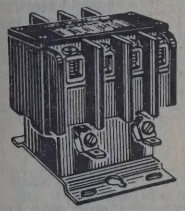
P25/P30/P40 Definite Purpose Contactors

P25 Definite purpose contactor is designed to switch three phase motor loads of up to 25 amps at 600V AC, resistive loads of up to 30 amps at 600V AC. The ruggedly constructed P25 is UL Recognized, and has field replaceable, silver-cadmium oxide contacts in a 3PST-NO-DM arrangement. Expected contact life exceeds 500,000 operations at rated load. Main contact terminals, #8-32 screws, are conveniently arranged for straight-through wiring. Other style terminals are available (below), but must be ordered separately. Coil terminals are combination #8-32 screw terminals and .250" quick connects. P25C models have a SPDT auxiliary snap switch with silver contacts rated 10 amps at 125-250V AC. The auxiliary switch has .250" quick connect terminals. P25P models have no auxiliary switch. Models with a "1" as the eighth character in the part number mount using two #10 screws on 2.125" centers. Models with a "2" as the eighth character in the part number are supplied with a universal mounting plate attached to the base of the contactor.



P30 and P40 series definite purpose contactors are physically identical except for their contact assemblies. P30 contactors switch motor loads up to 30 amps @ 600V AC, and resistive loads up to 40 amps @ 600V AC. P40 contactors switch motor loads up to 40 amps @ 600V AC, and resistive loads up to 50 amps @ 600V AC. Both the P30 and the P40 have field replaceable, silver-cadmium oxide contacts available in either 3PST-NO-DM or 4 PST-NO-DM arrangements. Expected contact life exceeds 200,000 operations at rated load for all models.

The main contact terminals, binder screws, are conveniently arranged for straight-through wiring. Other types of contact terminals are available. Coil terminals are combination #8-32 screws and .250" quick connects. Contactors have a "universal" mounting plate.

Models with a "C" following the series designator (P30 or P40) have a SPDT auxiliary snap action switch with silver contacts rated 10 amps @ 120-250V AC. The auxiliary switch has .250" quick connect terminals. Models with a "P" following the series designator have no auxiliary switch.

Contact Replacement Kit

Kit includes contact pressure springs, movable contact assemblies, stationary contact assemblies and complete replacement instructions.

EBT SERIES REED/TRIAC

Switches 7 amps, 60 Hz @ 25°C ambient with nominal load voltage of 120 VAC. Rated 5 amps rms 60 Hz @ 55°C ambient. Minimum operating current: 200 mA, 60 Hz. Expected life greater than 10 million operations. Bounce free. Operate time: 2 msec. maximum. Release time: 10 msec. maximum. Typical "Closed contact" voltage drop is 1.1 V. UL File E22575 Octal terminals fit standard 8 pin socket. Wt. approx 5.5 oz.

KUR DIRECT-ACTION DPDT IMPULSE RELAY

Designed for applications requiring on-off operation or alternate energizing of two loads. Operation is based on permanent memory function of electromagnetic latching relay. Remains latched during complete loss of power: 5A at 28 volts DC, resistive, or 120 volts AC, 80% P.F. Weight: 3½ oz.

Stk. No.	Type	Coil V	1-9	10-24	25-49	50-Up

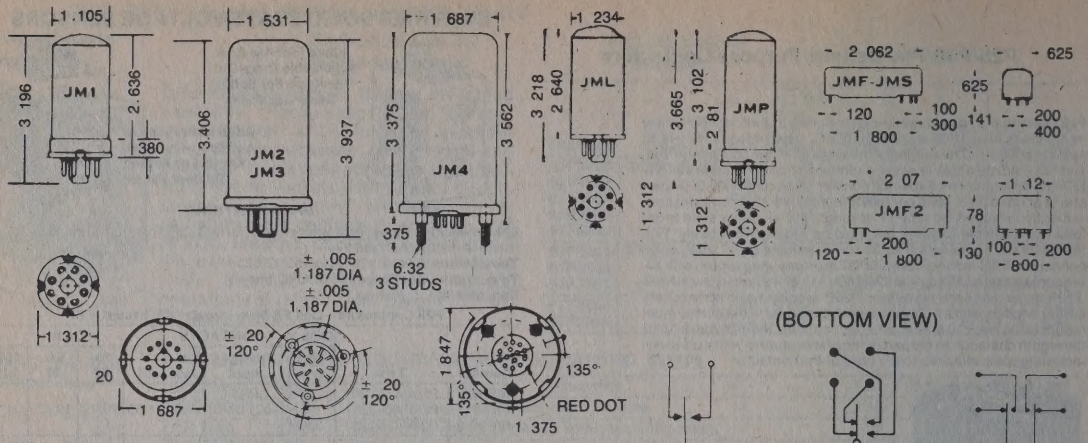

FIG. 61 JMF

FIG. 63

FIG. 71 JMF2

JM MERCURY-WETTED CONTACT RELAYS

Rare long life, high speed and unvarying dependability are the results of this hermetically sealed glass capsule, which contains a small reservoir of mercury sealed in a high pressure hydrogen atmosphere. Will handle contact loads up to 5 Amps @ 500V with operating time as short as 3ms. Contacts utilize the standard bridging Form D make-before-break arrangement, allowing single capsule SPDT, 2 capsule DPDT, 3 capsule 3PDT and 4-capsule 4PDT construction. Mounting position: Upright mtg. req'd, but deviation from upright to 30° causes only minor deviation in operating characteristics.

JML NON-BRIDGING MERCURY-WETTED CONTACT RELAYS

Employs a Form C non-bridging contact arrangement. They provide greater sensitivity, faster operation than JMP relays. Speeds from 3ms to 1.1ms are possible, depending upon coil power. Contacts are rated 2 amps max., 500V max. with contact protection. All JML relays mount in Amphenol 77-MIP-8 sockets. Weight: 4-oz.

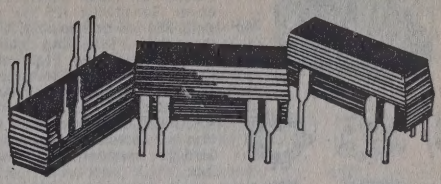
JWD SERIES

DUAL IN—LINE PACKAGE DRY REED RELAY



The JWD series relay features the versatile dual in-line package (DIP) terminal configuration. This relay offers low cost, dry reed reliabilty and allows high density packaging for low profile printed circuit board applications. The JWD is available in 1 Form A, 1 Form B, 1 Form C, and 2 Form A contact arrangements with terminals on 0.100" centers. Mounted height is only 0.275" which makes PC board spacing on 0.500" centers possible.

GENERAL

Insulation Resistance: 10^{10} ohms minimum at 100 VDC between open contacts and coil to contact leads.
Ambient Temperature: —55° C to +85° C.
Shock: 100g max. in three planes for an 8 millisecond ½ wave pulse.
Vibration: 20g max. between 10 and 5,000 Hz.

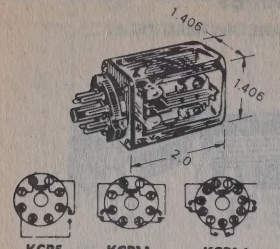
Will pick up at 75% or less of rated coil voltage. Operate time, including bounce, is 1.0 msec. Each reed contact will switch a load of 10 watts, 200VDC or 10VA, 140VAC. Maximum contact rating is 500mA DC and 350mA AC. Mounted height is .360" with PC board spacing on .6" centers. Terminals are spaced on a 1.0" x 0.1" grid. All package lengths are: .950", package widths are: 1DA1-.310", 7DB1-.400", 2DB1-.400", 50DC1-.550". JRE1DA1 and JRE2DB1 each require 25mA and will accept direct drive from TTL @ 25°C.

Potter & Brumfield Time Delay, Sensitive Relays

KCP SERIES—SENSITIVE ENCLOSED RELAYS



Low cost DC sensitive relay enclosed in clear polycarbonate cover. Sensitivity: 125 mw single pole; 250 mw double pole; 375 mw three pole. Mounting: standard octal plug-in type. Eight pin for KCP5 and KCP11. Eleven pin for KCP14. Contacts: Silver, 2 Amp @ 30 VDC or 120 VAC resistive. Use KRP hold down spring when vibration is a factor or when using inverted or horizontal mounting. Wt. 3 oz.

PW SERIES SENSITIVE HERMETICALLY SEALED

A miniature tube sensitive relay available in voltage or current actuated models. Sensitivity: Voltage: 180 mw; current; 40 mw. Precision, light weight hermetically sealed relay with 10g vibration to 500 Hz. Silver SPDT contacts rated at 1 amp @ 28 VDC, 1 amp @ 120 VAC resistive. Mounting Standard 7-pin miniature tube base. Weight: 1 oz. Size: 1 11/16" high above socket, .765" dia.

CW SERIES TIME DELAY RELAY

The CW time delay relay features a CMOS integrated circuit containing all timing circuitry and control logic for delay on operate, delay on release and interval on timing functions. Both timing function and delay time are easily programmed by means of four toggle switches and an adjustment knob on top of the unit's case.

One switch selects timing function, one selects seconds or minutes timing mode and the other two select timing range. The knob is used to adjust the timer to the actual time delay within the 0.5-5, 1-10, 5-50 and 10-100 timing ranges.

Load switching is accomplished by an internal relay with DPDT contacts rated 10 amps.

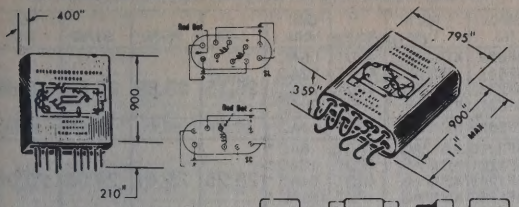
SC AND SL SERIES MAGNETIC LATCHING RELAYS



- **For high shock and high vibration applications**
- **Temp. Range: −65° to +125C.**

SC SERIES. Miniature permanent magnet relay. 200g shock, 30g vibration to 2000 Hz with no contact opening. Pickup: Approximately 260 mW @ 25° C. Operate time: 3 ms. max; @ nominal voltage @ +25° C. Drop out: 2.5 ms. max. @ nominal voltage @ +25° C. Terminals: Hook end solder or plug-in pins. Contacts: DPDT triclad plated. Rated load: 2 amps. @ 30 VDC; 1 amp. @ 120 VAC 60 Hz resistive, 100,000 operations minimum. SCG11D rectangular header with terminals on 0.2" grid. All DPDT. Wt. ¾ oz.

SL Series. Dual coil miniature magnetic latching relay with same specs and mountings as SC Series above except coils may be connected in series for polar operation. Wt. ¾ oz.

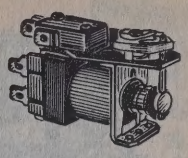
SERIES S89R LOW COST LATCHING RELAY



Bistable impulse relay that effects savings of power in applications where load is on long periods of time. To set relay, a 75 ms (min.) pulse is required. To release requires a second pulse. Time between pulses should be no less than 150ms. Contact rating, 15 amps, ½HP, 125/250V AC; 5 amps, 125V AC tungsten filament lamp load; ½ amp, 125V DC ¼ Amp, 250VDC. Life expectancy at full load, 50,000 operations min. 250,000 mechanical. Oper. temp. Range: -40to +60°C. Mounting is by two #8-32 tapped holes on 1.844" centers. Termination is .250" quick connect.

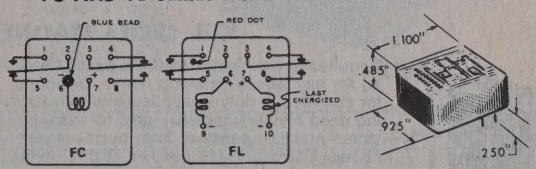
FC AND FL SERIES MINIATURE LATCHING RELAYS



FC Series withstands 150g shock, 400g linear acceleration, 30g vibration to 2000 Hz. Range: —65°C to +125°C. Bifurcated contacts rated 3 amps @ 28 VDC resistive. Plugs in on 0.2" grid. Meets applicable specs of MIL-R-5757 and MSFC-SPEC-339. Wt. 0.75 oz. **FL Series** Dual coil. Same specs as FC except operates by pulsing each coil alternately or connecting coils in series from a reversing (polarized) source.

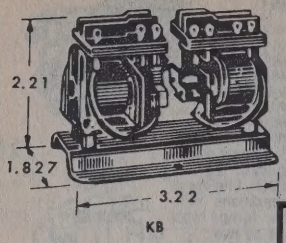
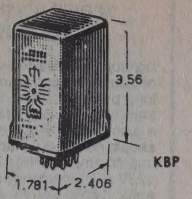
HC Series miniature, non-polarized, non-latching. High torque motor. Bifurcated gold plated silver DPDT contacts rated 2 A @ 28 VDC resistive. Temp. range: —65°C to +125°C. Hermetically welded. Meets or exceeds all applicable sections of MIL-R-5757, complies w/MSFC-SPEC-339. **HC11D** has plug-in plain case. **HC11DA** has hook-end solder terminals and shoulder brackets. **HC11DB** has hook-end solder terminals and flat mtg. plate with 2 holes. Size plain case: 0.8 x 0.4 x 0.4" Wt. 0.25 oz. **HCM Series** - Mil. version of HC. Meets or exceeds appropriate sections of MIL-R-5757.

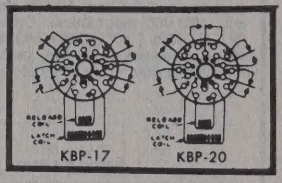
Potter & Brumfield Special Purpose Relays

KB and KBP SERIES DUAL COIL LATCHING RELAYS





- For Memory Work and Overload Applications
- Fast Acting
- Positive Latching



KB SERIES. Both release and trip coils must be for the same voltage. One coil operates relay to set latch and other releases it. Ideal for memory work and overload applications. Operates on momentary impulse to either coil. Mounting: two 0.156" dia. holes on 1.375" centers. Contacts: Silver, rated 5 amps. 120VAC 80% PF. *G Suffix indicates silver cadmium oxide contacts rated 10 amps. 120VAC 80% PF AC relays with 5 amp contacts are recognized under component program of UL (File 29244) and are CSA listed. AC coil for intermittent duty only. Wt. 6 oz.

KBP SERIES. Similar to KB Series except enclosed in translucent polypropylene dust cover and furnished with 20 pin octal type plugs for socket mounting. UL component recognition does not apply. Wt. 8 oz.

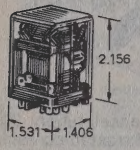
KUL SERIES MAGNETIC LATCHING RELAY



Requires approximately half the space needed for mechanical latching relays. Designed for continuous duty in applications demanding good memory stability. Ideal for machine tools, process controls and business machines. UL recognized File No. E22575 under component program and CSA listed. Silver-cadmium oxide contacts rated 10 amps @ 28 VDC, resistive or 120 VAC, 80% pF. All AC DPDT relays include diodes inside clear polycarbonate dust cover. Wt. 3.4 oz.

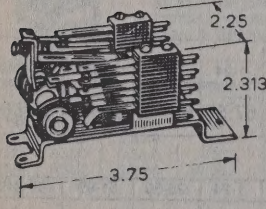
AP SERIES RATCHET IMPULSE RELAYS



- Intermittent Operation
- Reliable and Compact
- Operates on Impulses as Short as 60 ms.

Reliable compact unit for applications requiring on-off or reversing action on alternate operations. Positive ratchet operation at all speeds on impulses as short as 60 ms. Intermittent coil operation only. Mounting: Three 0.156" dia. holes on 3.375" x 0.875" triangular centers. Contacts: Silver. 5 amps @ 120VAC, resistive. Wt. 7 oz.

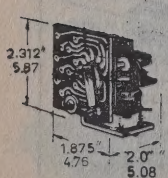
GM SERIES IMPULSE SEQUENCE RELAYS



GMIN

GM Versatile switching makes this relay especially suitable for single coil latching. Adaptable to automatic vending equipment, coin counting devices, remote television set controls, self-interrupting and homing circuits and many other applications. 2 Form C contact arrangement is switched alternately by cam action during drop-out of armature. AC version operates on 50% coil duty cycle (5 min. max.) Mountings: 8-32 tapped core with location boss. Suffix L (*) indicates an additional 2 Form C auxiliary contact and weighs 4¾ oz, Wt, w/0 aux,contacts 4 oz,

GMIN Uses basic GM structure with uni-directional PC boards. Board is attached to an extension of ratchet shaft. Movable contact arm advances one position each time armature drops out.

General Purpose Solenoids Potter & Brumfield

For use in such applications as vending machines, machine-tool equipment, and photocopy machines. Standard pull-on-operate models are available for either intermittent or continuous duty. Insulation is Class A (105°C). Termination: .187 x .020 quick connect lugs. All materials UL Recog.

EPOXY MOLDED REED RELAYS

Reed relays satisfy many applications because contacts are hermetically sealed in glass envelope to protect against pollution from dust and atmospheric gases. Because of simple structure within glass envelope, most reed switches have life in the order of 10^9 operations when used within their switching capacity and are just as reliable when called on to work after long periods of inactivity. Switching time is very short—typically .5 to 3 milli-seconds, excluding any time lag due to the coil and supply circuits. Most commonly used contact materials for dry reed switches are rhodium over gold, tungsten and other special alloys. Immersion resistant: Epoxy molded modular construction, completely resistant to standard printed circuit board cleaning processes. Insulation resistance across open contacts is 10^{10} Ohms or greater.

Specifications

Type	101	104
Contact Rating Max. (resistive load)	10VA	8VA
Switching Volts Max.	200VDC	100VDC
Switching Current Max.	.5Amp	.25Amp
Dielectric Standoff:		
—Min. across open contacts	300VDC	200VDC
—Min. between mutually insulated points	1000VDC	1000VDC
Life at rated load with appropriate contact res.	25 x 10^6	10 x 10^6

MERCURY MIP RELAYS

Available in Mercury wetted and position free Mercury MIP's. Compact printed circuit mounting on either 1" x .150 or 1" x .100 pin spacing. Epoxy molded modular construction, completely resistant to standard PC board cleaning processes. Dielectric standoff minimum between mutually insulated points is 1000VDC.

Magnecraft® reed relays

CLASS 101M AXIAL LEAD 1 FORM A

Low cost reed relays give optimum reliability and fast operation. Specifications: Miniature: SPST-NO (1 Form A) contacts rated 10 VAC max. at 0.5 A max. or 200 VDC max. resistive. Coil 600 mW nominal. Cap. 0.5pF avg. between contacts. Life: 5 million operations typical. Size 2¼" lg. x ½" w. x 7/16" h. including leads. *IC Compatible.

POWER & MIN. P.C. RELAYS

Magnecraft

Class 389 relays are high quality inexpensive general purpose relays, designed to switch larger contact loads without increasing overall size. They are fashioned after the popular and proven design of the Magnecraft Class 388 relays. Single make contact types are available with one, two or three poles. Double make and double break types are available only with one, two or three poles. Double make and double break types are available only with one pole but are capable of switching still larger loads and are especially suited for switching motor loads. Few relays are available in this size for the 15 to 30 amp range. The Class 389 is intended to fill this gap in availability for the design engineer. Open and enclosed flange styles. Comes in SPDT-DPDT-3PDT action. With a contact rating of 20 amps. 3/4 HP at 120 VAC. 1 HP at 240 VAC (1 & 2 Pole). 1/4" quick-connect terminals suitable for soldering.

* Resistance values ±10% measured at 25° C.
† Voltage specified relays pull in at 80% of nominal or less for DC relays and 85% of nominal or less for AC relays, at 25° C.
Note: 3PDT uses 15 Amps at 250 volts.

CLASS 76

6 and 10 amp, general purpose, high current, printed circuit relays. They are versatile, provide long life and reliable performance.

Features:
- Designed for continuous duty operation
- Dust proof cover
- Single and double pole versions
- Very little P.C. Board Area
- UL Recognized/CSA Certified
- 76UR Single Pole is TV3 Rated Per UL
- DC operation only

CLASS 67 ENCLOSED PLUG-IN OR PANEL MOUNT RELAYS 3 OR 5 AMP 2 TO 8 FORM C REGULAR OR BIFURCATED CONTACTS

The Class 67 miniature industrial relays are designed for applications requiring 2 to 8 Form C contacts where space, weight and low cost are of prime importance. Single and bifurcated crossbar contacts of silver alloy rated 3 to 5 amps at 32VDC or 120VAC resistive load. All relays feature plastic dust covers and combination solder plug-in terminals with 3-48 NC stud. Voltage specified relays pull-in at 80% of nominal or less for DC relays and 85% of nominal or less for AC relays at 25°C. Resistance values + 10% measured at 25°C. Size: 2 Form C, 0.734" x 0.938" x 1.188"; 4 Form C, 0.734" x 1.156" x 1.188"; 6 Form C, 0.734" x 1.375" x 1.188"; 8 Form C, 0.734" x 1.592" x 1.188". UL File No. E52197. CSA File No. LR41729.

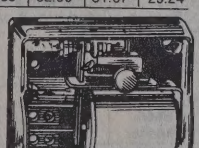
SPECIAL PURPOSE RELAYS

CLASS 120 MINIATURE COAXIAL RELAYS

The Class 120 is ideally suited for applications where space and weight must be kept to a minimum. SPDT contacts for switching RF circuits are silver alloy, gold flashed, conservatively rated 100 watts of RF power; impedance matched to 50 ohm cable. VSWR 1.25: 1 maximum from 0 to 470 megacycles. Size: $1\text{-}\frac{47}{64}$" x $\frac{43}{64}$" d x $1\frac{11}{16}$" h. Cables are RG58C/U 12" long, unterminated.

Stock Number	Type Number	Contacts	Coil Volts	Coil Ohms	Prices 1-9	Prices 10-24	Prices 25-49	Prices 50-99
57F1279	W120X-14	SPDT	12 VDC	100	36.55	32.90	31.07	29.24

CLASS 62, 5mW



The Class 62 is an ultra-sensitive, durable, dustite relay incomparable for use in any DC circuit restricted to a few thousandths of a watt power consumption. Mounting Data: 2 holes $\frac{9}{64}$" dia. Contacts. 1 amp resistive at 115 VAC or 28VDC. Size: $2\frac{1}{16}$" x $1\frac{9}{16}$" x $2\frac{5}{8}$".

CLASS W199 SERIES

Dimensionally interchangeable with relays made by others and with Class 99. Superior quality hinge-pin design, molded nylon bobbin and adjustment stability features give it longer life. Standard dielectric strength: 1500 VAC, RMS. Screw type terminals and molded phenolic base. Contacts: Silver alloy, $\frac{5}{14}$" dia. gold flashed. Choice of SPDT, DPDT, DPST-NO, and SPST-NO-DM. Size: SPDT ($2\frac{7}{16}$"L. x $2\frac{1}{2}$"W. x $2\frac{3}{16}$"H.)-DPDT ($3\frac{1}{8}$"L. x $2\frac{1}{2}$"W. x $2\frac{5}{16}$"H.)—DPST-NO ($2\frac{7}{16}$"L. x $2\frac{1}{2}$"W. x $2\frac{1}{4}$"H.) SPST-NO-DM ($2\frac{7}{16}$"L. x $2\frac{1}{2}$"W. x $2\frac{3}{16}$"H.) UL Listed File No. 43641. CSA Certified File No. LR37547.

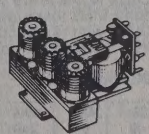
CLASS 128 COAXIAL RELAY



The coaxial contact structure is enclosed in a heavy duty precision machined aluminum cavity with removable plug for convenient inspection of contacts.

SPDT contacts for switching RF circuits are silver alloy, gold flashed, conservatively rated 500 watts of RF power; impedance matched to 50 ohm cable using standard type UHF connectors VSWR 1.25:1 max. from 0 to 1000 megacycles.

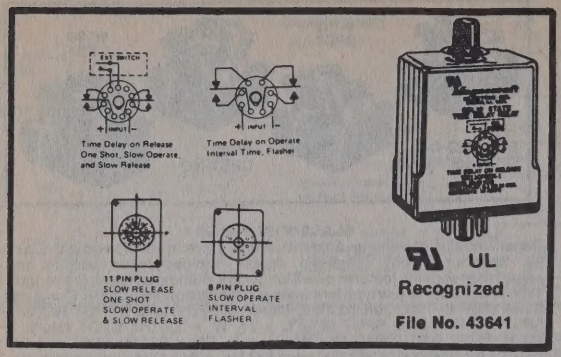
The Class 158 Relay was developed especially for making and breaking high voltage circuit. The silver alloy contacts will break up to 5000 volts VDC. at 200 milliamps current. Size: $1\frac{29}{32}$" x $3\frac{1}{16}$" x $2\frac{7}{32}$".

PRICES SUBJECT TO CHANGE.

Magnecraft Extended Time Delay Relays



Time Delay on Release One Shot, Slow Operate, and Slow Release
Time Delay on Operate Interval Time, Flasher
11 PIN PLUG SLOW RELEASE ONE SHOT SLOW OPERATE & SLOW RELEASE
8 PIN PLUG SLOW OPERATE INTERVAL FLASHER
UL Recognized
File No. 43641

FEATURES

1. Available in 9 different timing ranges
2. AC or DC operation
3. Functions of delay on operate, delay on release
4. Plug in mounting
5. Knob adjustable timing
6. Nylon dust cover
7. Reverse polarity protection (DC Models)

SPECIFICATIONS

Repeat Accuracy: ±.1% of setting at nominal voltage at 25° C
Contact Combination. DPDT Standard
Reset Time: 100ms max.
Temperature Range: Operate −10° C to +55° C, storage −55° C to +85° C.
Transient protection of 2000V for 8MS standard on all models.
The Class 211CP Time Delay Relay makes use of Hybrid Circuitry, combining Solid State Circuitry for timing function with an EMR for DPDT 10 Amperes output switching.

General Purpose Relays

CLASS 78 GENERAL PURPOSE INDUSTRIAL RELAY

FEATURES
- DPDT or 4PDT
- 3-10 Amp Contacts
- Plug-in, Q.C. or P.C. terminal
- Dust proof enclosure

CSA CERTIFIED LR40304

UL Recognized

Class 78 relays are most widely used of all general purpose industrial relays. Slightly larger than one cubic inch, these relays are interchangeable with all comparable types. 4PDT with 3 amp contacts or DPDT with 10 amp contacts. Plug-in, printed circuit, or quick connect terminal. Dimensions: 1.4" x 1.1" x .86". Dust proof enclosure. UL recognized.

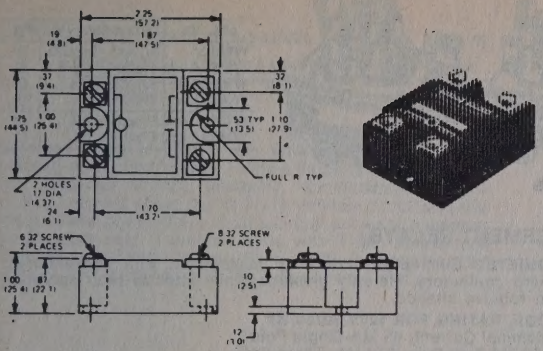
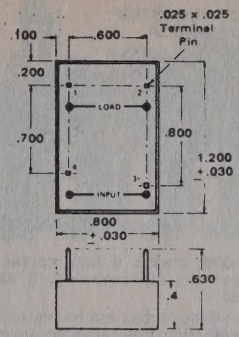
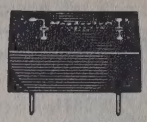
Solid State Relays

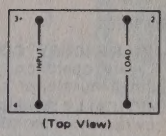
Magnecraft







W3PCX



All items are UL recognized (E50015)

CSA certified (LR32053)

Magnecraft's family of 24 solid state relays provide current ratings that range from 2.5 to 40 amps, with switching capacity up to 480 VAC. All models incorporate opto-isolation between input and output, and zero-voltage switching.

Screw type clamps are available.

Output switching reflects the latest state-of-the-art technology. Both high-reliability dual SCR and Triac approaches are available. All units have same dimensions or smaller . . . 1¾" wide x 2¼" long and 1" high.

High Transient Capability
High Dielectric Isolation Between Input & Output
Photo-Isolated, Zero Voltage Switching

MERCURY DISPLACEMENT RELAYS

FEATURES

LIQUID MERCURY CONTACTS means a new contact surface after every operation. Perpetually self-renewing, it cannot pit, weld, disintegrate, or oxidize.

HERMETICALLY SEALED Contactor tubes are hermetically sealed to provide maximum life, protection from adverse environments, and user protection from arcing and hazards of switching heavy loads.

QUIETER Eliminates "knocking" associated with conventional hard contactors. Mercury displacement contactor tube operates in relative silence.

CLASS 97 ENCLOSED 25 AMP RELAYS UL RECOGNIZED

The Class 97 is a low cost 25 amp relay for 1 and 2 pole, 120/240. It is available with socket for plug-in applications or for use with standard quick-connect terminals for simplicity and ease in wiring. The Class 97 relay offers high quality, dependable performance and long life. Size: 1 29/32" x 1 9/16"

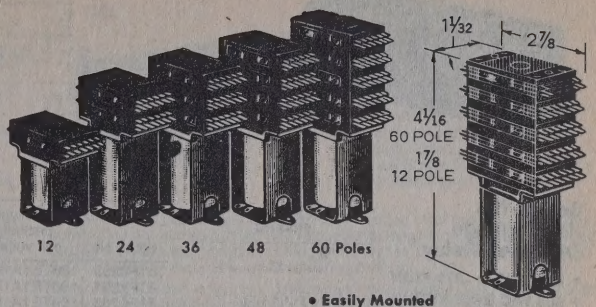
Multipole, Hi-Density Switching Relays

T-bar INCORPORATED
SWITCHING COMPONENTS DIV.

GENERAL PURPOSE LO-LEVEL LATCHING RELAYS

- **Stack-up Contact Wafers Switch From 12 to 60 Circuits**
- **Easily-Wired Snap-on Crimp Terminals Fit Into 6-pole Connectors**

Solenoid actuated relays with unique design employing stacked-up enclosed contact wafers for up to 60-pole switching. Ideal for aircraft, telemetry, communications, computers. Latching series has ability to maintain circuit stability. Ideal where power drain strains circuit power or generates undesirable heat. Terminals mate with T-Bar Connectors. Contact assemblies in dust-tight plastic enclosures 1 1/32" wide by 2 3/8" long; height is 1 3/32" per 12 pole wafer.



- **Easily Mounted Only 2 Screws**
- **Mount In Any Position**

Type	Application	No. of Poles	Contact Forms	Latching/Non-Latching	Coil Voltage
801	Gen. Purpose	4 to 48	"A" or "C"	Non-Latching	12, 24, 28
901	Low-Level	60 pole unit "A" form only			48, 110 VDC 115 VAC
907	Low-Level	36 to 48	"C"	Latching	24, 28 VDC

Series 800—30,000,000 mechanical (latching limited to 1,000,000) 20,000,000 @ 100 mw 100,000 @ 5 amps 28 VDC.

Series 900—30,000,000 mechanical 20,000,000 @ 100 mw 100,000 @ 1 amp at 28 VDC.

Contacts: Series 800—general purpose gold plated. Series 900—low-level bifurcated gold plated.

Contact Rating: Series 800—5 amps max. resistive to 150 watts. Series 900—1 amp max. resistive to 50 watts.

Contact Resistance: 20 milliohms typical
Ambient Temperatures: —55° to plus 85°C
Terminals: Mate with T-Bar Connectors
Dielectric Strength: 1000 VRMS @ 60 cycles/sec.
Insulation Resistance: 5000 megohms min.

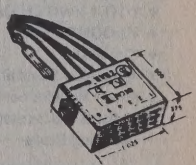
T-BAR CONNECTOR



Model 88601. T-Bar Connector. For connecting wires to T-Bar switches or terminals. Nylon terminal block pushes onto wafer terminals. Wires are first crimped to snap-in terminal using the crimping tool below. Accommodates #18 to 26 stranded wire with max. insulation diameter of .074". Each connector handles 6 poles, single or double throw (18 terminals) consists of 1 connector-block, 20 crimp contacts, 2 labels and 1 retaining clip. (see index).

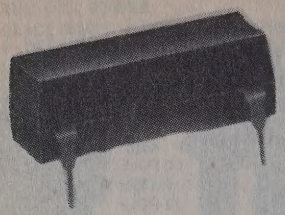
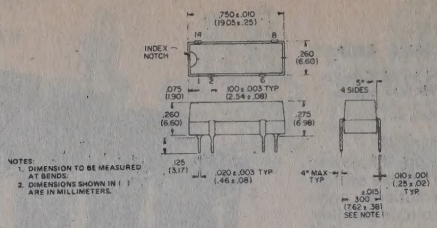
SIGMA Sigma High Voltage Reed Relays

DRY REED





The Series 186TE is a high voltage, dual in-line reed relay designed for applications needing high voltage, low current switching. These molded reed relays are designed for harsh environments and exposure to cleaning solvents, but are excellent for low level to 0.5 ampere switching. Specially constructed reed capsule and offset terminal placement provide isolation of 600 volts AC between contacts and 1000 volts AC between other mutually conductive parts.

The Series 186TE is particularly well-suited for applications requiring protection against high voltage line transients.

Series 186 High Voltage DIP Reed Relay

- SPST-NO • .275 HIGH
- 600 VAC BREAKDOWN
- Dual-in-line 4 terminals
- Low Level to .05 Amp
- Molded Construction

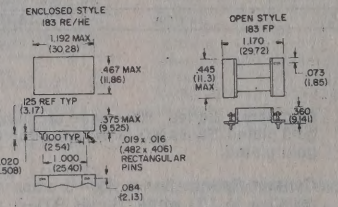
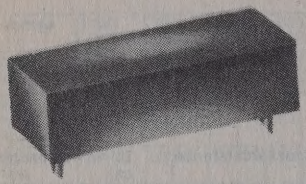
Mechanical Data





The Series 183 is a miniature size, printed circuit, high voltage reed relay capable of switching up to 500 volts and offering dielectric strength of 1200 VAC between all mutually conductive parts. Terminals are placed on popular 1" centers with grid spacing of .150". This rugged and reliable relay is available with a steel dust cover for added protection and magnetic shielding.

Series 183 Miniature High Voltage Reed Relay

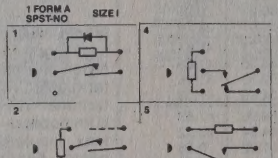
SERIES 198

- MOLDED CONSTRUCTION
- 1 TO 4 SWITCH CAPACITY
- 1C COMPATIBLE
- 1" x .100
- Immersion Resistant
- Power Requirements as low as 50 mw
- Optional Electrostatic Shielding and Clamping Diode



The Series 198TE reed relay features single-pole switching capability in the popular 1.0" x .100" pin spacing centers. Its compact molded construction provides immersion resistance to cleaning solvents with direct interchangeability to other open style reed relays. The Series 198TE may be ordered with an internal clamping diode for suppression of voltage transients or electrostatic shield. These relays establish new industry standards for economical, high reliability in dry reed switching. Contact rating Form A (OVA, Form C *VA Dielectric Strength 500 VAC between insulated parts).

MERCURY WETTED
REED RELAY
• SPST-NO • SPDT

- No Contact Bounce
- Position Sensitive
- Low Level to 2.0 Amp
- 1″ × .100
- Low Stable Contact Resistance

The Series 181 is a miniature, position sensitive, mercury-wetted reed relay designed for applications requiring long life, bounce-free contact operation. Terminals are placed on popular 1″ centers with grid spacing of .100″. This rugged and reliable relay is available in a low cost, open style, or with a steel dust cover for added protection and magnetic shielding.

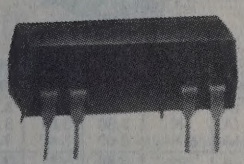
SIGMA MERCURY WETTED REED RELAYS NON-POSITION SENSITIVE



SERIES 185
MERCURY WETTED
DIP REED RELAY
•SPST-NO

- Non Position Sensitive
- No Contact Bounce
- Low Level to 0.1 Amp
- Dual-In-Line 8 Terminals
- Molded Construction

The Series 185TE is a non-position, sensitive dual-in-line mercury-wetted reed relay designed for applications needing no bounce contact characteristics plus the capability of being physically mounted in any plane.

Specially constructed single pole, single throw reed capsules provide reliable, long life switching up to 3VA at 0.1 ampere. These molded reed relays are designed for harsh environments and are capable of being immersed and cleaned with other electronic products during their automatic wave soldering process.

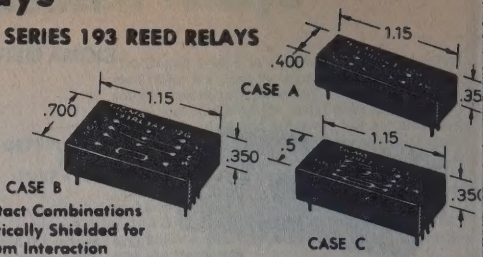
SERIES 193 REED RELAYS



- **26 Contact Combinations**
- **Magnetically Shielded for Minimum Interaction**

Enclosed reed relays. SPST thru 3PST, SPDT thru 3PDT. Form A capsules for single throw switching; Form C for double throw switching. Printed circuit type pin contacts are on 1.000" x 0.100" PC grid spacing. Magnetically shielded for minimum interaction and housed in a molded plastic case. All have standoffs. Contact Rating: 0.5 amp. 100V DC, max. 10W, max.

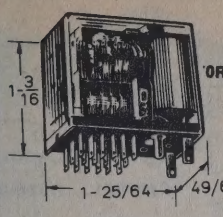
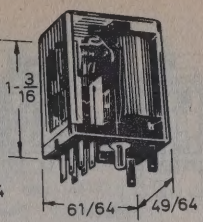
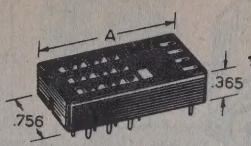
70R2



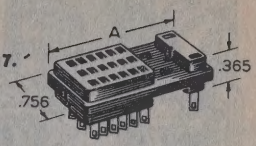
70RE42



70R6



AD120, 121, 122



AD117, 118, 119

Miniature industrial relay for low-level to 5 amp multiple-circuit switching. Choice of voltage adjusted (with either standard or bifurcated contacts) or current sensitive adjusted. Voltage adjusted types with bifurcated contacts rated at 50 million operations. Sensitive current adjusted types pick up from signals as low as 10 mW. Choice of solder or printed circuit terminal sockets, for fast, easy connection. Typical applications include use in communications and data processing equipment, measuring instruments, process controls, recording devices, and alarm systems. Temp.: −67°F to ±158°F.

Socket	Dim. A	Socket	Dim. A

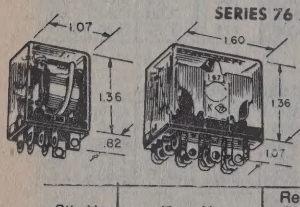
SERIES 76 AC/DC-DPDT, 4PDT



Compact relay for heavy duty industrial or consumer applications. Provides multipole switching of resistive loads up to 10 amps each pole at 120 VAC. Temperature range –40°F to +131°F. AC and +158°F. DC. UL/CSA approved 100K operates electric life.

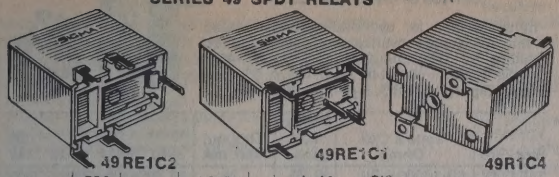
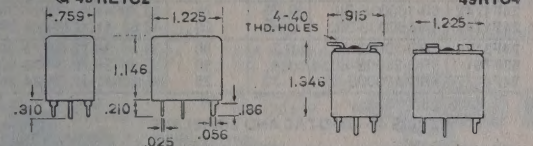
SIGMA

SERIES 49 SPDT RELAYS



49RE1C2 49RE1C1 49R1C4



The series 49 is a low cost printed circuit board relay capable of switching up to 10 amps in just over 1 cubic inch. Units have glass lined nylon dust covers and contact placement furthest away from the PC board. Terminals can be soldered directly to PC board or mounted for hand wiring. Overall case dimensions : .759 x 1.225 x 1.146. Temperature range: -55°C to +85°C. Weight: 1.5 oz. (42 g). SIL indicates contact material of fine silver, gold plated. SCO means silver cadmium oxide, gold plated. Terminal material: brass with fused tin plating. Initial dielectric strength (@ 25°C and 50% R.H.): between all insulated points is 1500 Vrms, across contacts is 500 Vrms. Initial insulation resistance: 1000 megohms, min. (measured at 500 VDC). Expected contact mechanical life: 50 million operations. Expected contact electrical life: 100,000 operations at rated load. Initial contact resistance (max.): 100 milliohms (@ 6V, 1A). Maximum dissipation at coil @ 25°C: 2.0 watts. Coil pick-up, max.: 75% of nominal coil voltage for VG adjustment, 80% of nominal coil voltage for VF adjustment. Not designed for submersible cleaning. UL Recognized—CSA certified.

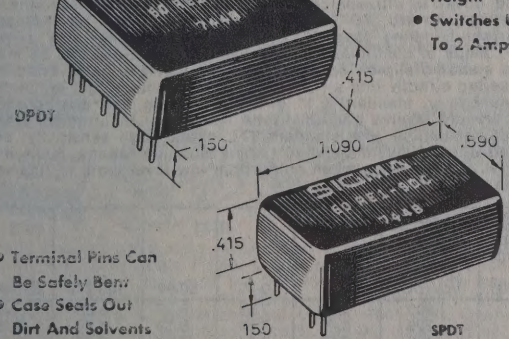
SERIES 60 LOW-PROFILE 2-AMP RELAY FOR PC BOARDS



- Low 0.415" Height
- Switches Up To 2 Amps
- Terminal Pins Can Be Safely Bent
- Case Seals Out Dirt And Solvents

Low-profile relay designed for high density PC board applications requiring a machine-solderable relay capable of switching higher currents than a reed relay. Can switch capacitive, lamp, and inductive loads that would weld the contacts of a reed relay, and can be operated from TTL-driver circuits. Available in both SPDT and DPDT models, with a choice of sensitive or standard coils. Uses standard 0.1" grid pin spacing. Ultrasonically welded polyester case protects the contacts against contaminants, and withstands normal vapors and sprays of most flux-cleaning solvents. Type No. Suffix represents Nominal coil VDC. UL/CSA approved.

SERIES 226 SOLID-STATE RELAYS

Handle loads from 50 mA to 7 A. Unit is encapsulated internally and cover is ultrasonically sealed. With integral heat sink for mating with std. TO-3 style transistor heat sinks for increased current handling capacity. By itself, integral heat sink permits 1½ amps of continuous load current. Connections can be made via standard slip-on connectors or the unit can be inverted and inserted directly into a PC board for wave soldering. Termination pins are on standard 0.1" grid pin spacing and are polarized to prevent reverse plug-in. 15 mA max. input requirement makes unit compatible with standard TTL gates. High sensitivity, coupled with 2,500V rms and 10^{12} ohms isolation ratings, make it an ideal output device when going from low level logic to line voltage loads.

Photo-Electric & Opto Isolator Components SIGMA

SERIES 8

Photocontrols operate on a light beam interruption. Available in models with an integral output relay in Receiver or with an amplifier and output relay remote from receiving head.

- **NEMA Type 1 housings.**
- **Plug-in and conduit mountings available.**
- **Easily replaceable lamps.**
- **Operating distances up to 25 feet.**

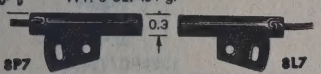
for model 8RCO1A only.

Plastic Shield for 8RC02A

8RC01A, 8RC02A
5 pin plug
WT: 3 oz. (64 g)

CSA certified
File LR20954

UL recognized
File E36169



8P7 #22 AWG leads. 12" long WT: 0.3 oz. (8.4 g)

8L7

Receivers and Amplifiers

- Expected electrical life (operations at rated load): 200,000 for 8P3 and 8P5; 1,000,000 for 8RC01A and 8RC02A.
- Temperature range: 8RC01A, 8RC02A; −40°C to +60°C. All others: 0°C to +50°C.

Specifications

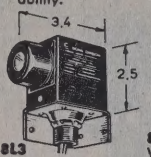
- Power consumption: 8P3, 8P5—2.5 VA; 8RC01A, 8RC02A—0.7 VA; 8A, 8A3 with 8L4—7.5 VA; 8A, 8A3 with 8L7—5.0 VA.
- Time Delay (Model 8A3 amplifier): 50 msecs to 20 seconds: ±10% repeatability.

Light Sources

- Lamp life 8L3—10,000 hours; 8L4—4,000 hours @ 5.5 V; 40,000 hours @ 4.5 V; 8L7—4,000 hours.
- Power consumption: 8L3—6VA; 8L4, 8L7—see 8A and 8A3.
- Temperature range: 0°C to +50°C.

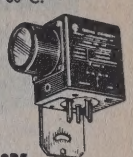
Mechanical Data

8L4 DEPTH: 1.6 (41.0) #18 AWG leads, 10" **8P4**



8L3 DATA SAME AS FOR 8P3 long WT: 2.8 oz. (78.4 g)

8P3 Width: 1.9 (48.0) ½" CONDUIT #18 AWG Leads. 19" long WT: 13 oz. (364 g)



8P5 DIMENSIONS SAME AS FOR 8P3 8-pin plug. WT: 9 oz. (252 g)

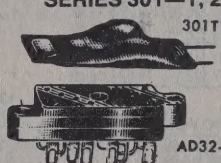
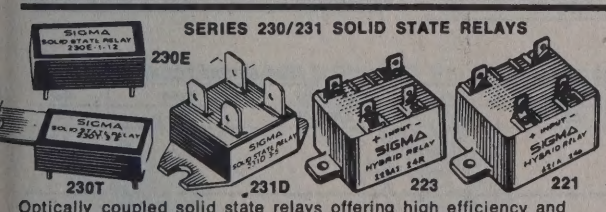
SERIES 301—1, 2 and 4 POLE



301R1, 2, 4

Opto-isolators feature solid state construction, 1000 Vrms min. isolation between output and input circuits. Signal applied to the input is coupled by means of light to one, two or four mutually isolated photoconductive cells. Suitable for AC/DC input/output. Cell has 300mW dissipation capability. Visual on/off state indication in plug-in models. High reliability switching functions include logic circuits, data sampling, audio switching and data processing. Other applications: noiseless audio level control, tremolo circuits, RC oscillator tuning. Temp.: −40°C to +50°C.

SERIES 230/231 SOLID STATE RELAYS



230E 230T 231D 223 221

Optically coupled solid state relays offering high efficiency and reliability with Zero Angle Firing. Unlike other ZAF types which have high leakage (1 to 5 mA), the 230/231 feature leakage less than 100 μA. Units handle 1 cycle surges of 50 amps and 2 minute overloads of 100%. Isolation Input/Output: 4000 VAC. Operating Temperature Range: 0°C to +115°C. UL and CSA pending.

SERIES 221 HYBRID RELAYS

For photocopy equipment, process controls, instrumentation. Uses reed relay to sense and provide gating to an AC semiconductor. Compatible with TTL logic; used to switch inductive, capacitive, tungsten or resistive loads. Operate time, 2 msec. max., 60 Hz. Release time, 9 msec. max. 60 Hz. Dielectric strength, between all insulated points, 1500 VAC rms. *Output, 120 VAC; †Output, 240, VAC.

SERIES 223 SOLID-STATE RELAYS

For use in vending machines, process controls, machine tools. Isolates power input from low level control circuits. Utilizes an optical coupler to control an AC semiconductor. Can be operated from either AC or DC sources. Operate time, 60 Hz, 50 milliseconds. Release time, 60 Hz, 50 milliseconds. Dielectric strength, between all insulated points, 1000 VAC rms. Output, 120 VAC.

ENCLOSED PLUG-IN 10 AMP RELAY

- **Transparent-Lightweight Case**
- **UL Listed**
- **Resistant to 200° F**

Enclosed in a transparent, lightweight Lexan case, resistant to temp. of 200° F. 8 pin octal plug for DPDT and 11 pin for 3PDT. Rated for 10 amps @ 60 Hz, 120 VAC, non-inductive load. U.L. Recognized. Size: 2 9/16" x 1 3/8" x 1 3/8".

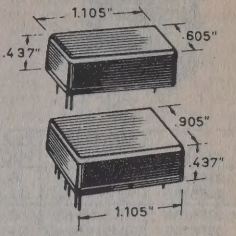
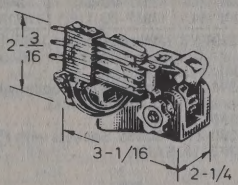
(AC loads are resistive.) Mechanical life in excess of 10^7 operations. Wt. 10 grams SPDT; 14 grams DPDT.

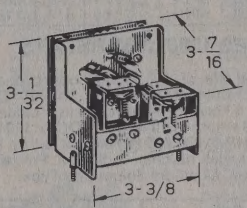


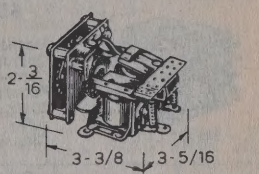
SEQUENCE RELAY

For on/off control of lighting, motors, appliances and speaker applications, among others. Each impulse (up to 10 steps per second) reverses contacts. Contacts rated 12½ amps. 120V, 60 Hz. Size: $3\frac{1}{16}$x$2\frac{1}{4}$x$2\frac{3}{16}$. Shpg. wt., 7.5 oz.



ELECTRICAL RESET STEP RELAY





TYPE PER. Resets when coil is energized. Coil, 120 VAC; 35W (step.) 7 W (reset). 40 points. 36 contacts. Sz. 3x$3\frac{3}{8}$x$3\frac{9}{16}$. **TYPE MER.** Positive acting interlock, actuated by magnet. Coil, 120 VAC. 20W step, 7W reset. 24 pts. 22 conts. Wt. 11.5 oz.

SERIES 840LS (AC) & 845LS (DC) ON/OFF RELAY STEPPERS

Single Coil Impulse Operated Mechanical Latching Relay Stepper

SPDT, DPDT or 4DPT contact combinations. Impulse as short as 20 ms energizes the coil to reverse position of switches. Contacts: 10 amp, at 120VAC, 60 Hz non-inductive. Power requirement: 8.2 voltamps. Shipping wt.: 5.2 oz.

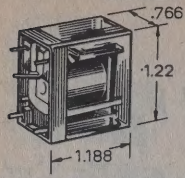
Mechanical and Time Delay Relays

SERIES 1345, 10 AMP RELAY



Occupies just over one cubic inch. Is designed for long life at a low price. Contact rating: 10A resistive at 12 VDC, 7A res.—6A inductive at 30 VDC, 3.5A res.—2.5A ind. at 120 VAC. SPST in your choice of NO or NC contacts, or SPDT. Heat resistant nylon cover. UL recognized under Component Program.

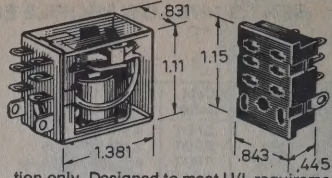
SERIES 1390-1395, DPDT, 13 AMP RELAY



Rated for mechanical life of 100 million operations, and 100,000 operations minimum at rated loads. Occupies approximately 1.25 cubic inches. Contacts rated at 13 A at 28VDC or 130VAC resistive; 7.5 A at 120VAC inductive: ⅛ hp at 120VAC. Heat resistant lexan cover. DPDT configuration only. Designed to meet U/L requirements. Weight: 1.25 oz. P suffix to serial number indicates Printed Circuit Type. All others Solder Lug Type.

SERIES 1390 sockets for 1390-1395 relays. Requires panel cutout 0.858" x 1.015" with .025" radi at all four corners. Chassis thickness of .031" to .062" recommended.

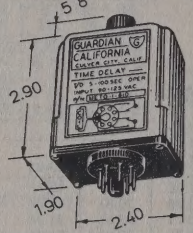
1390-1 ST Series relay socket with solder terminal lugs that accept AMP Series .187 quick connects.

23F5117. EACH ..... .85

1390-2 PC Series. Sockets with PC terminals.

23F5118. EACH ..... .85

MET SERIES—TIME DELAY ON OPERATE OR RELEASE



Provide a time delay range of .5 to 300 seconds. DPDT contacts rated at 10 A resistive load at 120 VAC, 50-60 Hz. Accuracy: ±10% of nominal setting over oper. and voltage range, with repeatability of 1%. Operating temperature range: 0 to 55°C. 0 in type number indicates delay on operate, R indicates delay on release.

Stk. No.	Type	Oper. Volts	Delay Range (Sec.)	1-9	10-24

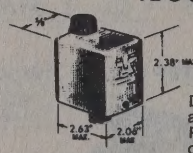
TDO SERIES TIME DELAY



- **Economical**
- **Versatile**
- **Repeatability within 5%**

DPDT contacts rated at 5A at 120VAC. Delay adjustment by ten-turn potentiometer. Repeatability is within 5% after a line interruption of 100 ms.

Stock No.	Type	Volts	Delay Range (Sec.)	1-24	25-49	50-99	100-249

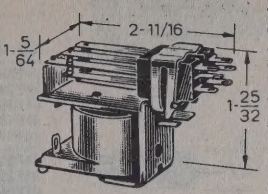
900-905/910-915 DPDT 10 AMP RELAYS



Number of parts and assembly time reduced by 50%. Eliminates cold flow while maintaining accurate adjustments. 1-piece switch mounting clip and return spring. Resistive load 120 VAC. Single screw mounting. Unitary field and core, no gap between core and field piece. Contacts: DPDT can control up to 10 amps. Mechanical life in excess of 1,000,000 operations. Size 2 1/16" x 1 23/32" x 1 5/64". Shipping Weight: 6 oz. U/L recognized, CSA approved.

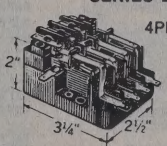
SERIES 2700/2705 25-AMP POWER RELAY



4PDT with 25A resistive cont. rtng. at 120VAC Input power is 10VA AC or 3WDC. Screw type or ¼" quick connect terminals. Load carrying members meet U/L requirements for up to 240VAC. Space for P.C. board. 2 slotted mntg. holes .290" x .177" on 2 1/32" centers, and two .177" dia. holes on 1 7/8" centers.

HGJM SERIES MERCURY—WETTED CONTACT RELAYS

Noise is only 15μV at 4 ms after coil energization with 10 kHz bandwidth; less than 5μV at 5 ms. Fast response time approaches 1 ms; ultra-stable to 250Hz. SPDT contacts rated 2 amps at 500 volts max.; 100 VA max. AC or DC.

HGSM SERIES PRINTED CIRCUIT MODULE RELAYS

Mercury-wetted relays for printed circuit board mounting. **HGSM-1000** series have SPDT make-before-break contacts: **HGSM-5000**, break-before-make. Contacts rated 2 amps, 500 volts. 100 VA max. at rated load. Max. dissipation, 2 watts continuous at 25° C. Temperature rise, 30° C per watt at 25° C ambient. Life expectancy, 22 x 10⁹. Single side stable, except as indicated. Size ⅝" x ⅝" x 2 1/16" max.

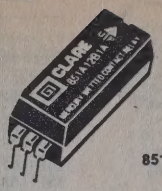
GENERAL INSTRUMENT

SERIES 851 AND HRB MERCURY-WETTED RELAYS

851 epoxy molded and HRB metal covered relays have reliable reed capsules with mercury wetted armatures. SPECIFICATIONS: Contact Rating (Resistive load with proper contact protection): Power—50VA max. Voltage—350Vdc or peak ac max. Current—1 ampere, max., switched. 3 amperes, max., carry only. Contact Resistance (ON impedance): 50 milliohms max., ±2 milliohms throughout life. Insulation Resistance (OFF impedance): 500 megohms over open contacts, 10,000 megohms between coil and contacts at 100Vdc, +25°C, 20-50% humidity. Drain Time: 30 seconds plus one no-load operation to clear the contacts. Operating Temperature: −38.8° to +65°C. Life Expectancy: 20 x 10^6 operations at max. contact rating.



851

SERIES HRM SUBMINIATURE RELAY

The HRM series mercury-wetted contact relay is a subminiature Form A module for printed circuit board mounting. Small size and attractive price are the major advantages to the relay.

PRMA SERIES PICOREED® DIP RELAYS

Signal level to 10 VA switching capability. Typical operating speeds for switching range from 200 µsec to 1.5 msec. 5V One Form A is compatible with standard TTL logic. Life expectancy of 100 × 10^6 operations at signal levels. 5 × 10^6 operations at full rated loads. 0.018" wide pins require 0.024" diameter holes for normal mounting. 0.040" diameters holes for reduced height mounting. Module Capacitance: Across open contacts −1.5 pF; Open contacts to coil −2.8 pF; Closed contacts to coil −4.2 pF. Pins are tintillate tinned.

600 ms typical response times, signal level to 10VA switching capabilities, total input/output isolation, IC compatible TO-116 DIP. Life expectancy of 100 × 10^6 operations at signal level or 5 × 10^6 at rated load. PCB mntg. on 0.30" × 0.100 grid patterns, or 14 pin DIP sockets. Ht.: 0.180".

SUBMINIATURE ELECTROMECHANICAL RELAYS LM SEALED FORM C DIP RELAYS

The Clare LM dual-in-line electromechanical relay provides reliable long life operation. The .133 cubic inch subminiature design meets today's standard PCB spacing and fits standard 16 pin DIP IC sockets. The relay is available in 1 and 2 pole versions with contact ratings of 3 and 2 amps respectively. To simplify soldering and cleaning operations, all LM relays are epoxy sealed. To insure long life operation, the relays have a vent that should be opened after cleaning. Coils are available in six standard voltages (3, 5, 6, 12, 24, and 48). Life Expectancy: Mechanical: 10 x 10^6 operations. Electrical: 5 x 10^5 operations at 1A, 30VDC, 2 x 10^5 operations at 1A, 60VAC.

LB MINIATURE TELEPHONE COVERED

6PDT contacts rated 2A at 28VDC resistive, with life of 100,000 operations at rated load, 100 million operations mechanical. Contact Resistance (ON impedance): 100 milliohms max. initial Contacts are palladium alloy with gold alloy overlay on bifurcated Make-and-Break springs. Operate Time: 10-25ms typical. Release Time: 5ms. Size: 1.24" x 1.00" x 1.22".

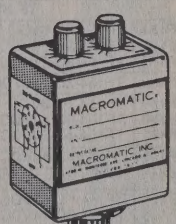
SS23



Type SS6 & SS8

Type SS6 is ON DELAY. Type SS8 is OFF DELAY. Both units feature: SPDT 3 amp output, 8 pin plug-In, Repeatable Accuracy ±5%, Ambient temp. range 0° to +130°F, Power consumption 2 Watts max. Recycle Time 100 ms. Timing adj. with screwdriver slot on top. Ideal for Burglar Alarms. Battery Charging controls, Photocopiers, Electric door control Size — Top: 1.35"x1.35", Bottom: 1.4"x 1.4", Side: 2.1"L.

GOULD Allied Control Cradle Series Relays

VOLTAGE ADJUSTED—AC-DC RELAYS

Industrial relays with versatile mounting means including solder, printed circuit board and socket options. Sensitivity selection to match applications ranging from 20 to 140 mW per pole. Contact selection to match load switching requirements. U/L Recognized File #E206041. Voltage relays adjusted for maximum pickup of 75% of nominal coil voltage. Wt. 1.0 to 6.0 ounces. Contacts are of the tape or ribbon type, with gold finished silver contacts to protect against corrosion and assure low contact resistance.

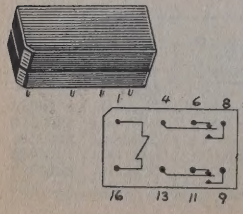
MAGNETIC LATCH RELAYS

Magnetic latch relays with single and dual coil construction. Versatile mounting means, including solder, printed circuit board and socket options. U.L. recognized File E-20604. Weight: 1.5 to 4.0 ounces.

Contact arrange. specified in Type No. Eg.: 2C indicates 2 Form C.



Fits 16 pin IC socket or PCB with .5" spacing. 4 ms operate time, 1 ms release time with 5 ms N.C. and 1 ms N.O. bounce time. Rated at 1 amp. at 28 VDC switching, 5 amps. carry. Max. pull-in sensitivity: 200 mW. Coil to contacts: 2.8 pf. between contacts: 1.5 pf. between circuits: 1.3 pf. Expected mechanical life: 10 x 10^6 operations. Operating temp.: –55°C to 70°C. Weight: 5 g. *±10%.

NEW LOW PROFILE S.I.P. RELAY

Low cost, low profile—¼ in² PCB space with .390" max. height. SP-NO or SP-NC contacts. Bifurcated contacts rated 2.0 amps at 28 VDC switching, 6.0 amps carry. 125 mw pull in sensitivity. Sealed construction withstands wave solder and inline cleaning. Operating temperature –55°C to +75°C. Operate time 3.0 ms. Release time 1.0 ms. Contact resistance 100 milliohm max. initially. Weight 4 grams, dimensions: L .900", W .290", H .390".

GORDOS IO MODULES & CONTROL SYSTEMS

MODULE BOARDS

- **Barrier strip with screw terminals for load connections**
- **LED Status Indicators**
- **Replaceable Fuses**
- **Color Coded Position Indicators**

Plug compatible logic contacts on 8, 16 and 24 position boards. Screw terminal logic connectors on 4 position boards. Circuitry for pull-up resistors. 5 amp. field replaceable fuses. LED status indicators.

INPUT/OUTPUT MODULES AND BOARDS

INPUT/OUTPUT MODULES

The Gordos I/O modules offer the high reliability and cost advantages of hybrid construction. Each module is functionally tuned and optimized during manufacture, providing module-to-module uniformity in the field. Thick film technology is used to provide superior thermal properties, noise immunity, and shock and vibration resistance for use in harsh environments.

SPECIFICATIONS

- 5, 15, or 24 volt logic compatible.
- Line voltages up to 280 VAC or 200 VDC.
- 600 V blocking and VDE specs available.
- 2500 VAC photo isolation.
- Zero voltage turn-on (AC output).
- Excellent surge protection.
- Component values laser trimmed to ±0.3%.
- Room temperature encapsulated.
- −30 to +80° C. temperature range for output modules.
- −30 to +60° C. temperature range for input modules.
- Single hold-down screw.
- Buffered I/O modules are also available.
- U.L. recognized.
- CSA certified.

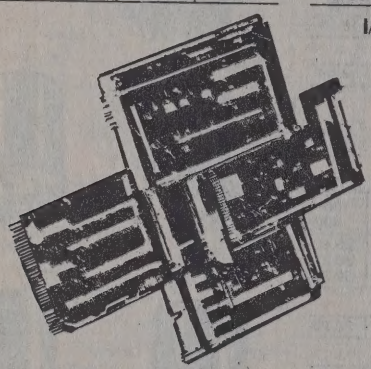
I/O Modules and Boards



SERIAL INTERFACE SYSTEM (RS-422 COMPATIBLE)

The Serial Interface System provides twisted-pair serial link between a host controller and other serial systems, plus a wide variety of parallel I/O peripherals including the STD bus. A converter is available to link these serial cards to the RS-232C based Systems. Contact Manufacturer for further information.

BUS COMPATIBLE INPUT/OUTPUT CONTROL SYSTEMS

The Bus Compatible Input/Output Control Systems make it easy to equip your RM-65™, Multibus™, EXORciser II®, or STD microcomputer bus for industrial control. Interface cards, cable, input/output modules, and module boards are available from a single source. Eurocards and VDE spec modules are also available.

PARALLEL INPUT/OUTPUT CARDS

GPBI/O CARD—Used with the RM-65 bus. Contains 16 buffered, bidirectional I/O lines for general TTL interface and I/O control. Eurocard versions are also available.

GPSI/O CARD—Used with the RM-65 bus. Contains 32 nonbuffered, bidirectional I/O lines for general MOS interface and I/O control with Gordos' buffered I/O modules. Eurocard versions are also available.

GS19I/O CARD—Used with the Multibus (IEEE-796). Contains 72 buffered, bidirectional, bit-programmable I/O lines for general TTL interface or I/O control. Permits any configuration of I/O modules. Interrupt Controller 8259 and Programmable Timer 8253 are also provided.

G680I/O CARD—Used with the EXORciser II bus. Contains 32 buffered, bidirectional I/O lines for general TTL interface or I/O control.

G7507I/O CARD—Used with the STD bus. Contains 24 buffered, bidirectional I/O lines for general TTL interface or I/O control.

DATA CONVERSION CARDS

DA-410 CARD—Supports the RM-65 bus with four 10-bit digital-to-analog converters.

AD-10 CARD—Provides 10-bit analog-to-digital conversion. 8 dual or 16 single-ended channels.

Mercury wetted relays have advantages of low stable contact resistance along with no contact bounce and an extremely long life. In order for mercury wetted relays to operate properly they must be mounted within 30° of vertical. Pin spacing of dual-in-line design conforms to standard DIP lead spacing and fits standard 14 pin receptacles and may be inserted automatically, 8 pin version of the DIP types are designed for direct printed circuit board mounting or TO116 sockets. Internal clamp diodes are available on some models which provide protection of drivers by suppressing back EMF. All ratings listed above are typical values at 25°C. Coil resistance is given ±10% at 25°C. All relays are molded epoxy for environmental immunity.

SERIES GA-AC GEN. PURPOSE RELAYS

The GA AC solid state relays have a control voltage input of 3 to 30 VDC and maximum line voltage of 140, 250 and 280 VAC. When ordering refer to the part number.

15000—MOLDED SOLID STATE RELAY

U.L. recognized, zero voltage turn-on, 3 to 32 VDC TTL compatible photo-isolated input with reverse polarity protection. SPST N.O. output, 10, 25 or 40 AMP, 24 to 280 VAC with internal RC network protection. Molded package with screw termination. 2500 VRMS isolation. Size: 2.250"L. x 1.75"W. x .875"H. with 1.875" mounting centers.

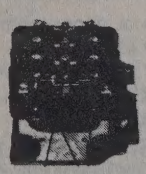
CONVERSION INSTRUCTIONS

All 10 and 15 ampere contact assemblies on standard type C contactors are normally open. To convert to normally closed, use screwdriver. No special parts needed.

1. Remove movable contact assembly and lock washer by backing off terminal nut "A".
2. Loosen screws "B" and remove stationary contact assemblies.
3. Invert movable contact assembly, and replace on contactor with flat "I" spring restiing on contact block. Contacts facing out.
4. Remove screws "B" from, and reinsert into opposite end of, stationary contact assembly. Re-install stationary contact assemblies, holding contacts in alignment with movable contacts while tightening screws.



Normally Open

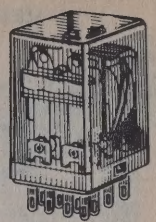
MINIATURE 10 AMP INDUSTRIAL CONTROL RELAY UL RECOGNIZED

TYPE 158



Silver cadmium oxide contacts rated at 10 amps, 28 VDC/120 VAC with a 80% pf. maximum contact resistance of .1 ohms. Coil voltage 6 to 240 VAC 50/60 Hz and 6 to 110 VDC. Coil has nominal power rating of 1.3 VA AC and .9 watts DC plus a maximum continuous rating of 2 VA AC and 2 watts DC. Rated at continuous duty operation. All ratings at 25 degrees C ambient. 1.28″L x .859″W x 1.109″H. Wt. 1.5 oz.

USES SAME SOCKET AS 156 RELAY

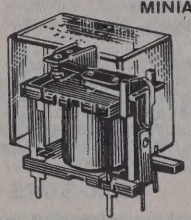
MINIATURE RELAY TYPE 310



Designed for PC board applications. SPDT contacts rated at 5 amps @ 28VDC or 120 VAC. Operate and release times are typically 4 ms. Occupies 0.666 sq. in. of board space with a total volume of .546 cu. in., yet it performs equally against devices many times its size and cost. Life expectancy: 100,000 operations (electrical); 10,000,000 operations (mechanical). Designed for recognition under UL 508, Industrial Control Equipment.

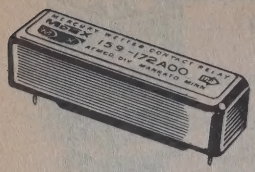
MERCURY WETTED RELAYS



Miniature mercury wetted contact relays feature long life, low power operation and no contact bounce. Life is rated in the billions of operations with fast operate time. Must be operated in the upright position but variations up to 30° will cause only slight changes in operation. Contact rating is 2 amps max, 500 volts max, 100 VA max for switching and 5 amps max for non-switching loads. Contact protection must be provided, circuit information provided with each unit.

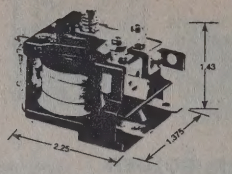
30 AMP, N/O Contacts



The Type 189 relay is an economy power switching relay capable of switching 30 amps through its single pole normally open double make contacts. Coil voltages are available in both DC and AC voltages. Contacts are available in silver and silver cadmium oxide. The Type 189 is available in open style construction with 6-32 stud mount and anti-rotational tab for mounting and .250" quick connect terminals. Options include location of coil terminals either on the header block or directly on the sides of the relay coil. Designed to meet U/L 508. Weight 2.3 oz.

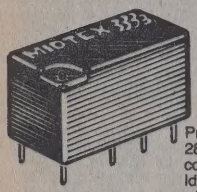
DUAL-IN-LINE POWER DPDT 2 AMPERE RELAY TYPE 190



- **Sealed For PCB Cleaning**
- **Gold Alloy Contacts**
- **Dip Socket Plug-in**

Provides full DPDT gold contact pair rated at 2 amps at 28VDC, or 120 VAC, resistive. Gold alloy and sealed construction provides low level switching performance. Ideal for semi-conductor or microprocessor systems where adequate isolation is required between the I/O circuit, can also be used for telecommunications. Operate and release times are 2-3 milli-seconds.

Suited for DIP socket plug-in, may be automatically soldered and immersion cleaned directly on a PCB, by virtue of a high density seal and inert gas treatment, which eliminates costly PCB masking and hand soldering. May be vented after insertion in a PC board by clipping the vent tab.

SOLID STATE TIME DELAY RELAYS

Time delay relays provide a wide selection of operational configurations, rapid reset times, and repeatability which is desirable when accurate recycling is required. Two types of timing circuits, depending on accuracy, repeatability, and environmental requirements, are employed: economy version, Type 613 series, Type 612, 614, and 615 series. Type 612, 613, 614 use same socket as Type 157 relay. Type 615 uses same socket as Type 158 octal relay. Delay on operate. When external power is applied and on completion of timing cycle, output relay transfers and holds. On removal of power output relay de-energizes.

Delay on release. External power is applied continuously when external switch is closed. The output relay transfers and holds. Time delay is initiated and output relay de-energized at end of timing cycle. Timing range. External resistor adjustments require approximately 20K ohms per sec. through 120 seconds. Variable delays achieved by integral potentiometer. Internally fixed Time Delay Relays available on special order. Note Type 613 will momentarily transfer on cycle interruption.

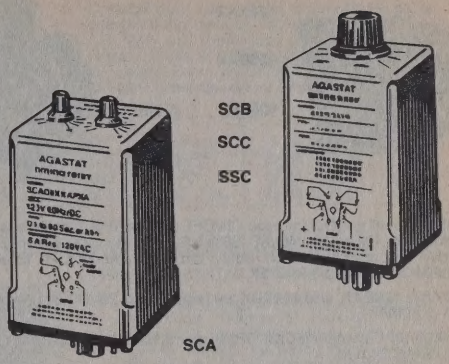
* Delay on Energization †Delay on deenergization # 8-Pin



Timing relays are stocked in 2 different operating modes. Type 1: Time delay occurs after input voltage is applied, thereby delaying output current for the duration of the time delay. Type 2: Output relay is energized whenever input voltage is applied, when input is removed output will remain on for the duration of the delay. **Type SCA:** Repeat accuracy: 0.5% +4 msec. Overall accuracy: ±5%. Reset time: 0.030 second min. between deenergization and reenergization. Time adj.: Dual internal pots with external knobs for "Fine" and "Coarse" adjustment. Operating temperature range: —20°C to 50°C. Current drain: During timing 5 ma, after timing 17 ma. Output: SPDT relay, 6 A resistive at 120VAC. Power: 120VAC 50/60 Hz or 120 VDC, +10% to —15%. **Type SCB & SCC.:** Repeat accuracy: 0.5% +4 msec. Overall accuracy. ± 2%. Reset time: 0.025 sec. minimum between deenergization and reenergization. Time adj.: Internal pot with external knob. Operating temp. range: —28.9° C to 49°C. Current drain: .015 A energized, .005 A deenergized. Output: DPDT relay;, ⅓ HP, 345VA @ 120/240VAC, 10 A @ 28 VDC/120VAC. Power: 120VAC, + 10% to —15%, 50/60 Hz. **Type SSC.:** Repeat accuracy: ±1%. Overall acuracy ± 5.25%. Time adjustment: Internal pot with external knob. Operating temp. range: —30°C to 65°C. Current drain: 25 ma. max. Output: DPDT relay, 10 A resistive rating. Power: 120 VAC: +10% to —15% voltage variation; 50/60 Hz.

Model 7012

Time delay on pull-in. Timing cycle begins when coil is energized. Coil kept energized throughout delay period preceding DPDT contacts transfer. Coil de-energized: contacts retransfer immediately (50 m-sec). Coil de-energized during time cycle, contacts transferred & timing mech. resets to start position for full time cycle on next energizaton of coil. UL listed.

Model 7022

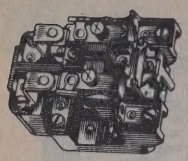
Time delay on drop-out. Coil energized: DPDT contacts transfer & stay in transfer position. Coil de-energized: Time delay begins. Timing cycle contacts stay transferred. End time delay setting: contacts transfer back to de-energized position. Coil re-energized during time cycle; contacts remain transferred, produce full time delay upon next de-energization if coil remains de-energized through time setting. UL listed.

Auxiliary Switch-Kits

SPDT contacts rated 10A/120, 250, 480 VAC. Type "T" provides immediate transfer of contacts for 7022 and two step timing to 100 sec. for both 7012 and 7022 models. Type "L" provides immediate transfer of contacts for 7012 models.

Struthers-Dunn Relays and Contactors

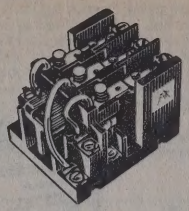
TYPE 425 30-AMP POWER RELAY



425XAX

425BXX

425XBX



425XCX

425CXX

Suitable for all general purpose ON/OFF applications. Continuous duty coils. Motor load 1 HP at 120-240VAC (80% P.F.) Base 2½ × 2½, except 2½ × 3½ for models with auxiliary switch. Screw terminals standard. UL listed. File No. E13224 CSA File No. LR40787.

425XAX, 425BXX, and 425XBX are rated 30A @ 28VDC or 120-240VAC and 10A @ 600VAC.

525XCX (3PDT) and **425CXX** (3PN0) are rated for loads up to 10A @ 600VAC and 25A @ 240VAC.

TYPE 275KXX COMPACT REVERSING CONTACTOR

Controls reversal of AC motors. For continuous heavy duty service. Two 3PDB contactors mounted on a single frame. Mechanically interlocked to prevent simultaneous closure. Rated at 120VAC 1, 2 or 3 phase for 1 HP (15 amps) or 480VAC 3 phase for 1 HP (5 amps). 0.250" tab terminals. 2 9/16 × 2 7/8 × 3 7/32. UL and CSA listed.

**Two DPDT Auxiliary Contacts for coil interlock or electrical lockup.*

TYPE 229 INTERFACE RELAY

Interfaces between DC control circuit and AC or DC loads up to 2 A. Mounts directly on printed circuit boards. Polycarbonate cover. Available with 2 A-gold-plated silver, or 5 A gold-plated scd, SPDT contacts.

Type 229XAXCY 2-Amp Interface Relay

TYPE 219 12-PIN GENERAL PURPOSE RELAY

Clear thermoplastic enclosure. Contacts, 10A, 120VAC res. Max. Amb. 53° C. Overload 100% nominal voltage. Must operate 85% AC, 80% DC volts. Base 1½ × 2⅛″, Ht. 2 19/32. Wt. 7 oz. Manual actuator available on all models. Neon lamp indicates coil energized. (Available with 120V AC only.) U.L. listed No. E31620 CSA listing (9494).

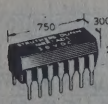
BASIC CHARACTERISTICS OF REED RELAYS

Contamination-proof, glass-sealed reed switches, non-critical mounting, and complete magnetic shielding for exceptionally fast low-level and light duty switching. Most are available with either miniature or standard size reed switches, in a wide selection of SPST-NO, SPST-NC, SPDT contact arrangements.



MRR-D REED RELAYS

Compatible with dual-in-line IC's including size and operating sensitivities that eliminate or minimize interface buffering. Pin spacing is industry standard. Contact rated at 10 VA max., .250 Amp max., 100 volt max. Wt. 1 oz.

TYPE 236 12-PIN DELAY-ON-OPERATE RELAY
TYPE 237 12-PIN DELAY-ON-RELEASE RELAY

Solid state timing network. 90:1 range. Contact rating 10-amps at 120VAC. Repeat accuracy ±5% at fixed voltage. Will operate at 95 to 125 VAC, but timing varies inversely with voltage. 20,000,000 mechanical operations. Type 236: Contacts transfer after preset delay when power is applied. Type 237: Contacts transfer after pre-set delay when control circuit is de-energized.

Struthers-Dunn Time Delay —G.P. and Sensitive Relays

TYPE A314 OPEN TYPE OR OCTAL BASE RELAY

Open types have solder lugs, and enclosed types plug into octal type base. General purpose relays rated at 10 amps. 120VAC. Available with neon indicating lamp and /or push-to-test manual actuator. Enclosed relay is 2¼" high × 1½" × 1½". Open type is 1⅞" high × 1⅜". U.L Recognized, File No. E13224.

AMPHENOL COAXIAL SWITCHES—MANUAL AND SOLENOID OPERATED

Popular selection of coaxial switches for a wide variety of commercial and industrial applications. Requires only 20 millisecond max. operate and release time. Mechanical life exceeds 1 million cycles. Silver plated for comp. shielding. Gold over silver plated contacts: 100 watt RF power rating. Vacuum impregnated coils withstand adverse environmental conditions including high humidity. Rating: −65°C to +85°C. Terminations are all shorting except those indicated (*). In Volts col. (**) denotes that the switches are either rotary manual (57F1108) or lever manual (57F1104 and 57F1106). Available in a wide range of function designs. All types have BNC plug.

24F2414. Type 26C5T. Normally closed. Delay 5 sec. 26 V. NET 9.84 8.48

Hermetically-sealed, heater-actuated relays for AC or DC operation. SPST—Normally open (NO); Normally closed (C). Draw 2 W. Contact rating—115v at 3A AC and 220v at 1A AC. Breakdown voltage: delays 2-5 sec. between contacts 250 V; heater to contacts 500 V. Compensated for 55°C to 70°C ambient. Diameter, 1¼". Height, less prongs, 2¾". Min. 9 pin. ¾x2½". U.L. approved through 115V. Shpg. wt. 4 oz.

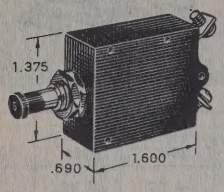
Potter & Brumfield Circuit Breakers

Thermal Circuit Breakers contain a trip-free mechanism which allows the contacts to open on overload even if the breaker is manually held in the reset (ON) position. Pushbutton reset models have a white band around the button which becomes visible on trip. Trip times shown for each model are 200% of rating. •Denotes UL/CSA. *Not UL/CSA in ratings of 30A and above @ 125VAC. All DC units UL/CSA except for 60A models.

BIMETALLIC & FAST TRIP—MODELS 109, 842



- **Pushbutton Reset**
- **Trip-free mechanism**
- **Fast Reaction**
- **Easily Mounted**

Model 109. Must trip between 101-135% of rating @ 25°C; will interrupt 2000A @ 250VAC (to 400 Hz), or 3500A @ 32VDC. **Model 842** has heater wire for fast trip; must trip between 101-135% of rating @ 25°C; will interrupt over 1000% of current rating. **Models 109** and **842** terminals are 90° to each other as shown. Mounting is ⅜-24 bushing nut.

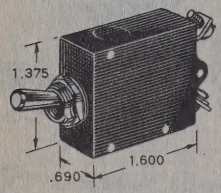
SWITCH/CIRCUIT BREAKER—MODELS 112, 548



- **Toggle switch action**
- **Flatted Bushing Mounting**
- **8-32 Screw Termination**
- **8-20 Sec. Trip Time**

Models 112 and **548** offer the combination of toggle switch/circuit breaker in a single package. Trips between 101-135% of rating @ 25°C. Both will interrupt 2000A @ 250VAC, 3500A @ 50VDC. 548 will interrupt 3000A @ 250VAC (to 400 Hz) pr 5000A @ 32VDC. Mounting: 15/32-32 flatted bushing. **Model 112** has steel toggle with rate marking on end. **Model 548** has silver toggle with no marking. *Not UL/CSA in ratings of 30 amps and above @ 125VAC.

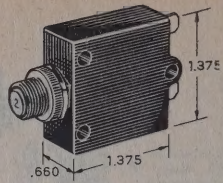
RECESSED BUTTON—MODEL W58



Series W58 breakers are UL Recognized as circuit protectors. File E69543 and CSA certified as appliance component protectors, File 30671. Red band on reset button becomes visible on trip. Must trip between 101% and 145% of rating @ 25°C. All models interrupt 1000 amps @ 250VAC, 2000 amps @ 50VDC. Termination: .250 × .032 Q.C.

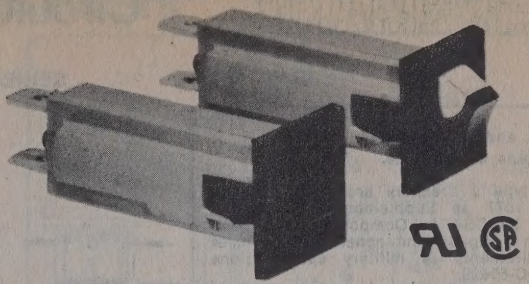
Circuit Breakers

Potter & Brumfield

Why hassle with replacing fuses when you can simply press a button to restore a circuit?

New P&B breaker fits the same cutout as ⅝" fuseholders.

- Snaps in from front
- Quick connect terminals
- Trip-free mechanism
- UL Recognized
- CSA Certified



W28 series circuit breakers from Potter & Brumfield represent convenient, inexpensive alternatives to twist-cap, panel- or chassis-mounted fuseholders and slowblow glass cartridge fuses. These single pole, thermal type breakers are ideal for a wide range of applications in equipment for industrial and consumer markets. Approximately the same size as many fuseholders, they securely snap into standard .625" round, single "D" or double "D" cutouts from the front of the panel. This allows W28 breakers to be prewired in front of the panel, then snapped into place. W28 breakers feature a reset button which cannot be manually pulled out to disconnect the circuit. When an overload occurs and the breaker opens, the reset button and a white indicator extend for visual trip indication. A trip-free feature allows the contacts to open even if the reset button is held in manually against an overload. All models will continuously carry 100% of rating. They may trip between 101% and 103% of rating, but must trip at 135% of rating within one hour at +25 C. Maximum operating voltages are 32V DC and 250V AC, 50/60 Hz. Models rated at 0.25 through 2 amps can be reset after overload currents six times their rating, while 3 through 15 amp models have resettable overload capacity of ten times their rated current. All have a short circuit interrupt capacity of 1000 amps at 250V AC, 50/60 Hz. or 32V DC.

Magnetic Hydraulic Circuit Breakers

Magnetic Hydraulic Standard and Mini-Mag models are U/L Recognized. All types contain a trip-free mechanism which allows the contacts to open on overload even if the handle is held in the reset (ON) position. Must trip value is 101%–125% of rating @ 25°C. Models are temperature stable from −40°C to +85°C. All models mount with 6-32 screws. Standard models terminate to 10-32 studs; Mini-mag models, to .032 × .250 quick-connect terminals. UL File E69543. CSA File 30671. *AC Models not UL-CSA.

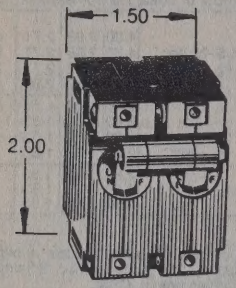
Circuit Breakers

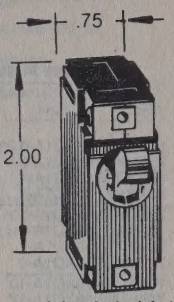
SERIES JA

- **UL and CSA listed**
- **Meets MIL-C-55629.**

All type J breakers are recognized by UL 1077 as Supplementary Protectors and by CSA as Components. All have been designed and constructed to meet requirements of military specifications MIL-C-55629.



Model JA2



Model JA1

SERIES JA. UL recognized under 1077. 2 inches (51mm) in height, requires a minimum behind-the-panel space. White toggle handle. Each pole measuring 0.75 inches (19mm) width. A sustained overcurrent or short circuit sensed by one pole triggers all other poles. In case of short circuits, tripping is instantaneous, bypassing the time delay characteristic provided to accommodate brief inrush currents which might otherwise cause nuisance tripping during motor starting or light source or power supply turn on. Quick on rear connectors make for fast and clean wiring. "B" type breakers are 65V max DC, all others 250V, 50/60 Hz.

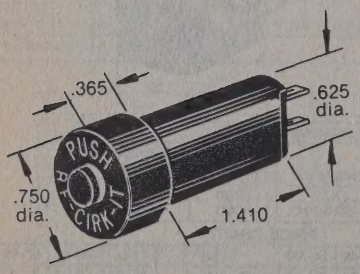
SERIES KD-1 "RE-CIRK-IT" PROTECTOR



Non-magnetic, UL/CSA recognized push to reset cylindrical overcurrent protector. Can replace traditional fuse and holder combination for sump pumps, industrial power supplies, medical equipment, copiers, camping vehicles, and vending machines. Fits standard ⅝" dia. panel cutout, clips on without screw mounting, has quick-on terminals. Current range 0.25 to 15 amps, ac or dc. Time delay prevents nuisance tripping by starting inrushes. 250V, 50/60 Hz, 32 Vdc.

- **UL-recognized Control Component**
- **Pushbutton reset**
- **Fits into "D" Panel cutout**

TX CIRCUIT PROTECTORS

Non-magnetic Series TX Circuit Protectors are available in one and two pole models. Attractive design compliments your product while adding overload and short circuit protection and doubling as an On/Off switch. Snap-in mounting and .250 quick-connect terminals allow front panel installation without the need of hardware or tools. Current ratings from 2 amp to 20 amp at 125 VAC, 50/60Hz or 32 VDC, also rated 250 VAC, 50/60Hz up to and including 10 amps.

The TX is CSA certified and UL recognized under Standard 1077. Unlighted versions meet the requirements of VDE 0730 and IEC 380. Standard colors are black body with white lens having On/Off legend. Other colors and legends are available as well as mixed ratings on two pole units.

LITTELFUSE

PICO II™ SUB-MINIATURE FUSES

255, 256 Series supercedes 275 and 276 Picofuses shown below. Ultra-small fuses for space-saving circuit protection. Totally encapsulated epoxy-coated body. Color-coding indicates current rating and time-current characteristics. For circuits of 125 volts or less where short circuit currents may be as high as 300 amperes. Blow Time: 4 hours, min. at 100%; 5 seconds max. at 200% (1/16-10 amperes); 10 seconds max. at 200% (12-15 amperes). Body is .280" x .095" dia.; Leads are 1½" long by .025" dia. (1/16-10 amps) or .032" dia. (12-15 amps) 255 series has axial leads; 256 series has radial leads. U.L. Recognized.

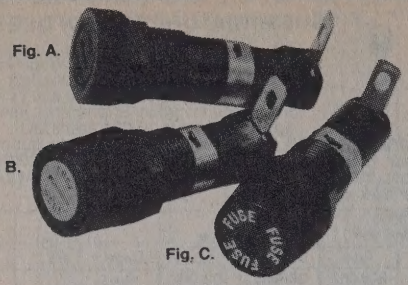
Fuseholders, Fuse Blocks, Fuse Clips



SHOCK-SAFE FUSEHOLDERS

U.L. Recognized
For ¼" x 1¼" or 5mm x 20mm fuses

Designed to meet International Electrotechnical Commission specifications 65 and 257. Eliminates any possibility of electric shock. Bodies accept ¼" x 1¼" fuses or 5mm x 20mm fuses for use in the U.S. or Europe. 20 amps max. up to 300 volts. Terminals accept solder or 3/16" female connector.

LOW PROFILE STYLE

AMPHENOL CONNECTORS

Amphenol
An ALLIED Company

All resilient, one piece, waterproof connector. Incorporates crimp Poke-Home contacts. High performance, low cost. Ideally suited for applications where an environmentally sealed, inexpensive connector is needed. Waterproof seals to prevent liquid entry. One piece shell and insert construction for longer service life. Abrasion resistant. Impervious to water, lubricants, fuel, ozone and road salts. Hooded female contacts and molded-in polarizing flat for high reliability. Installed and maintained with inexpensive hand crimp and insertion tools. Simple, positive, push-pull coupling for easy mating. Cable to cable or panel mounting. Voltage Rating: limiting operating voltage at sea level DC 250 volts, AC 200 volts RMS. Current Rating: 8 amps continuous. Temperature Range: Continuous operation from −40°C to +105°C.

165 SERIES MINIATURE MS TYPE CONNECTORS

- Pressure-proof and waterproof, mated or apart
- Extremely efficient in operation
- Built-in cable clamp
- U.L. Recognized

Pressure-proof and completely waterproof mated or apart. Withstand government saltspray tests by many hours in excess of standards. Extremely efficient in operation, contacts are bronze, gold plated over silver. Features built-in cable clamp. Average Shpg. wt. 3 oz.

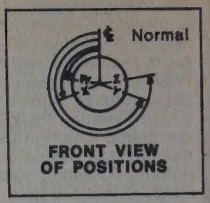
Amphenol

An ALLIED Company

AMPHENOL® CONNECTORS

Exclusive non-rotating contact design simplifies soldering and lowers termination cost. Blue diallyl phthalate inserts provide high insulating resistance and dimensional stability in the presence of both high humidity and high temperature. Only Amphenol MS "A" and "B" inserts feature molded barriers between each contact.



CURRENT RATING:

NOTE: If you prefer the standard dull-olive cadmium plate finish, which is non-reflective, then no suffix number is needed. If you would rather have the shiny, clear cadmium plate finish, just add the suffix (639) at the end of your part number. Both finishes give you the same high conductivity and resistance to corrosion.

Newark has a completely equipped Amphenol MS assembly center which allows us to ship you completed connectors from an extensive component inventory quickly.

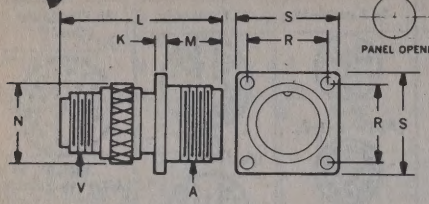
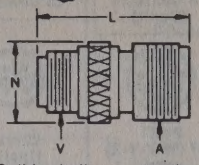
MS 3100A WALL MOUNTING RECEPTACLES



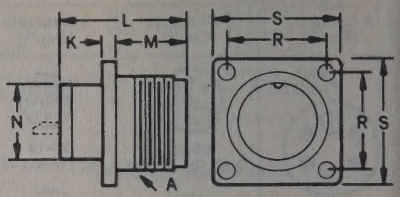
Solid shell construction. Integral polarizing key.

MS 3101A CABLE RECEPTACLES



Solid shell, construction. Integral polarizing key. MS/AN fittings.

MS 3102A BOX MOUNTING RECEPTACLES



One piece aluminum die cast shell. Internal polarizing key. Solid shell.

MS3100A & MS3101A

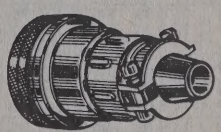
Male caps and chains for plugs MS3106 and MS3108 listed on facing page. Has external threads, provides tight dust-free cover. Av. wt., 2 oz.

10

WATERPROOF CABLE CLAMPS

Complete waterproof cable clamp assembly. Number 9767, consists of a 97-3057 Cable Clamp, a rubber bushing, a washer and a 97-3055 Adaptor.

To assure the watertight integrity of this clamp when assembled to an MS plug, the plug must be ordered with the deviation (417) which supplies a "W" washer cemented to the shoulder of the plug shell.



Type	Connector Size	Dimensions Inches A	B	Max. Cable O.D. Inches	EACH 1-9	10-49	50-99	100-999

Because the MS connectors do not include an inside tapered surface for seating the rubber bushing, the waterproof cable clamp assembly is supplied with an adapter. The adapter may have a 1 to 1 ratio or be a reducing adapter as illustrated above.

97 Series Popular Connectors. Have been assigned Newark part numbers and are available, pre-assembled from stock. Contact your local Newark representative or sales office for a quote on any 97 Series connectors available. Our assembly center is ready to service your connector needs. SEE PAGE 385 for cable clamps and other hardware.

RECEPTACLES AND MATING PLUGS

Meet current MIL-C-5015 specifications; interchangeable with units made to meet previous specs. Finish: Cadmium-plated aluminum with olive drab chromate conversion coating; non-reflective, corrosion resistant. Inserts: Molded dialyl phthalate, offers dimensional stability, high insulation resistance, high arc resistance. Contacts: Non-rotating, silver-plated; pre-tinned solder pockets. Coupling rings. Made from solid aluminum bar stock.

A PRECIOUS METAL CURRENT PRICE SURCHARGE MAY APPLY ON SOME ITEMS.

17D SUBMINIATURE RACK AND PANEL CONNECTORS

Amphenol
An ALLIED Company

Amphenol 117D Subminiture connectors are a complete family of rectangular connectors with D-shaped polarization. Two piece and monoblock insulators, five shell sizes, five contact positions. 117D are used for low cost commercial applications. Insulator: Two piece while polyamide 6.6 UL 94 VO rated Shell: Steel yellow chromated over zinc. Contacts: Screw machined. Male: brass Female: bronze Plating: Gold over nickel. Nominal voltage 300 V eff at 50 Hz Current rating: 7.5A.

SERIES 17 MIN RAC® CONNECTORS

Original Poke-Home. Removable crimp or solder Poke-Home contacts.
Rear Release. Crimp Poke-Home contacts, inserted & removed from rear of connector.
Encapsulated Contact. Removable crimp or solder Poke-Home contacts.
All have nylon insulators.
All MIN RAC 17 series connectors are interchangeable and intermateable with other similar "D" shaped or trapezoidal connectors. Crimps are uniform, easily inspected and can be made on machines producing 1,000 terminations per hour. Soldering is done away from connector, avoiding damage to dielectric. Then the contacts are easily inserted using only the amount needed. Connectors are field serviceable. Meets EIA Standard RS-232C for data communication connectors.

Contacts: Original poke-home: Gold over nickel plated copper alloy; Rear Release: nickel contact underplate, .00003" gold in critical area and .00005" on balance of contact; Encapsulated: gold over nickel plated copper alloy.

REAR RELEASE CONTACT

Crimp, snap-in contacts require no insertion tools. Rated @ 3-5 amps,* −55°C to 125°C. Dielectric-glass filled nylon. Wire Size: 22-26 AWG. Crimp type, insulation support, contacts are sold separately.

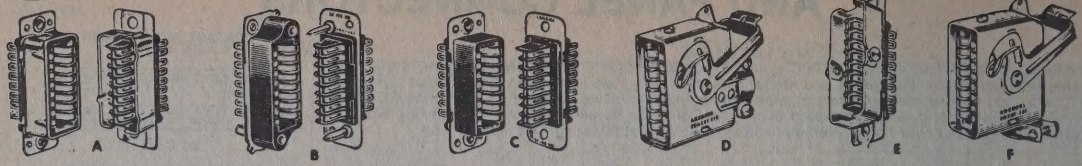
AMPHENOL BLUE RIBBON CONNECTORS



Barrier polarization type connectors are designed for interconnecting electronic sub-assemblies, circuit switching, rerouting and other multi-contact applications. Interlocking design of mating dielectric bodies provide positive polarization. The dimensional stability and high tensile strength of Amphenol Blue dielectric make this type of polarization possible. Float mounted receptacle corrects misalignment of plug and receptacle. Corrosion resistant, stainless steel molded-in mounting plates and housing. Rated: 5 amps, 800 volts DC at sea level, 300 volts at 70,000 ft. altitude. Av. Shpg. Wt. 3 oz.

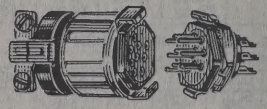
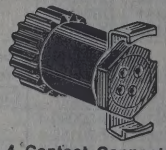
126 SERIES MINIATURE HEXAGONAL CONNECTORS

For inter-connecting miniature equipment. All contacts are size 20 (.040 Dia) except for one size 16 (.062 Dia) on 4 contact insert. Solder pockets accommodate #20 or smaller gauge wire. Overall diameter of connector is ¾". Total length is 1 5/64". A brass nut fastens connector to panel. Keying of connector body prevents rotation. Gold plate contacts can be soldered without pretinning. Rated for 500V (RMS) at 7.5 Amps.

126 SERIES MINIATURE HEXAGONAL CONNECTORS



Panel Mount Plug and Mating Cable Receptacle with Hood and Locking Sleeve (5-7-9 Contacts Only)



4 Contact Connector with Hood and Locking Clip #2

- **Keyed body connector prevents rotation**
- **Overall diameter is only ¾"**
- **For 20 gauge wire or smaller**

CROSS-OVER ADAPTERS

62-01. Interconnects 18-button phone with old wiring pattern to 3-fingered cable with new wiring pattern. 62-02. Interconnects 18-button phone with new wiring pattern to 3-fingered cable with old wiring pattern. 53-1. Mates with 3-finger connector-ended cable incoming from main terminal box or bridging adapter, extends circuit to two 18-button Call Directors by accepting 3-finger plug-ended cable from each.

MODULAR TELEPHONE ADAPTER

50-pin plug wired to a 6 position modular jack. Allows single line, modular telephone sets to be connected without rewiring, to existing 50-pin connectors on running cable. Conversions in minutes.

25 PAIR CABLE ADAPTERS

Three-way bridging adapters for 6-button telephones. Used to connect one or more 6-button type key telephones to 25 pair cables. **C-P-C:** mates with 25 pair connector-ended cable and extends circuit to two 6-button telephones by mating with plug-ended cable from each. **P-C-P:** interconnects one 25 pair connector-ended cable from main terminal box. 4¼"Lx2½"W x 2¼"H. .1=grey color. .2=beige color.

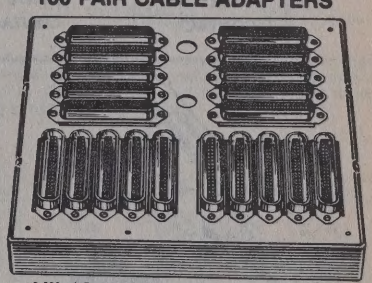
100 PAIR CABLE ADAPTERS



- **4-Way Bridging Adapters for 30-Button Key Telephones**

Contains twenty Series 57 Micro-Ribbon connecting devices. Every fifth one interwired to form 4 completely interconnected sets. Access holes for 5-fingered cables provided on sides of case. Outer Case: 9¼"L x 8¾"W x 2½"H.

Connectors with short dip solder tails on .140" row spacing and dip solder tails with .200" row spacing terminations consist of the same economical materials and array of sizes (6 thru 43 positions) as the 225 Series solder eyelet connectors. **Specifications.** Operating voltage 600 VAC (RMS) at sea level; (50 VAC (RMS) at 70,000 ft. 5 amp current rating. Dielectric material is electrical grade black phenolic. Insulation resistance 5,000 megohms minimum. Copper alloy contacts with .000020" gold over copper. 30 mV maximum contact resistance at rated current. Board thickness .054" to .071".

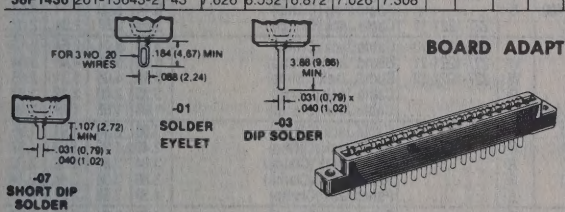
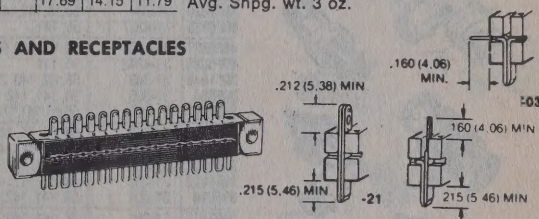
Dual readout of double-sided printed circuit boards. Pre-loaded cantilever-type contacts are assembled into dielectric with precise spacing for automatic solderless wrap terminations. Tail length is sufficient for three wire wraps plus space for bussing or PC board next to block. Contacts are confined in dielectric to determined pre-load force for fixed, definite separation eliminating possibility of shorts. Gold-plated phosphor bronze contacts rated at 5.0 amps. Voltage rating: 300 V rms at sea level. Minimum voltage breakdown: 1800 V rms. Contact resistance: 6.0 milliohms max. .025" square tail with 500001-type contacts. Insulator material: Black electrical grade phenolic. Avg. Shpg. wt. 3 oz.

10

BOARD ADAPTORS AND RECEPTACLES





Series 143 Connectors. Prevent board rocking and keep voltage losses at a minimum at extremes of temperature and vibration. If heavy cycling is anticipated, series 133 plug may be attached to board and mated with 143 connector. Pin identification is molded on top face and term. surface. Designed for flush mounting.

Series 133 Plugs. Combine excellent electrical performance with mechanical sturdiness. Repeated matings will not cause deformation of contacts. End caps prevent damage to mounting holes when mouning screws are tightened.

AMPHENOL CONNECTORS

QUICK TRIM BNC PLUGS

CLAMP NUT

CONTACT ASSEMBLY

CONNECTOR BODY

For RG59/U Belden #9268. Have minimum cable preparation and no special tools required for terminating computer peripheral. Lower installation cost occurs because all that is required is a ¼" cut to expose center conductor.

UHF CONNECTORS

Threaded coupling UHF series are low-cost, general purpose connectors used in applications at lower frequencies where no serious mismatch is introduced. They will operate satisfactorily at frequencies up to 300 MHz and have a peak voltage rating of 500 volts. NOTES: 1) Silver plated body. (†) Teflon.

TYPE N CONNECTORS

Series N connectors are medium size, weather-proof, threaded coupling units with a frequency limit of 11 GHZ. They have a peak voltage rating of 1500 volts and are impedance matched to either 50 or 70 ohm cables.

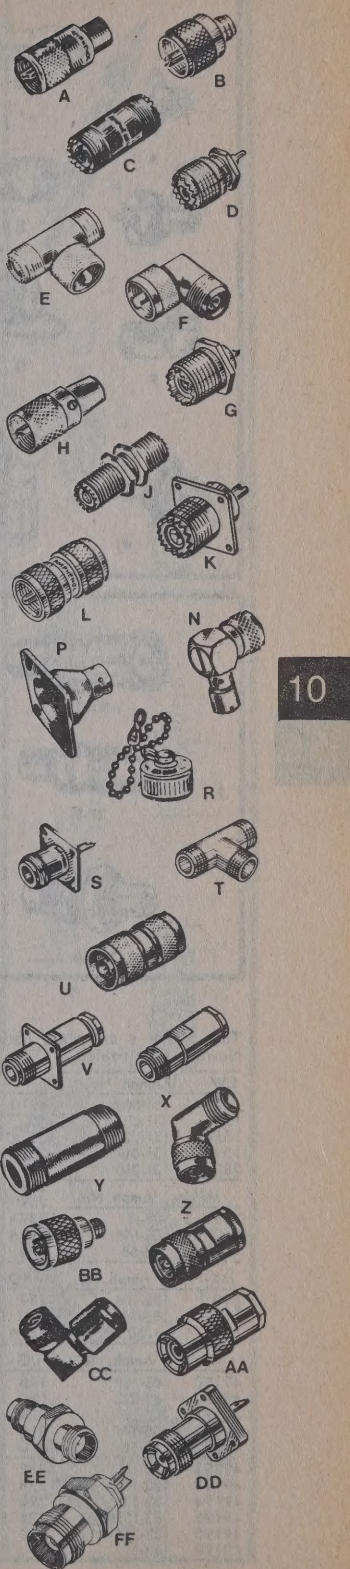
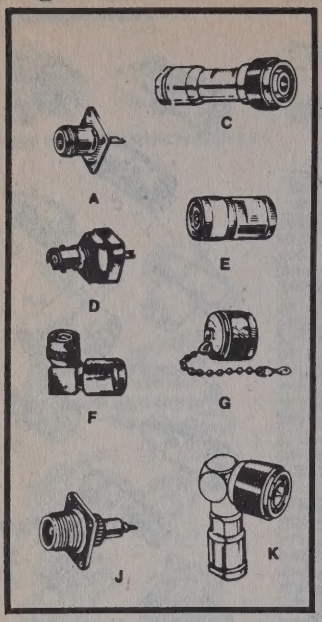
*70 ohm impedance; not intermateable with 50 ohm connectors.



10



Constant 50 Ohm Impedance Design matched to 50 ohm cables can also be used with 75 ohm cable, at lower frequencies (below 300 MHz). Peak voltage rating of 1500V and low SWR up to 10 GHz. Thermal limits; –67° to 390°C). Pressurized; compression seal. 2-stud bay net lock. "V" groove split silicone rubber gasket and peaked braid clam. Weatherproof gaskets. Meets military specs of MIL-C-3989.

TYPE "HN" CONNECTORS

Constant 50 ohm impedance connectors designed for high voltage applications. Frequency range; 0-4GHz. Voltage Rating; 1,500 V peak. Pressurized; compression seal. Thermal limits; –67° to 390°F (–55° to 199°C). Synthetic and silicone rubber weatherproof. Meets military specs of MIL-C-3643. Dielectric withstanding voltage; 5,000 rms. SWR; 1.3. Have 5 KV peak ratings, when used with 307 Silicone compound.

SUBMINAX 27 SERIES SMB AND SMC CONNECTORS

Constant impedance (50 or 75 ohm) types with voltage rating of 500 volts peak and frequency limit of 10 GHz. Two types of coupling mechanisms available-Snap On (push on) for frequent fast mating and limited space; Screw on for vibration type applications. Types do not intermate.

AMPHENOL CONNECTORS

Amphenol
An ALLIED Company

CONNECTORS FOR TWINAXIAL CABLE

For interconnecting computers and information display system. Has gained wide acceptance for terminating Twinaxial cables interconnecting host computer system and peripheral display, printer and other uses. Impedance: 95 ohms nominal. Frequency Range: 0-200 MHz usable to 500 MHz. Voltage Rating: 500 volts peak. Thermal Limits: −67° F to 185° F, (−55° to 85° C) Weatherproof. Mating: Keyway polarization, ¾-20 threaded coupling. Cable Affixment: screw thread nut and braid clamp. Contacts—Male: brass, silver plated. Female: Beryllium copper, silver plated. Other Metal Parts: Brass, ASTRO-plate finish. Insulators: Copolymer of styrene or equal.

TWIN SERIES

Have a nominal impedance of 95 ohms are weather-proof All are polarized to preserve continuity of the individual conductors. These conductors can normally be used at frequencies up to 200 mc. and in some cases to 500 mc with caution. Maximum peak-operating voltage is 500 volts. Type 309-6275 plug for RG-U 22 cable. Average shpg. wt., 4 ounces.

TRIAX SERIES

TRIAX connectors are used in transmission line applications where maximum RF shielding and minimum noise radiation are required. Have an impedance of 50 ohms, but can be used where impedance matching is not critical.

SMA SERIES

50 ohm, semi-precision, subminiature (3mm), high-frequency (0-18 GHz) connectors with ¼-36 threaded coupling. Meet all MIL-C-39012 requirements for SMA connectors.

Fiber-Optic, Inter Connections

Advantages
- Complete Electrical Isolation
- No Short Circuit Possibilities
- RFI/EMI Noise Immunity
- EMP Immunity
- Wide Signal Bandwidth
- Transmission Security
- No Crosstalk
- No Contact Discontinuity
- Wide Operating Temperature Range

Single Channel Termination

SPECTRA STRIP CONNECTORS FROM AMPHENOL

Amphenol
An ALLIED Company

FLAT CABLE CONNECTORS

FRC 2-IDC socket connectors are mass terminated to flat cable and mate with the header which is affixed to the PC board. Features include positive header locking device, simplified one motion mating and unmating, with both visual and physical polarization. Specs: Voltage rating 250 VAC (PMS). Current Rating: 1A. Housing and Lock: Polyester Resin UL 94VO black—Socket Housing and Cover: Polycarbonate resin UL 94V-O black. Stain relief: Polyamide resin UL 94VO black. Contacts: Copper alloy with gold over nickel plating.

D-SUB MINIATURE—FRC CONNECTORS

841 Series D—Subminiature pin and socket connectors allow hi-re mass termination of standard .050" pitch round-conductor FRC. Without prestripping or separation of conductors. Accepts 28 and 26 AWG standard and 28 AWG solid conductors. Fully intermatable with standard D-Subminiature connectors having .054" contact spacing. Insulator: Gray-glass filled polyester UL94-V/O rating. Contacts: gold over nickel plating. Material: Phosphor bronze alloy.

● Intermatable and interchangeable with all present industry standard latch-lock type audio connectors ● Solid Diecast ● Satine Nickel Plating ● Quick, Easy Assembly ● Set Screw Cable Grip

The 91 contact resistance has a voltage drop between 45-50 mV. Its corrosion resistance can withstand standard MIL-STD-202 48-hour salt spray test without damage or corrosion. It's Zinc die-cast with protective satine and nickel plated. Insert dielectric is thermoplastic. Contacts are copper alloy with tin-lead plating. Pins and socket are solder cup termination. Cable clamp set screw accept commonly use 3/16" to 5/16" diameter cables.

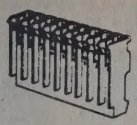
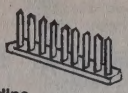
IDC Connectors and Headers

PANDUIT CORP

Designed for mass-termination of both discrete wire and notched flat cable. Pre-loaded insulation displacement contacts eliminate need for hand crimping and hand loading of contacts into housings.



.100" and .156" centerline connectors



.100" and .156" centerline headers

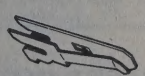
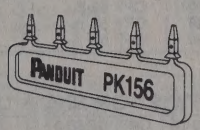
CONNECTOR INSTALLATION TOOLS—Individually Terminated Wires

MRT Hand Tool

Ideal for prototypes and repair.

Stock No.	Type	Description	Each
67F996	MRT-100F	For .100" connectors	8.80
67F997	MRT-156F	For .156" connectors	8.80

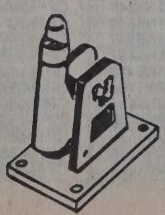




Polarizing Keys

Stock No.	Type	Per Pkg. of 100
67F998	PK100	7.65
67F999	PK156	7.65

PCT Pneumatic Tool



MCT Manual Tool

Controlled cycle insures proper termination. Self indexing. Used with either nose section shown below. Wgt. 10 oz.

Stock No.	Type	NET
67F994	MCT	82.50

CTD Interchangeable Nose Sections

Used with MCT or PCT tools to terminate unstripped wires in end connectors. Wire insertion guide. Self-indexing. Controlled cycle assures consistent connections.

Stock No.	Type	Description	Net Price
67F992	CTD-100F	For .100" connectors	55.00
67F993	CTD-156F	For .156" connectors	55.00

PCT Pneumatic Tool

Use with either CTD nose section. Includes hose and filter/regulator. Wgt. 11 oz.

PCTBM Bench Mount

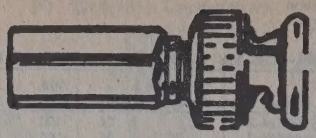
Converts PCT Tool to single wire insertion bench press. Includes foot valve, hose and hose fittings. PCT tool and CTD nose section must be ordered separately.

Stock No.	Type	Description	Net Price
67F995	PCT	Pneumatic Tool	137.50
81F4602	PCTBM	Bench Mount	75.00

10

EASY-ON™ brand Coaxial Connectors

ADVANCE IN COAXIAL CABLE CONNECTOR DESIGN



EASY-ON FAMILY®
SELF-ENERGIZING CONNECTORS

Self-energizing center contact, pre-assembled in the body, provides a positive mating of the center conductor and the contact. Cable attachment is achieved by tapered and threaded back-end opening, which makes it easy to twist the unit onto the cable braid and jacket, insuring good grounding and a high integrity termination. Patent pending.

- **Save Time and Money on Assembly**

No contact soldering or contact crimping, no additional parts such as loose clamp nuts, insulators, or sub-assemblies to handle. No wrenches required, and no need for training or dexterity. The SPC Technology Easy-On series of BNC connectors reduces average installation time by 83% (40 seconds vs. 4 minutes for standard BNCs).

ELECTRICAL CHARACTERISTICS

- **Nominally 50 or 75 Ohm impedance.**
- **Peak voltage rating 500 Volts rms.**
- **Dielectric withstanding voltage 1500 volts rms.**
- **Insertion loss less than .1 db @ 2 gHz.**
- **VSWR 1.05 @ 1 gHz, 1.2 @ 2 gHz.**
- **Bright nickel-plated brass body and ferrule.**
- **High-density polyethylene insulators.**

TWIST-ON COAXIAL CABLE CONNECTORS

- **Twist-On cable attachment (pat. pend.)**
- **No solder or special tools required**
- **No loose contact or other parts to handle**
- **Utilizes self-contained, self-energizing contact (pat. pend.)**
- **Material: brass, bright nickel plated hardware, high density polyethylene insulator**

TNC PLUGS

TWIST–ON

CRIMP–ON

EASY-ON twist on CPFI-TNC model one piece connector construction with both crimpless and solderless center conductor/braid connections. Requires no tools.

Easy-On crimp on CP-TNC model two piece connector construction with crimpless solderless captive center contact and crimped outer band. Note: Same overall dimensions and "C" dia. as CPFI-UG & CP-88 BNC models for equivalent cable.

Stock No.	Type	RG/U Cable	1-9	10-24	25-99	100-499

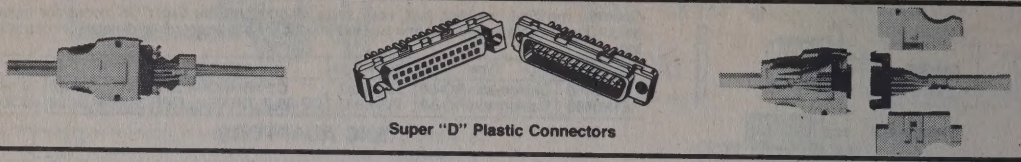
Super D Connector System



Super "D" Plastic Connectors

Exclusive New Super D Features:

- 9, 15, 25 and 37 contacts, plastic connectors intermate with existing D type connectors. No shock hazard. Materials per UL 94V-0.
- Snap-on plastic hoods captivate connectors, providing positive, self-latching, audible mating with reliable retention and quick-release disconnect.
- Pre-loaded pin/socket contacts provide solderless (IDC) 4-point termination of 24-26 AWG stranded wires, at positive time and cost reduction, without wire stripping.
- Meets EIA Standard—RS449 for 9 and 37 contacts interface for DTE and DCE equipment. Includes compatible latching and form factor to fit specified envelope for handling. Also meets RS232 for 25 contact connectors.
- 3 terminating tools—Auto-Clinch D for high volume; Certi-Clinch D for moderate production and field installation; and Uni-Clinch D for field repair or retrofit—provide reliable termination of all four sizes.

Cable-to-Panel-Latch-N-Lock
After solderless termination connector w/molded latching blocks, is screw-mounted from behind thru a panel opening. An accessory plastic wire strain-relief may be snapped on insulator after wire termination. Terminated mating connector, w/o latching blocks, is then captivated with snap-on hood containing latch-levers and assembly is mated and latched to panel mounted connector w/an audible click. To release, squeeze latch-levers towards each other with thumb and forefinger and pull to unmate.

Cable-to-Cable-Latch-N-Lock
Connector without latching blocks, captivated by a hood with latch-levers, mates with and latches to a connector with latching blocks, captivated by a hood with filler inserts. Push assemblies together—an audible click indicates they are latched. Squeeze latch-levers and pull for quick-release.

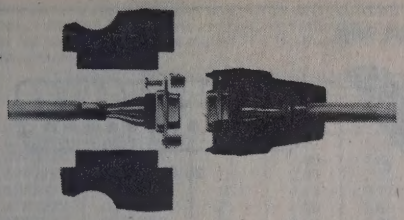
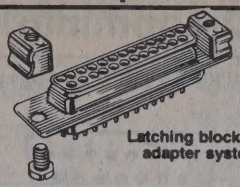
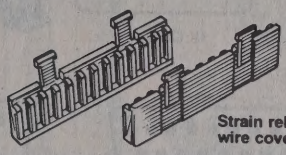
Super D Adapter System/Super Shielded D Connectors



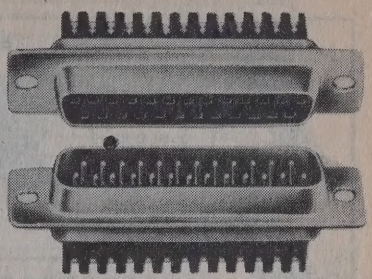
Super D adapter system



Latching blocks for adapter system



Strain relief wire covers



Specially designed black two-piece snap-on plastic hoods, with and without latches, captivate metal shell D-Subminiature connectors. Add-on metal latching blocks are screw mounting flanges to accept the latch locks.
For cable to panel screw mount, the mating metal shell D-Subminiature connector is captivated in a filler end hood with screws. Screws are screwed into screw lock assembly for semi-permanent locking.

D-Subminiature connectors in 9, 15, 25 and 37 contact sizes in standard D-sub. metal shell. Termination is insulation displacement for cost saving. Connector uses same black hoods, add-on latching blocks, hood and mounting screws as in the super D adaptor system. It may be used for grounding in applications using shielded cable.

CERTI CLINCH D FIELD TERMINATION TOOL
Designed for mass termination of individual wires, eliminating wire stripping, soldering and crimping. It handles all four Super D sizes, is readily portable and requires no set-up time and little operator time. Rugged, all metal construction affords trouble-free long life.
Stock No. 10F8176 . . . Type SD-CC . . . . . Price 485.00

UNI CLINCH D SINGLE WIRE HAND INSERTION TOOL
Designed to insert one 24-26 AWG wire at a time, Uni Clinch D is used as a field repair tool by field service engineers.
Stock No. 10F8177 . . . Type SD-UC . . . . . Price 45.00

Super D Manual Stay Band Tool
Designed for applying the steel stay band/strain relief to the cable before termination of wires to the Super D connector, the manual Stay Band tool applies both Stay Band sizes to the full range of cable sizes.
39F386 . . . Type SD-MSBT . . . . . price $49.00

SD-CCN Conversion nest converts SD-CC Certi-Cinch D for use with Super Shielded D Connectors.
81F4926...Type: SDCCN . . . . . Net $69.02

Cinch Connectors

Connector Division
TRW Electronic Components Group

D-Subminiature

ECONO D CONNECTORS

Two piece insulator. Crimp, snap-in contacts can be inserted by hand in rear of insulator, and can be removed with a hand tool. Economical connector for commercial applications. The D*U/version of this insulator is UL recognized.

ALPHA WIRE FIT-BOOTS

FIT-BOOTS—For D-Subminiature Connectors—Shrinks Tight Over Connector Shells. Designed specifically for subminiature rectangular connectors manufactured by Cinch. Replaces metal molds and plotting forms used on molded harnesses. Provide a strain relief, a convenient handle, and seal out contaminants. Molded of a heat shrinkable, modified polyolefin compound with excellent physical and electrical properties. Any heat gun may be used to shrink boots.

- Instantaneous Latching
- Snapable Plastic Hood
- Integral Cable Clamp
- For Solid 24-26 AWG
- Strain-reliefs Incorporated in Connectors
- Panel Mounting Clips Permit Fast Chassis Mounting
- Threaded Bushings Molded Into Each Connector

SPECIFICATIONS

Insulator: .....30% glass filled polyester.
Contact Material: .....copper base alloy.
Contact Plating: Gold finish per MIL-G-45204 Type II over .000050" copper per MIL-C-14550. Selectively gold plated.
Termination: Insulation displacement Cinch ribbon solderless termination system. Accommodates solid wire. Built in wire restraint feature on each contact.
Polarization: Keystone shape prevents "wrong way" mating.
Electrical Ratings 500 volts RMS AC at sea level. 700 volts RMS DC at sea level. 5 amps.
Number of Contacts: .....14, 24, 36, 50 and 64.
Styles: Rack and panel and cable to cable with end entry and top entry hoods.

U.L. Recognition

Reduces connector assembly costs by combining a hardware-eliminating connector design. Latching is instantaneous, without separate hardware. The plastic hood snaps in place. Cable clamp is part of the connector and requires no additional hardware. Unmating is accomplished by inserting any pointed object into window at either end of connector. Connectors come in three styles: rack and panel plugs and receptacles, cable to cable plugs and receptacles with end entry hoods, cable to cable plugs and receptacles with top entry hoods. Accessories listed below include panel mounting clips, locking screws, buff gold hoods and wire restraints.

Cinch-Ribbon connector system

Intermateable and interchangeable with solder type ribbon connectors now in use.

Termination speed exceed conventional soldering techniques.

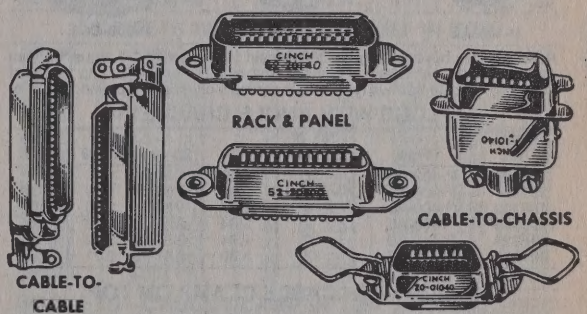
Four gas-tight connections for each conductor.

Accommodates solid and stranded wire.

Built-in strain relief for each conductor prevents inadvertent wire removal.

Insulator: 30% glass-filled polyester. **Contact style:** Ribbon. **Contact material:** Copper base alloy. **Contact plating:** Gold finish per MIL-G-45204 Type II over .000050" copper per MIL-C-14550. Selectively gold plated .000040" in contact mating area, and .000005" in contact terminating area. **Shells:** Steel with a finish of zinc, and clear chromate. **Termination:** Insulation displacement. Cinch ribbon solderless termination system. **Polarization:** Keystone shape prevents "wrong way" mating. **Electrical ratings:** 500 V rms AC at sea leavel. 700 V rms DC at sea level. 5A.

CINCH RIBBON



Insulator: Diallyl phthalate, Type MDG per MIL-M14. **Contact style:** Ribbon. **Contact material and finish:** Copper base alloy with a finish of gold per MIL-G-45204 Type II, over .000050" copper per MIL-C-14550. Selectively gold plated .000040" in contact mating area, and .000005" in contact terminating area. **Shells:** Steel, with a finish of zinc and clear chromate. **Termination:** Solder and printed circuit tails on .085" (2.16 mm) centers for terminating to 1/16" (1.59 mm), printed circuit boards. **Polarization:** Keystone shape prevents "wrong way" insertion. **Mounting:** Shells for rack and panel receptacles have float mounts. **Electrical rating:** 500V rms AC at sea level 700V rms DC at sea level. 5A.

TERMINATION TOOLS

Certi-Clinch terminates a 50 contact connector in less than 5 minutes. For field assembly and low production applications. Portable and requires no set-up time. Accept all sizes and shell styles. Standard Certi-Clinch handles solid wire only. Max. insulator outer diameter is .040 (1.02 mm).
43F197. SCT-334 ..... **633.66**

Versa-Clinch hand operated tool used to perform four basic functions: 1. Cut off and terminate one wire to Clinch Solderless Superibbon. Ribbon and some connectors manufactured by others. 2. Unlatch the Superibbon 90° Hood for removal. 3. Open and close Superibbon. Metal Cable-Clamp. 4. Unlock mated Superibbon Connectors, Versa-Clinch is used to cut, patch, remove, repair, open, close, latch, unlatch, tap and terminate.
43F155. VCTT-361 ..... **42.63**

Pliers designed for reterminating wires removed from solid wire solderless Cinch-Ribbon and Superibbon Connectors.
43F196. SRT-358 ..... **25.00**

Rated for duty beyond range of 300 Series: 1100 Vrms at 1-5 amps. Contact resistance: .001 ohm avg. Polarized and suitable for either cap or panel mounting. Double bellows type socket contacts of cadmium-plated phosphor bronze engage both sides of flat plug contacts. Plug prongs are cadmium-plated brass ¼" wide, 1/16" thick.

AUDIO CONNECTORS

Metal parts are brass with bright nickel finish. Insulation is molded phenolic. Phosphor bronze "knife switch" type socket contacts engage both sides of flat brass plug contacts. Formed fibre linings in caps. Knurled nut has 3/4"-27 thread. P-202-CCT makes ideal microphone cable connector.

INTEGRATED CIRCUIT SOCKETS

- DIP Sockets
- 1 AMP Rating
- Low Capacitance

Ideal for testing and prototype purposes as well as production applications. Protect leads and hermetic seals. Positive electrical contact. Low contact resistance. Resistive to corrosive atmosphere and extremes in temperature and humidity. Withstanding Voltage: 1800 VRMS, dip solder tails; 1000 VAC RMS, wire wrap tails. Temp. Range: −65° C to 150° C. Insulations: 1-GP Black Phenolic. 2-Diallyl Phthalate. 3-Black G.F. Polyester. 4-White G.F. Polyester Lead Plating. 5-Electro Tin. 6-Gold.

LOW PROFILE SOCKETS WITH PC BOARD TERMINALS

Low profile DIP sockets are extremely economical. Unique design permits substantial reduction in assembly costs. Produced in 8, 14, 16, and 24 contact sizes as standard items. 22 & 40 sizes also std. items for low profile DIP sockets.

DIP SOLDER

Precision Military and Commercial Printed Circuit Board Edge Connectors—Featuring .156 Lead Spacing, 1/16" Boards

Designed for minimum printed circuit card wear, low insertion force, and positive contact with the printed circuit board. Insulation is glass-filled diallyl phthalate. Type SDG-F per MIL-M-14. Commercial type: Stripe plated with .000030" gold in contact area and .000010" gold on tails with copper underplate. No plating on edges. MILITARY: contacts are beryllium copper with 50 micro-inches of gold finish. Available with solder tab, dip solder. All utilize bifurcated contacts permitting two flexing surfaces instead of one for positive contact. Bifurcated contacts are especially recommended for added contact reliability where vibration or printed circuit board irregularities would otherwise cause trouble. **U/L Recognized**

ELECTRICAL SPECIFICATIONS—Voltage Rating (AC RMS, adj. terminals): 830 (Sea Level); 300 (3.4 Hg, 50,000 feet); 200 (1.3 Hg, 70,000 feet). Current: 5.0 Amps. Contact Resistance: .005 Ohms at Rated Current. Insulation Resistance: 5000 Megohms.

ENVIRONMENTAL SPECIFICATIONS—Per MIL-C-21097 and MIL-STD-202. Shock: 3 blows of 50G. Temperature Cycling: 5 continuous cycles, Test Condition B; Beryllium copper, –65°C to 125°C; Phosphor bronze, –65°C to 105°C. Salt Spray: 48 hrs., Condition B. Vibration: Condition B. Humidity: Condition B.

Cinch Printed Circuit Edge Connectors

CARDCON CONNECTORS WITH DIP SOLDER TERMINATIONS

Ideal for applications involving vibration or board irregularities. Bifurcated semi-bellows contacts for added contact reliability. Available in 6, 10, 12, 15, 18, 22, 24, and 25 contact sizes, with or without mounting ears. Accepts single or double sided, 1/16" thick PC boards, 0.156" center spacing, with either 0.200" spacing between rows, or 0.140" spacing between rows. Insulator: 94-VO rated, glass filled blue polyester. Contacts: 20 µ in. gold plate, on 50 µ in. copper on allow 260 spring brass.

3/4 W terminals are for solder attachment of wires on one side of terminal block, W terminals both sides, and Y terminals underneath. Standard terminal block with binder head or SEMS screws can be used for wire or special terminal attachment.
U/L Recognized except 173 Series. Insert an "E" to part number to get SEMS screws.

MATERIALS:
Insulator: molded phenolic
Eyelets: brass screws: nickel plated steel
Terminals: hot solder-dipped brass

Series 140. Accommodates up to #16 solid wire.

SERIES 6337 (.156") CARD/EDGE CONNECTOR

- Contacts Accept 3 Levels Wrapping Wire
- Dual Readout
- Bifurcated Bellow Contacts
- For 1/16" Printed Circuit Cards

Discrete connectors have .025" square wire wrapping terminals. Contacts on .156" × .200" centers. Current rating 3 Amps. maximum. Contact material consists of phosphor bronze per QQ-W-321D. 10 microinches, minimum, gold plate over 30-100 microinches of nickel. Insulating material is thermoplastic polyester per UL 94VO. Maximum voltage potential between contacts 1500 VAC. Insulation resistance: 5000 Megohms minimum at 500 VDC.

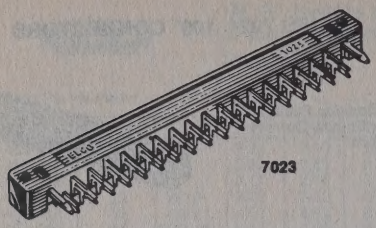
PC Varicon™ Connectors

SERIES 7023 .100" CONNECTORS



Mates with 7024 and 7038 series. MIL-C-21097 Qualified Products List (QPL)-approved. Guide pins facilitate mating, ensure correct alignment. Insulator maintains exact spacing between contacts; insulator rigidity reduces PC card warp. Reduces cost of card punching operation (fewer holes are needed) and of contact staking operation (one operation instead of two). Reduces assembly time (no plastic strip to remove). For 1/16" PC card, as indicated. Current rating: 10 amps. Contact material and plating: phosphor bronze per QQ-B-750, Composition A; 10 microinches gold plate over 30-150 microinches nickel plate. Insulator material: diallyl phthalate, glass-filled, flame resistant, per MIL-M-14F, type SDGF. Military specifications: MIL-C-21097, MIL-E-5400, MIL-E-8189, MIL-T-21200, MIL-E-19600 (Par 3.5.5.), MIL-STD-454.

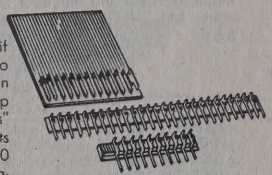
02 SERIES CONTACT STRIPS ON .200" CENTERS MATES WITH 5000 SERIES RECEPTACLES



Contacts can be staked (and soldered, if desired) directly to PC card. Requires no insulator. Contacts are supplied on disposable plastic strips. Staking and strip removing equipment is available. For 1/16" PC card. MIL-C-21097 Qualified Products List (QPL)-approved. Current rating: 10 amps. Contact material and plating: Phosphor bronze per QQ-B-750, Composition A; 10 microinches gold plate, over 30-150 microinches nickel plate. Military spec.: MIL-C-21097, MIL-E-5400, MIL-E-8189, MIL-T-21200, MIL-STD-454, MIL-E-19600 (BuWeps) par. 3.5.5.

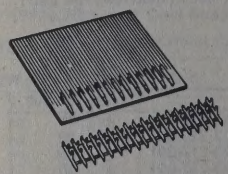
Standard strip supplied with max. 60 contacts:

Type	
02-060-013-5200	6.24

We will cut these strips into any number of contacts, please contact your local (Newark) sales office for a price quote.

013 — For 1/16" thick card. Type 60 5001 19 13 contacts spaced .200", with wire hole (maximum of 60 contacts per strip)

02 SERIES CONTACT STRIPS ON .100" CENTERS MATES WITH 7000 SERIES RECEPTACLES



Consists of contacts which can be staked and soldered to PC card; no other insulator needed. Contacts are supplied imbedded in vinyl strips, correctly spaced and ready for insertion and staking into PC card. Complete set of plug contacts supplied on two disposable plastic strips, one for upper-tier contacts and the other for lower-tier contacts. For 1/16" PC card. Current rating: 10 amps. Contact material and plating; phosphor bronze per QQ-B-750, Composition A; 10 microinches gold plate over 30-150 microinches nickel plate. Military specifications: MIL-E-5400, MIL-E-8189, MIL-T-21200, MIL-E-19600 (BuWeps), par. 3.5.5. **Upper-tier and lower-tier contacts on separate strips.**

Standard strip supplied with max. 60 contacts:

Type	
02-060-147-5200	6.24
02-060-135-5200	6.24
02-060-137-5200	6.24

We will cut these strips into any number of contacts, please contact your local (Newark) sales office for a price quote.

147 — For 1/16" thick card. Lower tier contacts, type 60 7001 15 13

135 — For 1/16" thick card. Lower tier contacts with wire hole, type 60 7001 04 13

137 — For 1/16" thick card. Upper tier contacts with wire hole, type 60 7001 05 13

A PRECIOUS METAL CURRENT PRICE SURCHARGE MAY APPLY ON SOME ITEMS.

METAL TO METAL VG CONNECTOR SYSTEM

G+W Elco Corporation
a Gulf + Western manufacturing company

High density connections with small envelope suitable for mounting to single or double sided printed circuit boards. Conforms to VG Spec. 95324; Din Spec. 0041612 and IE C recommendation 488 (Co)48.

Technical Data of Series 8257/8267

- Basic grid: .100 square
- Contact positions: 3 × 16, 2 × 32 and 3 × 32
- Current rating: 3 amperes max.
- Contact resistance: 10 milliohms max.
- Insulator material: Polyester Thermoplastic (GF).
- Contact material: Phos. Bronze per QQ-B-750 Comp. A
- Contact post dimension: .024 × .024
- Contact plating: Gold over nickel
- Push out force of post in insulator: 7.5 lbs.

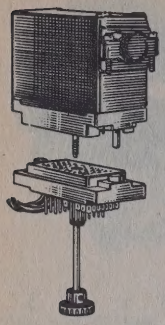
Rack-and-Panel Connectors

SERIES 8017 RECTANGULAR WITH .150″ OFFSET GRID



- **75, 100 or 130 Contacts**
- **Crimp, Solder/Taper Tab, Solderless Wrap and Taper Tab Terminations**
- **Removable VARILOK™ Contacts**

Rectangular rack-and-panel connectors with .150″ offset grid, available with 75, 100 or 130 contacts. Polarizing hardware can be set to any of six positions at the factory; can also be reset by the user (36 possible polarizing position combinations per pair). Guide pins and sockets ensure correct alignment when mating. Optional cover, with top or side cable entrance and clamp. Available with or without actuating screw or nut. U.L. approved. Insertable/removable VARILOK™ contacts. Choice of terminations: .078″ taper tab (216), solder/.098″ wire hole (217), solderless wrap tail in choice of three sizes (218, 750 and 296), or crimp (to be ordered separately). Current rating: 8.5 amps maximum. Contact material: phosphor bronze per QQ-B-750, Composition A. Contact plating: 10-20 microinches gold plate over 30-150 microinches nickel plate. Cover material and finish: Steel with black wrinkle finish. Clamp material and finish: Zinc (fixed clamp) or steel (movable clamp) with black wrinkle finish. To Order, complete the 15-digit assembly as shown at right.

ORDERING CODE

Complete a 13-digit assembly number for each mating part, plug and receptacle:

8017 — XXX — XXX — XXX

NUMBER OF CONTACTS
75 (**075**), 100 (**100**), 130 (**130**)

CONTACT CODE

For factory installed contacts, use 3 digit code no. For loose contacts, use code 000 and order separately by part no. All contact are with standard gold plate unless otherwise specified (crimp contacts can only be ordered separately).

HOW TO ORDER 8016 AND 8026 SERIES

The complete connector part number consists of product series 8016 plus codes for no. of contacts, contact code and variation.

8016 Series — **056** No. of Contacts — **217** Contact Code — **001** Variation

Example: (using above) 8016 series plug connector with 56 contacts using a solder tab contact that has a standard polycarbonate insulator with an actuating screw.

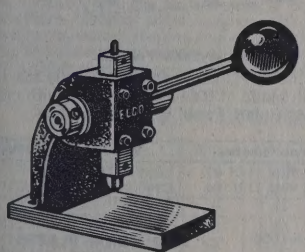
HAND STAKER



- ¼″ Ton Capacity
- Stakes most currently available contacts.

MODEL NO. 06 1856 01. Designed for use as a multi-purpose laboratory tool. Will stake most contacts presently available. ¼″ ton capacity, working surface: 2″ x 2⅛″, Ram dimensions: ½″ x ½″ x 2½″.

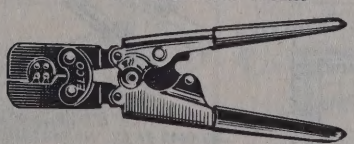
69F309. NET 126.00

CONTACT EXTRACTION TOOLS

Designed to extract contacts from their insulator quickly and easily, without damage to either contacts or insulator.

Stock No.	Type	For	1-up
69F310	06 1877 04	Varilak Con.	14.10
69F311	06 7699 01	Mini-Varilok Con. (8026)	14.10
69F312	06 7770 01	Mini-Varilok Con. (8221, 8223, 8229)	14.10

CONTACT CRIMPING PLIERS



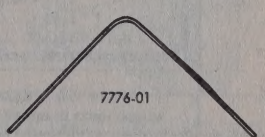
Designed for hand crimping of contacts; well suited for maintenance, model shop and small scale production purposes. Independently adjustable for conductor and insulator.

Stock No.	Type	Contact Capability	1-Up
69F314	06 7852 01	#60 8017 03 13	59.95
69F315	06-7858-01	#60 8216 03 13	59.95

CONTACT INSERTION TOOLS

7638-01

1742-04



7776-01

Solder and wire wrap insertion tools, except VARILOK & MINI-VARILOK, insert contacts directly into insulator.

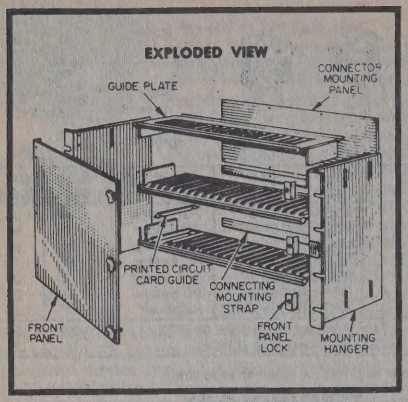
A PRECIOUS METAL CURRENT PRICE SURCHARGE MAY APPLY ON SOME ITEMS.

Varipak™ PC Card Enclosures & Access.

SERIES 9016 VARIPAK PC CARD ENCLOSURES



VARIPAK II is an enclosure for printed circuit cards and connectors. Mounted on back panel, connectors are easily accessible for cross wiring and check-out. Can be used in large logic storage cabinets, pull-out drawers, and as framework for small inst. panels. Made of Aluminum it consists of mounting hangers, Guide Plates: will support up to—

82 card guides—19" Single Varipak
164 card guides—19" Double Varipak
107 card guides—24" Single Varipak
214 card guides—24" Double Varipak

Printed circuit card guides, Connector mounting straps, Connector mounting panels, Front panels, and Identification marker strips. 64 standard models in 19" and 24" width units. *Vertical distance between mounting holes.

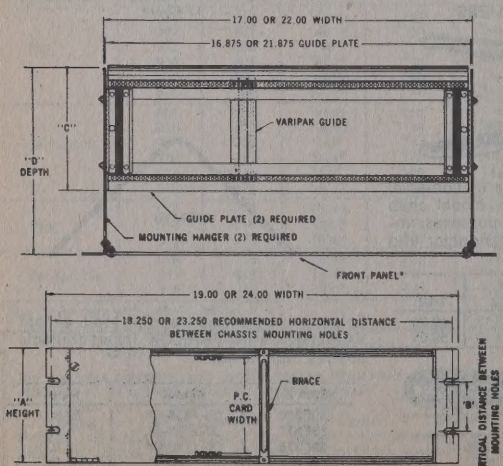
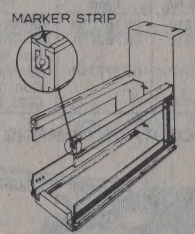
OVERALL DIMENSIONS

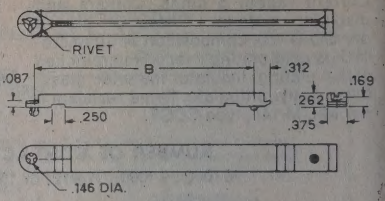




I.D. MARKER STRIP—63 9016 24 02. White matte surface to print PC rack positions. Made of extruded flexible polyvinyl. 16¾" long.

REINFORCEMENT BAR—63 9016 75 04. Provides additional support for heavy PC cards. Extruded aluminum, 16¾" long. Clear chromate finish; other finishes available. Slides into leading edge (front) of guide plate. Provision for ID labels.

P.C. CARD GUIDES



For use with Varipak enclosures. Aligns card with connector; holds card in place. Rugged polycarbonate rated 280-300° F. Wide beveled lead-in edge for easy card alignment. Guides are easily assembled and removed, without damaging either the guide or the enclosure. Guide float allows for tolerance accumulation between guide and connector.

Part Number	Nom. Card Thick.	For Assembly No.	B

All dimensions are in inches.

MOUNTING STRAPS

63 9016 23 01 01—End strap without connector mounting holes; available in six sizes
63 9016 50 01—End strap with 82 mounting holes

WIBA® Terminal Strips

ELECTROVERT INC.

GENERAL SPECIFICATIONS

Terminal strips have fully enclosed metal parts. Connections are corrosion resistant with screw terminals designed with a nickel plated phosphor bronze wire guard to prevent wire conductor damage. CSA approved/UL recognized E60678.

PRINTED CIRCUIT TERMINAL STRIPS

Terminal strips are delivered with markings. Standard marking for 5mm spacing is 1 to 24. Pressure screws are captive and secure against self-loosening. Rated at 300V, 14AWG, max. 15 Amp. Break resistant polyamid insulating body. Continuous service temperature: 100°C. Conductors enter at 45°.

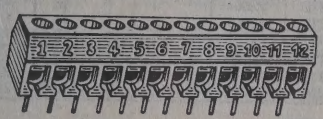
Series 8281



Fully enclosed, compact strips molded of polyamid for PC board or panel connections. Terminal poles numbered consecutively. Silver plated brass pressure connectors; terminal screws are nickel plated brass; Soldering pins hot tip tinned electrolytic copper. For 5.08 mm (.200") spacing. Available in 5 & 10 mm. Other sizes 1-24 poles available on request.

300V NO. 14 AWG. MAX. 15 AMP.

PLUG-IN TERMINAL STRIPS FOR PRINTED CIRCUITS

Provides for quick connect or disconnect of wired terminal strip from a P.C. board by means of an interconnecting pin strip. Wires connect directly to the numbered screw connectors of the terminal strip which connects to the pin strip. Screw connectors have captive wire guards to accommodate wires up to 16 AWG. Normal current: 10A nominal voltage: 300V. Insulating body: Orange Lexan 94N. Continuous use at 110C (230F). Contact sizing: 5mm.

HI-D JAX® PHONE JACKS: E.

Smaller, more compact phone jacks, mate with std. ¼" phone plugs. Molded box body protects integral silver-plated, nickel silver springs. Low contact resistance and electrical leakage with little capacity between the springs. Mount on ⅝" centers in single ⅜" hole in panels up to 5/32" thick, depth behind panel 1 3/32". (*)"N" prefix feature a threaded nylon bushing to provide complete insulation of jack sleeve from mtg. panel. **Type M-112B** is designed and adjusted to mate with telephone and MIL-std. plugs. **Type 114B** switches out speakers when connecting stereo headphones. Dual N.C. switch contacts open both stereo circuits independently when a 3-cond. plug is inserted.

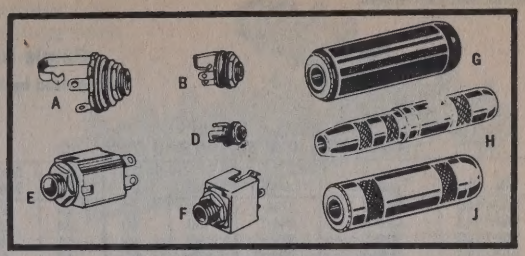
®Registered tradename of Switchcraft, Inc.



LITTEL-JAX® PHONE JACKS: A.

Quality phone jacks that mate with standard ¼" phone plugs. Notched insulating washers mechanically interlock springs and solder lugs. "V" bend in tip spring firmly "holds" mating plug. Minimum space requirements. Economical. Mounts in single ⅜" hole panels up to 5/32" thick except L-11 and L-12A in panels up to ¼" thick. **C-11** and **C-12B** have locating pins (non-turn devices). **S-11** similar to **11** except .210" I.D. sleeve. **C11, C-12B,** and **C-12A** per JAN-J-641. **14B** switches out speakers when connecting stereo headphones.

JACK COVERS: K.

Handy, rugged, spring-load phone jack covers. Covers jack openings when phone plug is removed. Protects against dust and moisture. Use with standard ⅜"-threaded bushing type jacks.

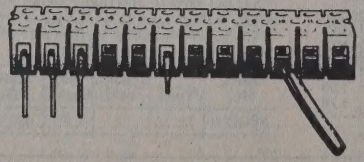
0987 SERIES—HI-VOLTAGE LOW-PROFILE TERMINAL BLOCKS



0987 Series—Hi-Lo™-Terminal Blocks™.—600 V—50 A. Accommodates wire sizes through AWG #8. Screws: steel nickel plated; Terminal Contacts: copper alloy, nickel plated; Feed-thru Contacts: copper alloy, electro tin plated. Made of 94V-O thermoplastic. UL, CSA & VDE Approved.

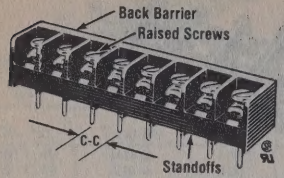
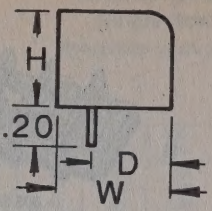
RDI Reed Devices — BARRIER TERMINAL BLOCKS FOR PCB'S

BREAK RESISTANT





- Black Barrier safeguards components from field wiring, stops shorting of adjacent wires.
- Wire-clamping plate screws secures 2 different gauge wires without wire lugs.
- Stand offs allow cleaning flux from top side of pcb.
- Screws in wire-ready raised position.
- UL grade (94V-0) polypropylene.

3PCV .250"C—C H=.50", W=.55" 5 AMPS, 150 V.

SNAPTRACK™ Relay Sockets

- Save 30% installation time.
- Save 50% wiring time.
- Coil indication lamp option.

Snaptrack™ is a PVC non-conductive track up to 48" long which mounts quickly. There are 50 different sockets which will fit one track size. Sockets have break resistant barrier terminal strips. Screws have captive wire clamps as standard and are in raised position when shipped to reduce wiring time. Sockets assemblies fit into any position along track.

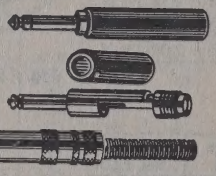
13F5044	AP250	Black Plastic	Nickel Plated	1.80
13F5045	AP255	Red Plastic	Nickel Plated	1.80

BANTAM PLUGS

Attachable Single and Dual Bantam Plugs are manufactured of profiled construction using nylon insulation for extended life. Each plug is supplied with shell, shell mounting screw, two lugs, and two lug attachment screws. Available in Black or Red shells.

Stock No.	Type	Description	Each
65F296	PJ-777	Single Bantam Plug	6.70
65F297	PJ-778	Dual Bantam Plug	13.20

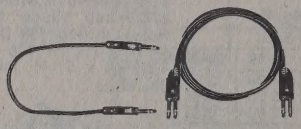
HEAVYWEIGHT PLUGS



All brass plugs designed for durability. They incorporate the best features of military plugs with the audio shaped tip. Available with the screw on metal or plastic shell. Crimp ring supplied. Optional flex relief spring is available for use with AP100B to increase cord life.

Stock No.	Type	Description	Each
13F5038	AP100	Heavyweight with black plastic shell	3.45
13F5039	AP100B	Heavyweight with brass shell	5.40
13F5040	RS100B	Brass plated flex relief for use with AP100B	.14

BANTAM PATCH CORDS



Cords are plastic jacketed, overall shielded and molded on plugs.

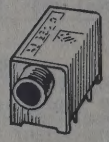
81F1910	BRK-PCB	Mounting bracket	.45

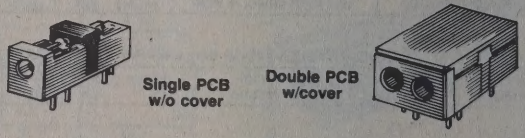
RIGHT ANGLE PC JACKS



Eliminate need for discrete wiring or mother/daughter board arrangements. Mount directly to board. Available with or without shunts. May be mounted with screws.

Stock No.	Type	Description	Each
81F1911	AJ318-1	Two conductor-12.5mm	1.60
81F1912	AJ318-2	Two conductor-18mm	1.75
81F1913	AJ339-1	Three conductor 12.5mm	1.90
81F1914	AJ339-2	Three conductor 18mm	2.15

BANTAM PRINTED CIRCUIT BOARD JACKS



Single PCB w/o cover

Double PCB w/cover

Mounts directly to circuit board. No external switching. Color selection for coding. Interfaces with industry standard Bantams and miniature telephone jacks. Compact design conserves space. Dust cover inhibits contamination.

Packaging provides addition environmental protection.

STANDARD SIZE COAXIAL JACKS

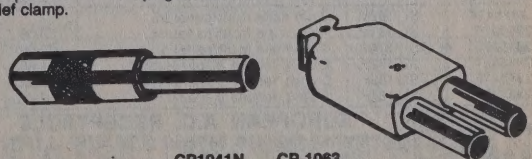
Designed for patching or accessing high frequency signals from DC to 100 MHz.

Stock No.	Type	Description	Each
81F1915	CJ-1000N	Single jack*	21.25
81F1916	CJ-1011N	Single jack*	21.20
81F1917	CJ-1014N	Multi purpose jack*	58.60

*Available with gold plating on all surfaces.

STANDARD SIZE COAXIAL PLUGS

Compatable with WE plugs. Standard wrench fittings includes cable strain relief clamp.



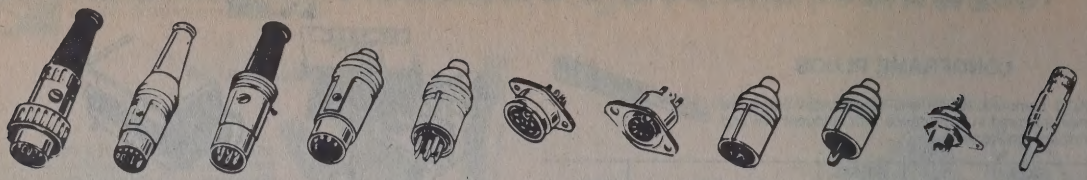
CP1041N CP-1063

Stock No.	Type	Description	Each
81F1918	CP-1063N	Dual plug*	14.20
81F1919	CP-1041N	Single jack*	21.95

*Available with gold plating on all contacts. Will fit any long frame panel.

10

SWITCHCRAFT Audio Connectors



Exact replacement plugs and receptacles for most foreign built tape recorders, radios, computers, and test equipment. Designed for all low level circuitry. Nickel plated barrel with plastic "snap-on" shells.

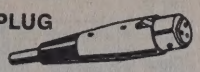
"QUICK GROUND" CONNECTORS

Feature a separate "Ground-Terminal" electrically integral with the connector shell. Ground continuity between mating plugs automatically accomplished. Socket and pin assemblies utilize "wedge-action" to assure firm, reliable positioning. ***Asterisk** denotes black velvet finish. All others satin nickel.

STRAIGHT FEMALE PLUG



Fresh, streamlined design includes rugged, diecast zinc body, satin nickel finish. Grounding feature offers 4-, 5-, 6-contact versatility. Mates with straight male plugs with similar arrangements. ***Asterisk** denotes black velvet finish. All others satin nickel.

BEAU Single-row Terminal Strips from Vernitron

HIGH BARRIER RESILIENT TERMINAL STRIPS

- **Virtually Eliminate Breakage**
- **Single Row; 3/8" Centers**
- **20 Amps, 600 Volts**
- **Feed Thru and Closed Back**

Barrier strips made of highly resilient glass-filled thermoplastic materials. Terminals are imbedded in walls of the terminal block on four sides. Enclosed contact tails eliminate entrapment of foreign materials and reduce copper wicking. Base: 3/8"W × 21/32"H. Terminals: high strength copper alloys, tin plated: 6/32" × 1/4" binding head screw.

"MITI-PLUG" AUDIO PLUG

Premium quality 2-cond. phone plug with full shielding and resistance to extremely rough usage for electified audio instruments such as guitars and basses, and other instrumentation such as amplifiers, synthesizers, power heads, speaker systems, and others requiring high quality audio plugs. Large cable clamp on all plugs. Choice of cable flex relief spring and brass, red or black plastic handle. Typical mating jack: Switchcraft No. 11.

"SILENT-PLUG" PHONE PLUGS

Nos. 169 & 172 2-cond. Silent-Plugs feature a circuit closing device that automatically shorts tip and sleeve together when plug is disconnected. Eliminates hum pickup, pops and squeals from amplifier. For high quality & professional audio applications. NEW 181 & 182 similar to 172 & 169 respectively, except they have solder lugs for quick, easy solder connections and mylar type handle insert for max. insulation. Mates with standard 1/4" Littel-Jax jacks.

Stock No.	Part No.	Fig.	Handle	Terms	Length & Dia.	1-9	10-24	25-49

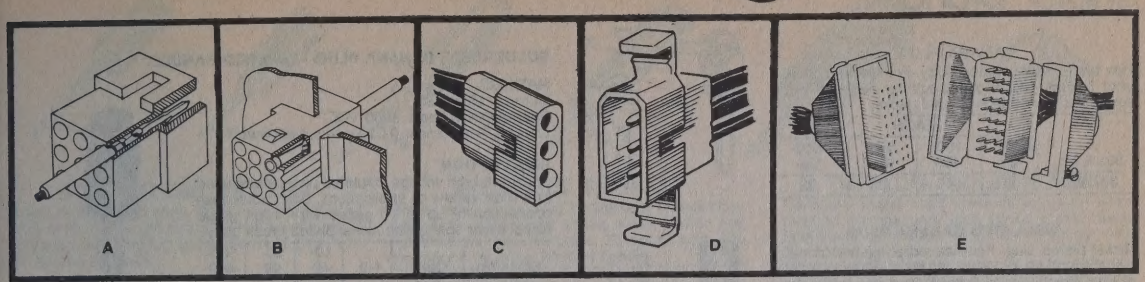
MANUFACTURED BY

Nylon Connectors

molex waldom



Mistake-Proof Polarity—Noted for great flexibility. Pin terminals easily removed individually from housing for circuit changes & reinserted. Housing is polarized; but possible to interchange female pins in receptacle and to install male pins individually in plug to achieve unlimited polarization.

Miniature connectors .062" pin terminals, 250 volts per circuit, up to 5 Amps per circuit; standard nylon connectors (using .093" pin terminals) from 1 to 15 circuits (250 volts per circuit, up to 12 Amps per circuit).

Most housings have integrally molded mounting ears for ease of panel mounting. UL Approved, CSA Listed.

SOLDERLESS BANANA PLUG—TAPERED HANDLE

RATINGS
Current: 15 amps
Breakdown Voltage: 5000 VDC
Contact Resistance: 0.010 ohms maximum

DESCRIPTION
Compact, high voltage insulated plug can be used in a wide variety of applications. Fast, solderless connection of up to 16 gauge wire. High grade nickel silver spring with nickel plated brass body.

Stock No.	Color	1-9	10-49	50-99	100-499

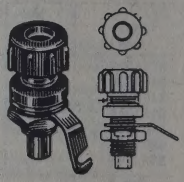
NYLON BANANA JACK

Brass, nickel plated body. Molded nylon, per MIL-P-20693A, head. Hex nut, brass tinned lug. Mts. in 5/16" hole in panels up to ¼" thick.

Stock No.	Color	1-9	10-24	25-99	100-499
39N972 39N973	Red Black	1.14	.94	.83	.70



BANANA JACK—SOLDER TYPE
For Panel Thicknesses up to 8.8mm (.343")

RATINGS
Current: 15 amps
Breakdown Voltage: 10,000 VDC
Contact Resistance: 0.010 ohms maximum

DESCRIPTION
Versatile jack has cadmium plated formed contact with pierced terminal for solder connection. Threaded nylon body withstands 7kg. cm. (6lb. in.) of thread stripping torque.

Stock No.	Color	1-9	10-49	50-99	100-499

35N1068	6.50	5.85	5.53	4.88

BINDING POSTS

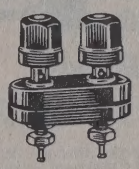
METAL BINDING POST

Brass, nickel plated head and body. Accepts standard phone tip or banana plugs.

Stk. No.	1-24	25-49	50-99	100-499
38N293	.85	.69	.62	.52

DUAL ASSEMBLY BINDING POST NYLON

Brass, nickel plated body. Captive molded Nylon head. Molded black insulation, cross slotted to accept std. phone tips in post either forward or sideways. Mounts in 2, ½" hole on ¾" mounting centers in panels up to ¼" thick. Accepts single or dual banana plugs. Supplied with 4 hex nuts. 2 flat washers.



Stk. No.	Color	1-9	10-24
35N845	Two Black	2.97	2.43
35N846	Two Red		
35N847	One Red, One Black		

INSULATED SPADE LUG

Steel hot tinned, .030" thick lug. Molded handle Tapered slots fit studs from ¼" down to #6 dia. Fits all standard binding posts. Accepts std. banana plugs in rear. Solder bridge for wire connection up to No. 18 AWG.

Stk. No.	Color	1-24	25-49	50-99	100-499
39N977	Red	.15	.14	.14	.12
39N978	Black				

NYLON BINDING POST

Captive molded Nylon, with brass, gold plated insert hex head. Brass, gold plated body. Molded Nylon, with gold plated brass insert washers. Accepts phone tip, spade lug, banana plug, alligator clip, standard or solid wire up to 15 AWG.

Stk. No.	Color	1-24	25-49	50-99	100-499
35N844	Red	2.97	2.43	2.16	1.80

Standard Binding Post

For Panel Thicknesses up to 7.15 mm (281")

Description: Fully insulated nylon binding post solves many common design problems. Nylon is flatted to prevent tuning. Metal body is silver plated with turret terminal. Threaded nylon body withstands 7kg. cm. (6.0 lb. in.) of thread stripping force. **Ratings:** Current: 15 amps. Breakdown Voltage: 8000 VDC.

Stk. No.	Color	1-24	25-49	50-99	100-499

34N860	4.25	3.83	3.61	3.19

Standard Binding Post—UL Type with Keyed Insulators

For Panel Thicknesses From 1.58mm (.062") to 6.35mm (.250")

Description: New binding post designed to meet UL-1244, IEC 348.P and C39.5-1974 specifications for distance of thumb nut opening. Keyed insulators prevent turning of installation. Metal body has turret terminal and is gold plated. **Ratings:** Current: 15 amps. Minimum Withstanding Voltage: 1000 VAC RMS. Contact Resistance: 0.01 ohms maximum.

Stk. No.	Color	1-24	25-49	50-99	100-499

81N1255	Yellow				
81N1256	Blue				

Press Fit Tip Jack

For Panel Thicknesses up to 9.05mm (.375%)

Description: Nylon body design saves production time and costs. Installs by pressing into mounting hole. Requires no mounting hardware. Silver plated contact with turret terminal sets in a nylon body. [Closed entry feature prevents access of probes over 2.16mm (.085").] **Ratings:** Current: 5 amps. Breakdown Voltage: 5000 VDC. Contact Resistance: 0.005 ohms maximum.

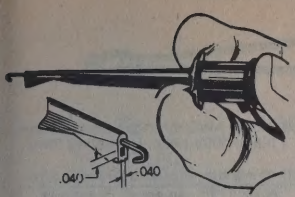
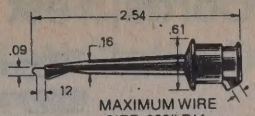
Test Leads and Clips

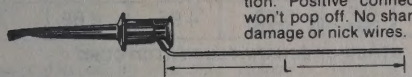
POMONA ELECTRONICS





MAXIMUM WIRE SIZE .090" DIA.

Plunger action clips with gold-plated contact hook can be connected rapidly to component leads. Clip is completely insulated to point of connection. Comfortable finger grip operation. Positive connection that won't pop off. No sharp teeth to damage or nick wires.



SINGLE END MINI GRABBER

No connector on one end to permit connection of various components. Nylon insulation molded directly to clip for added durability. Gold-plated beryllium copper tip for maximum sensitivity. Wire is 20 AWG, stranded 41x36. Extra flexible polyvinyl insulation, .087" outside diameter.

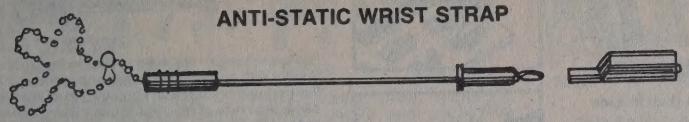
Test Adapters, Patch Cords, Anti-Static Devices

POMONA ELECTRONICS

ANTI-STATIC WRIST STRAP



MODEL 4918-48

This personnel grounding wrist strap protects even the most sensitive I.C. from accidental damage due to static electricity. The self-adjusting chain wrist strap (see inset) allows freedom of movement, yet is attractive and comfortable to wear. The unit features a built-in 1 megohm resistor. The unit is supplied with a banana jack to alligator clip adapter for quick disconnect. The strap can also be used with the model 1614 adapter for even greater versatility.

Stk. No.	Model	1-24	25-49	50-99	100-249
81F4632	4918-48	7.50	6.75	6.38	5.63

CONNECTOR TEST ADAPTERS

An ideal test adapter for the rapid testing of the hard to get at contacts of multi-pin MS type connectors such as miniature circular standard circular and rack and panel. Excellent for testing of continuity, voltage and signal on individual contacts. Test adapter available in pin and socket contact sizes 22, 20, 16 and 12.

- Gold plated contacts.
- Flexible tip prevents damage to connector contacts if test adapter is accidentally bent.
- Flexible tip allows testing of adjacent contacts.
- Fully insulated to prevent accidental shorting.
- Accepts standard banana plug.

UPPER: Banana jack, 4.22 mm (.166) dia. brass, nickel plated.
LOWER: "MS" style contact, gold plated, see tab block.
INSULATION: Polyvinyl chloride (PVC), +50°C. (+122°F.) Max.

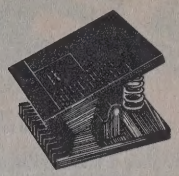
ANTI-STATIC DIP REMOVER



DIP REMOVER, SIZE 16

This DIP remover has 16 (8 per side) equally spaced notches that allows removal of DIP's from 8 to 20 pins. Accepts DIP's up to 8.89 (.35). **COLOR:** Black.

DIP REMOVER, SIZE 24

This DIP remover has 24 (12 per side) equally spaced notches that allows removal of DIP's from 22 to 36 pins. Accepts DIP's up to 16.51 (.65). **COLOR:** Black.

DIP REMOVER, SIZE 40

This DIP remover has 40 (20 per side) equally spaced notches that allows removal of DIP's with 40 to 64 pins. Accepts DIP's up to 16.51 (.65). **COLOR:** Black.

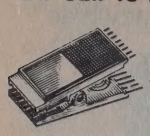
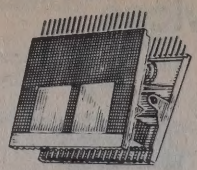
POMONA ELECTRONICS

14/16 Pin Dual In-Line

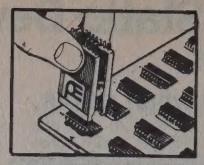
DIP CLIP IC TEST CLIPS

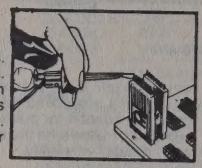


24 Pin Dual In-Line



40 Pin Dual In-Line





Specially designed to allow the attachment of test probes to IC packages. Design reduces possibility of accidental shorting while testing live circuits. Tarnish resistant, nickel-silver contacts have spring-loaded wiping action to assure good electrical connection. Positive control finger design gives positive positioning to prevent accidentally overloading sensitive circuits. Once connected, numerous test probes may be quickly connected for convenient hands-free testing in the laboratory or in the field.

MDP-ST. Standard size double banana plug with solder turret terminals; units are stackable.

1809. .08" dia. tip jack to banana plug adapter. With .166" cross hole for side stacking.

2269. Double banana jack; standard size, nickel plated, one each red and black jacks on either red or black base.

MDP-R-600. Standard size double banana jack with an internal 600 ohm, ½ watt, 1% tolerance resistor across the leads. .166" holes for top and side stack up.

2142. Miniature insulated banana jack; requires ¼" hole.

3276. Miniature banana plug with gold flashed body and threaded stud for rapid mounting.

1432. Banana jack to pin tip adapter; nickel plated brass body with .166" cross hole to allow side stacking.

2247. Miniature double banana plug patch cord. Two miniature double plugs on RG174/U coax.

3277. Miniature banana jack; for 1/16" panel, mounts in .135" hole.

3279. Same as **3277** except 1/8" panel.

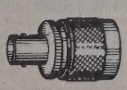
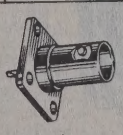
3846

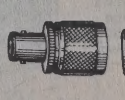


3288

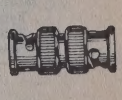
2957



2451



3286



3533

Model 4160. BNC bulkhead receptacle, 50 ohm impedance, can be mounted in panels to .134" in thickness, Teflon insulation and tarnish resistant finish.

Model 3534. Right angle BNC jack to BNC plug; 50 ohm impedance, Teflon insulation and tarnish resistant finish.

Model 3287. UHF jack to BNC plug; 50 ohm impedance, Rexolite insulation, gold flashed Phosphor Bronze contacts.

Model 3846. Isolated ground BNC jack to jack; mounts in panels up to .175" thick, Teflon insulated.

Model 3288. BNC jack to type "N" plug; contacts are gold flashed, Teflon insulation, tarnish resistant case.

Model 2957. Adapts BNC receptacle to male phono plug. All metal construction to insure proper shielding. Allows use of available BNC cables on equipment.

Model 2451. BNC female receptacle; 50 ohms, mounts in 29/64" hole, solder cup connection, Teflon insulated.

Model 3286. BNC jack to UHF plug; gold flashed contacts, Rexolite insulation, tarnish resistant finish.

Model 3533. BNC plug to plug; allows interconnection of two coaxial cables with BNC jacks. 50 ohm, Teflon insulated.

RF CONNECTOR ADAPTERS/TERMINATORS

SMA to BNC adapters are 50 ohm RF connectors adaptable to microwave applications such as couplers, dividers and mixers to 12.4 GHz, up to 1000 VRMS. BNC adapters and terminations are all 50 ohm units, contacts are gold flashed beryllium copper with Teflon insulation, exterior is a long lasting tarnish resistant finish.

METAL-CLAD NYLON TIP JACK TIPS

Shock-proof nylon and metal construction. Nickel-plated machined brass jacket protects nylon body—assures positive fastening to mounting surface.

STANDARD TYPE

These low cost metal-clad jacks have nylon tips for extremely long wear. Each is provided with formed silver-plated phosphor-bronze contact to insure optimal performance. Voltage breakdown is 7,000 volts DC. 3.8 pf. 10 amp.

SOLD ONLY IN MULTIPLES OF 5

NYLON INSULATED SOLDERLESS TIP PLUG

Durable molded nylon insulating sleeves designed so no metal surfaces are exposed when plug is inserted in jack. Connection of up to 16 gauge stranded wire. Withstands extremely high voltages and a wide temperature range. Current rating is 10 amperes. Standard .080 inch diameter pin fits all standard tip jacks. Size: 1 7/16"x3/8". Shpg. wt. 2 oz.

Banana Plugs, Banana Jacks, and Binding Posts

Kit contains an assortment of 153 banana plugs, jacks and binding posts for plug sizes 3mm (.120") dia., 4.44mm (.175") dia., and 7mm (.300") diameter. Includes both insulated and uninsulated types. Mil-Spec type and UL type binding posts. 30 banana jacks, 75 banana plugs, and 48 binding posts.

81F4465 108-2299-001 ..... 80.78

Test Jacks, Tip Jacks, and Tip Plugs

Kit contains an assortment of 360 test jacks, tip plugs and tip jacks for plug sizes 2mm (.080") and 3mm (.125") diameter. Includes both insulated and uninsulated types. Military type, Rib-Loc® types, and test probes. 180 vertical and horizontal test jacks, 90 tip jacks, and 90 tip plugs.

81F4466 105-2299-001 ..... 81.15

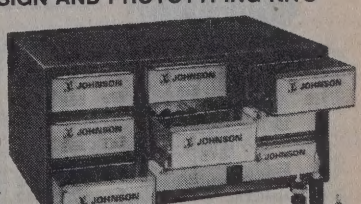
SPACER DESIGN AND PROTOTYPING KIT

Aluminum, Brass, Stainless steel, and Nylon spacers

Kit contains an assortment of 1080 spacers in 1/8"; 1/4"; 3/8"; 1/2"; 3/4"; and 1" lengths with thread sizes of 4-40 and 6-32 or clearance holes for #4 and #6 screws. 10 or 25 pieces of each part number. Includes round tubular and threaded, hex threaded, male/female and swage types. 435 brass spacers, 450 aluminum, 120 stainless steel and 75 nylon spacers.

81F4467 312-0009-001 ..... 128.25

HARDWARE DESIGN AND PROTOTYPING KITS



Each kit is a selection of the most popular standard plugs, jacks, binding posts, spacers and connectors.
Use for making custom patch cords, designing prototypes or other applications where banana plugs, tip plugs or spacers are required.

JCM DESIGNERS KIT

A connector kit that saves you design and replacement time. Contains an assortment of 45 miniature coaxial connectors in a nine drawer plastic cabinet. You can always be sure of having the parts you need.

81F4925 142-0000-01 ..... 98.40 Each

Texas Instruments

LOW PROFILE DIP IC SOLDER SOCKETS

Offers oxidation resistance by delivering hi-contact point pressure. Low profile, anti wicking design. Mount end to end on .100" centers. Body: thermoplastic—Meets UL Spec 94V-O. Contacts: Copper-Nickel alloy. Finish: Gold inlay 50 m.l. a tin inlay, 200 mi.

HI RELIABILITY-MACHINED LO PROFILE SOCKETS

SOLDER TAIL

Open body construction and high standoffs provides improved cleaning and heat dissipation. Accepts I.C. lead lengths from .090" to .155. Body: Thermoplastic meeting UL 94V-O rating. Contact: Beryllium copper. Finish: gold over nickel. Sleeve: Brass. Finish: Gold over nickel or tin over nickel.

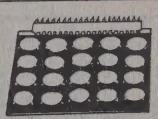
STANDARD KEYBOARDS

Keyboards to fit almost any application 10 to 40 positions. Mask to fit any keyboard design: Tactil feel, audible feedback. Due to K Lexon® discs eliminates the need for a costly board by making electrical and physical matrix (x-y) coincide (11KS series). Copper alloy termination.



Keyboard Only

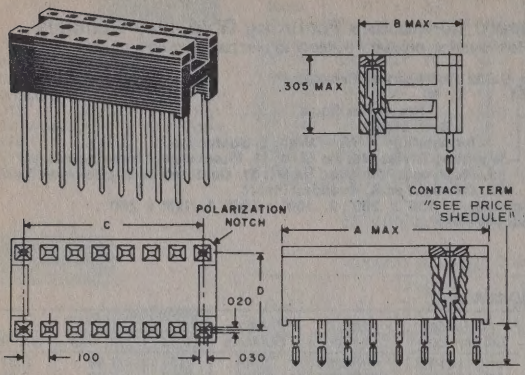
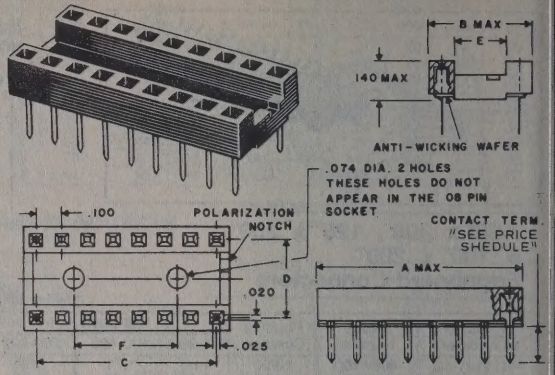
VOLTREX® brand Integrated Circuit Sockets

STANDARD PROFILE



LOW PROFILE



STANDARD PROFILE FEATURES

- **Edge wipe twin beam contacts provide optimum performance and insure years of trouble free service.**
- **Contact damage associated with testing and use is virtually eliminated by the closed entry insulator design.**
- **Sockets employ a snap-on cap which allow the user to replace contacts damaged during board assembly.**
- **Selected sockets are supplied with mounting holes which permit users to fasten them to the circuit board.**
- **Contact tails for solderless wrapping are available in three different lengths. The longest will accept up to three levels of #30 AWG wire.**

STANDARD PROFILE

18	.900	.400	.800	.300	.200	.500

LOW PROFILE FEATURES

- **Sockets are end and side stackable for economy of board space and are visually polarized by a notch at one end.**
- **Miniature twin beam edge wipe contacts for maximum reliability and extended service.**
- **The low profile of this socket allows closer board spacing or increased air flow in equipment for more efficient operation.**
- **Sockets are supplied with anti-wicking wafers which protect the spring element of contacts from solder entrapment.**
- **Closed entry insulator design to minimize contact damage during testing and use.**

LOW PROFILE MACHINED PIN SOCKET

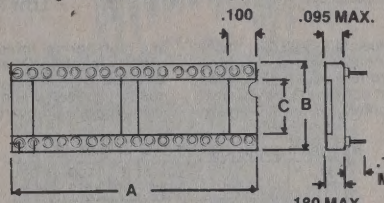
VOLTREX® brand

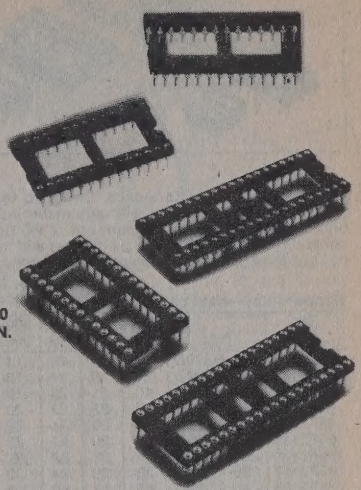
MP SERIES SOLDER TAIL SOCKETS

The MP Series is a machined pin, solder tail low-profile open-frame DIP socket. These sockets are designed to meet and exceed adverse environmental conditions including military requirements of high-vibration and shock conforming to MIL-S-83734.

This series of sockets is able to accommodate 8 through 40 flat lead DIP IC's, or 0.41/.016 to 0.51/.021 diameter round leads. Continuous grid spacing allows for optimum use of PC board. Available in tubes compatible with automatic insertion equipment, the closed end construction eliminates common solder or flux wicking problems. The two-piece tapered entry socket terminal with four leaf closed entry BeCu inner contact and machined outer sleeve will accept short IC leads.

The insulator is thermoplastic polyester, UL Rated 94V-O. The inner contact terminal is beryllium copper with gold over nickel plating (30 microinches per MIL-S-45204). The outer sleeve is brass, gold over nickel or tin plated.





Part Number	Socket Length (A)	Socket Width (B)	Pin Row (C)	No. of Contacts

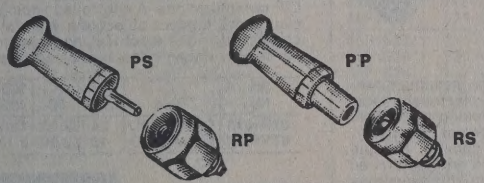
Electrical Connectors — Superior Electric

11

SUPERCON ELECTRICAL CONNECTORS



SUPERCON Electrical Connectors are designed to provide safe, rapid and positive panelboard connections. Nylon plastic parts; brass current carrying parts. Wiring connections to the same plug can be either soldered or solderless. 25, 50, and 100 ampere types are listed by UL. Socket and pin types of single-conductor plugs and receptacles are offered in 25, 50, 100 and 250 ampere capacities. 25, 50 and 100 ampere types are rated 125-250 volts a-c or d-c current interrupting; 600 volts unenergized connect or disconnect use only; 250 ampere types are rated 600 volts unenergized connect or disconnect use only. 25, 50, and 100 ampere types are CSA certified under file number LR-17812.

LOW PROFILE

200 SERIES DIP SOCKETS

- **High Normal force**
- **Automatic insertion capability**
- **Higher retention**
- **Lower insertion**
- **Gas tight performance**
- **Military approved MIL-S-83734**

Gas tight contact performance. Designed to meet MIL-S-83734. Packaged in tubes compatible with automatic insertion equipment. Continuous grid spacing for maximum use of PC board real estate. Side wipe contact for maximum electrical contact and most consistent mechanical performance. Computer designed low-profile contact for high retention and high normal force without the danger of damaging the IC lead or its plating. **Insulator:** thermoplastic polyester, UL rated 94V-0, color black. **Contact:** Copper-alloy (CDA688), tin-lead plating (-AG29D), or Beryllium copper, tin-lead plating (-AG39D); or Nickel-silver (CDA770), gold inlay in contact area, tin overlay on solder tail (-AG49D).

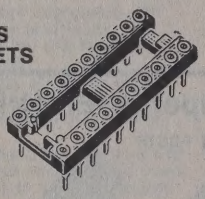
800 SERIES DIP SOCKETS



- **Continuous X-Y grid spacing**
- **Low Profile**

Four-finger screw machine inner contact for proven reliability and durability. Closed bottom construction for anti-wicking. Ladder type insulator for improved cooling, cleaning and inspection. Accommodates wide range of IC lead sizes and lengths as short as .100". **Insulator:** thermoplastic polyester, UL rated 94V-0. **Contact:** machined beryllium copper, gold-plated. **Sleeve:** machined brass, tin-lead solder plate (-AG11D) or gold (-AG10D).

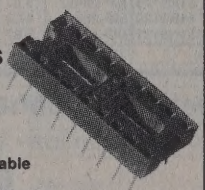
400 SERIES DIP SOCKETS



- **X and Y Stackable**
- **Low cost**
- **Dual Beam Contacts**

Dual face grip contact for maximum contacting surface. Gas tight electrical performance with 100% non-wicking properties. .048" standoffs for better visibility, cleaning, soldering and cooling. Accepts full range of IC lead sizes and lengths as short as .075" in length. Anti-overstress protection. **Insulator:** thermoplastic polyester. UL rated 94V-0. Contact plating in selective gold and tin lead. **Contacts:** Beryllium copper.

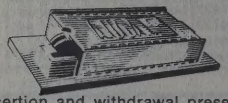
"LIF" (LOW INSERTION FORCE) SOCKETS



Ease of insertion and withdrawal preserves lead integrity and hermeticity. .600" mounting center IC packages. Specially designed Tin-lead plated BeCu contacts provide insertion force of 1/10 or less of comparable standard DIP configurations. A controlled wiping action overcomes contact objections. Normal closed contact provides electrical performance similar to four-fingered machined contacts.

SOCKET TERMINAL STRIPS

For microprocessor sockets, hybrid IC sockets, QIL sockets, component sockets, test points. Break into any desired lengths. Stackable for .100" grid spacing. Meets military requirements of high shock and vibration. Closed end construction eliminates solder or flux wicking problems. Two-piece, tapered-entry socket terminal features a four-leaf, machined, closed-entry inner contact and machined outer sleeve. Accept leads .015-.022 diameter. **Inner Contact:** machined, beryllium copper, gold-over nickel-plated. **Outer Sleeve:** machined, brass, gold-over nickel-plated or tin-over copper-plated. **Pins:** phosphor bronze, gold-over nickel-plated.

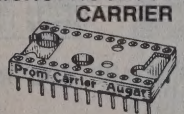
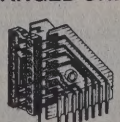
MICROPROCESSOR/PROM CARRIER



Type 524 is PROM carrier. Type 540 is microprocessor carrier. Two-piece, machined socket terminal: Inner contact — beryllium copper, gold – over nickel – plated. Outer sleeve — phosphor bronze, gold- over nickel-plated. Designed to protect fragile leads of expensive microprocessors and PROMs. Mating of carrier to microprocessor forms one unit facilitating mounting onto panels. Meets MIL requirements for shock and vibration. Closed end construction ends solder or flux wicking problems. Low profile.

Stk. No.	Type	Contacts	1-99	100-499	500-999
14F2721	524-AG70D	24	4.10	3.51	3.05
14F2722	540-AG70D	40	6.36	5.45	4.72

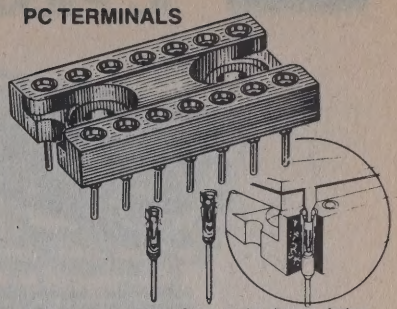
GANGED UNITS



Two-piece, machined socket terminal: Inner contact—beryllium copper, gold- over nickel-plated; Outer sleeve—brass, tin-plated. Board: glass epoxy, tin-plated copper circuitry. Terminal: phosphor bronze, solder-coated. Spacer: delrin. Permits gang mounting on PC board — .400" centers or greater.

Stk. No.	Type	Contacts	1-99	100-499	500-999
14F2723	514-AG21D	14	5.46	4.68	4.06
14F2724	516-AG21D	16	5.85	5.01	4.35

PC TERMINALS



Gold contact plating. Gold or tin sleeve plating. Space between rows: 8, 14, 16, 18, and 20 contacts — 7.62/.300"; 22 and 24 contacts — 10, 16/.400"; 24, 28, 32, 36 and 40 contacts — 15.24/.600". Insulator: thermoplastic polyester, UL rated 94V-0. Two-piece tapered entry socket terminal-four leaf machined closed entry inner contact and machined outer sleeve. Closed end construction eliminates any solder or flux wicking problems.

P SERIES SOCKET TERMINAL BOARDS

16 + 2 SOCKETS PER PATTERN V+G SLEEVES

Accepts 14- and 16-lead dual in-line ICs. Double-sided board with power and ground plates connected to two contacts in each pattern. V and G positions are sleeves (no inner contact) for soldering in capacitors or other components.

Board is ⅛" thick glass epoxy. Inner contact, outer sleeve and pins are gold over nickelplated.

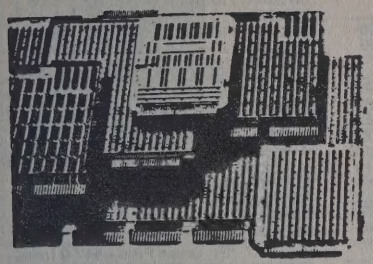
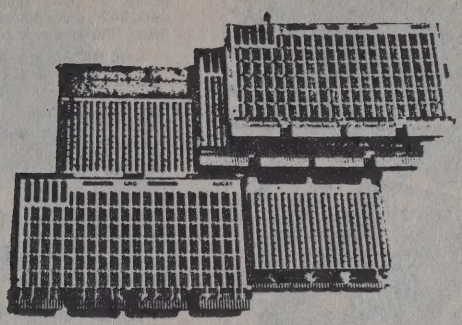
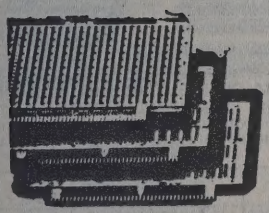
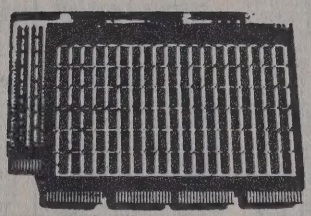
Computer Interface Panels–Wire Wrap™

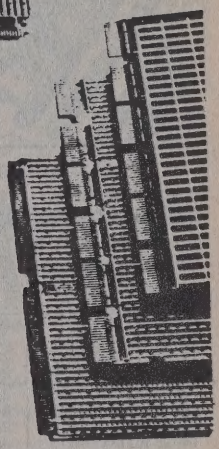
AUGAT®

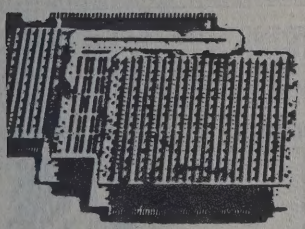


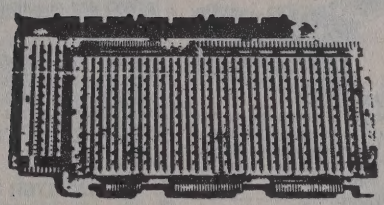












Panels for DEC, INTEL, MOTOROLA, ZILOG, IBM, TI990, DATA GENERAL, S100 and PROLOG. Pattern and universal style for most minicomputers and microprocessor systems.

High planar density wire wrap* panels offsets pin extension—affords greater volume density. All boards listed are Tin/Gold—Gold plated contacts and sleeves are available upon request.

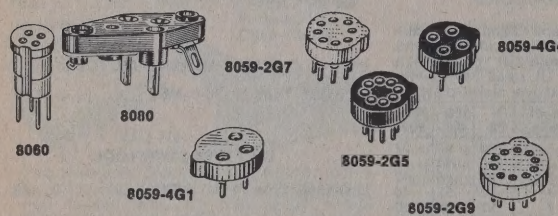
MISCELLANEOUS COMPONENT SOCKETS



Minature Transistor Sockets with 3 or 4 contacts come in 3 termination styles: turret, solder pocket, and printed circuit. Those with type numbers beginning 8058 have a pin circle diameter of .200" (5.08mm), and 8060 have diameter of .100" (2.54mm).
Power Transistor Sockets for TO-3 outline come with one or two solder lugs. They come with electro tin contact plating and black phenolic insulation, silver contact plating and diallyl phthalate insulation, or gold-nickel contact plating and black phenolic insulation.
Transistor and IC Sockets come with red, blue, green, orange, or yellow insulators and with 3, 4, 8, or 10 contacts. They have gold-plated contacts and sleeves.

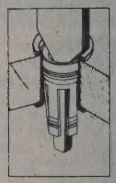
PRINTED WIRING CONTACTS



Holtite contacts press-fit into plated-thru holes using existing space within board and making plated-thru holes into sockets. Features: lowest socket profile, max. heat dissipation, 30,000 contact installations per hour, solderless gas tight insertion. Gold over nickel-plated beryllium contacts available in small, large and modified large.

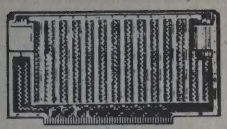
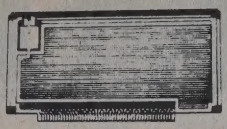
Microprocessor Interfacing Boards

Micro Vectorboard®

S100 BUS PACKAGING SYSTEM



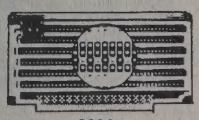
8800V



8801

8801-1

8802-1



8804

Type 8800V. Front and back power and ground planes, one heat sink, mounts 52 16-pin DIPs, or 26 24-pin DIPs or 10 40-pin DIPs plus 6 24-pin DIPs plus 4 power regulators.
38F1132 NET 24.50

Type 8801. "Pad-Per-Hole" board has individual tinned pads round most holes for tack soldering sockets or components; includes one heat sink.
65F690. NET 25.20

Type 8801-1. Bare board with contacts for maximum flexibility.
65F691 NET 17.08

Type 8802-1. Main area of board filled with rectangular tinned pads around pairs of holes. Large peripheral buses and two rows of pads at top for ribbon I/O connectors. Best suited for solder construction.
65F692. NET 32.62

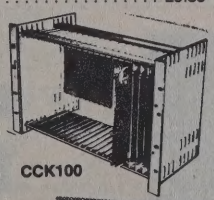
Type 8804. "Any DIP"® bus pattern on front and back accepts DIPs with leads spaced 0.1" by 0.3", 0.4" or 0.9". Holds 70 16-pin DIPs or any combination of devices.
65F693. NET 26.89

Type 8801-6. Plated thru hole pad-per-hole board. Isolated pads around each hole. Provides easier soldering. Front-to-back bus connections.
81F4769. NET 26.80

Type 3690-12. Card extender provides 7.5" long extension to facilitate testing. Mounted connector.
65F694. NET 29.33

RACK MOUNTING CAGE

Type CCK100. Especially designed to accommodate S100, Exorciser and Micromodule Plugbords. 19"W x 12.2"H x 8.9"D. Furnished with 21 pairs of guides. Adjustable rear struts mount mother boards or connectors.
10F8216. NET 56.45



CCK100

MOTHER BOARDS

Hi speed—up to 10MHz, shielded, two-sided, plated thru holes, FR4 epoxy glass, .000050" gold plated connector contacts, liberal decoupling capacitors, "reset" switch wiring pads, fully assembled.

Stk. No.	Type	Position	Net

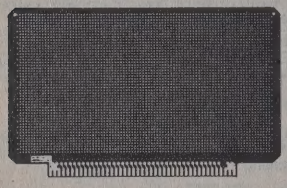
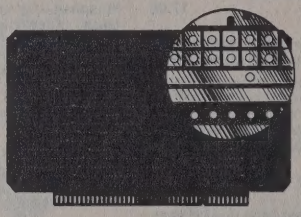
PLUGBOARDS FOR MOTOROLA EXORCISER, ROCKWELL AIM65 (Expansion)

All plugboards are 6"h x 9.75"w from 1/16" thick FR4 epoxy glass composite material with 43/86 nickel plated gold-flashed contacts on 0.156 inch centers. Contacts are identified and terminated per Motorola's standard. An overall pattern of .042" holes on 0.1" grid allows mounting any size DIP, discrete components, solder or W.W. terminals.

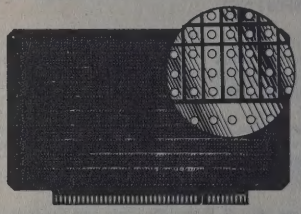
Universal plugboards for Motorola's M6800 based module system allow the user to make custom wired cards which are compatible with Motorola's plugin boards. Using the boards and connectors shown users can build custom interface special circuits and expand memories for systems using the following buses: S100, SBC80/10 or 20, or DEC, LSI11, PCP8 or 11, Motorola Exorcisor, STD, or Apple. Maximum flexibility is provided by card designs offered with overall hole patterns for user mounted DIP sockets and circuit components. Card interconnection can be easily made with conventional soldering and wire wrapping tools and with listed motherboard. All plugboards are 6"h x 9.75"w from 1/16" thick FR4 epoxy glass composite material with 43/86 nickle-plated gold-flashed contacts on 0.156 inch centers. Contacts are identified and terminated per Motorola's standard. An overall pattern of .042" holes on 0.1" grid allows mounting any size DIP, discrete components, solder or w.w. terminals. Additional I/O capability is available by installing .025" square header pin blocks in the .1" spaced tinned pads on the board top edge on models 4611 and 4611-2.



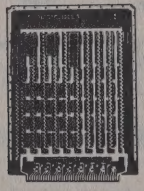
Model 4611-1 is bare except for contacts and provides maximum component density, wiring and layout flexibility.
10F8215 NET 21.75



Model 4611-2 accepts up to 78 16-pin DIPs or smaller number of other mixed sizes and has two heavy buses on one side for power and ground. Designed for wrapped wire construction.
10F8214 NET 32.65



Model 4611 accepts up to 43 16-pin DIPs and has groups of 3 hole tinned pads, 2 heavy buses on one side and is designed for soldering or wire-wrapped construct.
10F8213 NET 32.65



4305

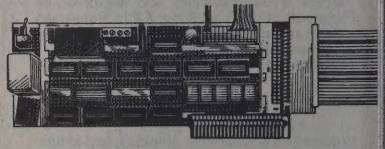
Type 4350 compatible with TI980-series computer. Holds 63 (14- or 16-pin DIPs) over power and ground buses; 6 (24-pin) and 45 (14- or 16-pin DIPs); or 40-pin DIPs by cutting one etched lead per location. Extra zig-zag power bus on each side of board. Mating Connectors: R680, R680-1 type has reversed numbering than the R680 type.

Stk. No.	Type	1-4	5-24	25-99
38F1133	4350	26.09	23.48	20.87

Additional I/O capability is available by installing .025" square header pin blocks in the 1" spaced tinned pads on the board top edge on models 4611 and 4611-2

4607

Type 4607 Plugboard measures 5.19"w x 8.43"h x 1.16" thick and has two sets of nickle plated, gold flashed 18/36 etched contacts on 0.125" centers. Overall grid pattern of 0.1" with .042" dia. holes for max. layout flexibility. Solder tail or wrap post sockets readily fit pre-punched holds. Board Mat. FR4 epoxy glass G-10 laminate. Mating Connector - R680.
65F697 ....., NET 18.61



Type 4609. Plugboard fits Apple II and similar systems and has combination of heavy 2 oz. copper etched tinned buses and 2-hole pads for easy mounting of 16, 18, or 40-pin DIPs. Extra 20/40 .1" spaced connector pattern provides additional I/O capability. Overall size 2.75" by 7.4" without connector projections and 3.125" by 7.7" with connector.
10F8210 NET. 25.07

Plugbords and Connectors

Vector

Plugbords listed with the "WE" suffix indicates that the board material is FR-4 grade glass epoxy per MIL-P-18177. Boards without the "WE" suffix are FR4 type glass composite material. All plugbords are 1/16" thick and have nickel gold plated contacts. On boards with buses and/or pads, solder tinning is provided for faster and easier connections.

DIP PLUG-IN BOARDS FOR WIRE WRAPPING CONSTRUCTION

Boards listed have .042" dia. holes on 0.1" grid and Models 4493 and 4494 accept DIP's with leads spaced .1 by .3", .4", .6", or .9", without overlapping bus lines.

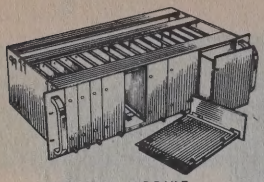
Vector-Pak Packaging System

MODEL CCM-14A

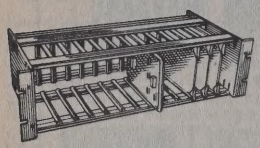


CCM-14A MODULE CAGE ASSEMBLY

Mounts intermixed circuit sizes without any guide adjustment. Card mount front panels are multiples of 1", and easily detachable for punching switch and indicator light holes in the flat. Four sizes of L-brackets may be intermixed in any order in rack mounted card cage and are provided with single jack screw for positive retention and easy installation and removal of card. Size 5¼"H x 19"W. For 4½" x 6½" cards.

Stk. No.	Type	Description	Each
38F1110	CCM-14A	Fully assembled cage, accepts modules below	77.83
38F1111	CM45A65-1	Module with 1" wide front panel	6.88
38F1112	CM45A65-2	Module with 2" wide front panel	7.15
38F1113	CM45A65-3	Module with 3" wide front panel	7.71
38F1114	CM45A65-4	Module with 4" wide front panel	8.08

MODEL CCK CAGES



Discrete guide, all aluminum for 19" rack mounting. Supplied completely assembled with adjustable mounting struts for easy connector attachment without hole drilling or special hardware. Have 21 pairs of aluminum riveted guides, except types with "P" in part number which have ABS plastic guides.

Stk. No.	Type	Hght.	Dpth.	Card Size	1-9	10-49

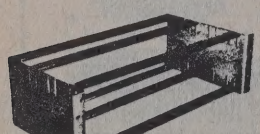
MULTI-PURPOSE CAGE KITS



For those applications where pre-assembled units lack the versatility needed due to special size requirements, etc., multi-purpose kits are available. These adjust to all card, module or receptacle size within range. Kits are supplied unassembled and have all required hardware. Major parts include 2 aluminum flanged side walls formed and slotted for standard rack mounting, 6 extruded aluminum T-struts (cross members) with mounting brackets and printed scale marking plus large assortment of required and extra screws, nuts, and lock washers. Card guides must be ordered separately. Special features of these kits are: slotted side walls for maximum mounting versatility —bracket mounting for all cross members (T-struts) for forward-backward positioning.

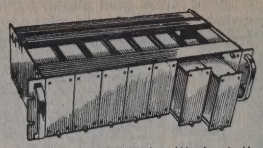
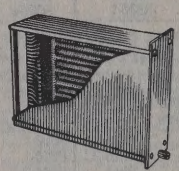
STRUT MODULE CAGES



Vector Strut module cages provide an easy way to rack mount modular aluminum cases containing circuit boards. Cages are all anodized aluminum with heavy side walls, extruded cross members and are shipped completely assembled with installed guides, ready to accept eight 2 inch or ten 1.6 inch wide aluminum EFP cases described below. Special extruded cross members at rear have preloaded 4-40 nuts for connector mounting and adjust 1.75" laterally and 1.70" vertically to accept different length connectors.

Stk. No.	Type	Description	Each
38F1356	CMA3A20	5¼"H x 19"W x 8.9" Dp assmbld. cage for 8-2.0" wide modules	71.32
38F1358	CMA3A16	5¼"H x 19"W x 8.9" Dp assmbld. cage for 10-1.6" wide modules	78.27
38F1184	CMA4A20	5¼"H x 19"W x 12" Dp assmbld. cage for 8-2.0" wide modules	73.24

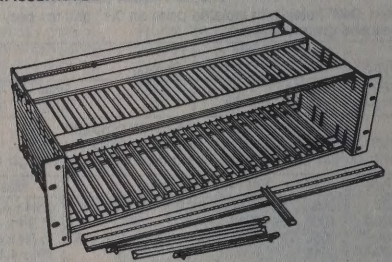
EFP MODULES FOR VECTOR STRUT CAGES



Modules accommodate 4.5"W x 6.5" or 9.6"L, or 7.98"W x 11.3"L circuit cards completely inside which mount in .150" spaced extruded grooves running lengthwise in cases. 1.6"W modules have 6 circuit card grooves; 2"W modules have 9 grooves. Module front panels are .080" thick and furnished with captive 10-32 thumb screw. Provide about 80 db of shielding.

Stock No.	Type	Description	Each
38F1185	EFP164-A66	Case, 1.6" wide by 6.6" long accommodates cards 4½" wide by 6½" long within unit. Fits CMA3-16.	11.82
38F1361	EFP204-A66	Case 2" wide by 6.6" long. Accommodates cards 4½" wide by 6½" long within unit. Fits CMA3-20.	12.15
38F1186	EFP204-A97	Case 2" wide by 9.7" long. Accommodates cards 4½" wide by 9.6" long within unit. Fits CMA4-20.	13.94
38F1360	EFP104-A66	Case 1.0" wide x 6.6" long x 4.6" high for max. card size 4½" x 6½" x 1/16".	11.53

UNASSEMBLED CARD CAGES WITH SNAP-IN GUIDES



Lower priced and more flexible. All-aluminum 19-inch rack mounting side walls and extruded cross members with holes for snap-in guides plus 4-way adjustable rear struts, pre-loaded with hardware for attaching connectors. Furnished molded snap-in nylon guides for 1/16" thick circuit cards. Cages accept 6½" long cards 3" to 4½" wide. Card spacing—any multiple of .25.

8002

CIRCBORDS

Have the advantages of plugboards without expense of plug-in connectors. All boards listed are 0.042" diameter holes on 0.1" grid and measure 4½ inches by 6½ inches by ⅛". Material is FR4 type epoxy glass composite with 2 oz. tinned copper patterns as indicated on one board side; back side of boards is bare.

Model 8001 is designed primarily for soldered construction and can mount up to 20 16 pin DIPS using one hole of each 3-hole pad per lead. At one end, 238 square tinned pads on .1 inch (2.54mm) spacing surround each hole for tack soldering discrete components or I/O headers.

Stock No.
38F1249. Net 10.85

Model 8002 is designed primarily for wrapped wire construction with interdigitated buses for two voltage levels. Up to 35 16 pin DIPS can be mounted. Use of WW sockets is recommended with Vector push-in wrap post terminals being used for soldered bus connections and WW interconnection points. At one end 238 square tinned pads on 0.1 inch spacing around each hole for tack soldering discrete components or I/O header.

Vector Circuit Builders Tools

CONVENTIONAL WIRE-WRAPPING AND UNWRAPPING TOOLS

Type P160-2B. Manual tool for making solderless wrapped connections. Hardened steel bit insures long life. Will wrap 26 to 30 gauge pre-stripped wire on 0.025" to 0.028" square wrap posts (Standard terminals or WW DIP sockets). May be used for wrapping bare wire point to point. Effective radius of 0.070" permits working on terminals spaced 0.1" apart, and its 0.56 minimum post hole depth permits multi-level wrap capability. For power wrapping, insert tool in P160-4R3 driver unit.

Type P160-1B. Dual Way Manual Unwrap tool slips over terminal and is turned to unwrap 26 to 30 gauge wires which were wrapped either right or left on 0.025" or 0.028" square posts.

Type P160-4R3. Convenient right hand turning rechargeable Electro driver tool. Light weight (9 oz.) accepts P160-2B, P160-9 manual wrapping/unwrap tool or P180 or P184 manual Slit-N-Wrap tools in its chuck. (P207 adapter required on Slit-N-Wrap tools). Sturdy shock-resistant high torque P160-4R is shaped in straight line configuration for working on horizontal as well as vertical planes. Just a touch of the switch on the pistol-type grip provides 6 to 8 gas tight wraps. Supplied with ni-cad rechargeable batteries and 110V recharger. May be used remotely without cord for many hours without recharging, or may be used with cord to extend its working time.

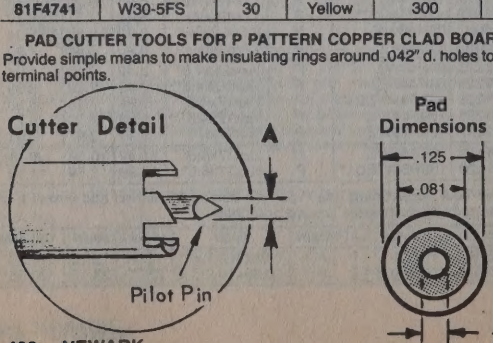
PAD CUTTER TOOLS FOR P PATTERN COPPER CLAD BOARDS

Provide simple means to make insulating rings around .042" d. holes to isolate terminal points.



SLIT-N-WRAP™ WIRE WRAPPING TOOLS AND WIRE

- **No Stripping**
- **No Precutting**
- **No Premeasuring**
- **No Loading**
- **Daisy Chain Wraps**
- **Quick Change Bits**
- **Reliable Wraps Meet MIL-STD 1130A, par. 5.6**
- **U.S. & Foreign Patents**

Specially designed tip slits the wire insulation just before it is wrapped on a post. Wire feeds from a spool making "daisy chain" connections with single level wraps.

P184-3 AC MODEL (110V AC) has 300' spool of Tefzel 28 ga. wire with tension regulator spring to reduce wire breakage, stationary wire gripper to avoid need to hold wire end at start of wrap, wrap bit shaft set-screw mounted, power transformer.
76F1112. 1-4 pcs 136.25

P180-3 Power (110V AC) for Polyurethane Wire. Same features as P184-3 except has 2 100' spools of polyurethane nylon insulated wire instead of Tefzel.
81F4744. 1-4 pcs 136.25

P184-2 DC Model. Features same as above P184-3 except is nickel cadmium battery powered. AC recharging unit included.
76F1110. 1-4 pcs 136.25

P-180-2 Same features as P184-2 except has 2 100' spools of polyurethane nylon wire.
76F1105. 1-4 pcs 136.25

P184-5 Manual Tool. Includes two 50' spools of Tefzel 28 ga. wire, tension regulator spring to reduce wire breakage, wire gripper sleeve at tip to avoid need to hold wire end at start of wrap.
81F4745. 1-4 pcs. 47.9

P180-5 Same features as P184-5 except has 2 100' spools of polyurethane wire.
81F4746. 1-4 pcs. 47.9

P184-1 Same as P184-5 except that it is supplied with 1-pc. wrap bit housing (no wire grip tip) for reduced cost.
76F1107. 1-4 pcs. 42.5

P180-1 Same as P180-5 except that it is supplied with 1-pc. wrap bit housing (no wire grip tip) for reduced cost.
76F1103. 1-4 pcs. 42.5

P184-7 For 28 ga. Tefzel Wire. 110V AC power Slit-N-Wrap tool with electronic turns counter. Assures uniform number of turns for each pull of trigger. Other features same as for P184-3.
81F4734. 1-4 pcs. 215.8

P180-7 For 28 ga. polyurethane nylon wire. Similar to P184-7 except for 2 ga. polyurethane wire on 100' spool (2 spools supplied). Other features same as for P180-3.
81F4747. 1-4 pcs 215.8

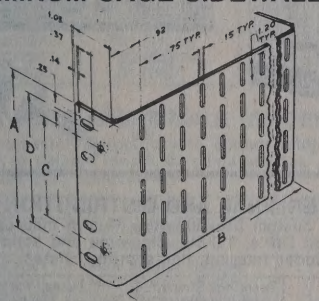
All aluminum handsome styling, grooved inside to accomodate different applications

Made from sleek extruded aluminum with four grooved interior surfaces which hold 1/16" circuit card chassis plates without need of additional fasteners. One surface is fastened with four screws. Two side panels may be punched for meters, switches, etc.

ALUMINUM CAGE SIDEWALLS



SERIES "P" side walls have multiples of 3, 4 or 5 rows of slots with equal spacing. Slots are positioned to mount struts flush top and bottom, or in from top and bottom to a max of 1.04 each edg.

Stk. No.	Rows of Slots Equally Spaced	Type	Hgt. A	Dpth. B	Mtg. Holes	1-9

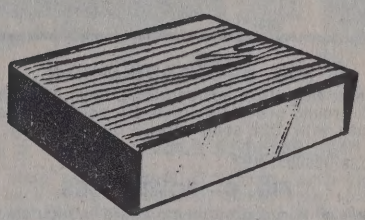
CONO SERIES INSTRUMENT CASES



Quick Access. Sturdy 0.062 inch thick aluminum cases with vinyl finished covers. Smartly styled desk top enclosures for electrical and electronic assemblies. Two sets of oval ventilation holes across rear chassis bottom and on upper area of back panel provide excellent convection cooling. Furnished completely assembled with four adhesive mounting bump feet.

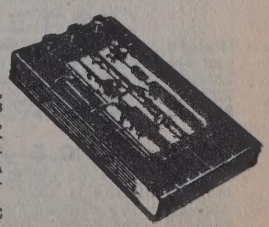
Type NT6-3/24. Pack of 24 plastic inserts and screws to fasten strut to side walls.
2081F4765 ..... 2.00

KLIP-BLOK KIT



51X KLIP-BLOK KIT. Accepts up to 12 DIPs, has 970 tie points. Has 4½" x 8" x 1/16" glass epoxy premarked Micro-Vectorbord® base, eight 24-quad (T66-96) Klip-Bloks, four 48-contact Klip-Buses installed. 3 5-way binding posts at one end. Incl. stick-on MS9A and MS10A DIP contact Marker Strips, T49-1 Adapter Pins for Klip-Bloks/Strips.
38F1123. Net 39.93

Integrated Circuit Accessories

BREADBOARDS, TERMINAL STRIPS AND TEST CLIPS

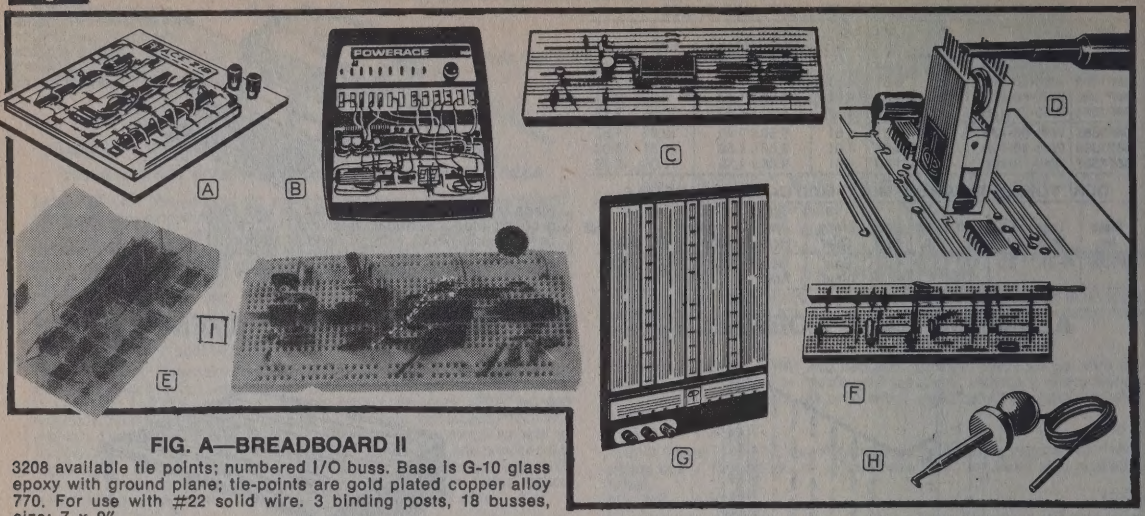


FIG. A—BREADBOARD II

3208 available tie points; numbered I/O buss. Base is G-10 glass epoxy with ground plane; tie-points are gold plated copper alloy 770. For use with #22 solid wire. 3 binding posts, 18 busses, size: 7 x 9".

65F110. Type 923605. **NET** 150.00

FIG. B—POWERACES

PA 101 general purpose prototype board w/regulated +5 to +15 volt power supply at 600ma and built in meter. **PA 102** for designing digital circuitry contains a one-shot pulse generator, clock generator with 1, 10, 100 Hz, 1, 10, and 100 KHz; 4 data switches; 2 logic switches w/debounce; pulse detection and 3 logic indicators. **PA 103** has +5V at 750ma, +15V and −15V at 250ma w/-15-0-+15V meter; 2 logic indicators; 2 logic switches and 2 data switches. Size: 7.5"W x 11.5"D x 4"H at rear but only 0.75"H at front. Wt: approximately 2.5 lbs.

FIG. I —CIRCUIT STRIP

Molded in alpha-numeric grid. Fast and easy identification of each tie-point in your ci rcuit. Ideal for electronic training programs. Components plug in—use 22AWG solid hook up wire. Accepts all components up to .032" dia. Size: 2.25" x 4.90" x .32".

81F1388. Type 923253. NET 14.00

FIG. E—JUMPER WIRE KIT

Contains 350 wires cut to 14 different lengths from 0.1 to 5.0 inches. All wire is solid, tinned, copper 22 awg, PVC insulated. Pre stripped and pre-bent at 90°.

65F2290. Type 923351. **NET**..... 13.95

FIG. F—TERMINAL AND DISTRIBUTION STRIPS

For building custom breadboards. Plug-in matrices on .1 x .1" centers for all DIP's, TO-5's, discretes and solid wire jumpers to .032". Includes integral, non-shorting, instant mounting back.

Stk. No.	Type	Terminal Strips, Distrib. Strips	Buses, Term. and Tie Points	Each

kepro Bench Top Printed Circuit Components

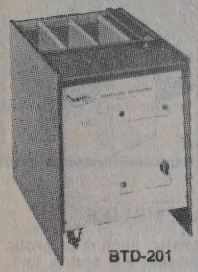
Kepro Circuit Systems, Inc.

BTX-200

ULTRA-VIOLET EXPOSURE FRAME

Type BTX-200. Exposure of photosensitive coatings in less than 2 minutes. An adjustable 5 minute timer extinguishes high output UV lamps at the end of the exposure cycle. Heavy foam padding provides excellent contact pressure between the negative and the light sensitive surface to be exposed. A pin registry rail is provided for easy 2 side registration. Four .125" dia. pins are positioned on 0", 4", 6", and 10" centers. 19½"L x 16½"W x 6"H. Shpg. wt. 30 lbs.

80W476. NET 435.00



BTD-201

CONTROLLED TIME SPRAY DEVELOPER

Type BTD-201. Designed to spray develop exposed photosensitive coatings requiring either solvent or alkali based chemistry. Developing cycles of 1 to 1½ minutes are controlled with a 5 minute electrical timer activating the spray pumps. A metal chemical tank is used and the exterior case construction is of P.V.C. plastic. 22"L x 15"W x 20"H. Shpg. wt. 60 lbs.

79W103. NET 640.00

BTE-202

DOUBLE SIDE SPRAY ETCHER

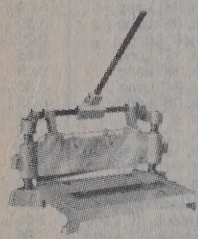
Type BTE-202. Single or double clad P.C. boards may be etched in less than 3 minutes. A 1000 watt grounded titanium heater maintains the four gallon etchant sump at a constant temperature of 120°F. Twin side manifolds distribute a random etch spray pattern against both sides of the vertically held panel. Construction materials compatible with commonly used etchants. 22"L x 14½"W x 20"H. Wt. 60 lbs.

80W475. NET 715.00

PRECISION MULTI-6 SHEARS

Type MS-6. Hand operated tool designed to cut circuit board laminates through .093" thick and sheet metal up to a thickness of .063". Cutting widths of 12.125" are possible. Accessory tooling described below. 11½"L x 18"W x 9"H. Shpg. wt. 24 lbs.

78F150. NET 355.00



MS-6

ACCESSORIES FOR MS-6

Type PS-2. Random 2-Hole Punch. Punches two randomly located .125" dia. holes.

78F151. NET 60.00

Type NA-1. Corner Notcher. Cuts 90° corner notches up to 1" x 1".

78F152. NET 77.00

Type PB-1. Press Brake. Makes 90° bends in soft aluminum or sheet steel.

78F153. NET 60.00

Type DA-2. Drilling-Routing. Holds .030" thru .125" drill bits or routing cutters.

79W102. NET 114.00

COPPER CLAD — PHOTOSENSITIZED

All materials are photosensitized with Eastman Kodak® KPR type 4 and are ready to shear to size using a KEPRO MS-6 shear. 24 sq. ft. of copper clad laminate sheared to convenient 12" x 24" size and packaged 12 pieces per package.

Fig. A — HOT ROLL DRY FILM LAMINATOR

Model BTL-121 Dry Film photo resist, 12" wide can be laminated to the top surface of copper clad panels at a constant speed of 5.4 FPM. Requires eight minutes pre-heat time for pre-set laminating rollers. Combination vent hood/film cover protects against light strikes of emulsion and provides collector for user venting. Supplied with 125 ft. roll of Dry Film and roll of 13" wide backing paper. PVC, stainless steel, anodized aluminum, and baked enamel finishes. Requires 115 VAC, 12 A, 60 Hz. 18 x 20 x 16". min. thick. .062". 65 lbs. shipping.

PHOTO LAYOUT KIT

Type PL-2A. For preparing camera-ready artwork without inking and lettering. Reduced layout time by use of pressure-sensitive tapes, dots, letters and numerals. Contents: 96¼" Tape Dot Terminations. 108"-1/8" Tape Conductor Strips. 216"-1/16" tape Conductor Strips. 1-translucent-type (letters and numerals, assorted sizes) sheet. 1-Acetate Sheet (8" x 10"). 1-Mech. Neg. (8" x 10"). 2-Sheets of Graph paper, 1/10" grid 8 x 10". 1-Instruction sheet. Wt., 1 lb.
19F2006. NET 5.75

MASTER PHOTO LAYOUT KIT

Type PL-200A. This package includes all necessary materials to make Master artwork on stable base drafting films. Utilizes the same time saving methods as the PL-2A. Contents: 2 pcs. 18"x24" Matte Surface Mylar, 1 pc. 1/10" grid. 432-1/8" tape dot termination. 567-¼" dot termination. 252-½" dot terminations. 18 yds.-1/16" tape conductor strips. 21 yds, -1/8" tape conductor strips. 18 yds. ¼" tape conductor strips. 1 sheet—8½"x11" translucent (letters and numerals, assorted sizes) sheet. 1-Bow Compass (with knife cutters) 1-Center Dot Cutter, 1-Cutting Knife Set, 1-Peeling, 1-instruction and Data Sheet. Shpg. wt. 4 lbs.
19F2007. NET 107.15

NAMEPLATE & PANEL KIT

Type NP-303A. Kit permits you to prepare name-plate by a simple photographic process. Plates are exposed to light source through artwork made from supplied materials. Panels are then dev., no fixing nec. Finished plates are aluminum and contrasting dk. blue. Contents: 2-8"x10" Aluminum Sheet, 1-8"x10" Acetate Sheet, ¼-Sheet translucent-type. 1-8"x10" Print Glass, 1-1oz. Bottle developer, 2-2x2x¾" Appls. (sponges). 2-(8x10") pressure sensitive adhesive. Shpg. wt. 1 lb. 1 oz.
19F2008. NET 19.10

ETCHED ANODIZED NAMEPLATE & PANEL KIT

Type NP-404. Produces etched nameplates and panels using anodized aluminum stock. Processed by exposing, developing, and etching plates. Finished plates are black anodized aluminum and natural color aluminum finish. Contents: 3-3x6" Aluminum Panels. 3-3x6" Acetate Sheets, ¼-Sheet translucent type. 1-Print Glass, 2-3" Clamps, 1-4 oz. Bottle Developer, 1-2 oz. Package Etchant, 1-Dev. Tray, 1-Etch Tray. 3-(3x6") pressure sensitive adhesive. 1½ lbs.
19F2009. NET 12.65

SILK SCREEN KIT

Tyep SC-601A. Professional materials and equipment for producing lacquer resistant film type photo stencils with print area up to 7"x9" and to use these stencils to screen-print 1000 or more impressions per day. No dark room needed. Kit includes screen printing frame with one stretched silk in place plus silk and emulsion for two additional patterns, mounting hinges, squeegee, black and white inks, film printing frame, photo-flood lamp, trays and all necessary chemicals and solutions. Shpg. wt., 13 lbs.
80W127. NET 97.20

ELECTROLESS PC BOARD TIN PLATING KIT

Model ITP-801A. Simple immersion process deposits thin coating of essentially pure tin to etched copper circuit to protect from oxidation and to provide exceptional solderability. Immersion tin plating is a chemical process and requires no expensive electroplating equipment. Immerse solution at room temperature. Board is removed from tray, rinsed 3 minutes under running hot water, then another 3 minutes under running cold water. Kit includes high-temperature glass tray, accommodating board sizes up to 7" x 10"; board handling rack; 1 qt. immersion tin solution (sufficient for plating patterns on approx. 25 sq. ft. of etched panels) and complete instructions. Shpg. wt., 5½ lbs.

MIDLAND ROSS / Cambion Division IC Sockets & Accessories

TYPE 703 IC SOCKETS

One-piece molded diallyl insulators withstand high temp. and provides excellent mechanical stability (Nos.-3777 and -3778 are one piece molded glass-filled nylon with anti-moisture bosses). Phosphor, bronze contacts accept flat or round pins up to .024" dia. Standard terminal plating is -03 gold for all Wire-Wrap; -04 electro-tin for all solder tab sockets. Sockets can be supplied with electro-tin plating on Wire-Wrap pins or with gold plating on solder tab pins—May be permanently mounted individually (rivet or screw) or press-mounted in PC boards or panels for production or breadboarding.

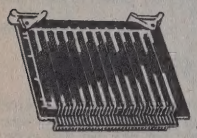
HIGH DENSITY WIRE-WRAP CAMBI-CARDS

714



715

PC boards accept dual-in-line IC sockets, in-line IC's and discrete components. Wire-Wrap interconnections. Each socket position on 715 Series (on every other row on 714 Series) has two auxiliary pins to permit connecting each C to power and ground planes. Cards with sockets affixed with sockets and spaces for discretes; for all discretes; copper-clad and blank cards, card extenders and general purpose cards without sockets but with grid patterns. All cards have edge connectors. Board material—.062" thick, double clad copper, epoxy glass cloth type FL-GE per MIL-P-13949. Pin plating, gold over phosphor bronze material. 715 Cards, 4.5" wide. 714 Cards, 9.75" wide.

COMPONENT SOCKET ADAPTERS

Plug into standard 14, 16, 24 or 36 pin dual in-line sockets or Cambion integrated socket strip. Larger width sizes for wider components straddle two sockets or socket strips. Terminal pairs are on .100" or .200" grid centers. Terminal is phosphor bronze, spring tempered per QQ-B-750; Comp. A. Finish is hard gold plate. Board material, .062" type GEE glass epoxy per MIL-P-18177. Also available with tin plating.

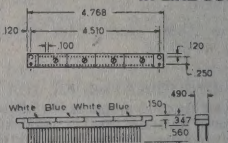
80 PIN DUAL IN-LINE SOCKET STRIP



Molded diallyl body .025" sq., Wire-Wrap posts and spring contacts. Electro-tin plated contacts standard. Mounts all dual in-line devices without a PC board for independent mounting or into Cambion mounting frame or relay rack drawers. Pins are replaced by removing the screw down covers. Socket strips accept five 14 pin DIP's, four or five 16 pin DIP's. Wider MSI or LSI DIPs can be mounted by bridging between two properly-spaced grips.

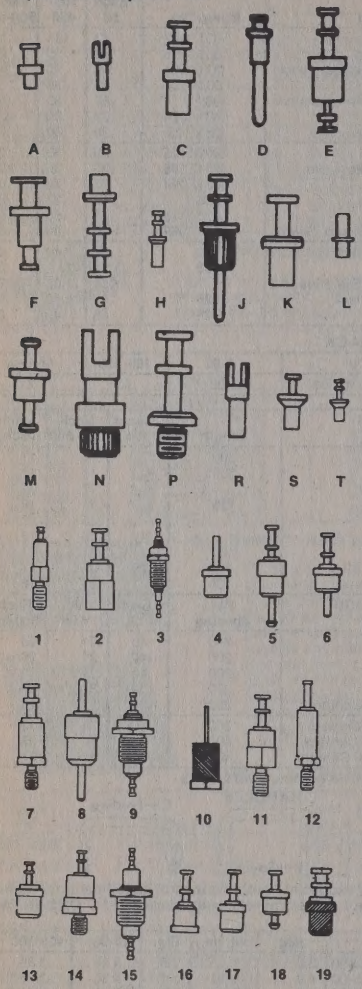
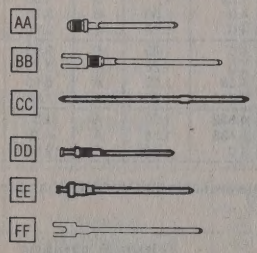
Solder Terminals

Suffix in type number indicates board thickness size: —**01**, 1/32"; —**02**, 1/16"; —**03**, 3/32"; —**04**, 1/8". Number in plating column indicates finish; **01** is silverplate, **04** is electro-tin plate and **05** is electro-solder. **Order number of terminals required in multiples of 100.**



WIRE WRAP TERMINALS



Type 3748-02-04. For board 1/16" thick, .090 mtg. dia.; .045 sq. wire-wrap pin with turret.
Type 3848-01-03. Board .062-.125" thk., .056 dia.; .025 sq. wire-wrap pin, turret.
Type 3854-01-03. Board .052-.188" thk., .058 dia.; .025 sq. wire-wrap pin, turret.
Type 3866-01-03. For board .062" thick only, 058 mtg. dia.; .025 sq. wire-wrap pin, turret. **Order number of terminals required in multiples of 100.**

STUD, TAPPED AND RIVET-MOUNT TYPES

Types 1503, 1504, 1510, 1511 and 1947 are Teflon; 1581 and 1795 are phenolic; 4810-4899 are molded diallyl; others ceramic. Last suffix in Type No. indicates color; —19 white; —16 blue; —00 no. color choice. Next-to-last suffix indicates terminal plating; —01 silver; —05 electro solder; —03 gold. Studs are cadmium plus colored chromate. (*) meets MIL-T-55155. All are double turret except (†) single turret, (**) fork terminal. **Order by number of terminals required in multiples of 10.**

HAND WIRE WRAP TOOL

For wrapping solid copper 30-AWG wire. Low cost alternative to power equipment. Molded glass filled nylon. Size: 3.225"x.480"dia.
13F3175. Type 435-1816-01-00-16 ..... 4.40

IC INSERTION-EXTRACTION TOOL

Position integrated circuits for insertion or extraction. Practically any C with 14 or 16 leads aligned on 0.300" centers can easily be inserted or extracted. Material is plastic.

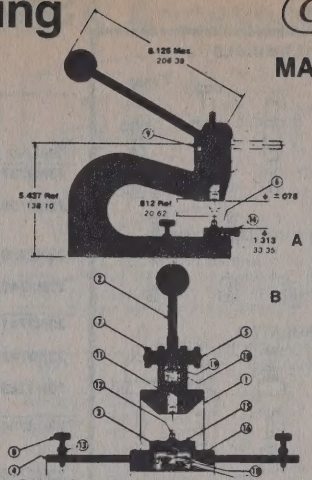
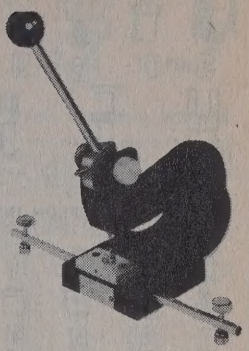
MANUAL TERMINAL SWAGER



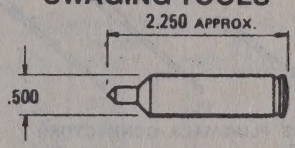


CAMBION 435-3803 Manual Terminal Swager has a deep, Arbor-type throat to accommodate large boards and panels. Stabilizing rods are included to support larger panels while swaging. This swager can handle curved and odd-shaped boards, and with its deep throat, terminals can be swaged in place as far as 5.0" from the board edge.

Series 435

Stock No.	Type	Description	Each
40F1570	3803-1	5" Throat	184.00

SWAGING TOOLS



45° FLARE PUNCH

Flare swage used where component will be soldered to an etched pad on the swaged side of the board. Though mechanically weak prior to soldering, the solder fillet provides reliable electrical and mechanical connection.

81F3877	6663-01-00	17.50	81F3878	6657-01-00	17.50

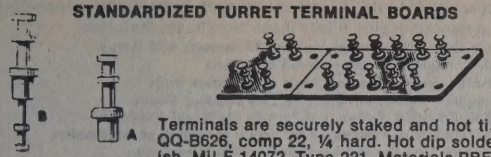
Keystone Terminal Boards & Accessories

STANDARDIZED TURRET TERMINAL BOARDS



Terminals are securely staked and hot tinned. QQ-B626, comp 22, ¼ hard. Hot dip solder finish. Mil-F-14072, Type 221. Materials PBE indicates Paper base electrical, Mil-P-3115C, Temp. 250°F max. Type XXXP, GEE indicates Glass Epoxy Mil-P-18177, 300°F max. Type G-10. All are 3/32" thick and double row of terminals (50 total) on 3/8" centers except (*) which has a single row with 25 terminals. All are 13⅛" long.

PLUG-IN HOUSING

Durable housings are ideally suited for packaging relays, logic packages, networks and miniature circuitry. Headers are molded of G.P. black phenolic. Pins are brass, nickel plated. Guide hole tapped 8-32 for terminal board mntg. stud. Materials: Polystyrene: use up to 170°F conditions. Butyrate. High impact strength, use at 210°F; Nylon at 300°F. Complete with Octal Header and Screws.

Fig. E

HINGED STANDOFFS FOR TERMINAL BOARDS

Saves time, space and service cost. Interconnects circuits or services without danger of shorting. Wiring exposed for easy test. Made of brass per Mil Spec.QQ-B-626A, Comp. 22, ½ hard. Cadmium plated per QQ-P-416 Class 2, Type 2, and gold iridite.

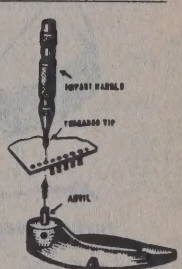
"IMPACT" STAKING KIT



Produces a light or heavy blow which is adjustable by turning the spring tension cap. Uniform striking action attained by pressing down handle. Interchangeable tools supplied permit assembly of terminal boards, printed circuits and small components. Simple construction, automatic single hand operation. Kit Includes: 1 No. 1301 Anvil Tool Holder, 1 impact handle (No. 1302), and the following tools: 1310, 1311, 1312, 1313, 1315, 1316, 1321, 1716, 1717, 1722, 1726. Instructions are also included. Stakes all dia. to 3/32" max.

35F1658. Type 1707 . . . . . .33.35

POWER TRANSISTOR AND SILICON CONTROL RECTIFIER SOCKETS

Standardized power transistor sockets for TO-3 case. Low cost. Corrosion resistant and cadmium plated for better solderability. **Meets EIA solderability Spec RS178A.** Spring brass contacts provide contact immediately upon insertion. Hard steel collector plates with 6-20 threaded formings to hold secure with maximum torque of 9 lbs.

Sockets for TO-66 case or SCR. Pre-assembled to chassis by either eyelets or rivets permit installation of semiconductor at later stage of assembly. Eliminates need of washers or bushings.

Sold in mulitples of five only.

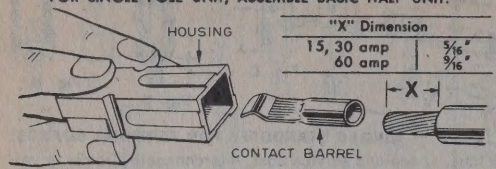
A-MODE™ brand Connectors

DESIGN & ASSEMBLE "A" MODE TO YOUR OWN CONFIGURATION
FOR SINGLE POLE UNIT, ASSEMBLE BASIC HALF UNIT:

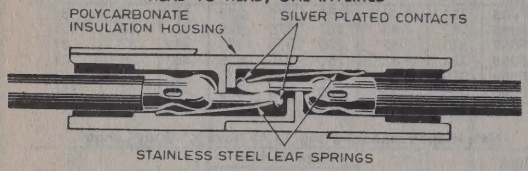


"X" Dimension	
15, 30 amp	5/16"
60 amp	9/16"

1. Strip wire per chart above.
2. Solder or crimp* wire into contact barrel.
3. Insert† contact into housing until it snaps into place.

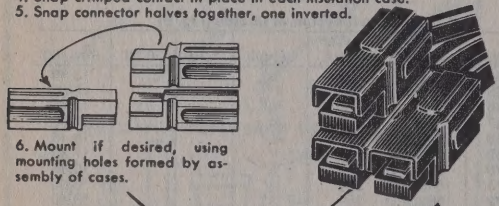
*See "A" Mode Crimp Tools for important requirements.
†Use #13N2017 insertion & removal tool for 15, 30, 60A sizes.

COMPLETE CONNECTION—SNAP TOGETHER 2 HALF UNITS HEAD TO HEAD, ONE INVERTED

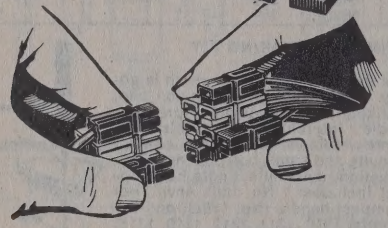


MULTIPOLE CONNECTOR

1. Strip wire for each pole desired.
2. Solder or crimp into contact barrel.
3. Slide together as many cases as desired.
4. Snap crimped contact in place in each insulation case.
5. Snap connector halves together, one inverted.



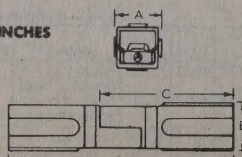
6. Mount if desired, using mounting holes formed by assembly of cases.



PHYSICAL AND ELECTRICAL CHARACTERISTICS

NOMINAL AMPERAGE:	15
SIZE (inches):	5/16x5/16x3 1/32
HOUSING MATERIAL:	Polycarbonate
STANDARD COLOR:	Yellow
CONTACT MATERIAL:	Copper, Silver Plated
SPRING MATERIAL:	300 Series Stainless Steel
OPERATING TEMPERATURE RANGE:	—20°C to 105°C
CURRENT RATING:	15 Amp on 16 AWG Wire produces 19°C Rise
VOLTAGE RATING:	600
BREAKDOWN VOLTAGE TO MOUNTING:	6000 DC
WIRE SIZE ACCOMMODATION:	16 to 20 AWG
MAX. WIRE INSULATION DIAMETER:	.137"
MATING FORCE: (one pair):	Approx. 2 lbs.
EXTRACTION FORCE (one pair):	Approx. 2 lbs.
CONTACT RETENTION FORCE:	Approx. 25 lbs.
CONTACT INSERTION FORCE:	Approx. 3 lbs.
CONTACT RESISTANCE (AVERAGE):	With 3/8" of 16 AWG wire 875 Microhms
ENVIRONMENTAL RESTRICTIONS:	Protected—No Hydrocarbon fluids

DIMENSIONAL SPECIFICATIONS—INCHES



Rating	A	B	C	D
15 Amp	5/16	5/16	31/32	1 5/8
30 Amp	5/16	5/16	31/32	1 5/8
60 Amp	5/8	5/8	1 7/8	3 13/64

*Amperage Module. A unique concept in electronic connectors. This patented design offers these significant features:

- **Meets Current Requirements from 15 through 600 Amps**
- **High Voltage Protection—Rated 600 Volts**
- **Self-Mating—No Separate Male and Female Units**
- **Stackable—Insulation Cases Fit Like Building Blocks With Slide-Lok Action that Permits Multipole Assembly**
- **Mountable—Case Designed for Screw Mounting of Assemblies**
- **Extremely Low Contact Resistance—400 Micro-ohms**
- **Snap Action—Positive Connect and Disconnect**
- **Self Cleaning of Contacts with Each Make and Break**
- **Maximum Conductivity from Silver Plated Copper Contacts**
- **High Reliability Index—15,000 Cycle Mechanical Life**
- **Color Coded Cases—Simplify Wiring**
- **U.L. Recognized and C.S.A. Listed**
- **High Dielectric, Impact Resistant Polycarbonate Case**
- **Non-Pitting Current Carrying Surfaces**
- **Vibration Protected—Full Current Flow under Vibration**

"A" MODE STANDARD PACKAGES

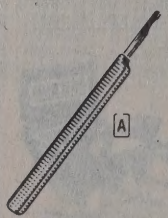
TOOLS DESIGNED FOR "A" MODE CONNECTORS



A INSERTION AND REMOVAL TOOL FOR CONTACTS

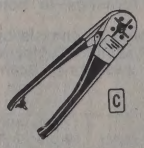
For use with 15, 30 and 60 amp contacts.
13N2017. NET 7.00

"A" MODE CRIMPING TOOLS

Designed to operate on the indent principle; results in locking the wire in the barrel of the contact without deforming contact barrel.

B HAND CRIMP TOOL FOR 15 AND 30 AMP CONTACTS

Quickly and easily crimps contacts.
13N2018. ..... 136.00



C RATCHET TYPE HAND CRIMP TOOLS

Controlled crimp cycle—jaws will not open until full crimp indent has been achieved.
13N2019. For 15 and 30 A Contacts.... 454.00
13N2020. For 60 Amp Contacts..... 304.00

Connector Kits

These kits are an engineer's dream come true. Because of the unique features of the A-Mode, one kit covers all your lab and design needs. The kit contains 50 connectors, a crimp tool, and an insertion/extraction tool in a tough clear plastic box.

AEK-015 15 AMP KIT INCLUDES:
50—15 Amp Contacts
50—Housings In Assorted Colors of Red, Black, Green, White
1—Insertion/Extraction Tool
1—Crimp Tool
13N1988. NET 189.95

AEK-030 30 AMP KIT INCLUDES:
50—30 Amp Contacts
50—Housings In Assorted Colors of Red, Black, Green, White
1—Insertion/Extraction Tool
1—Crimp Tool

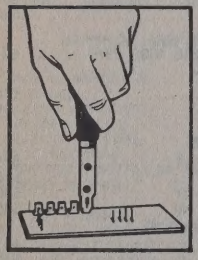
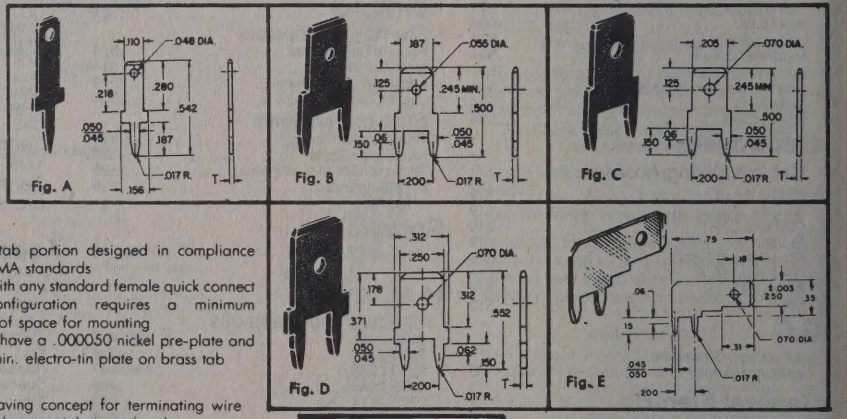
PC BOARD DISCONNECT TABS





- Mating tab portion designed in compliance with NEMA standards
- Mates with any standard female quick connect
- Tab configuration requires a minimum amount of space for mounting
- All tabs have a .000050 nickel pre-plate and .0001 min. electro-tin plate on brass tab

Printed circuit tabs, economical space-saving concept for terminating wire leads to printed circuit boards. Cost less than special pin and socket contacts and provide standardization. No need to top-solder the board. Male, quick-disconnect. All tab sizes are interchangeable in pre-drilled boards. Recommended mounting hole .046" dia., #56 drill or .052" dia., #55 drill, depending upon board type and thickness.

COMPONENT CLAMPS

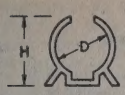

Fig. A

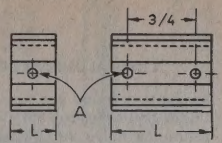

Fig. B

Fasten, and where required, insulate a wide variety of electrical and electronic components, accessories, and parts. Permit quick insertion, allow easy removal. Typical applications are capacitors, resistors, lamps, batteries and fuses. Made of strong black vinyl and have high dielectric strength. Floor of clip is pierced for screws or other fastening devices.

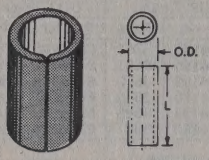
1/4" O.D. SPACERS

Nickel plated brass spacers per MIL-F-14072, QQ-N-290 type VII. Seamless aluminum spacers iridite finish per Mil-C-5541Excellent dielectric strength. Plastic spacers polyvinyl dichloride providing: high thermal resistance (to 225°F), self-extinguishing, and high dielectric strength. Nylon spacers are polyamide, Type 6/6 per MIL-P-17091B natural color.



ECONOMY ALUMINUM SPACERS

Material is 5052-H34 aluminum per QQ-318C. Spacers are rolled flat strip aluminum assuring maximum bearing surface, square ends, and no burrs. Approximate I.D.s: 11/64" for #4, 3/16" for #6, 15/64" for #8.

CIRCUIT BOARD STACKING SPACERS

LPCS spacers are used to stack any number of boards, vertically or side by side. Four spacing heights. Only two simple components. Everything snaps into place. Positive "Bathed Arrow" locking, made of strength nylon.

SNAP-IN CIRCUIT BOARD SUPPORT/SPACER

Provide ample clearance from the chassis for assembled boards. An arrow-type locking head snaps into a .187" dia. hole in chassis where it expands to lock permanently in position. Finger grip insertion eliminates need for tools. Circuit board is held firmly in position by locking tension flange which, compressed upon entry, springs out to lap over and secure board. A squeeze of the fingers permits removal of board from support for repair or replacement. FPCS supports permit complete accessibility to circuit board components for easy maintenance and replacement. Type FPCS fully compatible with type PCS rigid supports.

Coil spring fasteners utilize the spirally coiled spring concept, a recognized superior spring design. It imparts unique features not found in other spring pins. More than fasteners coil spring fasteners are also shock absorbing elements which are integral, active components of a total assembly.

COIL SPRING FASTENERS

- **Uniform strength and flexibility**
- **Equal stress distribution**
- **Wider hole tolerance**
- **Closer Diameter tolerances**
- Swaged Chamfers
- **Re-Usable**
- **Prolonged useful life of your assembly**

THREADED SELF-TAPPING BUSHINGS

MATERIAL BRASS

A consistently high level of mechanical performance at a *lower* total installed cost. High pull-out resistance. Hole tolerances do not affect pull-out resistance—translating into a consistent, high quality level. Low radial stresses against the hole wall reduce component breakage and expensive rejects.

SNAP-IN MOUNTING BUTTONS

Faster, easier to install. No tools needed. No screws, nails or rivets. Made of nylon. "Barbed Arrow" locking head expands to fasten permanently.

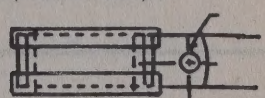
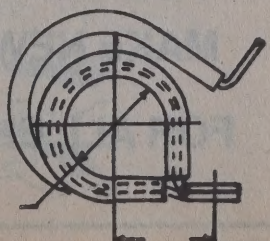
CUSHIONED CABLE CLAMPS

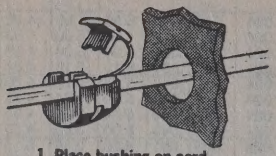
Cushioned Cable Clamps provide protection and routing support for tubes, pipes, wire bundles and cables. Material thickness for Diameters 1/8" through 7/16" is .032, and .050 for Diameters 1/2 through 1". TYPE SVC is made of pregalvanized low Carbon Steel (ASTM A 527), and cushioned with PVC (−40°F to 250°F). TYPE SSSC Combines Stainless Steel (300 series) and silicone rubber (−85°F to +450°F).



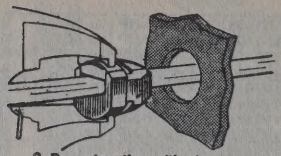


Wiring Accessories

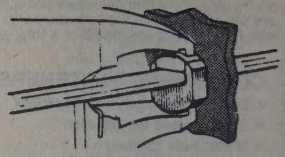
Strain Relief Bushings



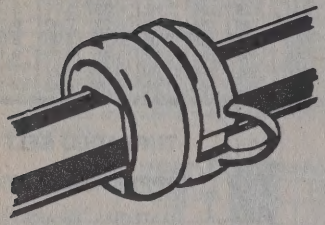
1. Place bushing on cord



2. Press together with pincers or pliers



3. Snap into hole



Add reliability, longevity and safety. They protect the life line of your electric/electronic products by absorbing forces of pull, push, flex and twist on power supply cables. Made of nylon, they securely anchor, insulate and protect cables at chassis entry point. Their flared exit eases the cable into a lazy bend preventing sharp bends and assures longer life for the cable and your product.

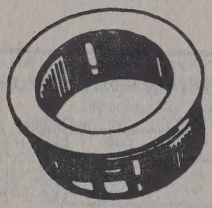
Snap Bushings



These nylon bushings convert raw-edged holes in metal to smooth, neat insulated ones. They snap and lock into holes with fingertip pressure. Will withstand a push back force of 35 pounds.

They'll meet your needs for insulating and mechanically protecting electrical and communication cables, tubing, hose, rope and utility lines. Available in 46 sizes for use in 1/4" to 2 1/2" diameter holes.

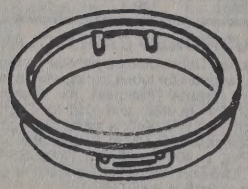
Heyco® Shorty Bushings



When internal clearance is limited these nylon insulating bushings will solve your problem.

1/8" clearance is all that is needed. They'll completely insulate and isolate electric or communication cables as well as low R.P.M. shafts and push-pull rods. Shorty Bushings will hold your costs down with their low price and fingertip installation.

OPEN/CLOSED BUSHINGS

This nylon bushing's split design allows side entry and encirclement of preassembled harnesses, capillary tubes or other units that have segments larger than the bushing's I.D. They also assemble into holes that already contain cable or tubing. Fingertip pressure installs the bushing which closes to form a complete circle and an insulation barrier against the raw edge of the metal hole.

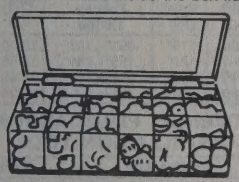
LabKits™

HEYCO LABKITS provide working assortments of HEYCO Nylon Strain Relief Bushings, Insulating Bushings, Hole Plugs, Cable Clamps, Terminal Bushings and Liquid Tight Connectors for prototype and laboratory use. They are an essential tool for product design departments and experimental research. Each clear plastic box has eighteen compartments and contains an assortment of the most popular sizes of parts. Pertinent information describing the contents of each compartment is mounted inside the box lid.



LabKit 1999
188 assorted Heyco strain reliefs, 18 popular sizes.
81F9338. Net: 38.46

LabKit 2997
255 assorted Heyco Hole Plugs, 18 popular sizes.
81F9340. Net: 115.38

LabKit 3399
285 assorted nylon cable clamps—18 different sizes, both standard and heavy duty for 1/8″ to 1 1/2″ diameter applications.
81F9342. Net: 38.46

LabKit 2999
258 assorted Snap and Shorty insulating bushings in 18 popular sizes.
81F9339. Net: 38.46

LabKit 2998
129 assorted insulating bushings, plugs and strain relief bushings for 1/2″ KO (7/8″) and 3/4″ KO (1 3/32) holes.
81F9341. Net:138.46

LabKit 4199
252 assorted terminals bushings complete with both 3/16″ and 1/4″ size solder and double male terminals assembled.

SNAP NUTS

INSERT INTO HOLE

DRIVE SCREW

LOCKED IN PLACE

Consists of a knurled aluminum nut housed in a tapered wall nylon cage. Driving a screw into the nut during assembly draws nut up, expanding cage wall and locking it into hole.

FEATURES AND ADVANTAGES

- **Spring tension in nylon cage holds nut in hole prior to final assembly**
- **Fits all sheet thicknesses**
- **Only the nylon comes in contact with the sheet material**
- **Makes assembly rattle-proof and dampens vibration**

HOW TO USE THE SNAP NUTS

1. **Drill or stamp a hole to dimension "X"**
2. **Push fastener into hole with finger pressure**
3. **Select screw length**
4. **Locate component to be attached over Snap Nut and insert screw**
5. **Drive screw, up to torque limit. 25, 50, 50, 65 in. lbs. resp.**

Note: Dimension "T" = .030"

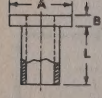
SCREW INSULATOR/BUSHING



May be used as screw insulator where high strength non-insulated screws are required. Wide flanges isolate from mounting surfaces. Also satisfy a wide range of bushing applications and because they require no lubrication, can be used as light loading bearings.

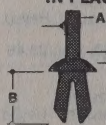
NYLON MOUNTING RIVETS



Type NMR plastic push rivet is the fast method of fastening. Insert rivet and push its post downward to spread the legs for secure assembly. For faster assembly, the NMR-T installation tool holds the rivet for insertion and injects the post with a tap of its plunger head.

ADHESIVE MOUNTED LOCKING CABLE CLIP

Easily mounted, neat appearing fastening device. Exclusive patented lock/release design allows easy insertion of cable and positive holding action. Long aging adhesive backing on clip holds to almost any clean surface. Average pull-off strength of 12 pounds. High-impact stable PVC temp. range −20° to +180°F.

10-121 PERMABOND™ HIGH VISCOSITY FORMULA

Higher viscosity means less wicking, no drip and slower speed of cure. Fills gaps .015-.017 inches. This grade has a higher skin adherance, which makes it ideal for surfaces which are irregular or rough, or have a high degree of porosity, such as wood or ceramic. Its slower cure time makes it ideal for applications where there is more than one operation, or minor adjustment is needed within 30 seconds. 1 fl. oz. bottle.
00Z404 NET. 10.92

10-127 PERMABOND™ QUICK FILLER/SETTER (Q.F.S.)

Clear, colorless accelerator and surface treatment agent for use with Permabond™ cyanoacrylate adhesives. It speeds the curing process and allows thicker layers of even the lower viscosity grade to be applied. It enables the adhesive to fill voids up to .020 inches.

This aerosol spray is especially useful in the electronics industry. Q.F.S. permits use of Permabond as a tacking compound for fast fixturing of electrical wires and components. 4 oz. aerosol.
00Z405 NET. 8.55

10-128 PERMABOND "910"

First setting high strength bonding for plastic rubber porcelin silicon chips "O" rings. 1 oz. bottle with dispenser nozzle.
00Z403 NET. 10.92

10-131 PERMABOND "910"

10 gram dispenser pen ideal for pocket or tool box.
00Z411 NET. 3.90

10-135 MIRACLE ADHESIVE KIT

Surface adtivator/cleaner with Cyanoacrylate adhesive.
32F337. NET 6.33

10-140 PERMA-LOK

Controls adhesion of metal parts. Resists loosening and vibrations. Fills gaps and provides metal to metal adhesion. Does not migrate to other components. Sets firmly in seconds without mixing or clamps. Removable with normal hand tools. 0.2 fl. oz. (6ml).
00Z318. NET 2.87

EPOXY PUTTY RIBBON

A two-part putty, which when kneaded together molds like clay to conform to surfaces to be bonded. Material bonds, fills and seals and when cured it can be sanded, drilled and filed. Will work on metal, wood, glass, ceramics, masonry and other materials. It is excellent for sealing plumbing pipes and filling holes and dents. It is most commonly used where large gap fill is required, or on hard-to-bond materials. Won't run, drip or sag like liquid epoxies. 10-155 pkg. of two 1.5 oz. strips.
00Z408 NET. 1.32
10-156 1/2 lb. strip in snap lid tub.
00Z409 NET. 5.82

10-165 CLEAN SWEEP

Blows away dust and grit. 15 oz. W/ adjustable 3-way valve.
00Z317. NET 3.37

10-180 PERMA-LOK NUT-LOCKING GRADE

Thixotropic anaerobic adhesive/sealant for medium strength locking of threaded fasteners, such as keys, splines, nuts, bolts and screws, to 3/4 inch in diameter. It is best for fasteners, which may require disassembly for service and repair. Ordinary tools, such as a wrench, are sufficient for disassembly, due to the medium strength of this compound. Cures fast and reliably on steel, zinc, cadmium and other plated fasteners. Does not migrate into other components. 1.7 fl. oz. bottle.
00Z407 NET 12.54

10-188 SUPER WOOD-LOK™

Super-strong industrial grade wood adhesive provides up to two tons of holding power. When cured, it is actually stronger than wood itself. Excellent for manufacturing all kinds of furniture and wood items. Although specifically formulated for wood, this adhesive is also excellent for bonding leather, Formica*, paper and other porous materials. 2.2 fl. oz. tube with dispensing nozzle.
00Z410 NET 1.77

10-190 PERMA-LOK™ SURFACE CONDITIONER

Prepares mating surfaces to be locked by Permaloc™ Anaerobic Adhesives/Sealants. Although in most cases a primer is not necessary for Perma-lok to form a strong bond, the use of Surface Conditioner will speed the cure while cleaning the part. It also activates passive surfaces, such as phenolic and melaminc plastics. Handy aerosol spray removes excess oil and dirt to prepare surfaces. Speeds cure of adhesives to 3-4 minutes for handling, full cure in 3-4 hours. 6 oz. aerosol.
00Z406 NET. 5.77

10-302 RADIO TV SERVICE CEMENT

SPRAYTEC™ brand

FEATURING "FAN SPRAY" ADJUSTABLE VALVE
A long needed improvement in aerosol valve design, specially developed for improved spraying of thick fluids such as paint.
• Oval Spray Pattern Reduces Over-spray by as Much as ⅓
• Finer Spray Particles Yield Greater, More Uniform Coverage
• Requires Less Finger Pressure than Other Sprays
• Adjustable Nozzle Tip—Rotates 90° so that Spray Pattern Can Be Stroked Up and Down or Side to Side Without Tilting Can. Results in More Even Coverage Like Using a Wide Brush
SPRAY PAINT ULTRA FLAT BLACK
DEOXIDANT Contact Cleaner
CONTACT CLEANER & LUBRICANT
TAPE HEAD CLEANER
CAUTION

SERVICE AID CHEMICALS

ULTRA FLAT BLACK SPRAY PAINT

Type 32N282. Colors meet Federal Color Specification TTL-0048 (GSA-FSS), Federal Color Standard 595 number 37038 below. **Ozone safe.** 1 pint cans.

00Z226 1-11 .....5.16 12-Up 4.39

WRINKLE FINISH BLACK SPRAY

Type 8667/10-8667. Air drying wrinkle finish develops in two hours at 75° F and 50% humidity—or faster using oven or heat lamp for 15 minutes. For chassis, panels, racks, audio equipment. Adjustable fan spray valve. **Ozone safe.** 13 oz. can.

00Z231 1-11 .....4.40 12-Up 3.78

INSULATING SPRAYS

MIL APPROVED MOISTURE AND FUNGUS-PROOF VARNISH

Type 32N427. Meets Mil Spec. MIL-V-173B. Widely used as PC board coating. Fluorescent, the treated chassis may be checked with ultraviolet light. Produces clear, smooth surface which will not crack, splinter or remain tacky. **Ozone safe.** Diel Str. 750 V/mil. 15¾ oz. can.

00Z246. 1-11 ..... Each 6.80 12-23 .... Each 5.78
24-47 ..... Each 5.10 48-Up..... Each 4.25

CRYSTAL CLEAR INSULATING ACRYLIC

MIL-TT-L-0048. Type 32N291. For metal, electrical and electronic equipment. PC boards, chrome, brass, plastic, tools, batteries, paper, wood, leather. Weatherproof, protects against corrosion. **Ozone safe.** 1500 V/mil. dielectric strength. 15¾ oz. can.

00Z245. 1-11.....4.64 12-Up.....3.95

RED INSULATING VARNISH

Type 32N510. Tough, flexible film with high adhesion and arc resistance, non-tracking properties. For new or old stator windings, armatures, coils, commutator end rings, frames and end shields, bus bars, switchboard parts. Air dry or bake. **Ozone safe.** Diel str. dry 100 V./mil., wet 700 V/mil.; ASTM-D-149, 13 oz. can.

00Z228. 1-11.....5.40 12-Up.....4.59

CIRCUIT COOLER SPRAYS

Type 34N610. Locates thermal-intermittent component by spraying suspected component while equipment is operating. If cooling solves intermittent problem, replace component. Use on capacitors, transistors, resistors, oxidized joints. 15¾ oz. can.

00Z247 1-11 .....6.20 12-Up.....5.27

TAPE HEAD CLEANER SPRAY

Type 35N3386. Cleans tape heads on audio and video recording equipment. Removes oxide and dirt. Harmless to tape. 6" spray extension tube included. 16 oz. can.

00Z249 1-11 .....7.28 12-Up.....6.19

RELAY AND CONTACT CLEANER

Type 32N184. Leaves dry surface. Non-flammable. Dissolves gummy deposits. Degreases and flushes off electronic and electrical equipment. Extension tube included for hard-to-reach places.

00Z244. 15¾ oz. can
1-11 ....5.24 12-Up.....4.46

00Z239 Type 32N349 5¾ oz. can
1-11 ....3.72 12-Up.....3.17

TUNER CLEANER AND GUARD—SAFE FOR PLASTICS

Type 32N154. Provides non-oily film that lubricates contacts, guards against corrosion. Won't affect magnet wire coatings, paper insulation, most paints and varnishes. For tuners, switches, volume controls, rheostats, commutators, circuit breakers, motors, locks. With spray extension tube. 15¾ oz. can.

00Z241. 1-11.....7.20 12-Up.....6.12

CONTACT CLEANER AND LUBRICANT SPRAY

Type 32N521. Cleans, lubricates and protects from corrosion. For use where spray will not come in contact with plastics. For switches, volume controls, tuners, relays, commutators, slip rings, tube pins, dials, recorders, rheostats, circuit breakers, locks, tools. With extension tube.

00Z224. 16¼ oz. can 1-11 .5.28 12-Up ...4.49

00Z243. Type 32N343 5¼ oz. can
1-11 ....3.76 12-Up.....3.20

ELECTRIC MOTOR CLEANER

Type 32N508. Dissolves and flushes away dirt, grease. Non-flammable, non-toxic. Does not require water flush. Evaporates and leaves dry surface. Will not harm insulation or painted surface. May be harmful to plastics. With extension tube for pinpoint application. 15¾ oz. can.

00Z201. 1-11.....4.84 12-Up.....4.12

SILICONE LUBRICANT

Type 32N181. For metal, plastic, rubber, wood, leather, etc. Non-freezing, non-gumming. Ideal for anti-stick, anti-squeak action in hot and cold sealer bars, windows and doors, drawers, sliding tracks, cutting equipment, conveyors, dispensing equipment, food processing machinery. Diel. str. 350 V/mil. Temp. range −40° F to +500° F. 15¾ oz. can.

00Z242. 1-11.....6.28 12-Up.....5.34

QUICK PENETRATING OIL

Type 32N509. Frees up and lubricates rusted or frozen bolts, screws, nuts, chains, mufflers, bearings, hinges, linkages, and other industrial and electronic equipment. **Ozone safe.** 15¼ oz. can.

00Z200. 1-11.....5.36 12-Up.....4.56

PLASTIC AND GLASS CLEANER

Type 35N3383. Developed for heavy-duty cleaning of glass and plastic surfaces — windows, screens, safety shields. Spray on — wipe off. Will not leave dulling streaks or residue. **Ozone safe.**

00Z230. 13¾ oz. can
1-11.....2.92 12-Up.....2.49

ANTI-STATIC SPRAY

Type 32N1079. Neutralizes static electricity and inhibits accumulation of airborne dust on plastics, glass, tile, leather, foil, textiles, metal, photo transparencies, negatives, TV screens, and other surfaces. **Ozone safe.**

00Z222. 15¼ oz. can.
1-11 ....4.40 12-Up.....3.74

SPRAYTEC™ brand Sealants, Terminal Strips, Connectors

"FLUX-AWAY" is particularly well suited for removal of rosin flux from printed circuit board assemblies, electrical relays, and other electrical and electronic devices. As a solvent, it is strong enough to remove the flux, yet mild enough to avoid damaging the materials being cleaned. Wt. 20 oz. can.

"FLUX-AWAY' is used to remove organic contaminants such as oils and greases from metal. It is employed to achieve a high level of cleanliness in the manufacture of precision parts.

PMDL has active water-displacing properties, creep and penetrating properties and fingerprint neutralizing characteristics. This positive combination is an important advantage for the protection of machined parts in process. PMDL will displace water and water/oil emulsions from a wet surface and will tend to neutralize corrosive tendencies of fingerprint contaminates. It should be noted that other soft film or oil TECTYL coatings may be applied directly over this product. Wt. 14.75 oz. can.

CRT CLEANER. Developed for heavy-duty cleaning of CRT's display terminals. Will not leave residue. Wt. 19 oz. can.

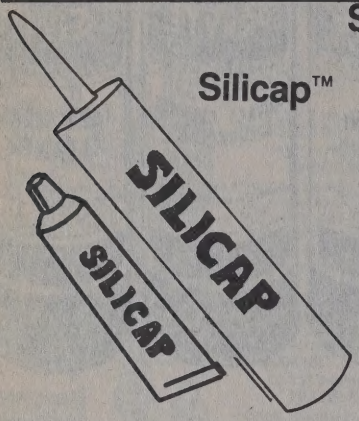
Silicone Rubber Sealant



Silicap™

SPC Silicone Sealants are all-purpose RTV compounds designed for protecting, repairing, sealing, insulating, and waterproofing electrical equipment and installations.

- Ready to use as supplied for on-site use; no mixing required
- Cures within 24 hours on exposure to moisture in the air; may be tooled before surface skin forms (about 10 minutes); full bond strength in about 7 days
- Maintenance-free performance eliminates costly callbacks

Good Dielectric Properties
- Electrically non-conductive
- Exceptional water repellency
- Good insulation properties

Long-Life Performance
- Will not sag, slump, lose shape, or run off surfaces
- Virtually unaffected by rain, sleet, snow, ultraviolet radiation, ozone, or temperature extremes
- Does not harden, become brittle, or crack with age
- Stays flexible from −65 to 500F

Seal: motors, generators, regulators, electrical connectors, control boxes, outlet boxes, joints, cover plates, and conductor entry holes to protect terminals and splices from moisture.

Repair: printed circuit boards, all types of electrical insulation materials, encapsulants.

Protect: coaxial cable connectors, modules, relays, power supplies, magnetic amplifiers, circuit boards, delay lines, transformers, ferrite cores, coils, complete electrical assemblies.

General Electric Silicones

TWO PART SYSTEMS

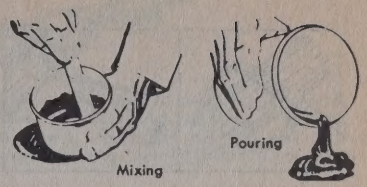
RTV-11. A low viscosity, white electrical potting compound which cures at room temperature to a resilient silicone rubber. Protects delicate electrical components from shock and vibration over temperatures from −75 to + 500°F.

RTV-21. A pink, pourable electric potting compound. Viscosity, poises: 250. Shelf life of six months.

RTV-60. Red, medium viscosity silicone rubber base that cures readily in deep sections to a high durometer, high strength rubber. Has excellent high temperature resistance—usable for short periods up to 600°F.

RTV-615. Low viscosity, clear electrical potting compound: Used to protect circuits when a transparent encapsulant is required. Can be easily cut open to repair failures and patches with fresh material.

RTV-630. A blue, medium viscosity compound which cures to an extremely tough, durable rubber. Best for prototype molds or other applications where extreme strength is required.



Stk. No. 1 lb. Container	Type	Color	Each	2-11	12-47

ONE PART SYSTEMS

One package silicone rubber adhesive/sealants for an unlimited number of industrial applications. Packaged in collapsible aluminum tubes and standard caulking cartridges. Cures to tough resilient rubber at room temperature. Will withstand temperatures of 400 to 500°F and remain flexible at −75°F. Resists moisture, aging, ozone weathering. Will bond to most substrates without primer. Ideal for instant insulation, repairing low pressure leaks, gasketing, bonding, encapsulating, sealing, etc.

RTV 189. A grey, paste type, one-component, ready-to-use, silicone rubber adhesive sealant which is designed to meet the requirements of military specifications MIL-A-46146A. Type III while providing extra high adhesive and physical properties.

SILICONE GREASES AND COMPOUNDS

Fit a wide variety of industrial and maintenance applications. Offer superior lubrication, dielectric properties, heat transfer, water repellancy, corrosion protection. Withstand temperatures from −100 to 450°F.

WIDE TEMPERATURE METAL LUBRICANT

Type G-300. Offers excellent metal-metal lubrication over −100 to + 450°F.

ALUMINUM STEEL LUBRICANT

Type G-322L. One of the finest available lubricants for aluminum steel. Prevents galling and corrosion. Also excellent for plastic-metal. Available in 8 oz. tubes.

GENERAL PURPOSE COMPOUND

Type G-623. An all-around dielectric grease which offers superior protection from shorts due to moisture. Ideal for cable connectors. Also excellent rubber lubricant for seals, gaskets, etc.

Stock No.	Type	Package Size	1-9
57F206	G-300	8 oz. Tube	12.04
57F208	G-322L	8 oz. Tube	6.64
57F212	G-623	8 oz. Tube	6.43

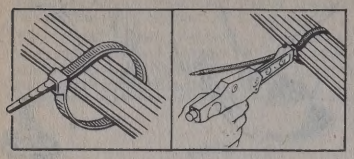
ATTENTION QUANTITY BUYERS

Newark Electronics also can supply these GE silicone products in package sizes up to five gallon pails. Write, phone or wire your nearest Newark Electronics office to discuss volume prices and delivery. Depend on Newark Electronics for the latest in silicone products at the lowest prices, fastest delivery. Stocking warehouses from coast-to-coast.

VOLTREX® brand Wiring Accessories

WIRE TIES

The Fast, Neat, And Professional System for Permanent Bundling Of Wire & Cable



Flexible ties—precision molded of high strength, self-extinguishing fungus inert virgin Nylon—wrap easily around wire/cable bundles. The tapered tail is inserted by hand into the ties self-locking head. Uniform gripping serrations allow convenient "pull-through" down to the bundle where the straps lock to eliminate slippage. The last step is final tensioning and excess trimming—automatically accomplished by the Tens-N-Cut tensioning hand gun, or, if the assembler chooses, a pair of pliers. Ties are available in either regular or screw-mount design. Ties are serviceable at temperatures to 275°F., maximum life and strength is attained at temperatures below 185°F.

- **Serrated ties with self-locking head**
- **Miniature ties have bent tip for easy insertion**
- **Manufactured from the finest virgin Nylon**
- **One piece construction**
- **Tens-N-Cut Hand Gun assures a better wire/cable tying system**

BEADED WIRE TIES

- Strong
- Durable
- Easy to apply and fasten
- Extra conductors can be added at any time
- Available in a range of lengths to suit the job
- Low cost

Wrap around the wire bundle, thread through the specially designed loop, pull it tight and lock in place. Stays put, holds harness together until released. To add more conductors to the bundle, open the tie, add the wires and refasten it. The ties are strong and durable with a high dielectric that makes them perfect for electrical harnesses. Polyethylene Type BTP, high dielectric ties come in various colors; Type BTN nylon ties are available in white only.

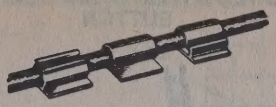
ADHESIVE CABLE HOLDERS



Stays in place permanently when adhesive mtd. For anchoring cable, tubing, pipe or rod up to 1/2" in diameter. Made from strong resilient CPVC plastic, elastic enough to receive components, firm enough to hold them securely. No holes to bore or screws to fasten. Adhesive backing permits fast mounting to any smooth surface.

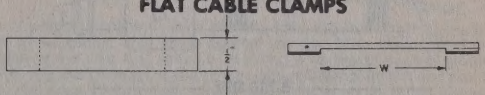
FLAT CABLE CLAMPS



Designed expressly for holding flat conductors: flat flexible cable, ribbon cable, etc. Place cable along desired course—strait, across corners, at right angles, stacked, whatever your application requires. Clamp's self adhesive backing holds harness permanently in position. Made of high dielectric, self-extinguishing CPVC.

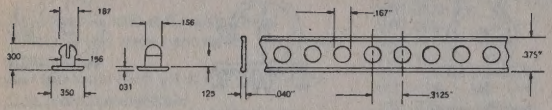
PERFORATED NYLON STRAP AND LOCKING BUTTON



LOCKING BUTTON
Part No. PNSB-05
Color: Black Pkg-100

PNS-05
NYLON STRAP (BLACK)

Versatile perforated strap and locking button. Used for fastening or supporting wire bundles, cables, tubing, pipe, wire harnesses. Also used to suspend a group of conductors or fasten them in position in assembly. Made from nylon, withstands ambient temperatures from −60° to +275°F. Acid and alkali resistant. Not affected by petroleum products. Supplied in 50 and 100 foot rolls.

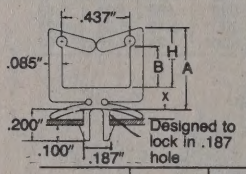
LOCKING WIRE SADDLES



Voltrex Locking Wire Saddles channel a group of wires over a course and lock them firmly in position, inverted or at an angle. Pointed tips compress to snap into a .187" dia. hole. Arched clip base positions saddle permanently. Wires and cable are inserted into the saddle and locked in position by squeezing sides to engage spring action lapped-grooves. Reusable. To unload, slide lapped-grooves sideways. Then reload and lock. Material is high dielectric nylon.

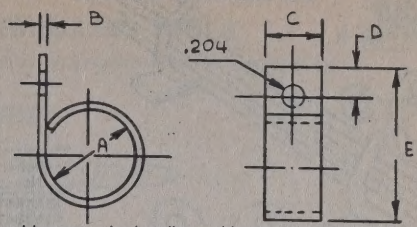
ELASTIC WIRE HARNESS CLIP



Anchor and harness wire bundles, cable, or rods in seconds. After initial mounting loading and unloading of material is accomplished quickly due to the Elastic 9/8 Nylon construction of the clip. There's no need to unfasten screw with each adjustment. Temperature range is from –90° + to 175° + continues rating. The clip has a .204 diameter hole for mounting with #10 screw.

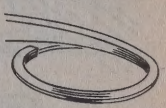
CONTINUOUS GROMMET

- **For any size or shape opening**
- **In panels up to .250″ thick**



Line any shaped opening—for a smooth, safe, fray-free finishing touch. Protects wires, cables, and cords against damage from sharp panel edges. Eliminates the cost and space of stocking a variety of special grommets. Simply snip the grommet to the proper circumferential length and slip it over the panel edge. It fits snugly and securely and won't jar loose. Available in solid lengths of polyethylene in conveniently packaged 100 ft. lengths. Conforms to MIL-1-613D.

Cushioned cable clamps provide protection and routing support for tubes, pipes, wire bundles, and cables. Material thickness for diameters 1/8″ through 7/16″ is .032, and .050 for diameters 1/2″ through 1″.

Type SVC is made of pregalvanized low carbon steel (ASTM A 527), and cushioned with PVC (–40 F to + 250 F)

Type SSSC combines Stainless steel (300 series) and silicone rubber (–85F to + 450 F)

TY-RAP INSTALLING HAND TOOL

- **Ties to preset tension**
- **Cuts off excess tail**
- **Low insertion force design**
- **Insures uniform tension**

Model WT193. Cinches up tie to preset tension, locks and cuts off excess tail. Insures uniform tension on all ties. Good on 18, 40 and 50 lb. TY-RAPS.
31F2657. NET **58.30**
Model WT197. For .301" tie bodywidth. For 120 lb. TY-RAPS.
34F1254. NET **100.45**

COMPACT CABLE INSTALLATION TOOLS

Lightweight, hand-operated cable tying tools install cable ties up to .301 in. wide and .080 in. thick. High impact plastic and steel withstands shock and rough handling. Symmetrical design for both left and right hand operators. Tie cinched up with squeeze action. Excess tail cut away when twisted 180 degrees. Specially designed pawl cuts away tail if tension limit exceeded. Suited for spot-tying applications.
WT1. For tie widths from .091" to .187" and 18, 40 and 50 lbs.
31F2639. NET **8.80**
WT2. For tie width of .301". For 120 lb. TY-RAPS.
34F1256. NET **11.20**

VOLTREX® brand Wiring Accessories

WIRING DUCT

OPEN SLOT VINYL DUCT

- Angled and interlocking lips on duct cover and sidewalls enable cover to be "snapped" on—cannot pop off.
- Continuous grooves facilitate use of plastic clips to mount wiring duct.
- Deepest open-slot (open slot) duct available—facilitates "flat" wiring and easy access to terminal strip wiring.
- Molded ridges secure clips in position.
- No sharp corners.
- Precisely located mounting holes—at no extra cost.
- Prescoring on interior side of both duct walls facilitates simple formation of clean duct junctions (tees, etc.) with no sacrifice of sidewall strength.
- One-piece construction—stronger sidewalls—no assembly required.
- Sidewall wire openings accurately and uniformly located directly across from one another.
- 2 standard side-hole types. Straight sided slots (open slot duct only) simplify wire insertion—no sidewall deflection required.
- Up to 18% more interior space for wire with no increase in overall width.
- Patented "No-Slip" snap-on cover* interlocks with duct sidewalls to prevent vibration slippage.
- Mounting holes on 4" centers.

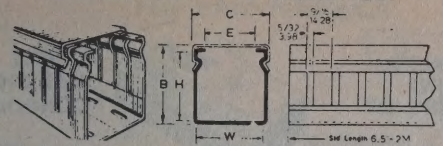
Instructions for use: The recommended clip spacing is one per foot, a minimum of two clips per piece of duct is required. Plain back clips may be attached with nylon rivets NMR-2 plated screws-10-32, self tapping screws. Adhesive backed clips need only be pressed in place. User should determine suitability for application regarding surface and environment. Adhesive back clips may be riveted or screwed in place using clip as drill guide.

Note: Adhesive shelf life one year.

Cable & Wiring Accessories

ELECTROVERT INC.

ELECTRO-DUCT® PVC WIRING DUCT



High-impact vinyl duct is non-flammable and warp-proof. Open slot design. Snap-on, non-slip cover. Mounting slots standard on all sizes. Temporary adhesive aids alignment and frees both hands for mounting. Scored snap-off plastic fingers permit slot enlargement for lead-offs; accommodate any size wire and/or bundle. Color: Grey. CSA approved. Supplied with channel and cover. Standard length, 6'6". U/L Recognized.

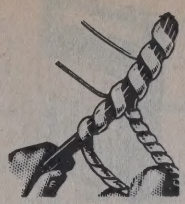
SPIROBAND



Spiral wrapping for flexible electric harnesses and cables. Unusual flexibility and elasticity make it ideal for temporary and experimental as well as permanent applications. Permits leadoffs or additions of wire at any point. High dielectric strength provides excellent insulation. Nylon and Teflon types for high temperature applications. (Nylon to 250°F; Teflon to 500°F).

SEALING COMPOUND

Auto-Electric Sealing Compound

3M

Scotch Brand Auto-Electric Sealing Compound provides a quick, easy and sure method of protecting against corrosion and moisture on electrical connections in cars, trucks and trailers. The mastic forms a moisture-tight seal around connections and the tough elastic vinyl backing provides additional protection against vibration, road grime and abrasion — constant problems encountered on a vehicle. The roll form is designed for those large or odd-shaped jobs. The patch was specifically designed for that everyday splice or sealing job — no other product like it.

GLASS-CLOTH INSULATED TAPE

Tape 27. For operating temperatures requiring high-heat insulated wires. Thermosetting pressure-sensitive adhesive assures a permanent bond at temperatures up to 300°F. High tensile strength.

Stk. No.	Type	Size	Color	1-9	10-99
36F905	27	½" x 66"	Wh.	3.98	3.05

ALL-WEATHER TAPE

Type 88. A super-tough flame-retardant black plastic backing provides excellent resistance to abrasion, oil, acids, etc. Extra pliability and conformability at temperatures down to 0°F. The thickness is .0085".

Stk. No.	Type	Size	Color	1-9	10-99
36F886	88	¼" x 66"	Blk.	2.32	1.91

SILICONE RUBBER TAPE

Type 70. High temperature splicing tape composed of fully cured inorganic silicone backing with a silicone pressure sensitive adhesive. Excellent conformability, high temperature characteristics, electric strength, and ozone resistance. Self cleaning rubber backing.

Stk. No.	Type	Size	Color	1-9	10-99
36F906	70	1" x 30"	Blk.	14.75	11.24

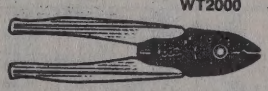
INSTALLATION TOOLING AND WIRE STRIPPER

WT2000



WT111M

ABMK-1

WT145C WT130A

COMPRESSION TOOLS

TBM5

Installs connectors, joints, lugs, splices, and taps over a wire range of #8 AWG through 250 MCM copper, and #12 AWG through 4/0 AWG aluminum.
81F2297 . . . . . Net: $182.00

TBM2

Installs connectors and lugs over a wire range of #8 AWG through #2 AWG copper, and #12 AWG through #6 AWG aluminum. Also installs copper taps from two #10 AWG to two #6 AWG, and copper pigtails from three #12 AWG to three #8 AWG. This tool features a COLOR-KEYED® dial which the operator rotates to match the color-coded connectors. It is equipped with the SHURE STAKE® mechanism.
81F2296 . . . . . Net: $93.00

WT2000 Accommodates insulated and non-insulated terminals from #22-10 wire range. Use for installing terminals, wire cutters, stripper and all purpose electricians' plier type tool.
34F1259. NET. 16.50

ABMK-1 Self adjusting wire stripper, ranges from 30-12 AWG strips. Stranded or solid, and aluminum or copper.
31F2606. NET. 49.00

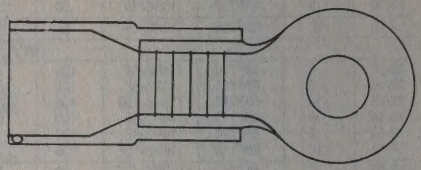
WT111M Accommodates non-insulated terminals from #22-10 wire range. Can be used as wire cutter.
31F265. NET 14.50
SHURE STAKE Mechanism prevents dies from releasing terminal until proper compression has been fully completed. For insulated #22-10 AWG use WT145C non-ins. use WT130A.
31F266. Type WT145C . . . 105.00
31F267. Type WT130A 82.00

VOLTREX® brand Solderless Terminals and Connectors

Listed E58918 | OSHA Acceptable | Certified LR22190-GM

SUPERIOR TERMINAL CONSTRUCTION OFFERS MANY ADVANTAGES

Wire guide barrel provides excellent electrical and mechanical connection. One piece, burr free construction for maximum electrical conductivity. Electro-tin plating for maximum corrosion resistance. Constructed of pure electrolytic (ETP) copper annealed to relieve stress points and to assure maximum installed strength. Barrel to pad transition designed to minimize flexing and bending. Multiple "V" grooves in barrel give maximum holding power and current flow. Insulation is molded of tough, resistant electrical grade vinyl or nylon. Color coding. Molded flange for accurate location of crimper. Open-end design permits visual inspection of wire location before and after crimping.



- Open end design
- ETP copper annealed
- Color coded
- One piece construction
- Electro-tin plating

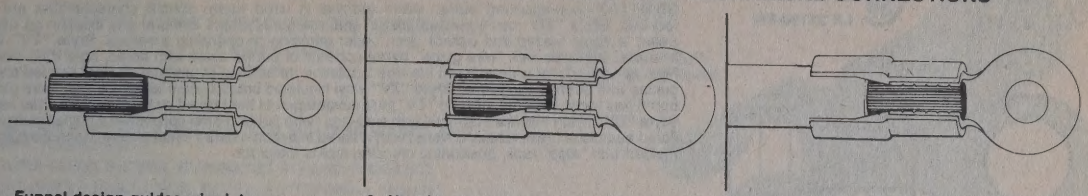
WIRE GUIDE BARREL FOR RELIABLE ELECTRICAL AND MECHANICAL CONNECTIONS



1. Funnel design guides wire into position.
2. No wire strand hang-up as wire is inserted. Fast, positive installation.
3. Wire in place, ready for crimping.

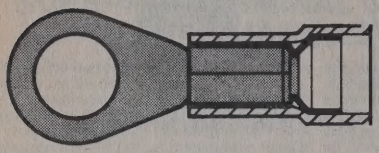
*) 26-24 Wire Range Only. Not UL Listed.

12

LISTED E58918

CERTIFIED LR 22190-6M

OSHA Acceptable



Style "TO" non-insulated butted seam terminal is used where special characteristics are not required. **Style "ZO"** non-insulated brazed seam terminal allows crimp at any location on barrel. Seam is silver brazed and cannot open under crimping or operating pressure. **Style "TV"** vinyl insulated terminals with "wire guide" barrel consists of butted seam with flared, rigid PVC sleeve. Flexure occurs over wide area on the wire insulation rather than at juncture. Funnel shaped sleeve guides wire strands into barrel. **Style "ZV"** vinyl insulated brazed seam terminals with "wire guide" barrel has same features as style "TV" plus advantages of the brazed seam over the butted seam. **Style "DY"** nylon insulated terminal with sure-grip "wire guide" barrel consists of a butted seam with flared seamless brass sleeve covered with a flared injection molded nylon sleeve. Because nylon is molded with "step" radii, positioning crimping tool is foolproof.

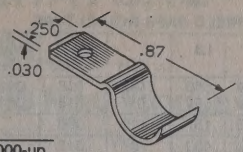
Solderless Terminals and Connectors

VOLTREX® brand

SPECIAL PURPOSE CONNECTORS

MALE FUSE CLIP ADAPTOR

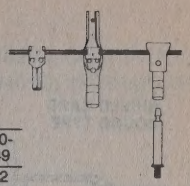
Ideal when fuse clip connections are not easily accessible. Instant electrical connection for add-on accessories. Sturdy brass construction. Beveled edges for easier insertion. Excellent conductivity. Easy fuse removal. Std. Pkg. 100.



Stock No.	Type	1-99	100-999	1000-up
16N1096	2316	10	.08	.07

"T" TAP CONNECTOR

Totally insulated connector. Crimps to any hot wire. Other end has insulated crimp plug for connection of 16-14 wire. Vinyl insulator boot covers entire T-tap brass clip.



Stock No.	Type	1-9	10-24	25-99	100-249
16N1093	16N1093	.56	.44	.37	.32

INSULATED WIRE NUTS

Crimp-type wire nuts have Nylon insulation. Simply insert the two wires to be connected, and crimp. Pkg. of 50.

Stk. No.	Type	Wire	1-9	10-49	50-99	100-249

31N240	CCN-ZY-1010	16-10	7.56	6.48	5.40	4.32

QUICK DISCONNECT ADAPTER

Three-way adapter consists of two male tabs and one female tab. The male tabs are in an over-and-under arrangement. Accepts two ¼" females and one ¼" male. Pkg. of 100.

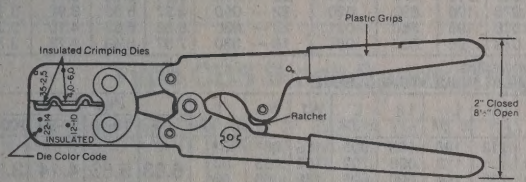
Stk. No.	Type	1-9	10-49	50-99
31N2519	MMF-XO-2525	19.88	17.04	14.20

INSULATED MALE DOUBLE QUICK-DISCONNECT

Has ¼" male terminals on both ends. Accepts female quick-disconnects. Vinyl sleeve. Pkg. of 25.

Stk. No.	Type	1-9	10-49	50-99
31N2518	MMS-XV-2525	8.47	7.26	6.05

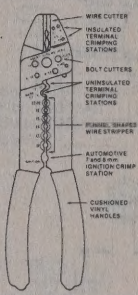
8403-003 RATCHET CRIMPING TOOL



VOLTREX

MULTI-PURPOSE

CRIMP TOOL



- **Funnel-shaped wire stripper with knife edge assures clean crimp—No rotational movement needed.**
- **Insulated terminal crimp stations in the nose for easy access and fast action.**
- **Critical positioning of crimping stations gives high strength-to-weight ratio.**
- **Wire cutter designed into tip for ease of handling.**
- **5 bolt cutting station for the most popular bolt sizes.**
- **Cushioned vinyl handles reduce hand fatigue.**
- **Insulated and non-insulated terminals and connectors and ignition parts crimped easily.**
- **Made with heat-treated alloy steel for durability.**

For Crimping 22-10 AWG Insulated And Non-Insulated Terminals And Connectors. Tool Capability: Crimps barrel and insulation grip independently on No. 22-10 AWG (0,35-6,0mm²) insulated and non-insulated terminals and connectors; nylon or vinyl insulation, butted or brazed seam, standard or short barrel. Crimping Dies: Insulated No. 22-14 AWG (0,35-2,5mm²) red and blue color coded. Insulated No. 12-10 AWG (4,0-6,0mm²) yellow color coded. Non-Insulated No. 22-14 AWG (0,35-2,5mm²). Non-Insulated No. 12-10 AWG (4,0-6,0mm²). Positive Closure: Ratchet requires full closure of handles to ensure proper crimp. Materials and Finish: Hardened steel jaws and handles with corrosion resistant finish. Grips: Plastic, orange color. Weight: 8 lbs.

8N1257 ..... 134.95

HANDLES 6 MOST COMMON WIRING FUNCTIONS

8403-001 is a compact, high-quality crimping tool designed to handle the six most common electrical wiring functions with ease and reliability. Features: wire cutter, insulated terminal crimping stations, bolt cutters, uninsulated terminal crimping stations, funnel-shaped wire stripper, automotive 7 and 8 mm ignition crimp station.

SHIELD CAPS

PVC-105

The new Voltrex insulating cap easily slips on the terminal without the use of tools, chemicals or heat. This simple application process results in a cost reduction while maintaining the highest possible safety standards. These U.L. recognized caps come in a variety of sizes to fit your particular insulation requirements.

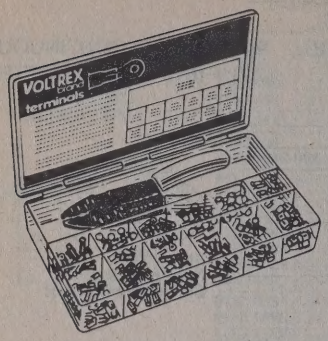
VOLTREX® brand Terminal Kits



TERMINAL FEATURES

- **Beveled terminal mouth to facilitate wire insertion**
- **Multiple "V" grooves for maximum holding power and minimum contact resistance**
- **Open barrel construction for visual inspection**
- **Barrel to pad transition designed to provide maximum resistance to flexing and bending**
- **Constructed from pure electrolytic copper annealed to facilitate proper flow for maximum installed strength**
- **One piece, burr free construction for economy, mechanical strength, and maximum electrical conductivity**
- **Uniform electro-tin plating for maximum corrosion protection**

These handy kits contain an assortment of 300 of our most popular electrical connectors in a durable plastic box. They are just right for on-the-job repairs or in the design lab. Each kit comes with a crimp tool and convenient identification chart.

Additional specifications on terminals are on pages 482-487.

A-MODE™ brand Connector Kits

A-Mode Connector Features

- **Self-mating**
- **Stackable**
- **Mountable**
- **Low contact resistance**
- **High dielectric**
- **Color coded housings**
- **UL recognized**
- **Snap action**
- **Self-cleaning**
- **High reliability**
- **Maximum conductivity**
- **High voltage protection**
- **Vibration Protected**
- **CSA listed**

These kits are an engineer's dream come true. Because of the unique features of the A-Mode, one kit covers all your lab and design needs. The kit contains 50 connectors, a crimp tool, and an insertion/extraction tool in a tough clear plastic box. **See index for complete line of A-mode connectors.**

AEK-015 15 AMP KIT INCLUDES:

50—15 Amp Contacts
50—Housings In Assorted Colors of Red, Black, Green, White
1—Insertion/Extraction Tool
1—Crimp Tool

13N1988. NET..... 189.95

AEK-030 30 AMP KIT INCLUDES:

50—30 Amp Contacts
50—Housings In Assorted Colors Of Red, Black, Green, White
1—Insertion/Extraction Tool
1—Crimp Tool

13N1989. NET..... 189.95

Lead Diameter	.024 ± .001"	.027 ± .001"

RESISTOR FEATURES:

- **±5% Resistance Tolerance**
- **Conformal Multi-Coating**
- **EIA Standard Color Coding**
- **Solder-Coated Leads**
- **−55°C to +155°C Temp. Range**

These ¼ and ½ watts have been designed for miniature circuits that require resistors with greater stability and reliability than carbon composition types, but the same small physical size. Carbon film resistors exceed performance characteristics of MIL-R-11F carbon composition types.

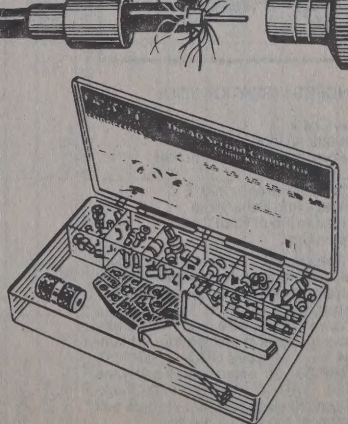
EASY-ON™ brand Connector Kits

- **50 or 75 Ohm Impedance**
- **<.1 db Insertion Loss at 2 ghz**
- **500 VRMS Peak Rating**
- **VSWR 1.05 at 1 Ghz, 1.2 at 2 Ghz**
- **1500 VRMS Dielectric Withstanding**
- **No Contact Crimp or Soldering**

This unique family of connectors reduces installation time from four minutes to forty seconds, because the self-extinguishing, pre-loaded, center contact is made by simply pushing the trimmed center conductor home. The termination is completed by simply sliding the braid crimp stress relief ferrule over the end of the unit and crimp. See page 411 for a complete description of the Easy-On family. Each kit contains crimp-type connectors from the Easy-On family and include the crimping tool and cable stripper, everything needed to make termination of your coaxial cable fast, simple and reliable.



Type 8411-UG88/1. Easy-On kit for terminating RG58/U cable with a type BNC connector. Contains: 25 pieces of type CP88-1 connector, a pre-set cable stripper, and ratchet type crimp tool.

23N3623. NET 222.95

Type 8411-UG88/2. Easy-On kit for terminating RG59/U and RG62/U cable with a type BNC connector. Contains: 25 pieces of type CP88-2 connector, a pre-set cable stripper, and ratchet type crimp tool.

VOLTREX® brand Product Assortments

CABLE CLAMP ASSORTMENTS

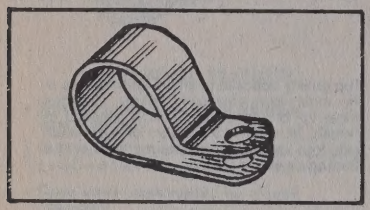
ADHESIVE BACKED CABLE CLAMP ASSORTMENT

- For Cable, Tube, Pipe or Rod Up To ½" diameter
- Made From Strong, Resilient CPVC Plastic
- No Holes To Bore, No Screws To Fasten

Kit 8408-ACC contains 355 pieces, 12 different parts, of quickly installed adhesive mounted cable clamps packaged in sturdy polystyrene sectioned storage box with handy identification chart in the lid. Contents: 40 ALC-2, ALC-4, 10 ALC-6, 50 ACC-1, 50 ACC-2, 25 ACC-3, 15 ACC-4, 10 ACC-6, 50 AUC-1, 50 AUC-2, AUC-3, and 15 AUC-4.

Adhesive: 0.25 lbs. max.; 200°F. max.

23N3617. NET 77.95



SCREW MOUNTED CABLE CLAMP ASSORTMENTS

Quickly and securely fasten tubing, rod, cable, etc. to a flat surface with just a single screw or nail. Assortment contains 50 pieces each for ⅛" and ¼" diameter; 25 pieces each for ⅜" and ½" diameter; 15 pieces for ¾" diameter; and 10 pieces for 1" diameter. Packaged in a sturdy polystyrene sectioned storage box with handy identification chart in the lid.

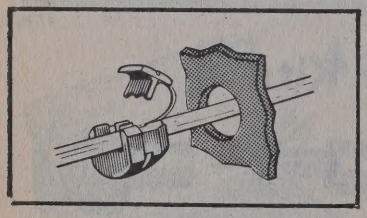
CORD STRAIN RELIEF BUSHING ASSORTMENT



WITH PINCERS INSERTION TOOL

- Cut Assembly Costs
- Prevents Insulation/Conductor Injury
- Rugged One-piece Nylon Construction
- Lengthens Cord Life
- Withstands Temperatures to 300°F
- Compact—Snaps Into Panel Hole
- Eliminates Need to Tie or Knot Cord
- Non-slip Grip on Cord

8408-SRF. An assortment of sizes and cord contours, 120 total, of cord stain relief bushings that eliminate the strain that tears cord loose from contacts or connections without injuring the insulation. Comes complete with specially designed pincers for ease in installation. Kit contains 10 pieces each of types SRD-10, SRF-10, SRF-20 and SRF-30; 20 pieces each of types SRF-40, SRF-50, SRR-10, and SRR-20. Packaged in sturdy polystyrene sectioned storage box with handy identification chart in the lid.

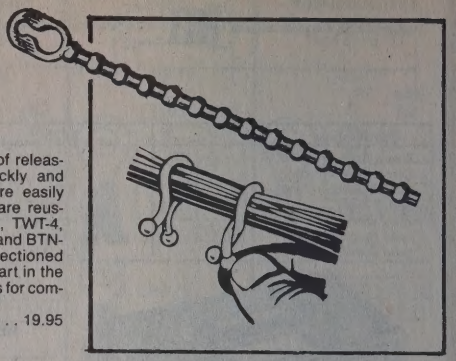
WIRE TIE KITS AND PARTS BINS

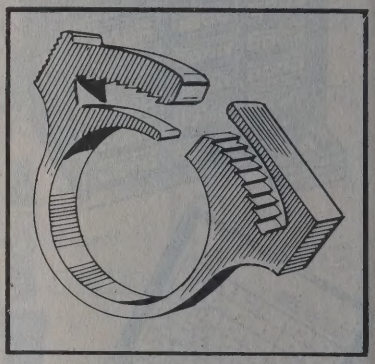


REMOVABLE WIRE TIE ASSORTMENT

- Variety of Colors For Coding
- Reusable
- Polyethylene and Nylon
- Fast and Secure

8408-TWT. This kit contains a number of releasable cable bundling devices that quickly and reliably secure wire harnesses, but are easily removed to allow wiring changes and are reusable. Contents: 50 pieces each TWT-3, TWT-4, TWT-5, TWT-8, BTP-4 (in mixed colors), and BTN-4. Packaged in sturdy polystyrene sectioned storage box with handy identification chart in the lid. See Voltrex Wiring Accessories pages for complete description.

23N3621. NET 19.95



CABLE/HOSE CLAMP ASSORTMENTS

- Reduces Installation Costs
- Easily Adjustable and Removable
- Durable, Secure, Fast, Economical
- Installs In Seconds With Pliers

8408-CHC. Kit contains an assortment of 8 sizes, 239 pieces total, of the unique type CHC cable/hose clamp. These clamps can be installed in seconds with a standard pair of pliers, sometimes with only two fingers, and can be removed by a simple twist action with pliers. Clamps are packaged in a sturdy polystyrene sectioned storage box with a handy identification chart in the lid. Contents: 50 pieces each CHC-19 and -21; 25 pieces each CHC-28, -32, -35 and -38; 20 pieces CHC-52; and 10 pieces CHC-58. See Voltrex Wiring Accessories pages.

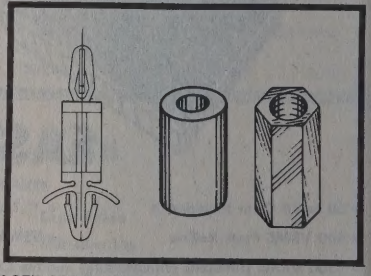
SPACER ASSORTMENTS

AMERLOK™ brand



8404-HSS CPVC PLASTIC SPACER ASSORTMENT

- Self-Extinguishing
- Temperature Resistance To 225°F
- High Dielectric Strength
- Takes #4, #6, #8 and #10 Screws

Assortment contains 9 of the most popular sizes of type HSS, self-tapping spacers and 9 of the most popular sizes of type RP, through-hole spacers: 18 different parts with a total of 800 spacers made of rugged polyvinyldichloride. Packaged in a sturdy polystyrene sectioned storage box with a handy identification chart on the lid. Contains: 50 each of HSS-44, HSS-46, HSS-64, HSS-66, HSS-68, RP4-250, RP4-500, RP4-750, RP6-250, RP6-500, RP6-750, RP8-500, and RP8-750. 25 each of HSS-48, HSS-85, HSS-86, HSS-88 and RP8-1000.

23N3613. NET 54.95

8404-PCS SNAP-IN SPACER ASSORTMENT

- Finger Grip Insertion—No need For Tools
- Locking Tension Flange Secures Boards
- Makes Repair or Replacement Easy
- Ample Chassis For Assembled PC Boards

Type PCS molded nylon spacers snap into .187" hole in the chassis; PC board with .156" holes snaps onto the spacer for quick assembly. Kit contains 50 pieces each of ¼", ⅜", ½", ¾", 1" and 1¼" heights, 300 pieces total, packaged in a sturdy polystyrene sectioned box with a handy identification chart in the lid.

23N3616. NET 38.95

METAL SPACER ASSORTMENTS

Kit contains 25 pieces each of 6 of the most popular sizes of round, thru-hole, round tapped, and hex tapped metal spacers, a total of 450 pieces. Sizes included are #4 screw ¼" and ⅜" lengths; #6 screw ½", ¾", and 1" lengths; and #8 screw 1" length. Packaged in a sturdy polystyrene sectioned storage box with handy identification chart in lid.

TYPE FPS-VOLTREX FLEXIBLE POLYOLEFIN SHRINK TUBING

MIL-23053/5. Excellent gen. purpose heat shrinkable tubing offering the best price-performance trade-off. Highly resistant to fungus/chemicals. Shrinks to less than half of supplied diameter. Lengthwise shrinkage less than 5%. Shrinks uniformly. Perfect insulation cover. Does not cold flow. Split resistant. COLORS: Black and clear in all sizes and put-ups. Red, white, and blue in 6 in. put-ups, sizes 3⁄32 thru 3⁄4 only.

Type HTV Voltrex High Temperature Vinyl Shrinking Tubing

E52331

- **Excellent Mechanical & Tensile Strength**
- **Withstands Heavy Oil Immersion**
- **Tolerance High Ultra-Violet Exposure**
- **Superb Weatherability**
- **Resists Splitting and Deformation for wave soldered PC Boards**

Newly developed heat shrinkable PVC tubing considerably exceeds 105° sustained duty capability. Voltrex Type HTV exceeds or equals the performance of Polyolefin tubing in: flammability; dielectric strength; oil resistances; tensile strength; and ultra violet weatherability at PVC prices. Available in sizes from 1⁄16" to 2" diameter. Sizes through 3⁄8" diameter. Supplied pressurized. Standard color: Black.

TYPE SRM-MULTIPLE WALL HEAT SHRINKABLE POLYOLEFIN

Multiple wall, semi-rigid, heat shrinkable polyolefin tubing. At excess of 135°C, outer tubing shrinks to geometry of surrounding, inner tubing melts for positive environmental seal. Insulates and encapsulates connections, splices, breakouts, and components. Suited for strain relief of solder joints and wire terminations. Tubing easily marked for identification. Meets AMS3634 and MIL-1-23052/4 requirements. Color: black.

TYPE MLT-VOLTREX MELT LINER TUBING

Thermo-plastic tubing, especially designed to bé compatible with polyolefins. When used between heat shrinkable tubing and whatever is to be sealed, it melts and flows upon application of heat to provide an environmental seal around the geometry to be covered. MLT flows and adheres to most low temperature plastics, fabrics and many metals. Applications such as sealing ends of wire harnesses or filling a void in a component are made quicker and more effectively than by using potting compounds or messy epoxies. Order the type MLT tubing in the size equivalent to the expanded I.D. of the heat shrinkable tubing to be applied. Operational temperature range, −75°C to 110°C. Dielectric strength; 800 volts/mil. Color: Clear.

TYPE KYS-VOLTREX KYNAR SHRINK TUBING

MIL-1-23053/8. AMS 3632B. Single best heat shrinkless tubing choice for applications involving extreme combinations of moisture, corrosive chemicals, strong solvents, oils, heat, stress, abrasion, high voltage and high mechanical strength. Voltrex Type KYS is a heat shrinkable tubing manufactured from poly-vinylidene fluoride with a thin wall and superior dielectric, abrasion, and cut-through properties. Kynar's stiffness makes this material an excellent strain relief, while the thin wall accommodates high density solder packs. Widely used as a component jacket for resistors and capacitors because of its superior flame resistance, thin wall and continuous operating temperature of 175°C. Color: clear. Kynar is a registered trade name of Pennwalt Chemical Company. 4-foot lengths marked in accordance with U.L. requirements.

TYPE NPS-VOLTREX NEOPRENE SHRINK TUBING

MIL-I-23053/1. AMS 3623. MIL-R-46846A, Type 1 Class 1. Heat shrinkable Neoprene tubing particularly useful for fabrication and repair of flexible rubber harnesses and wire bundles and for hydraulic couplings. Its superior cut-thru and abrasion resistance allow its use in heavy duty applications such as drop lines, drag lines, and industrial equipment cable. Excellent oil resistance makes it ideal for automotive, helicopter and construction equipment industries. Excellent for environments having constant vibration, need for easy application, good flexibility at low temperature, oil splashes or spills, drag or abrasion yet requiring good electrical properties and a watertight covering. Voltrex NPS is an ideal product selection. Color: black.

TYPE PVS-VOLTREX PVC-105 SHRINK TUBING

MIL-I-631D, MIL-I-23053-2. Low cost, low shrink temperature and flexibility make Type PVS ideally suited for production insulation and jacketing of cables, bus bars, terminals, etc. Voltrex non-irradiated PVC has several distinct advantages over irradiated PVC: 125°F lower shrink temperature for less heat and shock, 30% shorter shrink time for increased production, 10% higher tensile strength for greater tear strength, negligible water absorption for less current leakage. When heated to a temperature exceeding 200°F, tubing shrinks to half its supplied diameter while shrinking less than 20% in length. Tubing stocked in spools as listed. All sizes through ½" diameter are air spooled. All PVC tubing marked in accordance with UL requirements. Color: Black.

TYPE TTS VOLTREX TEFLON SHRINK TUBING

- **Extreme temperature Resistance**
- **Chemically Inert**
- **Non-flammable**
- **MIL-I-23053/12**
- **Type TFE Teflon**
- **Natural Color**
- **Excellent Strain Relief**

Voltrex TTS Teflon shrink tubing is made of type TFE Teflon which has an operating temperature rating of 500°F. TTS's stiffness, combined with its chemical inertness makes it an excellent strain relief for high temperature electrical connections within contaminated environments. Upon the application of heat in excess of 621°F the tubing will recover to about half of its original supplied diameter, shrinking firmly around the subject providing a permanent insulation covering. Color: Natural.

TYPE TFM INNER MELT HEAT SHRINKABLE TEFLON TUBING

A combination tubing with an exterior of heat shrinkable Teflon TFE and an inner lining of Teflon FEP. This tubing can be slipped over connectors, wires, terminals, splices, etc. When the covered section is heated, the TFE shrinks tightly over the inserted objects. At the same time the FEP melts and is squeezed into a solid or near solid encapsulation. Tight enough so that it offers safe protection against most environmental hazards involving pull or vibration. It has a service temperature of 450°F and offers the outstanding electrical, chemical and mechanical properties of Teflon. Easy to apply. Shrinking can be accomplished with a heat gun. Comes in nine different inside diameters from .036" to .950", in lengths of two feet. Standard material is translucent.

TYPE SST-VOLTREX SUPER SHRINK TEFLON TUBING

Super Shrink Teflon tubing provides the excellent chemical and thermal characteristics of Teflon but can be shrunk promptly over inserted objects upon exposure to moderate heat. Partial shrinkage will occur at 250°F with complete recovery at 450°F, allowing Voltrex Type SST to be shrunk on soldered joints, parts, components and fittings of plastic, metal or wood that could not be protected before because of the high temperature required for shrinkage. This makes the permanent protection of Teflon available for many heat-sensitive applications. Voltrex Type SST heat shrinkable tubing is made of FEP Teflon with a 400°F ceiling for permanent duty, and is available in ten sizes from 3/32" to 2" in diameter. Standard color is transparent light blue. MIL-I-23053/11

TYPE TZS HEAT SHRINKABLE TEFZEL TUBING

Made from DuPont "Tefzel" ETFE fluoropolymer. "Tefzel" is a high-temperature polymer designed to offer a combinaton of ruggedness, dielectric properties, chemical resistance and all over a very broad temperature range. It has the ability to be shrunk down at only 300°F, yet it can operate at intermittent service temperatures up to 392°F. Suited for many applications, including cable jacketing, wire markers, terminal covers, temperature probes, immersion tubing, heat exchanger coils, sight glasses, roll covers, and chafe guards. Has excellent electrical and mechanical properties, is heat-sealable, transparent, chemically inert, and self-extinguishing. Available in eight sizes from 3/16" to 1 1/2" I.D. Clear in color. Comes in two foot lengths. MIL-I-23053/14

TYPE SRC MODED POLYOLEFIN SHRINK CAPS

- **Semi-rigid Polyolefin**
- **Caps Shrink up to 50%**
- **Abrasion Resistant and Flame Resistant**
- **Extremely Tough and Tight Fitting**

Heat shrinkable semi-rigid polyolefin caps radiation cross-linked for excellent electrical/mechanical properties. Small/lightweight.

Chemical resistant. Shrinkable with standard heat guns. Color: black. Standard package, 100 pcs.

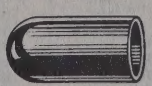
TYPE MLC MOLDED POLYOLEFIN SHRINK CAPS

WITH MELTABLE LINER

- **Easily**
- **Resistant to Chemicals**



Crosslinked heat-shrinkable polyolefin caps. Easily installed with standard heat gun or torch with temperature in excess of 276° F. Excellent electrical and mechanical protection. Unaffected by most corrosive fuels, fluids and chemicals. On shrinking, an inner adhesive liner will melt and bond to the cable jacket to provide an environmental seal for telecommunication and power cables, pipes or other cylindrical objects. Color: black.

VOLTREX® brand

Tubing Kits

TYPE HST-VOLTREX HEAT SHRINKABLE TAPE

- **Reliable Connections**
- **Two Layers**
- **Inner Meltable Line**
- **Color Black**

When taping is necessary as in the case of a working line, HST is the most reliable choice for long life and superior electrical properties. This two layered tape puts the correct amount of tension all around the joint automatically. No extra techniques or training needed. The inner meltable liner adheres to almost all clean surfaces for positive moisture protection. Color: black. 54 ft. rolls.

Stock No.	Type	Tape Width	Roll Length	Net per Roll 1-9	10-24	25-99	100-up

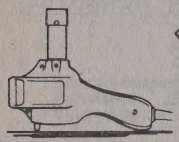
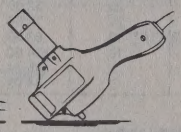
WHISPER "6" HIGH-TEMPERATURE HEAT GUN

6-POSITION SET-UP

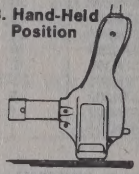
1. **Right Side Horizontal**



2. **Left Side Horizontal**



3. **Hand-Held Position**

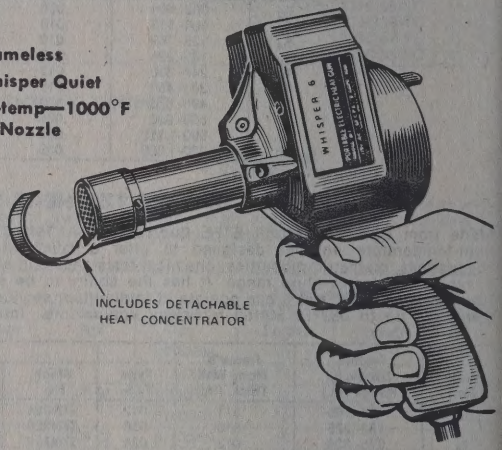


4. **Upside-down**

5. **Angled**

6. **Straight Ahead**

- **Flameless**
- **Whisper Quiet**
- **Hi-temp—1000°F at Nozzle**



Whisper—"6" Voltrex hi-temperature heat gun. Flameless. Specially designed for shrinking Voltrex tubing and for general heat shrink applications. Whisper quiet. Light weight. Noise level: R.F.—none; audible—none. Reduces operator fatigue; increases production. Preferred over noisy, air-blast types for day-in, day-out use. Reaches 1000°F at nozzle (measured with thermocouple). Shrinks full range of tubing types, including Teflon. Can be instantly set up in 6 positions without a stand. Safer and easier to use. Controlled heat path permits positioning hands close to side of nozzle end without burning fingers. Assures precision control of the shrinking process.

ENGINEER'S TUBING KITS

These kits contain an assortment of sizes of the tubing types listed below. This material assortment enables the engineer to decide upon the best tubing in each application before putting his prototype into production. The deluxe kits are perfect starter kits since they include the Whisper 6 Heat Gun. The Basic 6" kit contains 78 6" lengths of tubing plus 20 caps; the Advanced 100mm kit contains 120 100mm lengths of tubing plus 32 caps. Both are packaged in a high-impact, polystyrene, Sectioned storage box with "Quick-Scan" chart.

BASIC 6" KIT INCLUDES:

18 Pcs. Type **PVS**
18 Pcs. Type **FPS**
14 Pcs. Type **SRS**
14 Pcs. Type **SRC**
11 Pcs. Type **KYS**
8 Pcs. Type **SRM**
9 Pcs. Type **TTS**
6 Pcs. Type **MLC**

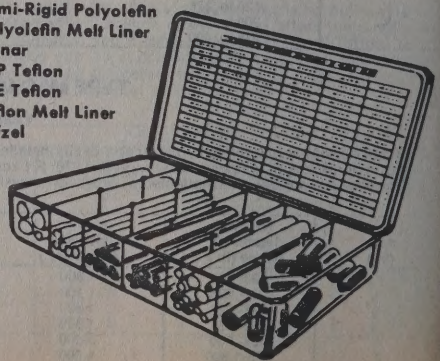
37N1436 ..... **50.95**

ADVANCED 100MM KIT INCLUDES:

18 Pcs. Type **PVS**
18 Pcs. Type **FPS**
12 Pcs. Type **KYS**
10 Pcs. Type **SRM**
14 Pcs. Type **MLT**
10 Pcs. Type **SST**
5 Pcs. Type **TFM**
10 Pcs. Type **TTS**
14 Pcs. Type **SRS**
9 Pcs. Type **TZS**
20 Pcs. Type **SRC**
12 Pcs. Type **MLC**

37N1443 ..... **84.95**

Including:
PVC
Flexible Polyolefin
Semi-Rigid Polyolefin
Polyolefin Melt Liner
Kynar
FEP Teflon
TFE Teflon
Teflon Melt Liner
Tefzel



DELUXE KIT

In addition to the kits described above, the deluxe kits include the Whisper "6" heat gun, designed for shrinking Voltrex brand tubing.

37N1449. Deluxe Basic 6" kit **130.95**
37N1444. Deluxe Advanced 100mm Kit **165.95**

Tubing

TEFLON INSULATING TUBING

VOLTREX® brand

MIL-I-22129C

Extremely high operating temperature range and chemical inertness make Voltrex Teflon insulating tubing unparalleled by any other material in electrical applications. Will not crack or become brittle. Remains flexible throughout entire operating temp. range. Available in thin wall, allowing miniaturization and compactness. Also available in standard wall where extra dielectric or mechanical strength are required. Stocked in 100' spools. Other spools sizes and tubing cut to length available on special order. Color: Natural. *DuPont Registered Trademark.

VOLTREX® brand Electrical Sleeving

VOLTREX TYPE GSX—HEAT TREATED FIBERGLASS SLEEVING

Product Description and Features: Voltrex GSX consists of a tightly braided fiberglass sleeving designed as Class 240C insulation. CSX is heat annealed to remove organic impurities, improve handling and reduce endfray. The sleeving is compatible with varnishes, epoxies and bonding agents where maximum reinforcement between the glass and encapsulant is needed. Product Applications: Voltrex GSX is utilized as primary and secondary insulation for motor leads, small appliances, brush assemblies, electric resistance heating elements and similar low voltage applications. It is the ideal sleeving for abrasion and cut-through protection over insulated leads. Color: Natural.

VOLTREX TYPE GSV—VINYL COATED FIBERGLASS SLEEVING

Product Description: Voltrex vinyl-coated glass sleeving consists of braided glass tubing coated with a vinyl compound specially formulated for high dielectric strength and good heat resistance. Product Advantages: Good physical strength, flexibility and toughness at an economical price make vinyl-coated sleeving the ideal selection for use in equipment designed for Class 105 and Class 130 service. It does not disintegrate nor swell after 48 hours in transformer oil at 105°C and it resists waxes, alcohol, petroleum solvents, esters, and many alkalies and acids. Because of the specially formulated vinyl coating, excellent resistance to cut-through, abrasion and cold flow is achieved. Vinyl-coated sleeving is flame retardant (self-extinguishing within 15 seconds), and resists cracking at temperatures as low as −40°C. It is especially resistant to solvents used in electrical varnishes. Product Applications: Vinyl-coated sleeving is suggested for use in potted coils, motor and transformer leads and connections, switchboard wiring, instruments and other applications designed for Class 130 operation. Color: Black.

VOLTREX TYPE GSA—ACRYLIC COATED FIBERGLASS SLEEVING

Product Description: Voltrex GSA sleeving consists of a specially designed fiberglass sleeving coated with flexible, thermally stable, fullycured acrylic resin. Product Features: GSA sleeving specially formulated coating adheres strongly to braid and resists cracking or splitting even when creased at high temperatures. Its dry, glossy surface prevents sticking and improves resistance to surface tracking at high voltage. GSA sleeving stands up under abuses of installation—it remains round; its good dielectric properties are unaffected by severe bending; it resists abrasion and cut-through. GSA sleeving is compatible with most acrylic epoxy, phenolic , polyvinyl acetal, and other wire enamels; and resists many acids, alkalies, and most commonly used solvents. Product Applications: GSA sleeving is suggested for use in instruments, transformers, motor leads and connections. Its good chemical resistance, toughness and flexibility make it ideal for use in most electrical equipment of enclosed or open type construction, rated for Class 155 or lower. Product Specifications: NEMA, VS-1, ASTM D-372, and Military Specification MIL-I-3190.
Color: Natural.

VOLTREX TYPE GSR—SILICONE RUBBER COATED FIBERGLASS SLEEVING

Voltrex silicone rubber-coated glass sleeving consists of a braided glass tubing coated with an improved, flexible silicone rubber formulation. Voltrex silicone rubber sleeving has outstanding thermal stability and is designed for long service life at temperatures up to 200°C, or for shorter exposure to temperatures as high as 250°C. Voltrex silicone rubber glass sleeving resists abuse from bending stresses at high temperatures, yet provides a flexible material which is functional through an extremely wide temperature range. Voltrex silicone rubber sleeving retains flexibility at temperatures as low as −70°C. Voltrex silicone rubber-coated glass sleeving is compatible with most high temperature insulation systems, exhibits excellent corona resistance, excellent ozone resistance and will self-extinguish within 45 seconds leaving a non-conductive ash. Silicone sleeving is unaffected by weathering. Silicone rubber-coated glass sleeving conforms to ASTM Specification D372. NEMA Standard VS-1, and Military Specifications MIL-I-18057 and MIL-I-3190. A wide range of uses has been found for Voltrex silicone rubber-coated glass sleeving including insulation of leads and connections in coils, solenoids, transformers, relays and other equipment operating at Class 200 and higher. It is also the ideal choice for equipment likely to encounter sub-zero operating conditions. Color: Natural.

BELDEN

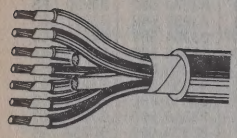
Multi-Conductor Cables

Multi-conductor cables are manufactured in a wide range of sizes, dimensions, shielding constructions and insulations to meet the needs and technical requirements of many different types of equipment. User safety is always a primary design consideration. Cable used for communications, instrumentation, sound, control, audio and data transmission are all included in the multi-conductor category. Each of these cables is designed to protect a desired signal under critical conditions by reducing hum, noise and cross-talk. The key to maintaining signal integrity under a wide diversity of conditions and environmental hazards, can be found in highly effective shielding designs and insulating techniques.

TYPE S NEOPRENE CONTROL CABLES (NON-PAIRED)



Industrial, utility, and motor control applications; remote control of automatic electric equipment. Neoprene jacket offers resistance to oils, acids, oxidation, abrasion, and impact.

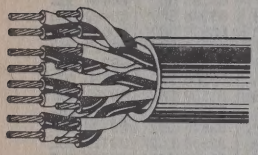
MULTIPLE CONDUCTOR CABLES-PAIRED



All types below have #22 AWG solid tinned copper conductors, vinyl insulated and cabled in pairs. Chrome vinyl jacket overall. 8746 spools are one piece −0 +20%. *Not UL Listed.

STRANDED

As preceding types but Type 22 AWG stranded (7x30) conductors provide greater flexibility, can be run in intricate bands.

MICROPHONE CABLES

General purpose shielded cables, for all stage, studio and instrumentation applications. Rubber types have rubber insulated tinned copper conductors, tinned copper braid shield, black rubber jacket overall,(†) except black Neoprene jacket. (**) 8402 & 8408 have brown hypalon jacket. Vinyl types are similar, but have polyethylene insulated conductors, chrome vinyl jacket.(*) Miniature cables having tinned cadmium bronze conductors. USES: Mike, power supply, instrumentation, entertainment, etc.

HI-FI AND STEREO CABLES

Phono Pick-Up Cable, Type 8421, Hi-Fi connecting cable, spiral wrapped shield, chrome vinyl jacket with cellular polyethylene insulated conductor, 8431 is rubber insulated, shield and brown cotton braid, 8419, and 8429, are vinyl insulated.* No shield, no jacket, color-coded polyethylene insulation and individual spiral wrapped shields; chrome vinyl jacket.

Dual-Channel Audio Cable, Type 8416. Designed for stereo and language lab hookup applications. Tinned copper-copperweld conductors, with color-coded polyethylene and individual spiral wrapped shields; chrome vinyl jacket. †per channel, +50 ft. below.

Miniature Audio Connecting Cable, Type 8417, Double BELFOIL aluminum-mylar shields provide total shielding for critical audio and instrumentation applications. Copper-copperweld conductor cellular polyethylene insulation, chrome vinyl jacket.

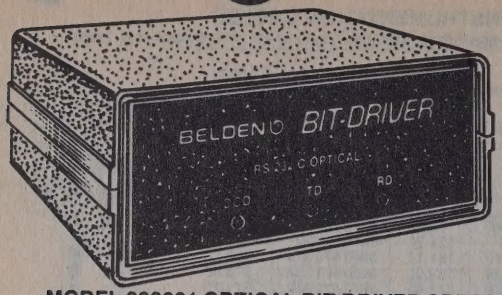
BELDEN Molded Cable Assembly



BIT DRIVERS, FIBER OPTIC CABLES AND KITS

Totally compatible UL Listed optical and metallic system units for RS-232-C equipment. Simplex and duplex full data transmission at up to 56K bps. Ideal for in house interconnection of wide range of EDP equipment. Either optical or metallic bit-drivers, plus cables to meet specific environmental needs and RS-232 interface cables from one supplier. Integrated system approach gives "matched performance" reliability for the entire data link. Unique LED indicator array shows system status and speeds diagnostic procedures. The Bit-driver saves telephone company rates and equipment rental charges. This system consists of two small Bit-Driver™ units located at the terminal unit sites and connected to them via a short RS-232 electronic cable. The Optical Bit-Driver's™ contain an optical transmitter and receiver pair which transmit signals over a duplex fiber optic cable at lengths up to 1,800m (5,900 ft). Thus terminal units can be separated by distances over one mile.

MODEL 222001 OPTICAL BIT-DRIVER SPECS

OPERATION MODE: Asynchronous, simplex or full duplex.
INPUT/OUTPUT INTERFACE: RS-232-C, Type D asynchronous, at 0 to 56K dps.
TRANSMISSION LINE INTERFACE: Two AMP fiber optic receptacles for interfacing with fiber optic duplex cable.
TRANSMISSION WAVELENGTH: 880 nanometers.
RECEIVER SENSITIVITY: 15 nanowatt at less than 10-9 bit error rate.
TEMPERATURE RANGE: 32 to 160°F (0 to 70°C).
INPUT POWER: 105 to 130VAC 60Hz 10 watts. Power transformer secondary fused.

10F8244. Model 222001. NET 280.00

MODEL 9338 METALLIC BIT-DRIVER SPECS

OPERATION MODE: Asynchronous, simplex or full duplex.
INPUT/OUTPUT INTERFACE: RS-232-C, Type D asynchronous, at 0 to 56K bp.s.
TRANSMISSION LINE INTERFACE: Balanced two pair metallic circuit.
TRANSMISSION LINE RESISTANCE: 150 ohms max. one way.
TRANSMISSION LINE PROTECTION: at 8 volts, up to 50A pulses.
TEMPERATURE RANGE: 32 to 160°F (0 to 70°C)
INPUT POWER: 105 to 130VAC 60 Hz. 10 watts. Transformer secondary fused.

EIA RS-232-C INTERFACE CABLE ASSEMBLIES

Fast, simple, reliable, accurate interface for data terminal and communications equipment employing serial binary data exchange. 25 conductor molded cables are designed and built to meet EIA standard RS-232-C and types A through M standard interfaces. The 8459 cable (UL style number 2576) passes the FR-1 verticle frame test and is preferred for critical interfaces. Positive pin-to-pin mating using subminiature "D" type plug connectors means no mix-up. Cable assemblies in stock in five standard lengths of up to 70′. Bulk cable available in put-up of up to 1000′. **Custom designed assemblies available on special request.**

ELECTRICAL/ELECTRONIC SPECIFICATIONS

- Capacitance: 35pf/ft.
- Cable voltage rating per UL2576: 150VDC
- Suggested working voltage: 200VDC
- Connector voltage rating: 500VAC @ sea level; 125VAC @ 70,000 ft.

PHYSICAL SPECIFICATIONS

- 25 conductor cable
- 22 AWG (7 × 30) stranded tinned copper
- PVC insulation
- PVS jacket
- O.D. .370″
- 25 Pin male subminiature "D" plug connectors at ends
- Contact Pins: gold over nickel-plated beryllium copper
- Dielectric: glass filled nylon
- Shells: Cadmium cold rolled steel with gold iridite finish

GPIB/IEEE GENERAL PURPOSE INTERFACE CABLES

Interface computer power with test and measurement hardware — without resorting to time-consuming patchwork wiring. UL recognized. GPIB cables can interconnect up to 15 programmable instruments at a time in star or daisy chain networks. Recommended for applications involving counters, signal generators, calculators, digital multimeters — any instrument equipped with standard IEEE 488 interfaces.

PHYSICAL SPECIFICATIONS

24 conductor cable
6 pair, 1 single conductor, braid shield with drain (91¾ cover)
Semi-rigid jacket, 8.9mm
24-pin AMP connectors-male and female-at ends
Gold over nickel-plated beryllium copper, contacts self-extinguishing plastic
Metric cadmium-plated finish screws.

LOCAL AREA NETWORK CABLES AND ASSEMBLIES

- **Ethernet**

Local area networks (or LANS) have emerged as a key development as our society progresses in the "information age." LANS are providing for the intergration of computer and communication technology to meet the "information age" demand for efficient information (or data) processing, handling, collection and distribution. LANS fulfill their function throughout a local region without using telephone, microwave, or satellite links.

High quality molded cable assemblies meet all requirements of paragraph 7.2.3. of "The ETHERNET" specification for extension cords.
CONNECTORS—Male and female 15-position subminiature D connectors include easy-to-operate slide locking mechanism.
CABLE AND CONNECTOR SHIELDING—Fully shielded 9892 cable is terminated on both ends with standard subminiature D connectors. Terminations are surrounded by "OMNI-SHIELD"™ advanced susceptability protection shielding. Connectors are encased in rugged molded blue thermoplastic handles to provide strain and flex relief . . . plus protection from abusive use.
Molded cable assemblies can be interconnected (concatenated) for extended transceiver hookups.

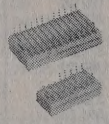
DIP CONNECTORS



High reliability original U-contact. Solvent resistant resin (PBT) housing. UL recognized. Plug into IC sockets or solder. Temp. range: −55°C to +105°C. Current rating: 1 ADC. Contact resistance: 10 milliohm max. @ 6 VDC, 0.3 amp. UL voltage rating: 30 VDC. Phospher bronze (gold over nickel plating) contacts. PBT (UL 94V-0) housing. PC board thickness: .062". Insulation resistance: 1000 megohm min. @ 500 VDC. Dielectric withstanding voltage: 500 VAC for 1 minute. Wire size (flat cable for IDC): .050" spacing, AWG #28 (stranded) or #30 (solid). Low profile PC board installation. Includes body and cover. Available in 14, 16, 24 and 40 pin positions.

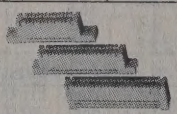
MAG-MASTER CONNECTORS

Now you can interface your discrete wires to your printed circuit board. Temperature range is −55°C to +105°C. Current rating is 3A DC. Contact resistance (at status mated with SOCKET) is 20mΩ max. at 6V DC, 0.3A. Insulation resistance is 1000MΩ min. at 500V DC and dielectric withstanding voltage is 500V AC for 1 minute. UL voltage rating is 30V DC. Contacts are selectively gold-plated. Has flex lock/eject hooks (optional) and 10 to 60 pins. Solvent-resistant and UL recognized.

CARD-EDGE CONNECTORS



Bifurcated contacts spaced .100". UL recognized. Temp. range: −55°C to +105°C. Current rating: 1 ADC. Voltage rating: 30 VDC. PC board thickness: .062". Phospher bronze (gold over nickel plating) contacts.

Mass terminable to .050" pitch cable without any cable preparation. Temperature range is −55°C to +105°C with current rating of 1A DC. Voltage rating is 250V AC and contact resistance is 10mΩ max. Insulation resistance is 1000MΩ min. at 500V DC. Dielectric withstanding voltage is 500V AC for 1 minute. Insertion force of 10kg max. and withdrawal force of 0.75 kg min. Flat cable is 1.27 mm (.050 inch) spacing and AWG #28 (stranded) or #30 (solid). Contacts are Phosphor-bronze (gold plating). Housing is PBT (UL 94V-0).

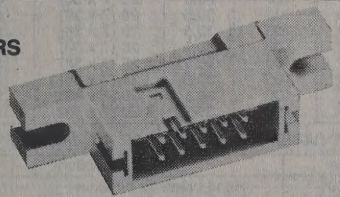
MALE CONNECTORS



Mass-termination with flat cable. Has 2.54 mm grid contact spacing, 0.64 mm contact. Extensive applications (T-tap, splice connector, I/O Interface). With many diversifications (10-60 pins, with and without mounting ears). UL recognized materials (94V-0). Temperature range is −55 to +105°C. Current rating is 1A dc. Contact resistance (with SOCKET) is 20 mΩ max. at 6 VDC, 0.3 A. Insulation resistance is 1000 MΩ min. at 500 VDC, Insertion force (with SOCKET) is 3.5 kg max. (10 pins) to 21 kg max. (60 pins). Withdrawal force (with SOCKET) is 0.25 kg min. (10 pins) to 2.5 kg min. (60 pins). Wire size (Flat cable for I.D.C.) is 1.27 mm (.050 inch) spacing, AWG #28 (stranded) or #30 (solid).

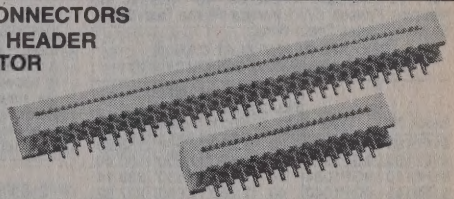
S.H.E. CONNECTORS SOCKET HEADER ELIMINATOR



Economically replaces socket-header combinations when disconnection is no longer necessary. Has 2.54 mm (.100") grid terminal spacing with high-density installation on PC board. Permanently replaces sockets and headers. High-reliability original U-contact (double-action of IDC). Pin location matches header mounting hole layout. Contacts available: 10-60 positions. Solvent-resistant resin (PBT) housing. UL recognized. Temperature range is −55°C to +105°C with current rating of 1A DC. Contact resistance is 10m Ω max. at 6V DC, 0.3A with an insulation resistance of 1000M Ω min. at 500 V DC. Dielectric withstanding voltage is 500V AC for 1 minute. Wire size: Flat Cable for IDC is 1.27 mm (.050") spacing. AWG #28 (stranded) or #30 (solid). Thickness of PC board (standard) is 1.6 mm (.062"). Contacts are Phosphor-bronze (gold-over-nickel plating). Housing is PBT (UL 94V-0).

BELDEN Belden Flat Cable and Assembly Tools

VARI-TWIST FLAT CABLE

Belden's Vari-Twist™ 9V280XX series was designed to reduce crosstalk by twisting the pairs but can be mass terminated in programmed flat sections with any currently available IDC connector. To further reduce crosstalk, each adjacent pair is twisted in an opposite direction. The standard twist length is 18 inches followed by 2 inch flat section of .050" spaced conductors. Vari-Twist™ consists of preinsulated singles laminated to a single clear PVC substrate. Standard put-ups is 100 ft. for easy pay out. UL style number: 2697. Flat interval conductor spacing; 1.27 mm (.050"). Pairs per cable: 5 to 32. Conductor sizes: 28 AWG stranded. Temperature rating: 80° C.

Stock No.	Type	No. of Pairs	Nom. Width	100'

In order to stabilize electrical characteristics Belden offers the 9GP10XX series. 28 AWG stranded conductors are laminated on .050" centers with an expanded mesh laminated to the bottom. One 28 AWG drain wire is in contact with the mesh for grounding purposes. The 9GP10XX series will terminate with any IDC connector. The 9GP10XX series standard package is 100 ft. for easy pay out. UL Style 2682. Temperature Rating: 105° C. Insulation resistance: 10^3 MΩ (10 ft. sample). Passes VW-1 Vertical Flame Test. Black Stripe indicates Drain Wire.

EXTRUDED SHIELDED JACKETED VARI-TWIST™ FLAT CABLE

To address FCC requirements and to reduce EMI/RFI Belden is introducing the 9V283XX series cables. The cable is Belden's standard 9V280XX series 100% covered with an aluminum/mylar foil, extruded black .032 PVC jacket. Two 28AWG drain wires for ease of shielded termination. These cables also meet the new UL style 20081 allowing the thin wall, 300 volts, and 80° C. The thin jacket allows for a high degree of flexibility, ease of termination, reduced space requirements and identification of the flat sections. Flat Interval conductor spacing: 1.27 mm (.050"). Pairs per cable: 5 to 32. Conductor sizes: 28 AWG stranded. Adjacent pairs have opposite lays, 18" twisted interval with a 2" flat interval is standard.

LAMINATED FLAT CABLE

Belden offers standard .050" pitch ribbon cable in white with blue and green stripes. The 9L280XX series is packaged 100 ft. to a box for easy payout. UL style number: 2651. Conductor spacing: .050" (1.27 mm). Conductors per cable: 10 to 64. Conductor sizes: 28 AWG stranded. Temperature rating: 105°C. Voltage rating: 300V. Insulation resistance: 10^3M Ω (10 ft. sample). Passes VW-1 Vertical Flame Test.

EXTRUDED SHIELDED JACKETED FLAT CABLE

The Belden 9L283XX series was designed to help meet F.C.C. E.M.I. requirements and doing it with a much thinner extruded jacket currently available to allow for greater flexibility. These cables meet the new U.L. style 20081 allowing for a .032" jacket wall, 300 volts, and at 105° C. The core cable is Belden's 9L280XX gray series to allow easy termination to any I.D.C. connector. All cables are 100% shielded with an aluminum/mylar foil and can be terminated with two 28 AWG drain wires. Voltage rating: 300V. Insulation resistance: 10^3M Ω (10 ft. sample). Lengths: 100' put-ups standard. Passes VW-1 Vertical Flame Test. Nominal thickness: .118" Conductor spacing: .050" (1.27 mm). Conductor sizes: 28 AWG stranded. Temperature rating: −20°C to +105°C.

CATV - MATV COAXIAL CABLES

Satisfy the requirements of CATV-MATV applications. One or more of the cables in this group will fulfill the physical and electrical requirements of a system. A range of cable sizes including a variety of materials to meet exact needs—copper and copper covered steel center conductors. Duofoil® and braid shields, polyvinylchloride and polyethylene jackets and galvanized steel messengers for overhead runs. All cables in this group, except Type 8241, are sweep tested using the Structural Return Loss Method to insure consistent cable performance and uniform electrical characteristics.

TV CAMERA CABLES, CCTV AND TELEPHONE CABLES

BELDEN

TV CAMERA CABLES AND CCTV CABLES

Belden TV Broadcast and Closed Circuit TV Camera Cables assure reliable circuit isolation thereby reducing AC hum and minimizing cross-talk between circuits. Made to take rugged service and to maintain high conductor insulation resistance regardless of ambient temperature changes. Major uses are controlling, powering and transmitting sound and picture information for monochrome and color TV cameras as well as for remote control, monitor and cue line systems. Engineered to be lightweight, flexible, and easy to terminate. UL listed.

HIGH TEMPERATURE—PLENUM CABLE

BELDEN by Milibride Plenum Coaxial Cables

Eliminates the need for using conduit when installing cables in air plenums.

Because of its flame resistance and low smoke emission properties, the special compound used in Belden plenum cable jackets and insulations has been accepted under the provisions of the National Electrical Code and classified by Underwriters Laboratories, Inc. for use without conduit in air plenums.

TAGT

High Temperature Appliance Lead Wire

Application: Internal wiring of domestic, commercial and industrial heating and cooking equipment and appliance for both damp and dry application. The insulation provides an excellent, high dielectric, high temperature lead wire having flexibility and strippability coupled with abrasion, chemical and moisture resistance not generally found in appliance wire.

Listing: Underwriters' Laboratories Inc. and by Canadian Standard Association as Type TAGT for 250°C continuous operation at 600 volts.

PLENUM CABLE

Computer and Instrumentations

Because of its flame resistance and low smoke emission properties, the special compound used in Belden Plenum cable jackets and insulations has been accepted under the provisions of the National Electrical Code and is classified by Underwriters Laboratories Inc. eliminating the need for using conduit when installing cables in air plenums. Cuts installation costs by 30% to 50% or more. Resists aging, cracking and chemicals and retains excellent mechanical and dielectric properties. Recommended applications for NEC Article 725-2(b) signalling cable.

Thermocouple WIRE & EXTENSION WIRE

BELDEN

BY MILI BRIDE

A thermocouple is the joining of two disimilar metal conductors. Voltage is generated when there is a temperature change at the junction of the two conductors. The voltage is transmitted to a calibrated meter which moniters the temperature changes. The most common use for thermocouple is process instrumentation where temperature monitoring is critical.

The concept of shielding the power cord has proven highly effective as a means of minimizing the error-generating effects of ambient electrical interference. This is an important benefit where interference-sensitive electronic devices such as computers and laboratory test equipment are concerned. It's been demonstrated that shielded cords can improve performance in applications like these and cut costs at the same time. For example, when substituted for conventional power cords such as those used in microprocessing equipment and computer systems, shielded cords have proven that they can reduce spurious electrical signals and cut manufacturing costs by eliminating the need for some or all noise filters. In one test a 60 db noise reduction was obtained simply by replacing an ordinary cord with a Belden shielded cord.

ELECTRICAL POWER CORDS, CORD SETS AND EXTENSION CORDS MEET O.S.H.A. REQUIREMENTS

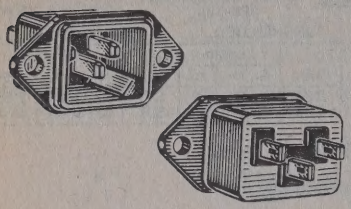
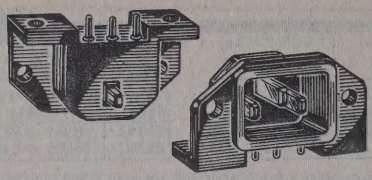
RECEPTACLES



17253 RECESSED POWER RECEPTACLE

The recessed power receptacle mates with any Belden cord having the SPH-386, SPH-390, or SPH-391 molded vinyl connector. May be used for equipment in the U.S., Canada and European countries. Rating: 6 AMPS, 250 VAC.

81F6090. NET ..... .80

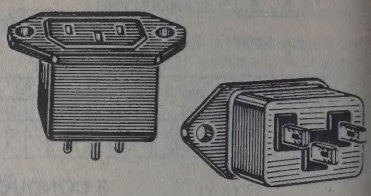


17265 AC RECEPTACLE

6A, 250VAC. SPH-386 390 391

Primary power receptacle with 6A, 250V rtng. for U.S. and European equipment. 3-pin type grounding. 2, .136" dia. holes allow fastening to PC board; 2 more .136" dia. holes allow fastening to panel or chassis, PC pins have ⅛" projection to fit thru PC board. Ground pin can connect to lug on rear of housing. Mates with connectors SPH-386, 390 & 391.

37F3022. NET 1.04



17267 AC RECEPTACLE

15A, 250VAC. SPH-388

Primary power receptacle with rating for U.S.A. and European equipment. Grounding, 3-contact type; front mount. Mounts with 2, #5 screws or ⅛" dia. rivets (not supplied). U.L. listed; C. S.A. Mates with Belden molded vinyl plugs SPH-388, SPH-388C and SPH-388D. Rating: 15 AMPS, 125 VAC—6 AMPS, 250VAC.

VOLTREX® brand Hook-up Wire & Power Cords

Voltrex hook-up wire is offered in three vinyl insulation styles: 300V-80°C 600V-105°C, and 1000V-80°C. Conductors are tinned copper, solid or stranded, or unitized stranded: bare copper strands with tin overcoat ("U" in table). Specify color and color no. when ordering. All colors are not available in all types. See stock color column.

Control and Signal Cable

UL Listed CSA Certified OSHA Acceptable for General Purpose Use

- Stranded tinned copper conductors
- Color coded PVC insulation
  .010" wall (24 and 22 AWB)
  .016" wall (20, 18, 16 AWG)
- Gray PVC Jacket
- UL/CSA rated 80°C 300 Volts

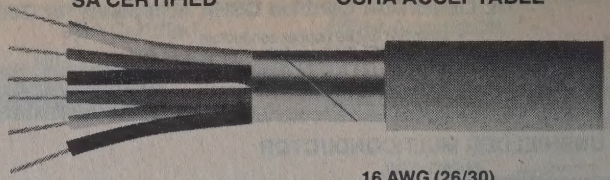
alpha Control and Signal Cable

UL LISTED **SA CERTIFIED** **OSHA ACCEPTABLE**

For General Purpose Use

Shielded Multiconductor
UL 2464 80°C 300 Volts

- Stranded tinned copper conductors
- Color coded PVC insulation
  .010" wall (24 and 22 AWG)
  .016" wall (20, 18 and 16 AWG)
- AL/Mylar foil wrap shield
- Gray PVC Jacket



24 AWG (7/32)

1. Al./mylar foil shield
2. Suitable for outdoor use
3. For non-conduit plenum installation
4. Dual (siamese) construction

Audio and Communication Cable

UNSHIELDED CABLE—UL LISTED

- Solid or stranded tinned copper conductors
- Color coded PVC insulation
- Gray PVC jacket

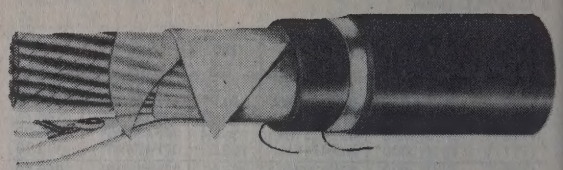
Instrumentation Cable • Process Control

- Stranded copper conductors
- PVC or PVC/nylon insulation
  Note: Conductors are both color and number coded
- Shields are aluminum/polyester tape with drain wire.
- Nylon rip cord to aid in jacket removal
- Black flame and weather resistant PVC jacket



PVC CONSTRUCTIONS
UL Subject 13; power limited tray cable per NEC Article 725; pass IEEE 383 vertical flame test

PVC/NYLON CONSTRUCTIONS
UL Subject 1277; tray cable per NEC Article 340; pass IEEE 383 vertical flame test

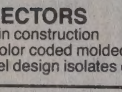
COMPONENTS

THERMOWELLS
- Brass per ASTH B-16
- Standard 3/4" N.P.T.



FITTINGS

CONNECTORS
- Solid pin construction
- ANSI color coded molded bodies
- Channel design isolates each wire

Cords and Cord Sets For OEM and Replacement

alpha

SHIELDED CORD SETS
Many Alpha cord sets shown on this page are shielded with 100% coverage foil accompanied by drain wires used for termination. This technique suppresses electrical radiation, thereby improving the performance of sensitive electronic equipment. Use of such cords can eliminate the need for costly noise filters and internal equipment shielding.

BONDED RIBBON CABLE

- Stranded tinned copper conductors
- .010" color coded PVC insulation
- 105°C 600 volt rating
- Flexible
- Easy teardown

alpha Flat Cable Connectors

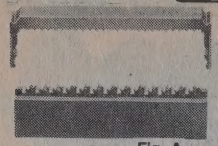

Fig. A

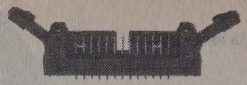

Fig. B

Fig. C

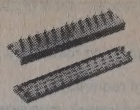

Fig. D

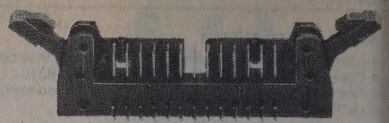

Fig. E

The Alpha Flat Cable Connector System has been designed to provide superior reliability, assembly ease, and compatibility with MIL-C-83503. Manufactured to strict tolerances, the Alpha connectors ensure precision termination and the ability to create reliable and predictable assemblies.

OFF-SET TINES
Patented off-set tines place forces on the conductor in opposite directions on two different planes, keeping the conductor under constant tension, ensuring a gas-light connection.

DUAL CANTILEVERED CONTACTS
The female socket connectors feature dual cantilevered contacts ensuring good electrical contact when inserted into a header. The design provides two surfaces for wiping action which will remove any oxides or dirt that may have built up on the contacts.

FEMALE SOCKET CONNECTORS—FIG. B

Mates with all standard headers and 0.025" wire wrap posts; recessed cover design allows cable to remain within connector profile; self-locking cover; patented off-set tine design ensures reliable gas-tight termination; terminations can be inspected before cover is put on. Also available in QPL version.

WITH STRAIN RELIEF

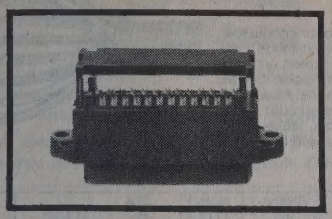
Flat Cable Connectors

D-SUBMINIATURE—UL, CSA



- Cover lip on primary cover
- Internal transition from .050" to .054" centers permit use of standard .050" cable.
- Phosphor bronze contacts with 30M " gold plating.
- Patented offset tines.
- UL 94 V-O plastic body.
- Offers a variety of cable entry and mounting options.

MALE—PIN TYPE

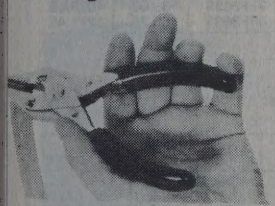
FCT-11A BENCH PRESS

Designed to terminate all Alpha 10C connectors. Assures quick and easy alignment of cable and connectors. Requires minimum fixture changing so that connector styles can be changed with little down times.
FCT-11A . . . Stock No. 67F900 Net each 422.35

FCT-12 BENCH PRESS

Truly universal bench press designed to accommodate most brands of IDC connectors. Manufactured from light weight and strong aluminum, this press minimizes operator fatigue through high mechanical advantages.
FCT-12 . Stock No. 81F5723 Net each 883.68



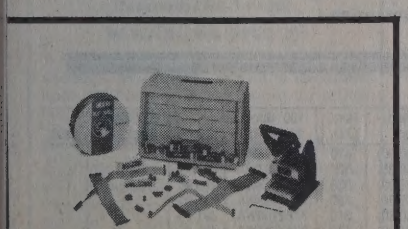
FCT-30 DIP HAND TOOL

Light weight and easy to use plier type construction is ideal for field service or light dip jumper assembly work.
FCT-30. . . Stock No. 64F219 Net each 37.13

FCT-BT—Tool used to remove system II header polarizing ribs.
Stock No. 81F5721 . . . . . 9.28

FCT34-43A Bench Press Adapter—Allows for termination of system II female socket connectors in FCT-11 Tooling.
Stock No. 81F5736 . . . . . 14.07

DESIGNER AND LAB KITS



FCT-80

FCT-80 DESIGNER KIT

Contains over 300 connectors and accessories representing the entire Alpha flat cable and connector system. Also includes the FCT-11A bench press and 100 feet of Alpha Pin 3581/50, 50 conductor color coded flat cable.

FCT-80 . . . Stock No. 67F901 Net each 1610.48

FCT-81 DIP KIT

Contains all materials needed to fashion DIP jumpers for prototypes, rewiring or repairs. Includes 14, 16 and 24 pin DIPs, strain relief clips, cables and hand tool. Packaged in sturdy clear plastic box. Ideally suited for field repairs. DIPs mate with all standard DIP sockets.

FCT-81 . . . Stock No. 67F896 Net each. 125.31

Dearborn Audio Cables

INDIVIDUALLY SHIELDED MULTIPLE PAIRS TINNED COPPER CONDUCTORS

Color coded .010" polyethylene insulation. Pairs have Mylar supported aluminum foil shield; 22 gauge stranded tinned copper drain wire; twisted. Grey PVC Mylar wrap between shields and jacket. Size & stranding: 22-7/30. *.008" polypropylene ins.

MIL-W-16878D TEFLON HOOKUP WIRE

TYPE E 600 VOLT

Single conductor, stranded or solid silver plated copper, extruded TFE Teflon insulation. Voltage rating: 600 volts. Temperature rating: −65°C to −200°C. Indicate color by adding code number to stock number; 0—black, 9 white.

"TEW" UL CSA 105C°, 600V, HOOKUP WIRE FLAME RETARDANT FR-1

Stranded, tinned copper conductor in sizes AWG #18 through AWG #4/0. All sizes use polyvinylchloride insulation rated at 600 volts with a temperature rating of 105°C. Specify color by number: 0-black, 1-brown, 2-red, 3-orange, 4-yellow, 5-green, 6-blue, 7-violet, 8-gray, 9-white. "F" denotes bonded tinned copper. (*) denotes only available in red, white, black and green.

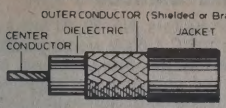
Dearborn Cable

COAXIAL CABLE FOR INDUSTRIAL & MILITARY APPLICATIONS



- **To give peak electrical and physical characteristics only virgin compound materials are used in all polyethylene dielectrics. This assures low loss and maximum efficiency.**
- **Coaxial cables have Braided Copper Shielding preventing electrostatic interference, keeping signals clean.**
- **"Long Life" Polyvinylchloride, and Polyethylene jackets on all Industrial RG Cables assure peak performance under any weather conditions. Non-Contaminating, Non-migratory virgin compounds are resistant to sunlight and chemicals, won't degrade electrical performance.**
- **To insure maximum signal strength Dearborn's Industrial Line of R.G. Type Cables are manufactured using MIL-Spec copper conductors.**

LOW LOSS COAXIAL CABLE WITH (FOAM) CELLULAR POLYETHYLENE DIELECTRIC

Compared to ordinary RG/U cable of similar size, the attenuation of cellular polyethylene (Foam Core) dielectric cable is reduced by as much as 35%. Well suited for CATV, Closed Circuit or MATV; ideal for use in amateur, commercial or citizen band installations Made to adapt to unusual terrain problems and resist damage from weather extremes.

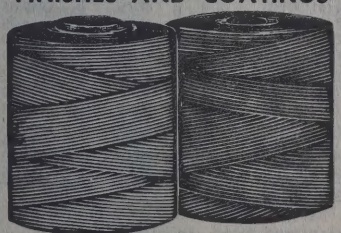
FINISHES AND COATINGS



Nylon Lacing Tape MIL-T-43435 Type I (Supersedes MIL-T-713D)

W-WAX (MIL SPEC B)

A microcrystalline fungicidal wax which exceeds MIL specs. Provides excellent knot retention and is suitable for either lacing or spot ties.

A-SYNTHETIC RESIN (MIL SPEC E)

A synthetic rubber-like resin formulated with fungicidal ingredients. Handling characteristics are excellent, knot retention is outstanding; meets or exceeds MIL specs. requirements.

OPERATIONAL TEMPERATURE RANGES: −67°F to +250°F.

DEARBORN NYLON LACING TAPE

NYLON LACING TAPE MIL-T-43435 TYPE I

Flat braided high-tenacity nylon yarn impregnated with microcrystalline fungicidal wax or to MIL specs. *Test tensile strength (lbs.); (†) Finishes code see box.

Dearborn Cable

COMPUTER TYPE MINIATURE CONTROL CABLES

For computer use. Stranded tinned copper conductors. No. 22, 24 are 7 strand, No. 20 is 19 strand. Insulated with .010" wall of PVC. Rated 105°C & 600V working voltage. Meet UL Style 1061, rated 80°C, 300V working voltage. Cabled by planetary method, laid contrahelically, Mylar tape barrier placed under shields. Tinned copper braid shielded cables overall of 85%-90% coverage. Black 105°C Vinyl jacket over shield. Self extinguishing materials. Approved under UL Style 2343 and 2344 for computer usage; +80°C, 300V. On non UL service, can be used at 40°C to 105°C, 600V.

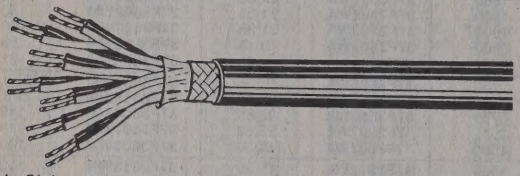
COMPUTER TYPE MINIATURE PAIRED CONTROL CABLES



U.L. Styles 2343 and 2344 employ an overall shield surrounding all internal cables. The individual conductors are stranded tinned copper. Conductor sizes 22 and 24 are 7 strand and size 20 is 19 strand. Conductors are rated at 105°C and 600 volts DC working voltage. Pairs are cabled by planetary method and have a Mylar tape barrier placed under the shield. Shield is tinned copper braid with 85%-90% overall coverage. Insulator jacket is black 105°C Vinyl and cable is fungus resistant and self extinguishing. Cables are U.L. approved for computer usage to +80°C and 300 volts. 100 foot put up listed, 500 foot and 1000 foot put ups available on special order.

CORONA RESISTANT HIGH VOLTAGE WIRE

- **Tinned, stranded copper conductors**
- **Flexible**
- **Conductors rated at 200°C**
- **Insulation rated at 150°C**

Conductors are tinned, stranded copper and are flexible. Silver plated copper, nickel plated copper, and pure nickel conductors available on special order. Conductors are rated at 200°C, pure nickel at 260°C. High voltage, high temperature silicone rubber insulation rated at 150°C and is available in dielectric strengths ranging from 10 KVDC to 40 KVDC. Insulation is easy to strip. 100 foot put ups listed, 1000 foot put ups available on special order. insulation: U.L. type 3239, Color: Natural only.

WIRE WRAP
KYNAR® COMPUTER-TYPE HOOKUP WIRE
APPROVED BY U.L. AND CSA

Kynar® insulation is flame retardant and self-extinguishing, highly resistant to ultra-violet. Its characteristics remain unchanged when exposed to 300 million roentgens. Operating temperature range is up to +125°C and is UL rated to 105°C. Conductor is solid annealed copper. Supplied on large hub reels. Available in black, red, orange, yellow, green, blue, gray, and white—**Specify color by number.**

THERMOPLASTIC INSULATED HOOKUP WIRE

X-L POLYETHYLENE, U.L. STYLES 3173, 125°C—600 VOLT

The Polyethylene insulation used on this series of lead wire is chemically cross-linked, which increases the moisture resistance, solvent resistance and aging characteristics. When momentary high temperatures caused by overloads or shorts occur, the insulation does not deform as quickly as if not cross-linked. Typical applications include small motors, control panels, dry transformers, etc. Recommended maximum baking cycles: 300°F for 24 hrs.—325°F for 12 hrs.—350°F for 8 hours.

Sound, Broadcast and Instrumentation Cable

SOLID CONDUCTOR OVERALL ALUMYLAR™ **SHIELDED PAIRED CABLE**

Description—
- Conductors: Solid tinned copper.
- Insulation: Color-coded polyvinylchloride.
- Construction: Paired conductors with overall shield.
- Shield: Alumylar™ overall shield with #24 awg. stranded tinned copper drain wire.
- Jacket: Chrome polyvinylchloride.

Characteristics—
- Temperature Range: -20°C to +80°C.
- Voltage Rating: 300 Volts.
- Resistant to: Acids, alkalis, oil, moisture, solvents and fungus.

Features and Applications—
- Alumylar™ shield with drain wire offers ease of termination and high reliability.
- Designed for use in point-of-sale and instrumentation applications.

Approvals—
- Recognized under the components program of Underwriters' Laboratories, Inc.
- UL Style 2464.
- Passes VW-1 Vertical Flame Test.
- OSHA Acceptable.

†Has electrostatic shield. *Insulation test voltage: Twice allowable RMS working voltage plus 1000 volts.

‡Primary tapped to provide secondary voltages of 45 C.T., 51 C.T. or 54 C.T. All transformers have lead terminations.

RECTIFIER, CONTROL and FILAMENT TRANSFORMERS (Cont.)

WITH DUAL C.T. SECONDARIES: All primaries 115V 50/60 Hz except (*) 60 Hz. All terminations are solder lug type. Insulation test voltage; 1500 RMS.

Power Transformers

"FS" Split Pack and "FP" Flat Pack combine best features of transformer design. Center wall bobbin allows the primaries and secondaries to be wound non-concentrically (side by side). This construction technique reduces coupling capacitance and eliminates the need for static shields. High isolation is standard in each series FS-2500V and FP-2000V.

Litton Distributor Services

PLUG-IN PC POWER TRANSFORMERS

—115 Volt, 50/60 Hz. Primary

Ideal for single or dual output DC supplies, isolated control circuits, reference supplies in transistorized control, instrumentation. Provide voltage stepdown and isolation from power line at relatively low power levels of 1½, 4½, 7 watts at 4 to 58 volts when connected in parallel, and 8 to 116 volts when series connected. Precision spaced plug-in terminals with fixed mounting centers. 115v, 50/60 Hz. Primary except (*) 115/230v.

POWER TRANSFORMERS

DUAL SECONDARIES—115/230V 50/60 Hz PRIMARY

All units have lug terminals. Dual secondaries may be connected in series or parallel. Uses include virtually all low voltage devices such as door openers, relays, signals, etc.

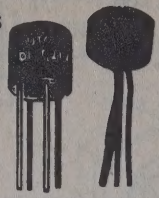
DI-T200 TRANSISTOR TRANSFORMERS MEET MIL-T-27C-TF4RX



Smaller than the DO-T Deci-Ouncers (below). With uninsulated leads spaced on .1" radius for printed circuit boards. Power ratings and other characteristics identical to DO-T's, except frequency response is approximately ± 3 dB, 400-1000,000 Hz. Hermetically sealed; rated for Class R (105°C max. operating) temperature conditions. Size 5/16" dia. × 3/8". Wt., 1/15 oz.

UTC Transformers and Inductors

MINIDUCTORS (MIL-T-27D-TF5RX)

MS, MW

ML

Hi Q in ultracompact form. Grade 5, hermetically sealed to MIL-T-27C. Temp. stability from ± 1% to ± 3%, -55% to + 105°C. **ML.** Hipermalloy cased, with maximum Q at 800 Hz or 1.5 kHz; 7/16 × 31/64 × 9/16". **MS.** Ultraminiature toroidal, max. Q at 20 kHz; 35" dia. × .23". **MW:** Toroidal, max. Q at 10 kHz; 23/32" dia. × 13/32". **SR series.** Ideal for switching regulator and AC filter choke applications. Inductance measured at 1V, 10kHz, O DC with tolerance of + 15%, -5%. Sizes: **SRB,** 1 3/16" dia. × 9/16"; **SRC,** 1 3/8" dia. 3/4".

Stand By Power Supplies

TRIPP LITE

INSTA-POWER SYSTEM

HIGHLIGHTS:
Automatic, heavy-duty, regulated battery charger. Comes with automatic load transfer switch and rugged square wave inverter. Circuit breaker protected on DC line.* Frequency controlled ±½Hz.* Full isolation of AC line power from inverter power.
* not on SB200 or SB400

COMES COMPLETE WITH:
- **Automatic regulated battery charger**
- **Automatic load switching**
- **Frequency controlled square wave inverter**
  (SB200 and SB400 are non-frequency controlled)

RELIABILITY:
The Inverter is the core of the stand-by power supply and Tripp Lite is one of the world's largest inverter manufacturers with over 20 years experience. Tripp Lite inverters are unsurpassed in performance and reliability. Their precision manufacture and advanced design assure that your insta*power system will operate with the highest standard of excellence.

FEATURES:
The inverter is the core of the stand-by power supply and Tripp Lite is one of the world's largest inverter manufacturers with over 20 years experience. Tripp Lite inverters are unsurpassed in performance and reliability. Their precision manufacture and advanced design assure that your insta-power system will operate with the highest standard of excellence.

1. Automatic, heavy-duty, regulated battery charger
2. Automatic load transfer switch
3. Rugged square wave inverter
4. Circuit breaker protected on DC line*
5. Frequency controlled ±½Hz.*
6. Full isolation of AC line power from inverter power

*not on SB200 or SB400

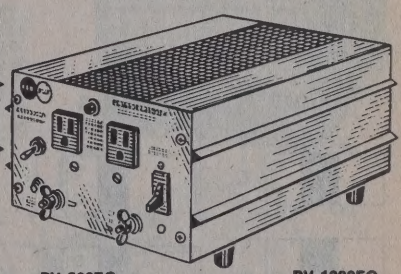
PV-550



PV-500FC

PV-1000FC

PV SERIES POWER INVERTERS

Solid state electronic power inverter converts 12 volt DC-power to 117 volt AC power (except PV-1000FC/24). Operates in car, truck, camper, ambulance, boat, shop; or wherever 12 volt DC battery power is available. Inverters run electric razors, lighting, small power tools, radios and stereos. Frequency controlled models (suffix FC) should be used for tape recorders, test equipment, ambulance equipment, video tape equipment, office machines, computers, and can be incorporated into stand-by power supplies. Load wattage ratings from 250 to 1000 watts continuous; intermittent duty, plus 10%. Complete with 117 volt AC outlet and convenient on/off switch. Connects to battery with heavy gauge wire (not included). Inverters are transistorized, solid state for long life and quiet operation. Square wave output voltage varies directly with input voltage, and is inversely proportional to load.
NOTE: Not recommended for use with capacitor-start motors (as found in conventional refrigerators), split phase motors or other reactive loads (P.F. less than .8).

13F9801	PV-1000FC/24	24	1000	3.5	Yes	5x9½x17	32	469.00

*Select Inverter with wattage rating greater than wattage required to power your device(s).

Sola Minicomputer Regulators

Provides voltage regulation and ultra-isolation for microprocessor-based equipment such as word processors, electronic cash registers and minicomputers, where noise and transients cause errors or voltage fluctuations and brownouts can cause memory loss. Sinusoidal output waveshape containing less than 3% harmonic distortion. Better than 60 dB noise rejection and effective capacitance less than 0.1 μF. Input line variations of ±15% regulated to ±3% on the output. Output will remain within NEMA voltage specs of +5%-10% for input voltage as low as 65% of nominal. Full load efficiency 85%.

CVS HARMONIC NEUTRALIZED TYPE TRANSFORMERS

Sola Constant Voltage Transformers contain less than 3% total rms harmonic content in the output. For all AC applications where harmonics can affect operation. Features built-in harmonic neutralizing circuits. No filters required. Regulation is ±1% for an input range of 15% of nominal voltage. NOTE: FOR MICROPROCESSOR-BASED SYSTEMS WHICH REQUIRE MORE ISOLATION, REFER TO SOLA'S LINE OF MINICOMPUTER REGULATORS LISTED ABOVE.

Sola Mini UPS

SOLA ELECTRIC
A UNIT OF GENERAL SIGNAL

A true UPS always between the AC line and critical load providing complete protection from brownouts and blackouts as well as line noise and transients. Output waveshape is sinusoidal with less than 3% single harmonic and 5% total harmonic distortion. Regulated output is +3% when operating from either AC line or battery. Handles load surges and fault clearing providing 125% overload for 10 minutes, 150% overload for 10 cycles and 200% overload into short circuit with 2 automatic restrikes before shutdown. Maintenance free battery automatically recharges upon return of AC line. Oper. Temp. 0°C to 40°C. Especially designed for small, sensitive electronic equipment such as minicomputers, data terminals, P.O.S. systems.

Sola 1.0, 1.5 & 2.5 kVA UPS'

Sola 1.0, 1.5 and 2.5 kVA UPS systems supply precise, conditioned power to the critical load independent of disturbances and interruptions on the AC input including brownouts, line noise and transients. Transistorized full bridge inverter design utilizing multiple pulse modulation for output voltage sinusoidal waveform synthesis. Input voltage 120VAC, 60Hz (also 208VAC, 60Hz in 2.5kVA models), 220 or 240VAC, 50Hz. Output regulation ±2%. 3% maximum single harmonic distortion, 5% maximum total RMS. Overload capability 125%, 10 minutes, 200%, 167 milliseconds. If overload capabilities are exceeded an automatic "no-break" transfer is initiated to bypass. Upon reduction of overload condition the automatic "no-break" transfer back to normal operation is accomplished. Standard control panel allows instantaneous determination of system status. 1.0 and 1.5 kVA models designed for shelf or 19" rack/cabinet mounting. 2.5 kVA model designed for floor or shelf mounting.

Sola Power Line Monitor

The Sola Power Line Monitor identifies dangerous or disruptive power line disturbances that can cause electronic equipment to malfunction, lose memory or even crash. Six red LED's and an audible alarm pinpoint power failures, low line voltage, voltage spikes, voltage drops or high frequency noise. After the alarm sounds, flip the monitor over to find probable causes and solutions for the indicated problem. Completely portable—plugs into any standard power outlet.

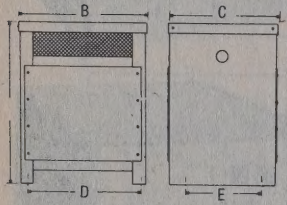

Fig. 3

Static-magnetic unit featuring fast response, no moving parts, adjustable output, remote sensing, compactness, mounting flexibility, and high KVA capacity. Designed to fulfill the needs of modern electrical and electronic equipment while operating at (or controlling) high KVA loads. Regulation: +0.5% for line charges. Variation limits: line ±10%, or +10%/-20%. Zero load to full load. Temp. 15°C to 40°C. Current capability: withstands high inrush load currents and momentary overloads. Maintenance free.

SINGLE-PHASE (60 Hz ±3 Hz)

Solatron/Acuvolt for Computers

Designed specifically to meet the stringent requirements of EDP equipment. Delivers clean, consistent, reliable power despite power line transients. Line regulation: ±¼%. Input Voltage: 208/230V, 3 phase, +10%/-20%. Output Voltage: 208/230 V delta or wye, adjustable from 208 to 240. Load regulation: ±¼%. Frequency: 57-63 Hz. Transient Response Time: Starts immediately; complete within 5 cycles. Power Efficiency: 95% typical. VA Efficiency: 75% typical. Maximum Harmonics: Balanced line and load 3%; unbalanced line and/or load 6%. Load Power Factor: with little derating -.75 lagging to .95 leading; without derating -.95 lagging to unity. 480V units available for computer power centers.

Power Supplies

SOLA ELECTRIC
A UNIT OF GENERAL SIGNAL

SOLA SWITCHING POWER SUPPLIES

Sola 150 Watt single, triple and quad output power supplies operate at 70-75% efficiency (single output) and 65% efficiency (triple & quad output). Line and Load regulation .25% on all primaries. Line regulation .5% and load regulation 1% on auxilliaries. Input voltage 90-135/180-257 Rms, 50-400Hz. Power walk-in 500 ms maximum to full output. Ride through at full load 10ms @ 100V Rms input. Available Open Frame or Enclosed.

Modular DC
Power Supply

MODULAR DC POWER SUPPLIES

Will hold output voltage to ± 1% or less for input variations as great as ± 15% of the nominal input voltage. Rated input range is 100 to 130 volts, 60 Hz. The response time is 25 milliseconds. Actual variation is linear over a ± 5% Change in frequency from 60 cycles. Have long life. Highly reliable and efficient. Multiple operation to increase current and to increase voltage. Oper. temp.: 0°C to 50°C. The output voltage will change approx. 1% for every 40°C change in ambient temp. Isolation and short circuit protection. Polarity: May be used positive or negative.

FIXED CONSTANT VOLTAGE DC POWER SUPPLIES

Will withstand high-transient overload without damage or output voltage drop. Output regulation ± 1% or less over 100-130V input range. Total ripple content does not exceed one percent. Load regulation less than 4% from 20% to full load. Efficiency approx. 75%. Mounted on standard 19" rack panel. Input 100-130 60 Hz. AC.

Power Supplies

SOLA SOLIDS

Series regulated power supplies, **84 Series** for mounting on PC boards and **85 Series** for mounting on the chassis directly, for point of use regulation. Units are fully tested and burned in three times, and carry a two year warranty. Available in single output or dual tracking outputs. Input Voltage: 115V ±10V (50 to 400Hz). Output voltage accuracy: ±2%. Oper. Temp.: —25°C to 71°C (operation at elevated levels may require derating.) Input isolation: 50 megohms. Line regulation: ±.02% or 2.5 mV. Load regulation: ±.02 or 2.5 mV.

87 SERIES DC/DC SOLIDS

DC/DC Solid power supplies series 87 provide line/load regulation while Pi-type input filter minimizes reflected input ripple current. Output Voltage Accuracy: ±0.5% Max. Oper. Temp. —25°C to 71°C. Line Regulation: ±0.02% full range max. Load Regulation: for single output models ±0.04% (NL-FL) max, for dual output models ±0.02% (NL-FL) max.

Double and Triple Output

For Single Output see 15/30 and 60 Watt Standard Power Supplies

OEM LINE REGULATED DC POWER SUPPLIES

Precise integrated circuit regulator with superior drift characteristics. Convection cooled. Complete serviceability. Completely protected, short circuit proof. Isolated, floating output. Low noise and ripple. Positive or negative polarity. Oper. Temp: 0°C to 50°C. Input Freq. Range: 50-400 Hz (derate load to 75% for 400 Hz). Input Voltage Range: 15 watt (105-125 VAC, 210-250 VAC), 30/60/120 watt (115/230 ±15%). Temp. Coefficient: .03%°C. UL listed.

PREMIER REGULATED DC POWER SUPPLIES

Completely protected short circuit proof; automatic current limiting. Convection cooled. Complete serviceability. Remote sensing. Regulation: ±.2% line or load. Ripple and noise: .1% Vrms. Input range: 120/240 VAC ±10%. 47-420 Hz. Temp. coefficient: .03°C. Polarity: may be used positive or negative. Oper. temp.: 0°C to +55°C. Automatic cutoff if heat sink temp. is exceeded. Storage temp: −62° to +85°C. Recovery time less than 50 μsec ½L to FL. U.L. listed.

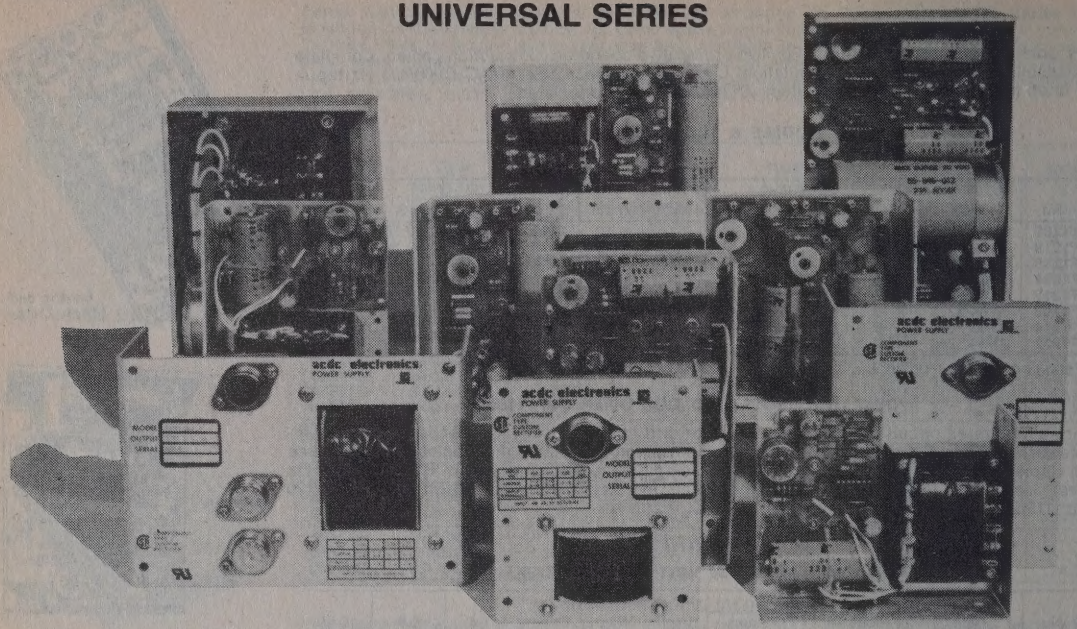
Premier Regulated DC Power Supply

UNIVERSAL SERIES



INPUT
Selectable transformer input taps for 100/117/220/230/240 VAC, 47-440 Hz.

OUTPUT
See table. Output is floating; either positive or negative output terminal may be grounded. Zero to full load current ratings as in table. Adjustment range is ±15% except variable 10V to 18V output on duals and triples.

REGULATION
Line: ±0.05% for ±10% line change.
Load: ±0.05% for 50% load change.

RIPPLE
2mV RMS Max, 3mV P-P

STABILITY
Typically ±0.15% for 24 hours after initial warmup.

SPECIFICATIONS

TRANSIENT RESPONSE
Output voltage returns to within regulation limits typically with 30μ sec in response to a 50% load step.

TEMPERATURE COEFFICIENT
0.02%/°C max.

AMBIENT TEMPERATURE
Operating: 0 to 70°C. Full convection rating to 50°C.

REMOTE SENSING
Standard on most models to compensate for up to 0.25 volt drop in the load cable. Open sense lead protection is built in on all units.

OVERLOAD PROTECTION
Inherently protected against overload and short circuit by a foldback type of characteristic. Recovery is automatic.

OVERVOLTAGE PROTECTION
Standard on all +5V outputs. Preset at 6.2 ±0.4V (fixed). Overvoltage protection—optional. Universal OVP module available for any model. Adjustable 4.5—36V. Typical setting 10-20% above operating voltage. Dual Output Models: Crowbars both outputs. Typical setting 3—4V above sum of operating voltage. Triple Output Models: OVP Universal on +5V outputs. Optional on outputs 2 and 3 as above. Overvoltage modules do not add to outline dimensions.

SHOCK
Per MIL-STD-810B, Mehod 516, Procedure V.

VIBRATION
Per MIL-STD-810C, Method 514.2, Procedure X, curve AW (to 50 Hz).

UNIVERSAL SAFETY AGENCY APPROVAL
UL Recognized. File #E48765. CSA Certified, File #LR47337. Voltage isolation per VDE 0804.

Ultra Frame Switchers

acdc electronics EMERSON

QUAD OUTPUT MODELS—RM SERIES

ULTRA UNIQUE FEATURES

- **Auto Pre-load**—No external load needed except 80W unit
- **Proportional Drive**—Protects control circuit
- **Floating Independent Outputs**
- **All Outputs Fully Regulated except 24V**
- **115/230 VAC Operation**—Change with fast-on tap
- **"U" Channel Construction**—Optimizes thermal design
- **100% Computer Tested**—Unit shipped with test data
- UL478, CSA22.2

ELECTRICAL SPECIFICATIONS

Input Range: 90-132/180-264 VAC 47-63 Hz.

Output: See table—total wattage not to exceed value listed in table

Ripple & Noise: 10 MV RMS, 100 MV P/P

Transient Response: 500 microseconds for 25% load change output #1—50 microseconds for outputs 2, 3, 4 except 24V.

Holdover: 30 milliseconds from last peak of line before removal of input

Remote Sense: Main output for up to 0.25V drop with loss of sense protection.

Remote Inhibit: Available by circuit closure between two accessible terminals

Overload: 1) Foldback or constant current limit for individual outputs; 2) Total current unit control; 3) Input A.C. fuse; 4) 24V output fused

Over Voltage Protection: Standard on output #1—optional on others except 80 and 120 W units

Temperature Range: 0 to 40°C derate to 50% at 70°C with natural convection—full output with 300 CFM air

Over Temperature: Unit protected by shutdown when internal temperature exceeds safe operating limit

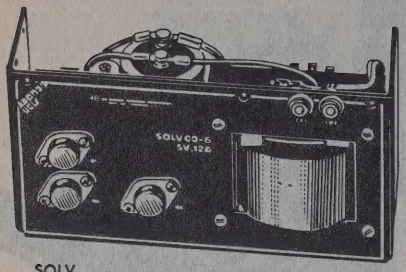
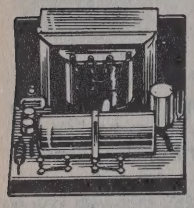
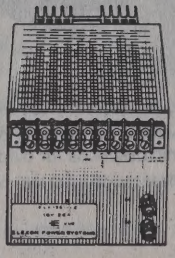
- Short Circuit Protected
- Remote Voltage Sensing
- Floating Output



SOLV



OLV



ELV

Computer grade, all-silicon DC power supplies include integrated circuit regulator for precision regulation. Open frame construction, black anodized chassis for increased thermo-conductivity. ELV Series enclosed ventilated anodized aluminum case with barrier strip terminals. Standard features include short circuit protection, electrostatic shielded transformer and remote voltage sensing. Floating output permits positive or negative ground operation.

Input Voltage	120/240 VAC ± 10%, single phase, 47-440 Hz (47 Hz optional for OLV-15)
Output Regulation	± 0.1% for line variations ± 10%, ± 0.1% 0 to full load.
Noise and ripple	Less than ± 0.1% peak-to-peak.
Output Voltage Adjust	± 5% at nominal line, full load.
Temperature Range	0° to + 55°C ambient operating. No additional cooling required.

OPTIONAL OVERVOLTAGE PROTECTION FOR OLV SERIES

SWITCH-MODE POWER SUPPLIES

SPECIFICATIONS: Efficiency: 70%, 60% on multiple output. Hold up time: 20 msec. Input: 90-130 VAC or 180-250 VAC selectable. Line regulation: ±0.2%. Load regulation: ±0.2% 1st output, ±0.5% all other outputs. Response time: 500 microseconds to 1% after 25% load change at 5A/usec. Current limit: "Fold-back" current limited. Operating temperature: 0-40°C. Storage temperature: −55°C to 85°C. Voltage adjust: ±5% 1st output, 2nd, 3rd, 4th output fixed ±5%. (ES260, 2nd and 3rd adjustable). Power fail and remote shutdown: Standard on ES150, ES200 and ES260. Output polarity: All outputs are isolated and may be polarized as desired. Remote sense: 1st output only. Reverse voltage: All outputs.

NOTE: A minimum of 15% load is required on the 5V main output to maintain regulation on 2nd, 3rd and 4th outputs. Ripple and noise: 1% p-p or 50 mv, whichever is higher. Over-voltage Protection: Standard on 1st output, optional on others. (ES 260 standard on all outputs.)

UNREGULATED (BRUTE FORCE) POWER SUPPLIES

- **Ideal for system applications which do not require regulated DC power**
- **Electrostatically-shielded transformer**
- **Isolated outputs for positive or negative operation**
- **Full rated output from 0° to 55°C, 105, 125 VAC, 47-440 Hz**
- **Output ripple, ±3% peak-to-peak, from DC to 10 MHz**
- **Input/Output isolation, 100 megohms DC, 900 VAC**
- **Designed to meet UL requirements**

Adtech Power Supplies

HIGH POWER—ADJUSTABLE DC POWER SUPPLY

• 0.1% Regulation • Constant Current • High efficiency, low noise

Provides regulated high current DC continuously adjustable over 2-25V or 5-50V range. Can be set for constant voltage or constant current operation. Wide voltage range suitable for many slot applications where different supplies would normally be required for each application. In constant current mode, can be used as battery charger. Adjustable damping for inductive loads for driving relays, solenoids and motors. SCR regulators used to provide precision regulation (±0.1%) with max. efficiency (75%). Series inductance and capacitor filter circuit provide low noise operation over all load and line conditions. AC input 105-130/210-260 VAC, 1 phase, 47-63 Hz. Controls include current limit adjust 0-100%; output volts adjust 10-100%; ripple adjust. Wt. 300W—20 lbs.; 600W—30 lbs.; 120W—50 lbs.

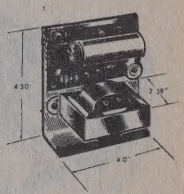
MODEL DPS — DC POWER SUPPLY

AC input 105 to 125 volts, one-phase, 57 to 63 HZ. (derate twenty percent for 400 Hz. operation). DC output voltage 5 to 6, 12 to 15, and 24 volts floating. Power 20 watts. Regulation line ± .25%; load ± .25%. Ripple is 0.3% + 10 millivolts RMS. Automatic recovery. (Derate current 2% C° over 40° C.) Weight 1.9 pounds. (*) Rated at 1 amp over 115-125 volt AC line voltage.



Stk. No.	Type	DC Output	Power Group	Fuse	1-9	10-24	25-49
99F1486	DPS-1	5/6V @ 3/2.5A	20 watts	3A	38.15	36.50	34.85
99F1487	DPS-2	12/15V @ 1.5/1.2A	20 watts	2A			
99F1488	DPS-3	24V @ 0.8AJ*	20 watts	1.5A			

All units are 115/230V input, ±10%; 47-63 Hz; single-phase; no derating at 47-63 Hz range. Each power supply is equipped with floated outputs, allowing for positive or negative grounding. Regulation is 0.1% for ±10% line voltage changes; 0.1% for no load to full load changes. 3 mV ripple peak to peak for 5 to 15V units, 5 mV for 25 to 28V, and .02% peak to peak (.01 RMS) on 150 to 250V power supplies. ±02% stability for 24 hr. period after 30 min. warmup. Screwdriver adj. for ±5% voltage adjustment. .02%/° C temp. coefficient 0.005%/° C typical. Automatic foldback circuit protects against short circuit conditions.

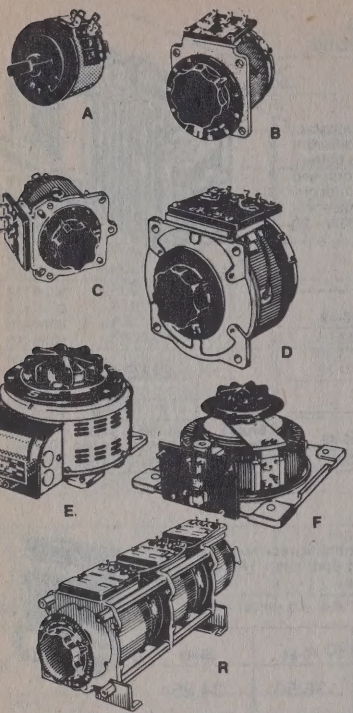
Transformers And Regulators

SINGLE PHASE MODELS—120 AND 240 VOLTS INPUT



Distortion Free Voltage Control up to 98% efficient. Rugged and reliable. Simple Installation - Negligible Maintenance. Will accept overload up to 10 times rated current.

SINGLE PHASE MODELS— 120 and 240 volts input. Type numbers without suffix are open styles designed for bench or panel mounting. Suffix "CT" have coils and terminals enclosed, for panel/conduit mounting. All are for 50/60 Hz. except (*) 60Hz only, or † 60 Hz on overvoltage.

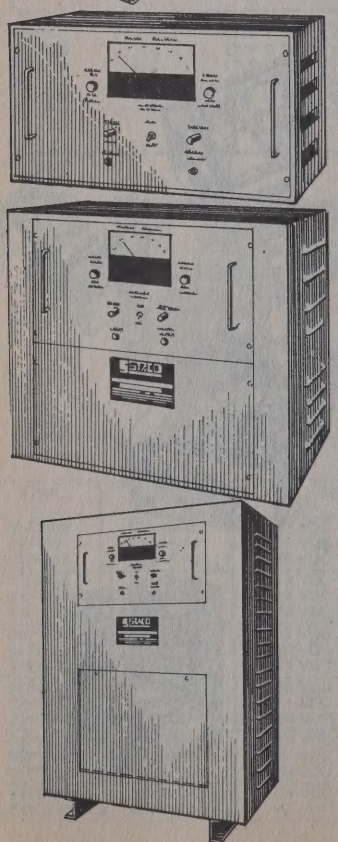
AUTOMATION EQUIPMENT: Vibrating Parts Feeders, Vibrating Parts Finishing Controls, Heat-Sealing Machinery. TEST EQUIPMENT: Lab Test Benches, Mfg. Test Stations. SCIENTIFIC & RESEARCH INSTRUMENTATION: Medical Electronics, Lab Power Supplies, Heating Mantle Controls. INDUSTRIAL EQUIPMENT: Variable Voltage Power Supplies (AC), DC Power Supplies, Plating Power Supplies, Voltage Regulators, Industrial Ovens, Soldering Iron Controls, Electronic Discharge Machines, Conveyor Controls, AC & DC Motor Speed Control Equipment.



Automatic Voltage Regulators
AVR SERIES

No wave form distortion up to 99% efficient, accepts short term overload up to 10 times, rugged and reliable.

AVR Series provides high power at low cost in a package that is engineered for convenient installation and simple operation. Provides ±3/4% regulated output for ±15% input variation. Analog voltmeter is standard on all units.

+ At Nominal output. Input voltage range shifts proportionally with output voltage setting.

* Can also be operated with an input range of 95 to 135 volts, an output rating of 57 amperes, 6.6KVA and a correction rate of 0.075 seconds/volt at 60Hz (0.090 at 50 Hz).

† Can also be operated with a nominal 208 volt output, an input range of 177 to 230 volts and an output range of 200 to 216 volts.

‡ Can also be operated with a nominal 208 volt ouput, an input range of 186 to 226 volts and an output range of 200 to 216 volts.

** Can also be operated with an input range of 105 to 125 volts, an output rating of 40 amperes, 4.6KVA and a correction rate of 0.15 seconds/volt at 60 Hz (0.18 at 50 Hz).

†† Can also be operated at nominal 208 volt output with proportional changes in input and output voltage ranges.

Staco Automatic Voltage Regulators—PVR Series

1/4% regulation, does not distort sine wave, insensitive to frequency changes.

PVR Series provides the ultimate in speed and regulation. Holds output at ±1/4% and corrects within 2.5 cycles +.6 cycles per volt changes.

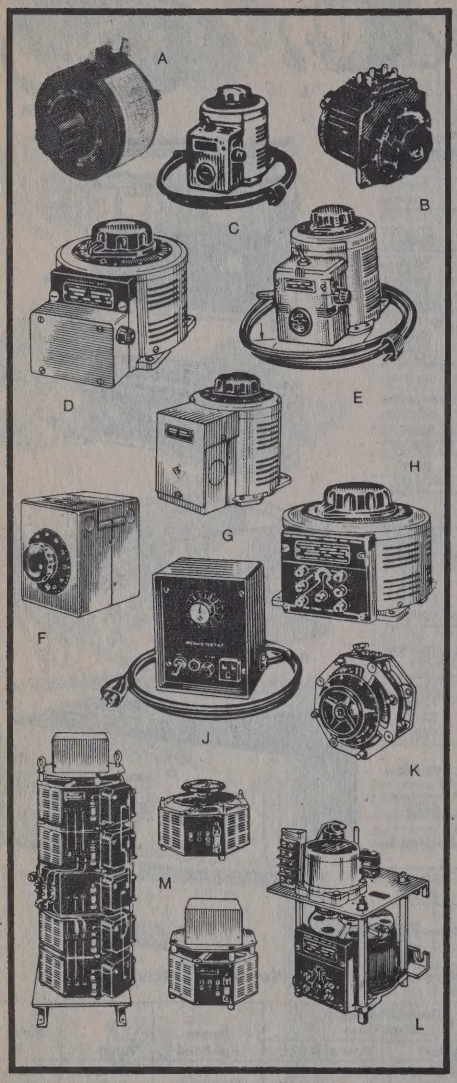
Superior Electric Variable Transformers

POWERSTAT® VARIABLE TRANSFORMERS

• Takes Overload • Boost Voltage • Sturdy Construction
• Efficient • Economical • Dependable



Epoxy-coated coils. An average of 20% higher current ratings; 10:1 greater overload capability; longer life; greater resistance to fungus, salt spray and other contaminating atmospheres. Commutator bars imbedded in place to prevent steady-state operating temperature and severe overloads from distorting the commutator. Designed to deliver continuously adjustable voltage from AC power lines. No waveform distortion. Precious metal plated commutators. Excellent regulation. High efficiency. Conservative ratings. All manually operated types listed below except the 10C-12 are available with motor drives. 1156D-1256D series types are available in ratings to 244 KVA. Contact Newark for details.

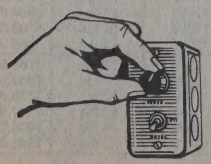
(†) Figures are approximate. Contact Newark for exact details. (*) All 240 volt units except Types 12 & 22 can be operated with 120 or 240 input but output current must then be derated. Contact your local Newark field office for details.

L Type. Meets OSHA. Equipped in grounded NEMA cord-plug assembly, on-off switch, pilot light, grounded output receptacle, fuse. Type 116B has integrally designed nonprojecting handle. Recessed panel controls. Rear slots accept wall hanger brackets. Type L21 & L116B have Powerkote coils.

VS Type. Accuracy of ±3% full scale. Single units in 116B-216B thru 146-246 series available with knobs having direct-reading voltmeters. Can measure load voltage without need for installation of separate voltmeters. Voltmeter remains stationary as knob rim is turned to vary voltage.

EN Type. Enclosed in cast aluminum & aluminum sheet dust-tight housing. Benchwall, floor, back or front or panel mounted. Knockout on each side of each end section for cable/conduit wiring. Can be connected to allow either clockwise or counter-clockwise knob rotation to vary output voltage.



DIGITAL MOTOR DRIVES

Available with motor-driven 116B-216B through 146-246 series units. Permit output voltage to be controlled over full range at 5 to 200 second speeds. Remote operation or digital control with pulse or square waves. Contact Newark Electronics for prices.

FOR FULL INFORMATION about the complete line of single and 3-phase, manual and motorized POWERSTAT Variable Transformers in ratings to 244kVA, contact your local Newark Electronics sales office, or Superior Electric.

STABILINE® Automatic Voltage Controls

SVR SERIES AUTOMATIC VOLTAGE REGULATORS

Highly erficient, extremely fast solid-state regulators designed for a variety of voltage control applications. Light in weight when compared with many other units of similar kVA ratings. Provide accuracy of ±3.5% for all line, load and power factor variations. Have virtually zero waveform distortion. Other series in the complete line include EMT and EMS (Electromechanical Solid-State) EMK (Electromechanical) and IES (Instantaneous Electronic Solid-State) with ratings to 300kVA.

SVRS SERIES TRANSIENT SUPPRESSORS/VOLTAGE REGULATORS

In addition to correcting for high or low voltage from power sources, units attenuate transverse-mode (line-to-line) noise and transients. Transient voltage attenuation of 40 dB from 5 to 50kHz. Provide the all-around protection needed by computers, business machines, word processors, microprocessor-based equipment and other voltage sensing devices to reduce or eliminate disruptions, data errors, loss of information and equipment failure. For 50/60Hz duty.

CR SERIES COMPUTER REGULATORS

Maintain properly conditioned voltage to computers and other voltage-critical equipment. Simple cord and plug connection to voltage source; two grounded receptacles for connecting equipment. Provide output of 120 volts rms ±3%, 60 Hz over an input range of 95 to 130 volts rms. Also provide 60dB minimum common-mode noise rejection to help prevent computer errors, loss of information and other noise related problems.

TVS SERIES TRANSIENT VOLTAGE SUPPRESSORS

Attenuate transverse mode (line-to-line) noise or transients. Attenuate consistently regardless of position on sine wave or direction the transient is applied. Do not rely on absolute magnitude before attenuation occurs. Response time is virtually instantaneous and transient reduction is 40dB (100 to 1) from 5 to 50kHz. For 50/60Hz duty.

IT SERIES ISOLATION TRANSFORMERS

Multi-shielded isolation transformers exhibiting low capacitance between primary and secondary windings. Effective for isolating sensitive equipment and attenuating common-mode noise generated by power consuming devices. Interwinding capacitance is 0.005 pF maximum and common-mode noise attenuation is 126dB. For 50/60Hz duty.

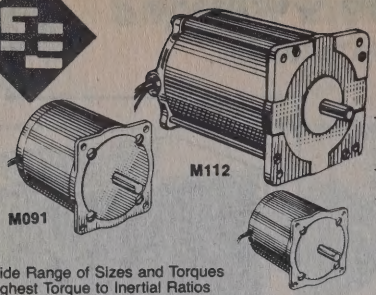
Superior Electric Motors

Stepping Motors & Controls

SLO-SYN DC Stepping Motors



- Wide Range of Sizes and Torques
- Highest Torque to Inertial Ratios
- High Stepping Rates
- Fast Single-Step Response

Permanent magnet rotors and eight-pole stators. No brushes, ratchets or detents. Shielded ball bearings insure reliability and long life. Motor shaft advances 200 steps per revolution (1.8° per step). 400 steps per revolution (0.9° per step) in the half-step mode. Current is maintained on the motor windings when the motor is not being stepped to provide a high holding torque. Six-lead motors are standard. Can be used as five-lead motor. Accuracy ±5% noncumulative.

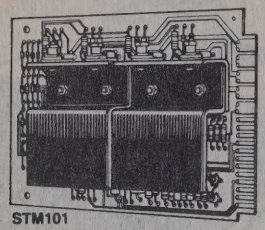
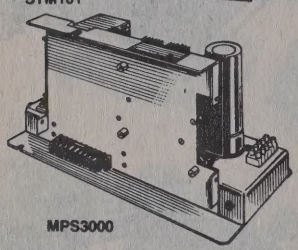
SLO-SYN® Modular Stepping Controls



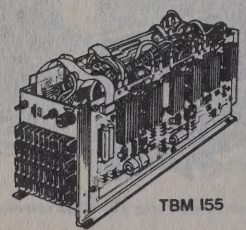
STM101

1000 Steps/Second Translator STM101: Provides sequencing and switching logic for bidirectional control. Converts pulses from a minicomputer, microprocessor or other external logic source into necessary stepping sequence. External logic controls step rate, direction and number of steps taken. Internal oscillator with 0-1000 pulse/sec. range provided for "off-line" or manual positioning control. Requires an external 24 VDC, 6 amp. power source. External Pulse Requirements: High 2.4-5.5 VDC, low 0-0.4 VDC. Dim. 4¼" x 6½".
05F829 Net. 110.00



MPS3000

Power Supply MPS3000: For use with STM101/STM103 translator modules or PIM151/PIM153 preset indexer modules which have compatible voltage and current ratings and which can be integrally mounted. Have terminals for all a-c input, d-c output and motor connections. Output: 24 VDC; 5 VDC. Power Input: 120 VAC, 60 Hz, 5 amp. Dim. 17"L x 8"W x 8"H.
02F1000 Net. 414.00



TBM 155

5000 Steps/Sec Preset Indexer TBM155: Indexing motions to 99,999 motor steps, controlled from BCD logic switches, computer or microprocessor. Adj. acceleration/deceleration. Either the half-step (0.9°) or full-step (1.8°) mode. Functions: index, run, jog, high speed, close and clear signals. Input: 120/220/240 VAC, 50/60 Hz. Internal Osc.: Base, 0-1000 pulses/sec; high, 200-5000 pulse/sec. 21"L x 7"W x 8"H.

3000 Steps/Second Translator STM103: Similar to STM101 but with rates to 3000 full-steps (1.8°) or 6000 half-steps (0.9°)/sec. Half-step mode permits finer system resolution w/o loss of positioning speed. Adjustable acceleration and deceleration circuitry increases load handling capability. Requires external 24 VDC, 10 amp. power supply. Internal oscillator range 0-6000 pulse/sec. External Pulse Requirements: High level 2-5.24 VDC low level 0-0.8 VDC 5¾" x 11".
02F1002 Net. 175.00

5000 Steps/Second Translator TBM105: Open chassis unit incorporating d-c power supply and sequencing/switching logic for bidirectional control. Either half-step (0.9°) or full-step (1.8°) mode. Power Input: 120/220/240 VAC, 50/60 Hz, 5 amp max. Internal oscillator: base, 0-1000 pulse/sec; high, 200-10,000 pulse/sec. External Pulse Requirements: 2-5.25 VDC high, 0-0.5 VDC low. Dim. 21"L x 7"W x 8"H.
80W844 Net. 909.00

Dropping resistors are required for motors used with 1000 and 3000 steps/seconds controls. Consult below for appropriate series resistors.

SLO-SYN® AC SYNCHRONOUS MOTORS

Basic shaft speed 72 rpm synchronous with 60Hz line frequency. Three lead types need only single-pole, 3-position switch for rapid forward, reverse and stop. Can be stalled without overheating. No mechanical or electrical braking; starts or stops in less than 5° of shaft rotation. Order phase-shifting resistor and capacitor for 1-phase source.

SLO-SYN motors available with special or severe conditions operation features for AC applications. Subject to normal production/delivery time setup charge.

UL LISTED

Standard, planetary gear and double end shaft models of the TS25, TS50, LS50, SS25, SS50, SS150, SS250 and SS400 motors can be supplied for applications requiring UL listing. These are identified with letter U suffix on type numbers. Are identical to corresponding non-listed motors. Listed under UL file number E31544.

PC-DA BRAKE & CLUTCH

Continuous duty reversible synchronous motor, 120 oz-in at 1 RPM. Positive clutch and instantaneous brake stops the shaft rotation within ⅛° at 1 RPM and 12° at 60 RPM. Starting time for the shaft is within 20 msec. Capacitor included. Ship. Wt. 1 lb. 5 oz.

MODEL A SYNCHRONOUS MOTOR

- **Reversible**
- **Fast Start/Stop**

Instrument grade motor is suitable for numerous types of application: chart drives, computer terminal and peripheral equipment, card readers and medical instrumentation. Rotor torque: 2.3 oz.-in. @ 300 rpm. "Drop in" replacement for pear shaped gear cup motors. Die cast gear housing. Perm. mag. Capacitor included.

EPSCO POWER SUPPLIES

For use in design, development, and testing of transistor circuitry. For servicing and operating auto, aircraft, marinecraft radio, electronic equipment, etc. For production line testing, industrial and educational laboratory work, and many other applications. Features include: Voltage regulation, AC ripple filtering, adjustable output voltage, large easy-to-read meters, isolated output terminals, 1-year warranty. Input—Regulated Models: 105-125 VAC,, 60 Hz. Industrial and General Purpose Models: 117 VAC, 50/60 Hz. Note: (*)—No-load to full-load unless otherwise specified. (†)—Output voltage change for each ampere of output current change, except on regulated units, % applies for either line or load. (††)—All 2% accuracy except 5% for general purpose units. Rectifiers: Selenium and Silicon. (**)—From 105-125 VAC.

Indicator Lights

IMLEC MODULAR INDICATOR LIGHT ASSEMBLIES

Series 100/101 assemblies are a modular concept that provide low cost, great versatility. These pilot lights mount with a rubber bushing snapped into a 9 mm dia. cutout—no nut or retainer required. A variety of light sources—incandescent, neon, green glow neon or LED's—fit into the bushing and colored lens assemblies are slipped in from the top. Lens assembly may be mounted independently from light source and mated in the final assembly. Lens colors/light sources are interchangeable.

105/106 SERIES MODULAR INDICATORS

Modular design concept from series 100/101, but smaller. Lens presses into 5 mm hole in the front panel, the rubber bushing with the lamp slips on from the rear to complete the assembly. No nut or retainer required. Lamps can be used with any lens allowing the light to meet design requirements while keeping the same styling.

LED SERIES INDICATOR LIGHTS

Model 406 is made of bright nickel plated brass and is also available with a black oxide finish (Indicated by BO suffix to type number). LED is installed forming a Macrodome lens. Panel hole, .244". **Model 407** is made from chrome plated brass and is supplied with turret type terminations. The LED is in a large dish shaped reflector to produce a much larger illuminated area. Panel hole is .244". **Model 440** is similar to model 407 except the diameter is larger, allowing for a larger reflected illumination, and is supplied with square leads for wire-wrapping. Panel hole is .335".

SOLID-STATE CARTRIDGES

Light source is a solid state lamp that provides the advantages of low power with extremely long life and is compatible with integrated circuits (can be driven directly by RTL, DTL, and TTL logic). May be used as direct replacements for existing cartridges using an incandescent lamp operating from a DC power source. An internal fresnel ring pattern in its lens design assures maximum distribution of the light output. Cartridge is supplied in a black anodized finish which produces a high contrast ratio. To facilitate proper installation of the cartridge, the polarity is marked (+) on the cartridge housing and the terminal base is keyed.

DATALAMP HOLDERS

Datalamp Holder is available with or without screw-on collar. The use of either is dependent on the desired front-of-panel appearance. The standard black anodized flange nut and collar produce the desired maximum contrast. In addition, the terminals of the holder are marked "A" and "B." The "A" terminal would denote positive (+) polarity. This feature insures proper installation and wiring.

NEON CARTRIDGES

Neons offered with the lower resistor value gives the best indication, with a minimum life of 5000 hours, while the higher value results in long life, where 25000 hours or more is required. The high brightness types offer relatively constant light output through life, and five times the brightness of the standard neon, they should be used in all cases where the circuit voltage is adequate.

INCANDESCENT LAMP CARTRIDGES

Ratings of incandescent lamps in amperes are purely nominal and the values shown are subject to ±7% to ±10% tolerances. Quality control in lamp manufacture aims at producing lamps that will deliver rated hours at rated volts. Operation of lamps at nominal amperes will produce unsatisfactory life performance. It is undesireable to operate lamps from circuit voltages much higher than ratings by means of dropping resistors. Maximum power that may be put in is 2 to 3 watts.

DIALIGHT Ultra-Miniature Lights

DATALITES WITH PERMANENT NEON LAMPS
Lamps are built-in—not replaceable. Units mount in 3/8" clearance hole.

Built-in; a rugged, long-life T-2 Neon Glow Lamp. Resistors to Mil-R-11 spec.

Lightweight construction of aluminum, black anodized finish. Plastic lens gives wide angle visibility. 2 insulated terminals of low carbon steel, solder plated. With mounting hardware.

HIGH BRIGHTNESS UNIT W/C2A (NE-2H) LAMP 110-125V AC 5000 APPROX. HRS.

Conform to military specifications (Mil-L-3661)

Stovepipe: With Built-in 22K Resistor.
(125/64x1/2" Overall: 2 Oz. Shpg. Wt.)

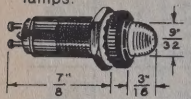
GREEN or BLUE LENSES are not recommended for use with Neon lamps.



SOLID STATE DIODE-LITES

Complete package-light source, housing, and lens. Ready for permanent, panel mounting. Light source is a solid state lamp that provides the advantages of low power with extremely long life and is compatible with integrated circuits.

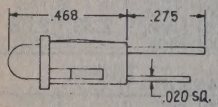
558 & 559 SERIES SNAP-IN LED INDICATORS



Snap-in mounting requires no additional hardware, 558 Series mounts in .156" hole. 559 Series mounts in .250" hole. Compact design allows high density packaging. Straight terminals suitable for wire-wrapping and/or soldering, or 6" wire leads, Black housing enhances contrast ratio. Polarity identified. High brightness LEDs. Wide angle visibility. Low power requirements: 15-20 mA. IC compatible. Vibration and shock resistant.

Lamps listed in this catalog are the more popular types available from Chicago Miniature. If your application requires special lamp or a lamp not shown, send Newark a description of your needs. We will submit our recommendations. "AS" types are aged & selected to critical application.

W—wire terminals. (*)—Not illustrated. (+)—Wedge base. L—Long life. (**) Bulbs are described by a letter indicating shape, and a number which is an approximation of diameter expressed in eighths of an inch. For example S-8 is "S" shape, 8 eighths or one inch in diameter. **Sold in multiples of 10 only.**

RECTANGULAR LED INDICATOR

Features: solid-state, long life, and reliability. Rectangular lighted area is lit by a GaAsP on GaP high performance LED chip. No light leakage from unit or sides. Stackable in X or Y direction. High brightness typically 4 mcd @ 20 mA. Applications include: legend backlighting, panel indicator, and bargraph meter.

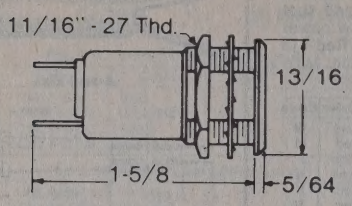
INDICATOR LIGHTS

CHICAGO MINIATURE LIGHTS

STANDARD INDICATORS



Accept T-3-¼ Miniature bayonet lamps for use in automotive panels, control consoles, electronic equipment, and test gear. Indicators have nickel-plated flanges for attractive appearance. U.L. and CSA recognized. Housing: glass-filled polyester; Lugs: brass; Hardware: zinc-plated steel. Mount in 1 1/16" diameter hole in panels up to 13/32" thick. 5100-822 designed for use with incandescent lamps,5100-832has 22K built-in resistor for use with B2A neon lamp on 125V, and5100-84 has 100K built-in resistor for use with B1A neon lamp on 125V or B2A lamp on 250V.

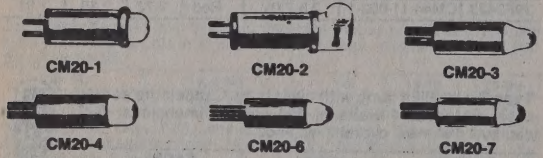
CM20 SERIES SUBMINIATURE LENS-END LITES



- **Intense spot of luminous and infrared energy**
- **Choice of spot shape and orientation**

For close proximity use with photosensors where an intense spot of luminous and infrared energy is required. CM20-1, CM20-2 (right angle lens), and CM20-17 are mounted in bi-pin cartridges. Clear anodized aluminum body; stainless steel terminals; nylon insulation. CM20-3 thru CM20-17 are packaged in gold anodized aluminum sleeves with 24 AWG stranded wire leads. Type B insulation per MIL-W-16878. Semi-resilient thermosetting resin encapsulation. Wt. ½ oz. Note: (#) Spot covers ⅛" dia. target when projected ⅜" from end of bulb at min. intensity of 750 foot-candles. (††) When projected 1" from end of bulb, spot covers 1" dia. at 350 foot-candles. (§) ⅜" from bulb, spot covers 1/16" dia. at 750 foot-candles. Spot is narrow elliptical. (‡‡) Same as CM20-3 except spot covers ⅛" dia. target. Spot is round elliptical. (**) No specifications for spot, however, lamp is axially aligned.

BI-PIN BASE

Bulbs are designated by a letter, indicating the shape of the bulb, followed by a number, which indicates the approximate bulb diameter in eights of an inch. For example T-1¾ designates a tubular bulb approximately 7/32" (1¾ x ⅛) in diameter. Standard tolerances are ±25% for MSCP (brightness measure).

Lamps with letters as following type number are aged and selected with tighter MSCP tolerance. For example, standard MSCP tolerance on an ML/715 is ±25%. ML/715 is the same lamp to a ±15% of rated MSCP. LAMPS ARE SOLD IN MULTIPLES OF 10 ONLY.

NEON GLOW LAMPS

Neon Glow Lamps are low priced devices used for indicators and circuit control applications. Two closely spaced electrodes cause neon gas to ionize and glow when voltage is applied. Since they have no filament, lamps withstand considerable shock vibration. External resistors not included except *resistor included in base.

Sold in Multiples of 10

MINIATURE BAYONET SOCKETS

Series LSL-11. Sockets accept miniature bayonet based lamps. Termination is to two solder lugs insulated from the mounting bracket. Socket configurations are illustrated at top right. Number following series designation in type number indicates mounting bracket, detailed below right. Brackets are .025/.032" steel, cadmium plated.

CANDELABRA BAYONET SOCKETS

Series LSU-21. Sockets accept single contact candelabra bayonet based lamps. Single, #22 AWG, 6" long lead provides voltage to socket. Mounting bracket is electrically connected to socket shell providing ground connection. Socket configurations are illustrated above right. Brackets are .025/.042" cadmium plated steel and are detailed below right. Number following series designation in type number is the bracket number.

5/16" DIA. 2-Piece Snap-In LED

Two piece unit consisting of a polycarbonate lens and white nylon housing-LED assembly. Simple, fast installation provided by placing the lens into mounting hole from the panel front and snapping the housing assembly onto the lens from the rear. Allows pre-wiring into the circuit and testing before installation. Has low-profile, damage-resistant lens offering static discharge protection and wide-angle viewing. Will snap-fit into .312/.317 (7.93/8.05) dia. hole in panel .020 098 (0.51/2.49) thick. Wire Leads: No. 24 AWG., .015 (0.38) wall PVC 4.4/4.8 (111.8/121.9) long. stripped: .43/.57 (10.9/14.5). Anode (+): Red lead.

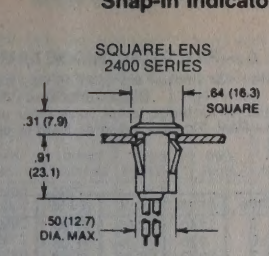
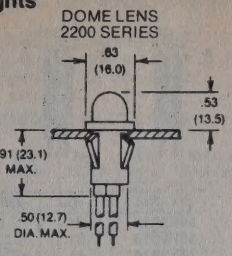
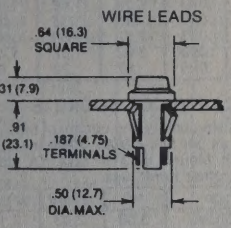
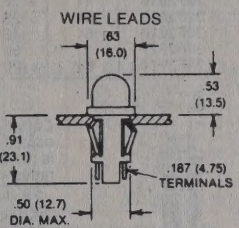
Snap-In Indicator Lights





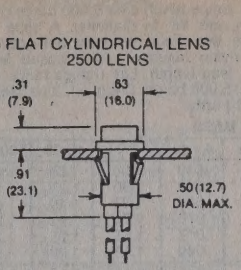


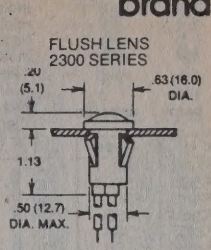
QUICK CONNECT TERMINAL

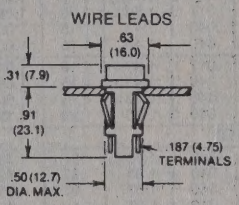


QUICK CONNECT TERMINAL

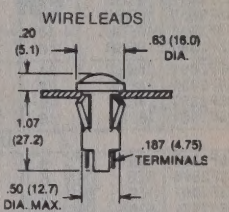
- **Neon models incorporate appropriate current-limiting resistors**
- **A choice of wire leads or quick connect terminals is provided**
- **Lights can be easily mounted by either push-on speednut or snap-fit into a.500" (12.70) dia. hole.**
- **UL Recognized—CSA approved**







QUICK CONNECT TERMINAL



QUICK CONNECT TERMINAL

- **Mounting: Will snap-fit into .500"/.505" (12.70/12.80) dia. hole in panels**
- **.020"/.0100" (.51/.254) thick. Push-on speednut.**
- **Wire Leads: Black, No. 18 AWG, 6" long**
- **Terminals: Tinned brass**
- **Lens: Polycarbonate**
- **Bezel: Chrome plated brass**
- **Housing: White nylon**

Indicator Lamps, Sockets

slide base

unbased

INDICATOR LAMPS

Indicator lamps which offer 5,000 hours of use minimum, are ¼" in diameter. A slide type base has two metal contacts embedded in molded nylon insulator. All unbased lamps have ⅞" lead length. Life ratings range from 5,000 to 15,000 hours. Shpg. wt. 2 oz. **Sold in pkg. of 10 only.**

PANEL LIGHT SOCKET AND LENSES

Nylon, to be used with indicator lamps (ESB Series). Sockets are designed for use with slide base indicator lamps and are rated for 75 watts, 125 volts. Quick mounting with a Tinnerman speed clip. Lenses are made of a high-temperature polycarbon material which eliminates lens warping and signall distortion due to heat. Unique internal design of lens allows for a wider viewing range. 2 oz.

Long Life annunciator lamps designed for use in elevator panels, call boards, etc. Lamps are $^{57}/_{64}$"Wx$1^{1}/_{16}$"L for bayonet base and $^{57}/_{64}$"Wx$1^{3}/_{16}$"L for candelabra base. Each lamp operates a minimum of 5,000 hours. Their unique light control is made possible by a self-contained reflector. **SOLD IN PACKAGES OF 10 ONLY.**

Made of phenolic for use with pilot lamps (PSB Series). For use with slide base indicator lamps 75 watts, 125 volts. Quick mounting with a Tinnerman speed clip. Lenses are made of a high-temperature polycarbon material which eliminates lens warping and signal distortion due to heat. Unique internal design of lens allows for a wider viewing range. 2 oz. U.S. listed.

AUDIO VISUAL LAMPS

Every projector lamp is ANSI coded, referring to a specific lamp type. Many are "double branded"—that is, they have two ANSI codes. These lamps will work in projectors calling for either lamp type. Even if the old lamp was a clear top, the double branded blue top projector lamp will work just as efficiently, if not more so, as a replacement.

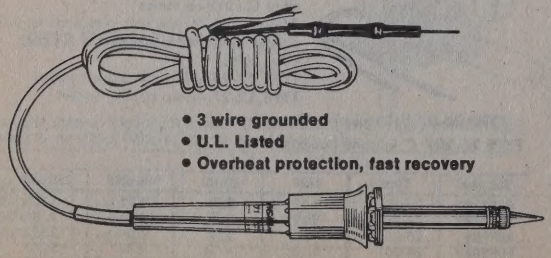
UNGARmatic 24-VOLT TEMPERATURE CONTROLLED SOLDERING IRON



- **3 wire grounded**
- **U.L. Listed**
- **Overheat protection, fast recovery**

Designed for use with any 24V power supply which has 2 amp. output minimum. 3-wire grounded with an ungrounded secondary circuit. Features: on-line economical maintenance Long-life iron-clad tips; spring loaded tip retainer; controlled temperature heater; taper lock heat shield; cool grip handle with 3-wire heat resistant flexible cord set.

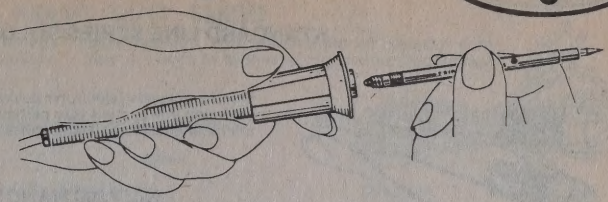
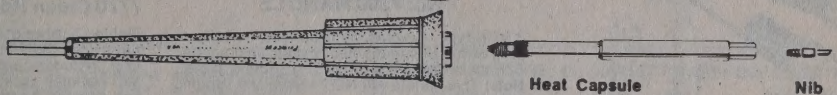
Modular Soldering Tools

Ungar®

PRINCESS® MICRO LINE

Design enables pinpoint hand control, comfort and accuracy assuring hi-yield soldering of delicate circuitry and components in the tightest spaces. Ideal for micro-precision, micro-miniature soldering. Uses include flat and stack packs, hybrids and discrete devices.





SOLDERING NIBS

6950, 6960 | 6951, 6961 | 6952, 6962 | 6953, 6963

HEAT CAPSULES

For 120 Volts AC/DC operation. Heating section threaded to accept series of ⅛" "Princess" soldering nibs. Length: 3¾". Shipping weight: 2 oz.

Stk. No.	Type	Watts	Temp.	1-9	10-49	50-Up

33F1304	5550	120V Thread-in handle	7.85	7.07	6.28

16

Designed to eliminate static induced currents. Useful for all general purpose and voltage sensitive components. Meets military, NASA, and other government contractor standards. Accepts more than 40 nibs, tips, tiplets, and de-soldered tips from Standard and Princess line. Ideal for MOSFET, IC components. UL listed heat cartridge available in 3 wattages. Protective coating on threads to reduce tip seizure. Lightweight handle. Grip. 3-wire cord approved for grounding soldering irons. 120V, 50-60Hz.

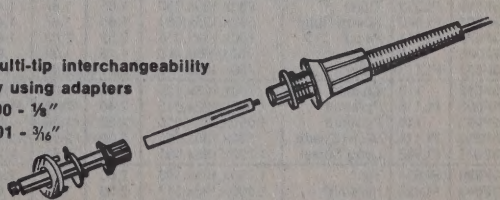
3-WIRE SOLDERING IRONS

Multi-tip interchangeability by using adapters
100 - ⅛"
101 - 3/16"

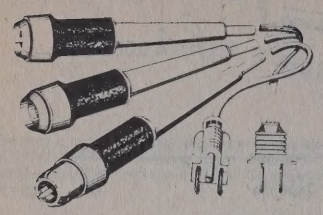


- **Approved 3-wire cord for soldering irons**
- **Ideal for MOSFET and IC Components**
- **Heat-resistant cord**

See page 632 for solder.

Modular Soldering Tools

STANDARD LINE SERIES SOLDERING HANDLES



Ideal for soldering electronic devices, printed circuit boards, and heavy wiring. Custom design the exact soldering iron to meet your particular application by choosing from the variety of handles, heaters, and interchangeable tips. Handles are balanced for comfort and fatigue-free soldering.

No. 7500 HANDLE

3 wire type. Completely grounded from tip to plug which eliminates electrostatic tip potential. Spring loaded, heat reflecting ground plate. **Note:** This handle will NOT accept any ceramic style heaters.

IMPERIAL® CARTRIDGE

Made of a temperature resistant stainless steel body and copper alloy heat collector. Threaded end of the collector is designed and engineered to provide maximum heat transfer. All cartridges fit the IMPERIAL PERMA-COOL handle and can be changed at the bench with easy slip-in, twist-lock action. Use on tight, high-density circuitry requiring precision tip temperatures and extreme care in soldering. Ideal for heavy-duty plant service maintenance but light enough for fatigue-free production line use.

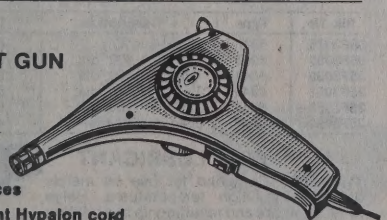
UNGAR® HEAT GUN



- 3-way switch
- Versatile
- U.L. Listed
- Weighs only 13 ounces
- Oil and heat resistant Hypalon cord

Feather light for greater accuracy and easier handling. Delivers 750°-800°F air flow temperature at nozzle in seconds. Air stream width ⅜". On/Off switch. Hot or cold air setting. Self-standing on work bench. Oil resistant Hypalon cord. Molded glass polyester housing. UL listed. 250 Watts, 120 Volts, AC only. Shipping weight: 18 oz.

Includes 4 baffles, one reducing baffle to reduce air flow at nozzle to .200" and three reflectors for shrink tubing applications. Handles all polyvinyl, olefins, silicone rubber and TFE materials. One reflector ½" L x ¾" dia. for solder sleeves and small tubing. One reflector 1¼" L x ¾" dia. for larger shrinking applications. One adapter to shrink most solder preforms materials, especially low temperature.

35F3074. Model 6966C. Complete, 3 wire cord, NEMA plug.

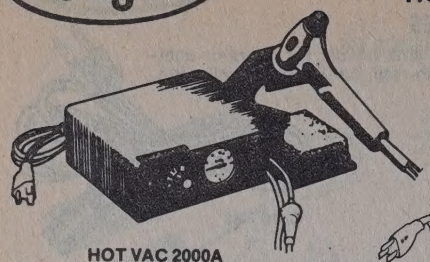
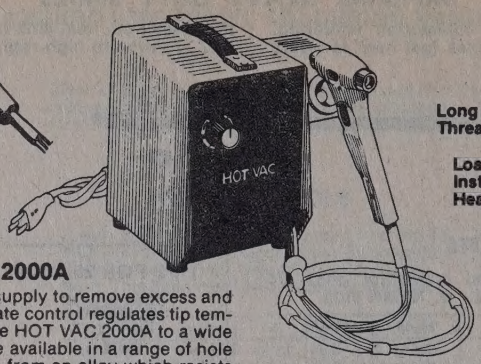
Ungar®

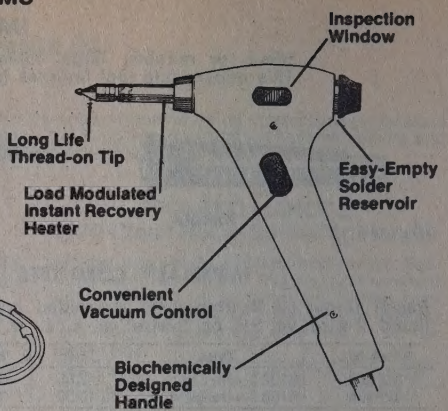
HOT VAC® DESOLDERING SYSTEMS



HOT VAC 2000A



HOT VAC 4000



HOT VAC MODEL 2000A

The HOT VAC 2000A uses normal shop air supply to remove excess and unwanted solder from PC boards. A solid state control regulates tip temperature from 500° to 1000° F and adapts the HOT VAC 2000A to a wide variety of applications. The long-life tips are available in a range of hole sizes from .032" to .089" and are machined from an alloy which resists abrasion and erosion by the solder. The solder reservoir is located in the handle and can be emptied even while the unit is operating. The exhaust is muffled for quiet and can be fitted with a remote exhaust for clean room applications.

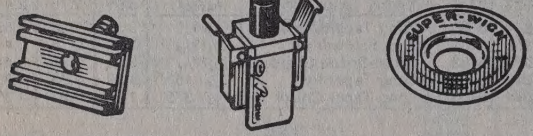
Ungar No. HOT VAC 2000A Desoldering System—
34F1072 ..... 365.00

HOT VAC MODEL 4000

Similar to the Model 2000A, except has built-in vacuum pump that operates only when the handle switch is actuated. A low-noise exhaust system and vibration isolators keep the pump quiet. The case is steel with baked-enamel finish. A convenient handle and a locking device to secure the handle permit easy transporting.

Ungar Model HOT VAC 4000 Desoldering System—
76F1006 ..... 399.00

DIP DESOLDERING KITS



Desolder Tip Spring loaded extractor Desoldering braid

50DK UNGAR Desolder Kit fits UNGAR Controlled Soldering Irons. Includes 95 tip adapter, 6982 spring loaded extractor, 6948 desoldering tip, 5013 Super-Wick Desoldering braid. **Kit 51DK** fits standard 3-wire and DI Line Irons. Includes 100 thread-in ⅛" adapter, 6982 extractor, 6948 Desoldering tip and 5013 Super-Wick.

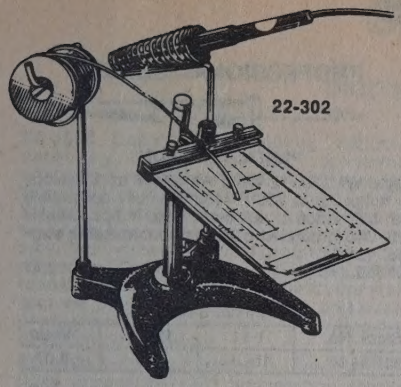
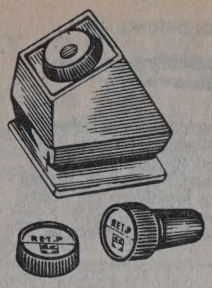
Soldering Equipment





DELUXE SOLDER STATION

Type 22-300. Designed to hold PC board, iron, and solder spool. Time-saving device. Spring-cushion grips for secure positioning of PC board. Solder iron holder accommodates pencil type irons, dissipates heat. Spool takes up to 2" spool sizes. Sturdy die-cast base insures stability. PC boards can be tilted and rotated a full 360° for ease and convenience. Adaptable for right or left-hand use.

34F1021. NET **24.95**

RE-TIP

Type 9482. Cleans soldering tips. Insert hot iron tip into RE-TIP, then withdraw—all contaminants are removed. Uniformly cleans tips up to 1/4" diameter—prevents contaminated solder joints. Prolongs tip life; tips solder faster, longer. With base for use in shop. **Type 9484.** Refill cartridge.

34F1019. RE-TIP base and cartridge. **NET** **6.95**

34F1020. Refill cartridge only (boxed). **NET** **2.95**

DIGITALLY CONTROLLED SOLDERING STATION

EC 2000 Capable of handling delicate soldering operations necessary in sophisticated applications, with electronically controlled temperatures selected and locked in by the operator. Temperature settings and readings are shown on LED display. Station is not affected by varying line voltages, voltage spikes, or line noise, nor does it create line noise. Operating safety is provided by the three wire grounding, and the use of non-inductive windings. Circuit breaker provides further safety against overloads. Tip temperature is held constant by platinum sensors located inside the tip. Work is protected from overheating, and production time is not wasted waiting for the tip to return to an optimum temperature.

EC 1000 Soldering station is identical to EC 2000 in all specifications except the LED temperature readout. The EC 1000 is dial controlled.

TEMPERATURE CONTROLLED LOW VOLTAGE SOLDERING STATION

- **15-100 Watt Range**
- **Idle Temperatures of 600°, 700°, 800°F**
- **Lightweight—¾ oz.**

Closed loop, low voltage circuit controls output and temperature. Temperature controlled by changing heat-sensing tip with knurled thumbscrew. Safe for IC soldering. Pencil iron has heat shield, non-burnable silicone rubber cord and plug-in design for easy interchangeability. Power unit with contemporary impact-resistant case, has unitized on/off toggle switch and neon indicator light, non-heatsinking iron holder, storage tray for extra tips, and tip cleaning sponge with receptacle. 3-way 6 ft. long cord. 120 V, 60 Hz, 60 W. Furnished with 1/16" screwdriver tip, 700°F. UL-Listed.

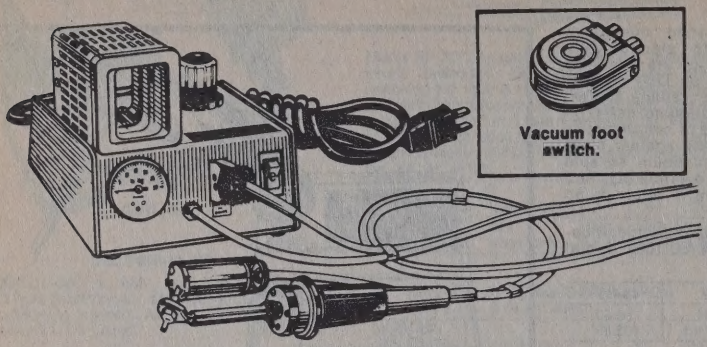
Weller Desoldering Tools

MODEL DS500 DESOLDERING STATION



- **Easily Cleaned, Transparent Collecting Tube**
- **Adjustable Vacuum Level**

Features temperature controlled desoldering iron, lighted on/off power switch, quick connect/disconnect plug and receptacle with plug lock, vacuum gauge, in-line vacuum filter, high efficiency vacuum transducer, air pressure (vacuum) regulator, safety iron holder, air pressure tubing with fittings and an air foot switch. Automatic control of temperature & grounded tip prevent sensitive components from damage. Iron is provided with a burn proof silicone rubber cord and quick connect locking plug. One desoldering tiplet comes with the DS500. Desoldering iron powered by 24 volt transformer within the station cabinet. Transformer's output is wired into a circuit breaker to prevent transformer damage. Iron plug and receptacle feature a locking plug retainer to prevent accidental disconnection. Vacuum obtained from the conversion of air pressure through a transducer, is turned off and on by means of a switch and the vacuum level is adjusted by an air pressure regulator. Air tubing and QC fittings provided. UL listed.

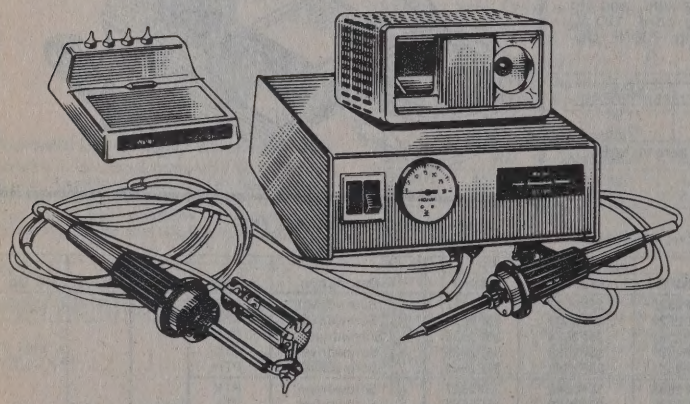
MODEL DS 100 DE-SOLDERING STATION



Power vacuum, especially designed for printed circuit board repair. Closed loop temperature control protects sensitive components. See thru solder collector is easy to clear or replace. Non-burnable cord cord sets. Low voltage tool input for added safety. High impact resistant tool handles and stainless steel barrels. Operates from factory air (30 psi minimum, 130 psi maximum) and line voltage. Complete with foot switch, indicating light/on-off switch, twin safety tool holder, vacuum adjustment and gauge, de-soldering tiplet and sponge holder, five assorted tiplets, and instructions. 120V 60 Hz. UL listed. **REPLACEMENT TIPLETS FOR DS100 SAME AS DS500.**

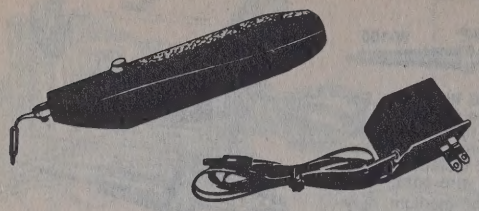
DURATEC™ brand

Solder Tools

Model CST 100 Cordless Soldering Iron with built-in work light



Features:

- **COMPACT—just 6" with tip fits easily in a tool box**
- **LIGHTWEIGHT—only 6 oz.**
- **HEAT FAST—approximately 5 seconds**
- **OFF-ON-BUTTON—one finger control**
- **SMALL TIP—for pin-point work**
- **TIP TEMPERATURE—Over 700°F**

Recharges overnight by plugging into 110-120V 60-cycle AC outlet. Solders up to 100 joints (depending on wire size) and can be used while re-charging. Operates on a rechargeable nickel cadmium battery. Recharger included. Extra Tips available.

Professional Series Pencil Irons SERIES PST

- **Lightweight—Balanced—Comfortable**
- **Molded, unbreakable, cool Polycarbonate Handle**
- **Efficient, versatile, reliable**

PST models are 120 VAC. Shaped and balanced for comfort and designed so tips can be quickly and easily changed without special tools, the PST pencil iron is a precision production tool. A ¾" shorter shaft on the PST-125 allows greater control in high density soldering. The handle remains cool even after hours of operation. Hot spots are eliminated because the handle has no screws to heat up. Furnished with 2- and 3-wire cord sets. Irons are supplied with chisel point iron plated tips.

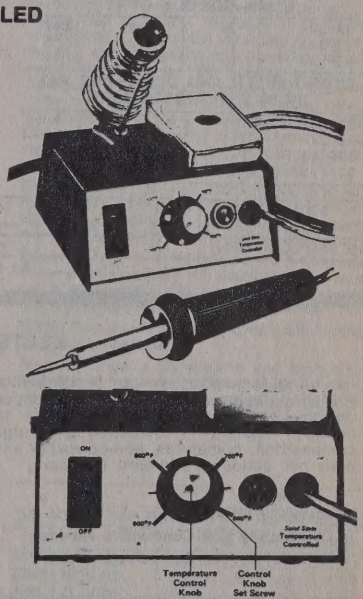
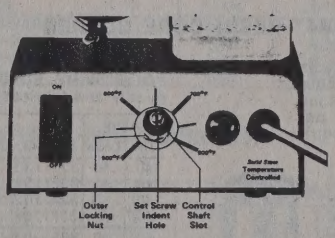
SOLID STATE TEMPERATURE CONTROLLED SOLDER STATION

Duratec STC-L4685 console all metal housing 5"w x 4"d x 2¼"d with toolholder sponge tray. Voltage: 110-120VAC, 60Hz. Input cordset 3-wire with NEMA plug, 4.5 ft. long. Solid state control circuit zero voltage switching. Control accuracy rated at ±10 F @ idling temp. Turn Knob temp. dial 460 F to 850 F. Lighted rocker switch.
81N2681 type STC-L4685 . . . . . NET 133.75

Replacement heating element with male plug connector, 50W, 120VAC
81N2682 type STC-H-EL . . . . . NET 26.95



Lock-in Temperature Setting
Concealed locking behind the dial locks in any temperature from 460°F to 850°F. Resettable.



TIPS FOR SOLDERING STATION STS-L4685

Iron clad. Premium quality. Providing extended tip life, these fine tips are excellent for continuous heavy duty soldering. Each tip is carefully iron-plated, finished with nickel-chrome and pre-tinned. Tips should not be filed. Screw on type.

ERSIN Multicore SOLDERS

Soldering Material

ADVANTAGES OF 5 CORES

- **Instant flux flow for rapid wetting.**
- **Eliminates flux voids common to single cores.**
- **Minimal soldering dwell time, heat conduction, and radiation.**

WIRE CORE SOLDERS WITH ROSIN FLUX

Manufactured with multiple, independent cores of high grade Ersin rosin flux. Combination of 5 core construction, purity of metals and fluxing activity insures fast wetting on partially oxidized surfaces.

KESTER "44" RESIN CORE SOLDER

Litton **KESTER SOLDER**

Featuring fast-acting, instant wetting flux. Makes soldering faster and provides a stronger, longer lasting bond. Flux residue is immune to fungus growth, resistant to oxidation and organic decomposition, completely non-corrosive and electrically non-conductive. 3.85% flux core.

- **Instant Wetting Action**
- **Electrically Non-Conductive Residue**
- **Completely Non-Corrosive Residue**

Resin Core Solder

DURATEC™ brand

A specially processed solder containing extremely low levels of impurities. Duratec solder provides improved wetting, shallower fillets, fewer rejects, easier inspectability and consistent results.

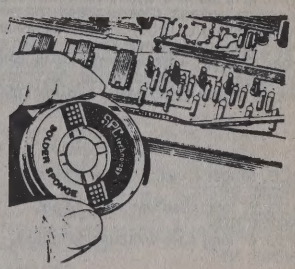
SOLDER SPONGE for any de-soldering job



Solder Sponge is the answer to the de-soldering needs and problems which you may have because Solder Sponge is vacuumized.

Solder Sponge is produced by utilizing space-age technology. The copper braid is de-oxydized and coated with a smooth flux layer by using the vacuumization production technology. Compare the flaky surface coating of competitive products and the smoothness of the flux coating of Solder Sponge. The better the coating the better the behavior. For his vacuumization process patents are applied for in many countries, including USA, England and Japan. The sophisticated vacuum technique produces an effective capillary action between the molten solder and the wick.

Solder Sponge meets all soldering quality specifications set worldwide by critical electronic associations. Such standards exclude harmful and corrosive chlorides content in the flux coating.

Solder Sponge is made with very soft chemicals because of a vacuum manufacturing technique, and is noncorrosive. Contains practically no chlorides or halogens and has a long shelf life.

Solder Sponge affectively removes solder leaving no corrosive residue.

Solder Sponge is an effective and economical means of de-soldering available today for use in military, industrial and commercial applications.

PLIERS & CUTTERS

The exceptional strength and performance of Xcelite pliers and cutters are the result of forged alloy steel construction, precision machining, and scientific proportioning. Handles are designed to fit the hand comfortably and to provide maximum leverage. Cleanly milled and perfectly aligned jaws grip tightly and surely while easy cutting is assured by hand-honed, mated cutting edges. For extra working comfort all models have permanent, red plastic-coated "Cushion-Grip" handles except Combination Slip Joint pliers.

TECHNICIAN/SERVICEMAN'S AND FIELD ENGINEER'S TOOL KIT

SERIES 99 SERVICE KITS

Series 99 service kits and sets are made up of various screwdriver, nutdriver and other blades which can be used interchangeably in series 99 handles. All blades are high carbon steel with highly polished finish except Bristol and Allen Hex types, which are precision formed, cold drawn, case hardened steel. Plastic handles have patented spring device that holds blades firmly, yet permits quick, easy insertion and removal. Regular handles accommodate all blades, single and reversible.

99-SMW. 27 piece kit contains 99-1 (Regular) and 99-3 (Stubby) handles, nine regular nutdrivers (99-6 thru 99-16), three stubby nutdrivers (99-S8, 99-S10, 99-S12), two slotted screwdrivers (99-811, 99-250), two Phillips screwdrivers (99-821 and 99-822), one reamer (99-38), extension blade (99-X10), 6" long nose cushion grip plier (52CG), 5" diagonal cushion grip plier (55CG), 6" cushion grip adjustable wrench (46CG), plastic-coated canvas case (99-SMK). Plus WP25 soldering iron with 1/16" screwdriver tip, ST3 1/8" screwdriver tip, No. 100 wire stripper/cutter. and 99SMWK plastic-coated canvas case.

Wire Wrapping Tools

WIRE CUT-AND-STRIP TOOLS

OK-729 PNEUMATIC WIRE WRAPPING TOOL

The new OK-729 pneumatic wire-wrapping tool from OK Machine and Tool Corp. is the lightest available—a mere 11 oz. (300 gm)—yet is packed with heavy duty features. The uniquely compact tool is perfectly balanced and features precision steel drive components enclosed in a reinforced Lexan* housing for maximum performance and reliability. An especially effective new muffler, a positive indexing mechanism with adjustable stop location, and a 6 ft. (2 m) flexible air hose round out the features of the new tool. The tool is available in 2 versions: "Standard" at 4,500 R.P.M. and "CSW" with higher torque and a lower 3,000 R.P.M. speed for cut/strip/wrap applications. Designed to operate at 80-100 PSI (6-7ATU) OK-729 is fully rated for "heavy duty" applications on wire as large as AWG 18 (1.0mm) yet its unique light weight and balance make it ideal even for the most delicate 30 AWG (0.25mm) work.

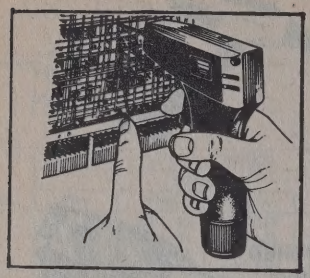
HOBBY-WRAP BATTERY POWERED WRAPPING TOOL



BW-2630 is battery powered wire wrapping tool designed for wire-wrapping onto standard DIP socket terminals. Includes sleeve for producing preferred "modified" style wrap. Prevents overwrapping and is carefully designed for serious amateurs. Operates on rechargeable "C" size batteries (not supplied). Pistol grip design of ABS, positive indexing mechanism. Weight 11 oz.

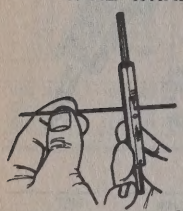
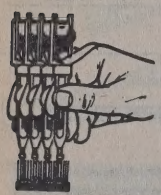
WIRE WRAPPING COMBINATION TOOL

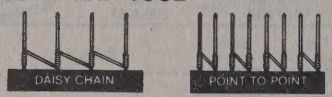


WSU-2224 wire wrapping tool. For wrapping 22-24 AWG wire (.030 x .060" and .045" square posts. This unit does the job of three tools. It wraps, unwraps and is capable of stripping wire because of a unique built-in stripping blade. Takes minutes to learn to use and makes perfect connections in seconds without solder. Compact and inexpensive.

10F7534 ..... 15.63

JUST WRAP TOOL





Designed to wrap 30 AWG wire without prior stripping or slitting of wire insulation on .025" square posts. Tool holds 50 ft. of 30 AWG wire and will wire continuously through any number of pins (daisy chain). Equipped with a built-in wire cutoff and is equally suited for point-to-point wiring.

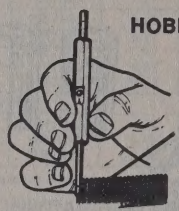
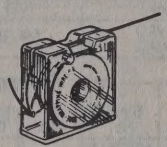
HOBBY WRAP WSU-30M



WSU-30M performs complete wire-wrapping functions for 30 AWG wire onto standard .025 inch square DIP Socket Posts. Unwraps and strips 30 AWG wire nick-free. Makes a "modified" style wrap in approximately 1½ turns on insulated wire and wire wraps are in addition to bare wire for purposes of added mechanical stability. Designed for serious amateur. Compact. All metal construction for years of dependable service.

10F7535 ..... 9.17



Tri-Color Dispenser

Contains 3 rolls of 30 AWG wire in one dispenser, one red, one white and one blue. Has a built-in plunger that cuts wire to desired length. This refillable dispenser also has a built-in Stripper capable of stripping 1" of insulation.

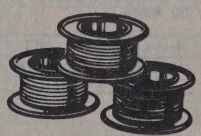
Stock No.	Type	NET
10F7537	WD-30-TR1	9.17

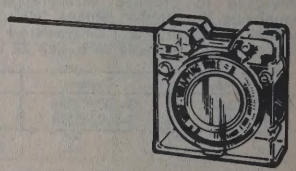
TRI-COLOR DISPENSER REPLACEMENT ROLLS

Replacement wire for tri-color dispenser consists of all three colors, red, white and blue. Each roll is 50' long and is silver plated solid conductor for easy stripping.

Stock No.	Type	Description	NET
10F7542	R-30-TRI	Contains all 3 colors Red, White & Blue	7.01

WIRE DISPENSER





For single wire dispensing. Can hold up to 50' of AWG 30 wire with built-in plunger that cuts wire to desired length. Has built-in stripper for stripping 1" of insulation.

10F7538	WD-30-B	Blue Wire	5.93

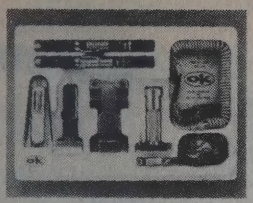
Insertion and Extractor Tools



Kit contains:
A Digital Logic Probe and Pulser. The digital logic probe PRB-1 and logic pulser PLS-1 are compatible with DTL, TTI, CMOS, MOS, and microprocessors, using a 4 to 15V power supply. These are fast, simple-to-use, cost-effective tools to complete the digital trouble-shooter's tool bag. Designed to test and analyze both static and dynamic conditions of logic circuitry. Both are circuit powered and feature high impedance, input overlaod protection, and replaceable tip and cord.

PRB-1 DIGITAL LOGIC PROBE
10 nsec pulse response.
Open circuit detection.
Pulse stretching
Automatic thresholds
Finger-tip indicators
Power supply overvoltage protection

PLS-1 DIGITAL LOGIC PULSER
Multimode—single pulse or pulse train
Automatic level sensing
Automatic current limiting
Automatic output voltage
Low output impedance
Finger-tip pushbutton

WK-8 CIRCUIT TROUBLESHOOTING KIT

B IC Insertion and Extraction Tools. kit includes DIP IC extractors and inserters to handle all ICs from 14 to 40 pins. TOols that engage conductive surfaces are CMOS safe and include grounding lugs where needed. Kit includes extractors EX-1 for 8-24 pin devices, EX-2 for 24-40 pin devices. MOS-1416 for 14-16 pin devices. MOS-2428 for 24-28 pin devices, and MOS-40 for 36-40 pin devices.

C WRS-1 Wrist Strap
This personal grounding strap is an essential part of static proofing the electronic work station for assembly workers and laboratory personnel. The strap is easily attached to the operator with a bead chain and to an anti-static work surface with the battery clip. Protects sensitive components from any static charge generated by the operator. Built into the flexible wire wrist strap is a 1 megohm resistor to prevent shock hazard to the operator.

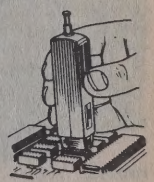
DIP/IC INSERTION TOOL

- **Inserts both 14 and 16 pin IC package into sockets or predrilled boards.**
- **Easy one-hand operation.**
- **Built-in pin straightener.**

Model 1416. DIP Insert Tool features precision parts for long life and is easy to use. Narrow profile permits tool to work on densely spaced patterns, while unique insertion mechanism assures accuracy. Simply insert IC, rock it on the straightening saddle, and push down on the tool. Also automatic ejector delivers the IC ready to be placed in the insertion end for installation in your board or socket.
10F7499 . . . . . 4.27

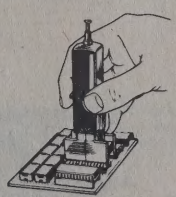
MOS & CMOS SAFE INSERTION TOOL WITH PIN STRAIGHTENER



- **Durable chrome plated ABS construction.**
- **Easy one-hand operation.**
- **Pin straightener built into handle.**

Model MOS-1416 DIP Insertion Tool. Inserts both 14 and 16 pin IC packages into sockets or predrilled boards. Tool includes a remarkable pin straightener built into handle. Simply insert the IC, rock it on the straightening saddle and push down on the tool. An automatic ejector delivers the IC ready to be placed in the insertion end for installation in board or socket. Ground strap may be easily attached for highly sensitive MOS & CMOS IC's. Precision parts for long life and easy operation. Narrow profile permits tool to work on densely spaced patterns.
10F7498. NET 9.67

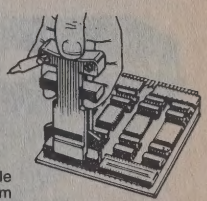
IC INSERTION TOOL



- **Handles all MOS, CMOS, and regular 24 and 28 pin IC's.**
- **Chrome plating.**
- **Aligns bentout pins.**

Model MOS 2428. Insertion tool aligns bentout pins by simply rocking IC on straightening saddle. For accurate and instant insertion simply press tool over IC to pick up then place tool onto the socket and depress the plunger. Heavy chrome plating throughout for reliable static dissipation. Tool includes terminal lugs for attachment of ground strap.
10F7497 . . . . . 9.67

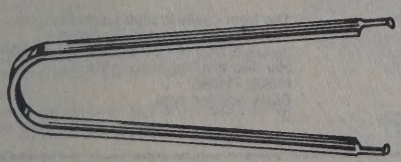
28-40 PIN IC EXTRACTOR



- **Self-adjusting.**
- **Easy to use.**
- **Chrome plated.**

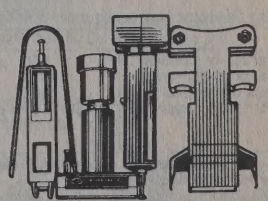
Model EX-2. CMOS safe and self-adjusting while gently lifts IC from socket or board using uniform pressure applied simultaneously at both ends of the IC. It's designed for easy one-hand operation and is heavily chrome plated for reliable static dissipation. Features attaching terminal lug for ground strip (strap not included). Extracts all 28-40 pin DIP IC's having standard .600" body widths, including MOS and CMOS devices.
10F7494. Net 10.75

DIP EXTRACTOR



EX-1 Extractor. Ideal for hobbyist or lab engineers. One piece spring steel construction gives years of dependable use. It extracts all LSI, MSI and SSI devices from 8 to 24 pins.
10F7547. Net 2.11

WK-7 IC INSERTION KIT



Kit includes DIP IC extractors and inserters to accommodate all IC's from 14-40 pins. Tools that engage conductive surfaces are CMOS safe and include grounding lugs where needed. Kit includes extractors EX-1, for 14-16 pin devices, EX-2 for 24-40 pin chips, MOS-1416, MOS-2428 and MOS-40 for 14-16, 24-28 and 36-40 pin IC's respectively.
10F7495. Net 37.75

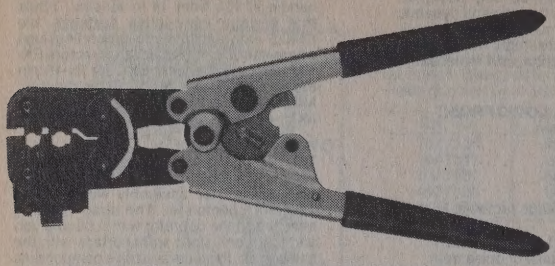
BESTOOL™ brand Crimping Tools

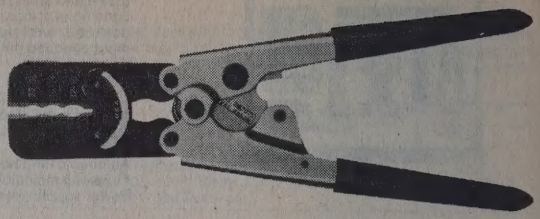
INSULATED TERMINAL CRIMP TOOLS



Full Cycle Insulated Terminal Crimp Tool

This two cavity, four jaw, full cycle tool is designed to crimp both the conductor and insulation portion of insulated terminals or splices in a wide range of wire sizes. Ratchet handle assembly, coupled with a unique locator and jaw design, assures consistent, reliable terminations throughout the extended operational life of the product.

Capacity: ..... Crimps red and blue insulated terminals and splices in wire sizes 22-14 in the front cavity. Crimps yellow insulated terminals and splices in wire sizes 12-10 in the rear cavity.
Locator and Wire Stops: ..... Orients the terminal properly to assure consistent terminations.
Jaws: ..... The conductor and insulation crimping jaws are 4150 thru-hardened steel, machined and gaged to industry specifications. Jaws are supplied with black oxide finish. Nests are identified by wire sizes and are color-coded for fast, easy identification.
Ratchet: ..... Ratchet assures a complete crimp cycle prior to release and is adjustable to compensate for wear after extended operation.
Handles: ..... Handles are 1051 thru-hardened steel, nickel plated, with black grips.
Overall Length: ..... 9".
81N5432 NET ..... Type CTR-100 ITD **99.95**



Full Cycle Insulated Terminal Crimp Tool

This three cavity, two jaw, full cycle tool is designed to crimp the conductor portion of insulated terminals or splices in a wide range of wire sizes. Ratchet handle assembly with locator jaw design assures reliable terminations.

Capacity: ..... Crimps red insulated terminals and splices in wire sizes 22-16 in the front cavity. Crimps blue insulated terminals and splices in wire sizes 16-14 in the middle cavity. Crimps yellow insulated terminals and splices in wire sizes 12-10 in the rear cavity.
Jaws: ..... The jaws are 4150 thru-hardened steel, machined and gaged to industry specifications. Jaws are supplied with a black oxide finish. Nests are identified by wire sizes and are color-coded for fast, easy identification.
Ratchet: ..... Ratchet assures a complete crimp cycle prior to release and is adjustable to compensate for wear after extended operation.
Handles: ..... Handles are 1051 thru-hardened steel, nickel plated, with black grips.

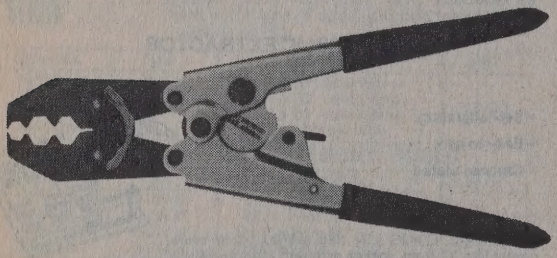
COAXIAL CONNECTOR CRIMP TOOLS



Full Cycle Coaxial Crimp Tool

FOR MIL-M22520/5 COAXIAL CONNECTORS

This rachet controlled three cavity crimp tool is designed to provide consistent reliable hex crimp terminations on a wide range of coaxial connectors. A unique ratchet release mechanism is provided to allow removal of an incorrectly placed connector or crimp ring prior to completing the crimp cycle.

Crimp Capacity: Hex configurations in the following dimensions

	CTR 100 BNC-1	CTR 100 BNC-2
End cavity (contact)	.068	.068
Center cavity (braid)	.213	.178
Back cavity (braid)	.255	.324
R/U Cable sizes*	55 58 141 142 223 303 400 69 62 140 120	122 174 179 180 187 188 195 8281

*Match specifications of previous tools used or coax connector manufacturer recommended cavity size.

Jaws: Jaws are high carbon thru-hardened alloy steel supplied with a black oxide finish numbered for fast easy identification. Handles: Handles are high carbon thru-hardened steel, nickel plated supplied with black grips. Ratchet: The patented ratched assembly assures consistent terminations. Adjustability for extended use and a unique release mechanism assures trouble-free operation. Overall length: 9".

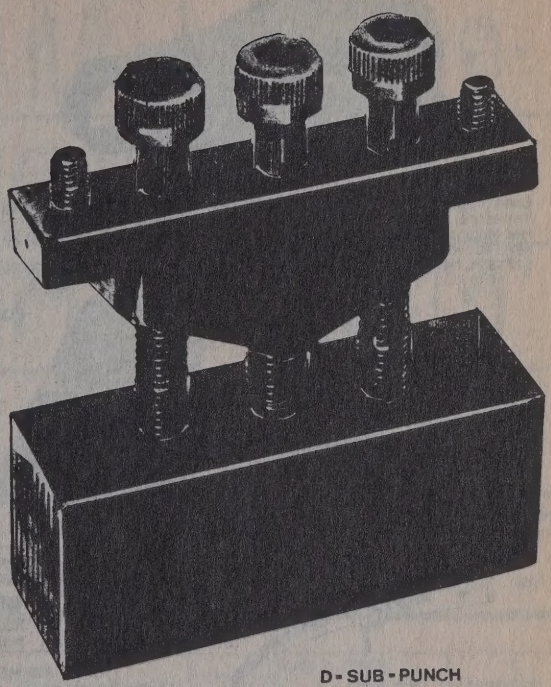
MODEL D-SUB-PUNCH

BESTOOL™ brand

(For mounting 25 pin sub-miniature, RS232 Standard)

- **Accurate punch-out conforms to plug or receptacle.**
- **Mounting holes accurately located and prick-punched.**
- **Minimal burr on rear of panel.**
- **Burr free on panel front.**
- **Supply of adhesive backed templates included with kit.**
- **All necessary screws and wrenches provided with kit.**
- **Quality built punch/die set can be re-ground to sharpen.**



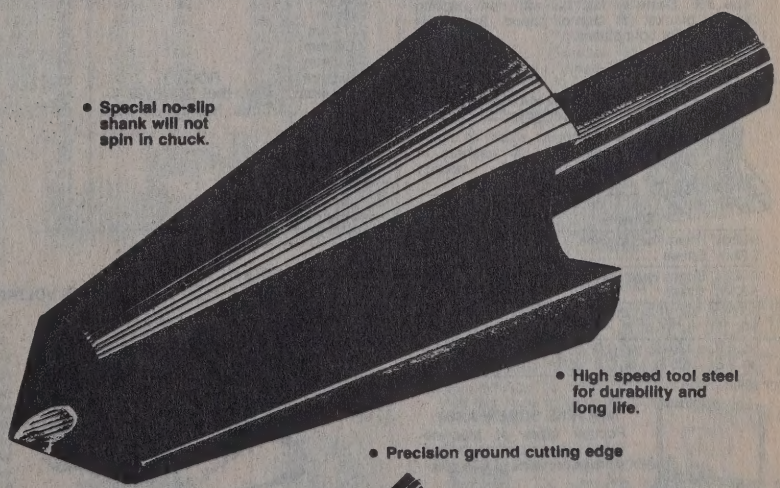
D-SUB-PUNCH

This Panel Punch provides a suitable hole for mounting the 25 pin sub-miniature plug or receptacle commonly utilized in devices employing RS232 Standard digital data transmission. The punch is designed for those connectors equivalent to TRW Cinch Connector Types DB-25P and DB-25S. The Punch/Die unit itself is machined of D-2 tool steel, hardened, and cutting edges are ground. Punch and Die are drawn together by 3 bolts which are tightened in a predetermined sequence. Adhesive templates which are provided with the kit locate these 3 bolt holes. Before the hole is completely cut, two hard point screws are tightened to both mark and prick punch the receptacle mounting screw holes. After the operation is completed the slug is ejected from the die by use of two cap screws. All fasteners are socket headed and allen wrenches are provided. The thickness capacity is 22 gauge to 16 gauge in both steel and aluminum.

81N2660 ..... $163.95

VARI-BIT MULTI-HOLE DRILLS

- Drills clean, quick holes in steel up to 1/16" thick, non-ferrous metals, plastic, Formica, plywood, PC Boards, etc.
- Can be used in any industrial hand power tool, or on pedestal drilling machines.
- A range of sizes on one tool—the further the tool advances, the bigger the hole, replacing an index full of drills.
- Reasonable accuracy can easily be obtained by using a washer on the tool as a simple stop.
- Shape of tool allows easy withdrawal from workpiece.
- Saves time over chassis punches.
- More economical than chassis punches—one tool does the job of several punches.
- Drills holes as easily in .007 shim stock as in 8 gauge sheet metal.



- **Special no-slip shank will not spin in chuck.**
- **High speed tool steel for durability and long life.**
- **Precision ground cutting edge**
- **Special point angles prevent wandering on finished surfaces**

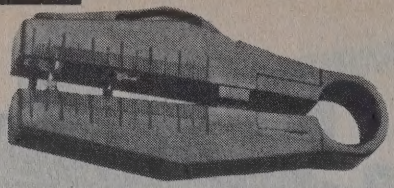
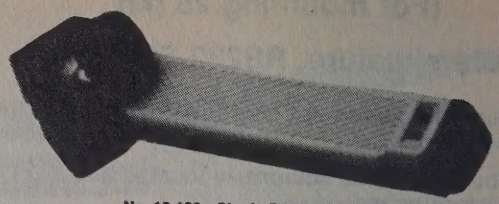
TOOLS, HARDWARE KITS



No. 12-156—Teflon Stripper

Specifically designed for stripping PTFE, Kaynar and other heat resisting insulations, plus applications that require wire stripped to consistently accurate lengths. Stripping length can be preset from 7/32" to 2 3/8". For up to 20 AWG stranded or 14 AWG solid wire.

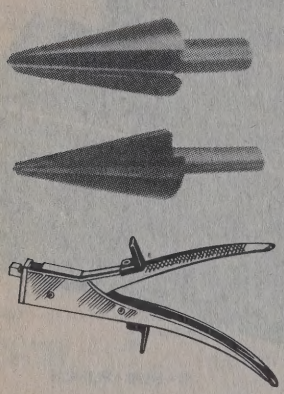
81F1364. Net 33.80



No. 12-160—Single Blade Stripper

Makes easy work of tough stripping jobs from 500 MCM heavy conductors to delicate fiber optics. Tool steel blade cuts around the circumference of the cable then swivels exactly 90° at the touch of a button for slitting longitudinally along the cable.

81F1365 Net 23.25



NIBBLING TOOL

Type 805. Hand operated nibbling tool cuts sheet metal like a chassis punch. Starts with 3/8" hole then nibbles to shape and size desired. Cuts up to 18 ga. steel, 1/16" copper aluminum, and plastic.

34F1018. Net 8.17

Type 806. Same as 805 but with heavy spring stripper bracket for greater speed. Bracket is removable for tight places.

IDEAL

Wiring Devices and Anchors

WIRE MARKING KITS

Economical solutions to all general-purpose wire marking requirements—on-site and in-plant. Positive identification now means time and money savings later. Plastic impregnated cloth is resistant to moisture, dirt and oil. Withstands temperature extremes from —40 to +275 F. Non-smear legends—ensures high visibility, instant identification. Standard 1½ in. markers are perforated for separation into half-length sizes for marking wires 3/16 in. diameter and smaller. Matching terminal markers to pair up with every wire marker. Gives a complete wire identification.

FLANGE TYPE ANCHORS

Excellent for multi-purpose use—effective anti-turning ribs works well in hollow or solid materials. Flat concentric ribs for greater grip. Open throat and slot for easy installation. Maximum expansion at inner end. May be used with either sheet metal or wood screws. Anchors are made of Tenite® butyrate plastic. Resists moisture and corrosion—won't deteriorate. Has high impact strength. Temp. rating (—50°F. to +220°F.).

WD-40 SPRAY CLEANER

- **Penetrates**
- **Cleans**
- **Protects**
- **Lubricates**

WD-40 spray cleaner is perfect for cleaning contacts, cleaning sticky parts and lubricating all types of machine parts. As a fast-acting penetrant, WD-40 loosens rusty joints easily. WD-40 can be used to protect metal from moisture and corrosion. This silicone-free spray leaves no gummy residue and is a non-conductor of electricity. Quickly eliminates moisture-induced short circuits in electrical and electronic equipment. WD-40 is available in a 12 ounce aerosol spray.

Jonard Industrial Tools

MANUAL QUICK-WRAP GUN

Type WG-350. Connections are considerably stronger than solder connections. Lack of stress points results in less breakage. Hand-operated gun uses interchangeable bits and sleeves. Bits are selected to fit different sizes of terminal height, width and wire sizes combinations. Sleeves are selected to fit over the bit. Sleeves are insulated to help prevent shorting of adjacent connections. Terminal Dia. x Depth are all .075 x .750" except for wire gauge 22-24 which is .075 x .807".

35F3641. NET **113.87**

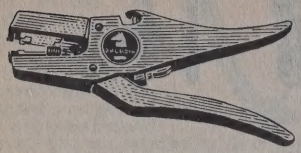
PALADIN The Wire Handlers

SELF ADJUSTING STRIPPER



Type PA1100. Strips 12 to 30 AWG wire in one step. Built-in sensor automatically adjusts to cut and strip solid or stranded wire and multiple cable. Feeds from the front so it can reach anywhere. Stainless steel blades good for over 100,000 operations. Pocket-size capable of cutting and stripping up to six conductors simultaneously in bonded or molded cables. Fiberglass, reinforced nylon body is virtually indestructable and electrically insulated.
10F 7010 Net 42.95

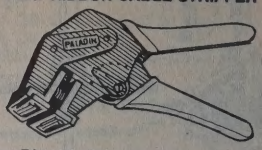
FLAT RIBBON CABLE STRIPPER

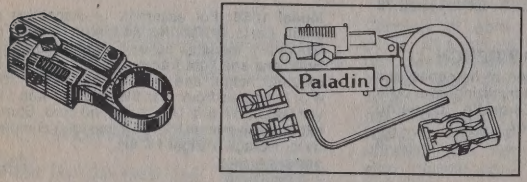


Type PA1121. Strips cable for on-board soldering or connector termination. These tools strip up to 32 conductors of bonded, laminated or twisted pair conductor flat cable-a major advance in flat cable preparation technology, both in function and versatility. Two varieties of the tool are available. The PA1120 strips the insulation completely off the cable while the PA1121 strips the insulation back, but does not remove it, thus preserving the centerline spacing. No other flat ribbon cable stripper on the market today can equal the quality or cost effectiveness that this tool delivers.
Maintenance/Repair Kit for Both Tools: PA2105
81F 2490 NET 159.00

CABLE TY GUN

Type PA1825. Paladin's new Cable Ty Gun gives the user high quality at a truly economical price. The Ty Gun tensions the ty's and cuts them cleanly without leaving ragged edges. The tension adjustment gives great flexibility in selecting bundling pressure while keeping operator fatigue to a minimum.
81F 2491 NET 52.50

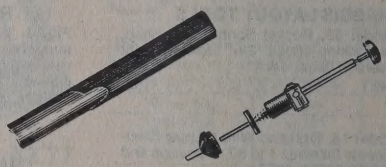
COREX COAXIAL WIRE STRIPPER



Two bladed (types 1204, 1208) or three bladed (type 1209) coax tool designed for solder and crimp type connectors. Removes dialectric, braid, and outside insulation, either simultaneously, separately, or in any combination of both. Strips all coaxial wire with O.D. of .14" to .30", including RG58, RG59, RG142, RG122, RG174, 8281, and Western Electric or IBM cable. Removable cassette blades are rated up to 5,000 strips. Tool holds cable in place while making a series of consistent, 360° turns, which cuts quickly and smoothly.
Type PA1204. Two blades, designed for crimp or solder connectors. Cuts braid and dialectric same length, which extends .26" from outside insulation after its use.
10F 7019 NET 34.95
Type PA1208. Same as PA1204, except braid and dialectric extends .48" from outside insulation after its use.
10F 7020 NET 34.95

Type PA1209. Three bladed version designed primarily for crimp type connectors. Cuts braid and dialectric to different lengths, in one operation. Braid extends .27" and dialectric extends .42" from outside insulation after its use.
10F 7021 NET 42.95

DESOLDERING TOOLS



Compact hand-held unit designed with quality, versatility and performance in mind. Sturdy metal body resists cracking or breakage. Teflon tips are made of a heavily reinforced material to withstand more desoldering operations. The all metal internal vacuum system is industrially tough and will give excellent performance throughout its long life. A unique spring action allows the plunger seal to "float" on top of solder debris thus preserving the full vacuum force at all times.
Type PA1700. Desoldering tool with standard tip.
10F 7022 NET 16.95
Type PA1701. Desoldering tool with miniature tip.
10F 7023 NET 16.95
Type PA2712. Standard replacement tip.

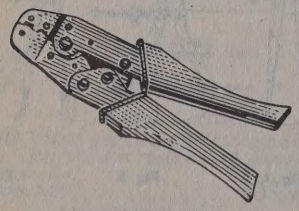
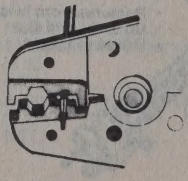
CRIMPEX CRIMPER



Double-action hand tools crimp insulated terminals and splices. Accepts a wide variety of connectors. Over 50,000 operations. Terminals which it will accept include 3M, T & B, AMP, Hollingsworth, Burndy, and Ideal. Choice of handle size and crimping capability.
Type PA1300. Hand ratcheted crimper. 22-10 ga. Length 9".
10F 7002 NET 49.95
Type PA1601. Smaller version of PA1300. Length 7½". 22-14 ga.
10F 7003 NET 49.95

CRIMPEX FOR BNC CONNECTORS



Type PA1610. Mini crimper type PA1601, with RG-58 dies for BNC connectors. Crimps pin and ferrule in two easy steps.
10F 7004 NET 112.95

Type PA1615. Mini crimper, PA1601, with RG-59 dies for BNC connectors.
10F 7005 NET 112.95
Type PA1616. Mini crimper. PA1601, with RG-174 dies for BNC connectors. For use on Amphenol #31-242 or Trompeter #PL220-003 connectors.
10F 7006 NET 112.95

COAX TERMINATION KIT

COAX TERMINATION KIT
Lightweight kit designed primarily for field use. Includes the ratcheted crimp tool with replaceable dies, and the coax wire stripper. Gives constant quality connections.
Type PA4000. RG-58 coax termination kit. Includes crimper model PA1610, and coax stripper model PA1209.
10F 7007 NET 154.95
Type PA4001. RG-59 coax termination kit, includes crimper model PA1615, and coax stripper model PA1209.

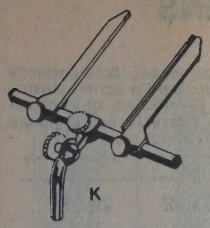
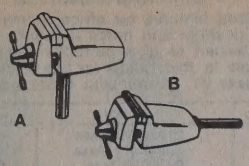
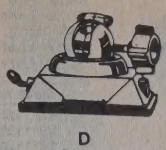
Panavise Handling Devices







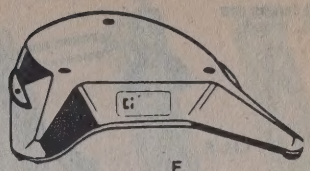


Fig. A model 303 standard PANA-VISE head vertically mounts to all 300 bases and features 2½" wide nylon faced jaws which open 2¼" holding objects firmly yet gently. Exceptional quality & strength.
75F019 model 303 ..... $16.95

Fig. B model 304 LOW PROFILE HEAD has the same features as the standard head except the stem is cast into the rear of the head for the away from the work bench jobs when mounted in the LOW-PROFILE base.
81F1160 model 304 ..... $18.95

Fig. C model 300 standard Pana-Vise BASE holds all regular 300 series heads and PCB holders. Exclusive split ball feature permits the location of work to any position. Rotates turns and tilts by the securing of a single knob. Three base mounting holes in the lugs is adaptable to Pana-Vise mounts or permanent mounting.
75F016 model 300 ..... $13.95

Fig. D VACUUM BASE attaches to any clean non-porous surface with it's heavy duty suction pad. Same multi position split ball feature as the standard base. All 300 series heads mount in this base.
75F018 model 380 ..... $21.95

Model 301 STANDARD PANA-VISE combines popular head 303 & base 300
75F017 ..... $29.95

Nylon faced jaws. model 343.
75F016 ..... $2.00

VACUUM BASE PANAVISE. model 381 combines model 303 & model 380
75F032 ..... $37.95

Fig. F model 308 WEIGHTED BASE MOUNT: 5 lbs. mount for all 300 series bases is compact and keeps stability. Equipt with four non-skid neoprene feet. Tapped in holes for permanent mounting.
75F020 ..... $16.75

Model 809 combo consists of the 308 mount, the 305 LOW-PROFILE BASE which is the same as the standard base but is only 2½" in height, and the 366 WIDE OPENING VISE that opens to 6" with 1¾" wide jaws. The steel jaws have reversible neoprene pads that are ribbed on side and have a wide "V" on the other for cylindrical and delicate objects.
75F024 Model 809 ..... $50.65

Model 808 combo consists of the LOW-PROFILE BASE, the WEIGHTED BASE MOUNT and the 376 SELF CENTERING EXTRA WIDE OPENING HEAD that double action jaws allow fast operation and stays centered on the base for heavier objects. This head opens to 9" and features the same reversible pads as the 366 Wide Opening Vise.
75F023 model 808 ..... $49.60

Model 376 SELF CENTERING EXTRA WIDE OPENING HEAD. (vise only)
75F031 ..... $20.95

Model 810 combo of the 300 STANDARD BASE and 315 PCB HOLDER that opens to 12" puts boards where you want them. These 6" aluminum arms hold boards up to 5/32" thick. Featuring a special "V" grip groove with adjustable spring tension equalising the pressure right to end of the arms even holding exceptionally small parts.
75F021 model 810. ..... $33.90

Model 811 combo same as the 810 combo with the WEIGHTED BASE MOUNT 308 for PCB work.
75F025 model 811. ..... $50.65

Fig. K model 315 CIRCUIT BOARD HOLDER combo.
75F022 ..... $19.95

Model 333 RAPID ASSEMBLY CIRCUIT BOARD HOLDER. This circuit board holder features an 8 position rotating adjustment and six position feature in the vertical plane. Crossbars are available up to 30 inches in length to hold circuit boards up to 28 in. in width. Extra arms can be added for dual or multiple assembly. Same spring loaded feature in the arms as the 315 model.
75F028 model 333 ..... $39.95

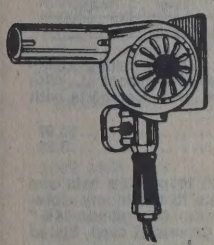
Model 324 ELECTRONIC WORK CENTER FEATURES the model 315 PCB Holder, the 300 standard Base and the model 312 TRAY BASE MOUNT with a SOLDER STATION model 371 to hold solder spool and coil solderpencil holder.
75F027 ..... $49.95

Model 312 BASE TRAY MOUNT (only) a low cast metal mount for all 300 series bases has six individual trays for neatly organizing small parts and tools or should a part drop the 8½" dia. tray will catch it.
75F026 ..... $13.95

Model 350 MULTI-PURPOSE WORK CENTER features a combination of the 312 BASE TRAY MOUNT the model 376 SELF CENTERING EXTRA WIDE HEAD and the model 300 STANDARD BASE.
75F030 model 350 ..... $44.95

MASTER APPLIANCE

AIR HEAT GUN



Sturdy die-cast aluminum housing. 8 ft. neoprene-jacketed 3-wire cord and plug that is oil and grease resistant. Turbo type fan blade is efficient and quiet in operation. All models for 115VA.C. or D.C. operation. Equipped with adaptor for 2 prong receptable. Shipping wt. 5 lbs.

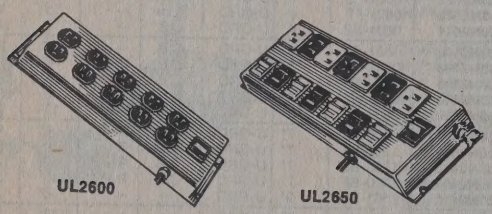
SERIES UL 2600



SPECIFICATIONS

- Case size: 13 7/16"L x 4¼"W x 1½"H (Excluding mounting tabs, case length—12 7/16")
- Mounting: four Keyhole-slot brackets, centers—10 1/16" x 2¾"
- Power supply cord: 14/3 SJT, molded plug
- Maximum rating: 15A, 125VAC, 60Hz, 1875 Watts, continuous duty
- Protection: all have circuit breakers
- Fabricated steel case with baked-on finish (Blue)
- Component colors: black except where noted

UL2600. Five duplex outlets (a total of 10) with lighted rocket switch.

UL2650. Seven alternating black and white lighted rocker switch-outlet groups plus master lighted rocker switch control.

Stock No.	Type	Cord	Each
60N2600	UL2600-BS	6'	41.05

POWER MASTER LINE MONITORS

Power Master Line Monitor Power Conditioners protect against spike damage by filtering both the hot line and the neutral line. In addition, the filter is also bi-directional. This means that the filter system not only dissipates incoming spikes, but also outgoing spikes created by your own equipment. The Power Master filter system is passive. In other words, it operates only when a spike occurs. Upon sensing a spike or series of spikes, it will instantaneously "clamp" or reduce the spike to a level that is safe for use by your equipment. The spike, depending upon severity and the design of the Power Master filter system, is harmlessly dissipated either in the form of heat, through the grounding system or both. The result is a constant flow of clean electrical power to and from your electronic equipment.

RECEPTACLES

3-wire grounding-type convenience outlets. 5242 is side-wired only. 5252 and 5262 are back or side-wired. Isolated ground receptacles have grounding terminals isolated from mounting strap to prevent transmission of transient current often associated with building ground. Twist lock except (*) straight blade.

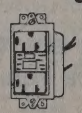
GROUND FAULT INTERRUPTER RECEPTACLES



Ideally suited for installation in bathrooms, workshops and outdoors, or with any application in residential dwellings, hospitals, schools or industry where GFI protection is needed. All are U.L. listed and have been designed to protect people from line-to-ground electrical shock hazards. If the level of leakage exceeds the trip level (4-6 milliamps), the unit quickly acts to open the circuit.

Stock No.	Type	Amp.	V.	Each 1-9	10-24	25-49

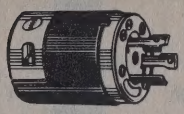
INSULGRIP-NYLON CABLE CLAMPS



Molded of Dupont® Zytel, a rugged nylon which resists flame, arc, corrosion, shock and a wide range of environmental conditions. Powerful cable grip jaws offset wire in clamp to prevent strain on wiring terminals. Exclusive "Picture Window" wiring chamber lets you see if wires are inserted correctly. UL and CSa listed.

RECEPTACLE CIRCUIT TESTER

- Durable construction
- Ease of operation
- Immediate diagnosis

5200 Tester has a simple arrangement of neon lights indicating various fault conditions in electrical circuits. Quick and easy operation. By plugging the 5200 Tester into a single phase, 125V, 2-pole, 3-wire outlet the combination of lighted and unlighted lamps indicates circuit condition.
34F1145. NET 24.74

GROUND FAULT INTERRUPTER & POUCH

Plugs into any standard 15A., 120 V, straight blade, U-ground receptacle. Cord connected equipment can then be plugged into the single 3-wire grounding outlet in face of unit for ground fault protection. Underwriters' Laboratories listed for indoor use. Conforms to applicable National Electrical Code requirements.

GROUND FAULT LEAKAGE TESTER

GFT 2-G. Designed to measure trip level of either portable or "wired in" GFI in a range of 2 to 7 milliamperes. May be used on any 110, 120, 130 volt circuit at 15 or 20 amperes, or circuits above 20 amperes with use of adapters. Compact, tough impact resistant nylon housing. Highly visible indicator light on center band. Can be used to test tools or appliances with either two or three cords.

RECHARGEABLE NICKEL-CADMIUM BATTERIES AND CHARGERS

Batteries can be stored charged or uncharged. Capacity of Nickel-Cadmium batteries is expressed in average ampere hours, and stays relatively fixed over a wide range of discharge currents. Rechargeable batteries actually cost less to use per ampere hour than throw away batteries. Nominal cycle life is 1000 cycles except for Type N88 8.4 volt Ni-cad batteries can be recharged up to 300 cycles. End of cycle life is considered to be the point where the battery no longer provides 80% of rated capacity.

GENERAL PURPOSE CARBON-ZINC BATTERIES

Long-life carbon-zinc batteries are most popular for portable power. Available in most standard sizes. For use in industrial, electronic; transistor, and many other applications. Specially sealed to provide protection in handling and against corrosive leakage. Sturdy construction. Long dependable service, even over a wide range of temperatures, plus peak performance at all times.

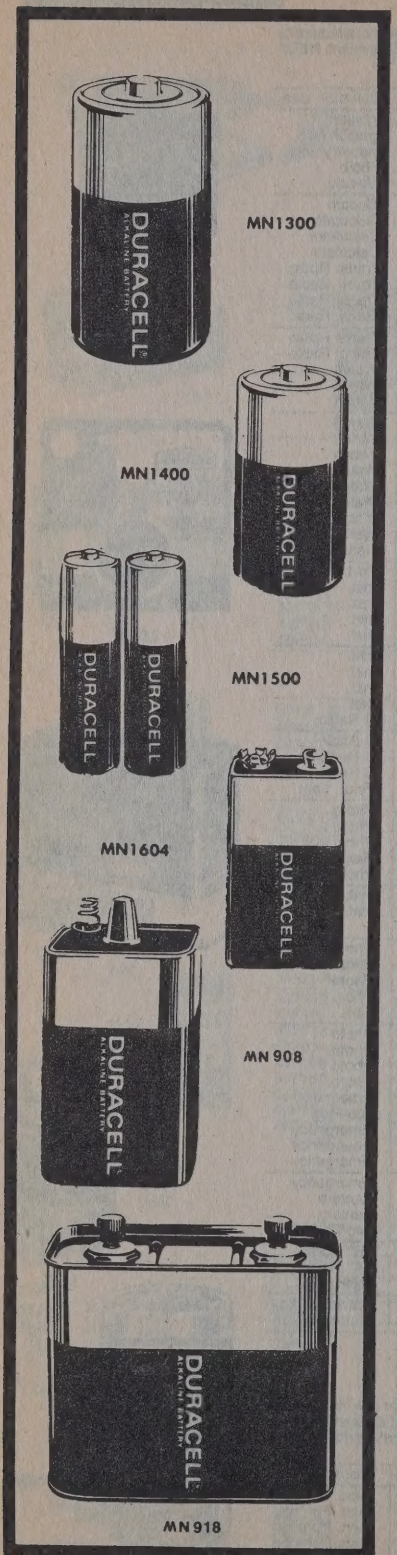
Batteries



ALKALINE BATTERIES

• **LAST SIX TIMES AS LONG AS CARBON CELLS** • **HIGH ENERGY**

For devices that require a long lasting power souce that delivers high energy, such as movie cameras, cassette players, electronic flash units, etc. Alkaline cells can last up to 6 times as long as carbon cells.

MERCURY BATTERIES

• **MORE POWER PER UNIT OF VOLUME** • **HIGH ENERGY**

Mercury batteries offer more power per unit of volume than any other type making them ideal for use in electronic circuits. Mercury batteries are widely used in electronic instruments, photographic equipment, hearing aids, paging equipment, and radios.

RECHARGE BATTERY SYSTEM

Battery modules utilize AA, C, D or 9V batteries. Mini-charges BC-3 & BC-2 can recharge 1 & 2 battery modules respectively. Both plug directly into wall socket. BC-1 can recharge up to 4 batteries of any of the four sizes. Batteries recharge in 16-18 hrs. Provides cost efficient source of portable energy. Delivers lower cost/hr of operation than "throw-away" battery types. Can be charged/discharged up to 1000 times. Strong durable construction. Consistent performance. Excel in high drain applications. Spare batteries can be left on charge for an indefinite period of time without harm to either batteries or charger. UL listed.

RECHARGEABLE SEALED NICKEL-CADMIUM CELLS

Battery system includes rechargeable sealed nickel-cadmium cells and chargers. Nickel cadmium cells rated 1.25 volts can be recharged up to 1000 times or more. Home consumer uses these cells along with Model BC-1 charger to replace ordinary throw-away batteries.

STANDARD AND DIP-TYPE INDUSTRIAL NICKEL CADMIUM BATTERIES

Sealed cylindrical cells and battery packs are for applications requiring maintenance free durability and high discharge rate capabilities. All cells have a resealable safety vent mechanism which provides for complete safety. Batteries are capable of up to 1000 charge/discharge cycles and are available in standard temp. 50°C and high temp. 70°C capabilities. **Data Sentry®** are DIP-type P.C. board mountable batteries with DIP compatible pins, solvent-resistant plastic case, resealable safety vent mechanism, and are available in 2.4V, 3.6V with either standard temp. 50°C or high temp. 70°C Gold Top® design.

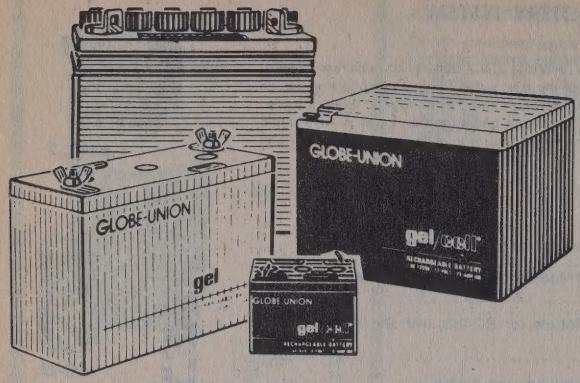
gel/cell® GLOBE Rechargeable Batteries, Chargers



SEALED, RECHARGEABLE GELL/CELL BATTERIES

Small, powerful rechargeable batteries with exclusive gelled electrolyte held permanently between plates and sealed in polystyrene. Compact, long-lasting battery contains no liquid. Can be operated, stored or charged in any position, even upside down. Completely maintenance free, water or electrolyte is never added. Up to 500 or more charge/discharge cycles. Self discharge is only 2% to 3% per month. Reliable lead dioxide system eliminates danger of permanent cell reversal and resulting loss of ability to recharge. Protective self-sealing relief valves prevent excessive cell pressure build-up if batteries are accidently over-charged. Not affected by memory or previous use history. May be connected in series to obtain any multiple of 2 volts or in parallel for other than standard capacities. A fully charged Gel/Cell wil operate over a temperature range of -76° F to +140° F. Gel/Cells are rated at 77° F. Their capacities increase above 77° F and decrease below 77° F. Durable, high impact, polystyrene case is non-conductive, will not rust or deteriorate. Ideal for transportable equipment such as tape recorders, TV sets, medical apparatus and test equipment. **Note.** Last digit of Globe part number indicates terminal style. 1 .187" quick connect, 3 "L" terminal, 4 .110" lug, 5 ¼-20 stud, 6 .250" quick connect, 7 .250" positive, .187" negative (vertical).

RECHARGEABLE BATTERY PACKS

Portable power supply provides a great source of power for battery operated equipment. Gives dependable electrical power anywhere, indoors or out. use it on camping, fishing and motor trips to power a portable radio, TV set, tape recorder, depth and fish finders, boat running lights, camp and emergency lights. Provides plenty of power for portable tools, communications equipment, test instruments, public addresses. Operates simply by connecting appliance to the power pack using a standard automobile cigarette lighter appliance plug. Any 12 volt or 14 volt appliance designed to operate from automobile lighters may be plugged directly into power pack. Absolutely safe, operates efficiently in any position and is not harmed by extremes of temperature. Battery pack is easily recharged by self-contained charger which inserts into battery pack and plugs into standard wall outlet. Pays for itself many times over by letting you save on batteries. Charging time for 12 volt battery pack is 16 to 20 hours for a complete charge; 18 to 24 hours for 14 volt battery pack.

Operating temperature range: -76° F to +140° F. Recharging temperature range: -4° F to +122° F. Not harmed by over discharge. Maintenance free. Comes complete with handsome carrying case, shoulder strap and self contained battery charger.

Stock No.	Type	Nom. Volts	Amp Hrs. (20 Hr. Rating)	W	D	H	Weight Lbs.	Net Each

BATTERY CHARGER

Easy to use, low cost charger provides choice of two well regulated output voltages. Panel switch selects "fast" or "float" voltage. In "fast" mode a fully discharged battery is recharged in 12 to 16 hours, or less; in "float" mode, 36 hours or less. Batteries can be brought to 75% to 80% of full charge in half the time. With switch in "float" position, batteries may be left on charge continuously. Indicating lamp stays on during charge, begins to glow dimly and goes out when battery is approximately 90% charged (50% on float setting). Protected from momentary shorts and reversed polarity. Chargers with 350 mA outputs recommended for batteries up to 3 ampere rating; 750 mA chargers for larger batteries or when charging smaller batteries in parallel. Operating temp: -4° F to +122° F. Black bakelite case with aluminum top panel. Size: 5⅞"W by 3⅛"D by 2¾"H. Weight 2 lbs. Indicator lamp brightens noticeably if connections are accidently reversed.

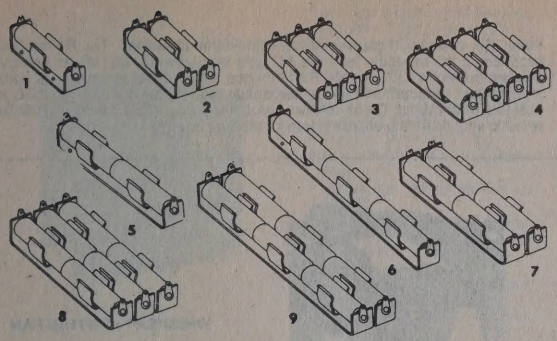
Keystone Battery Holders, Plugs

ALUMINUM BATTERY HOLDERS



Frame and clip made of 2024 ST4 Aluminum for light weight and strength. Spring tension battery holders feature cadmium-plated copper lugs and fibre insulators which are moisture-proofed.

STANDARD ALL STEEL BATTERY HOLDERS

Ideal for Nickel Cadmium Alkaline, mercury, and carbon zinc cells. Made of SAE 1065. Carbon Steel to MIL Spec. 17919, heat treated to spring temper and nickel plated .0002 thick. Stainless steel eyelet, moisture proof vulcoid washers and a coated copper solder lug compose the contact assembly. 2 mounting holes (**) Side by side clips mounted on phenolic 1/16" thick MIL Spec. 3115B. (†) End to end with insulating tubes.

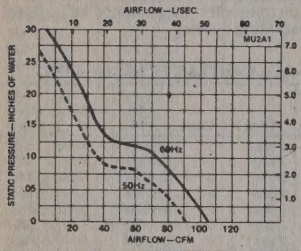
EG&G ROTRON

Muffin® and Whisper® Fans

U.S. designed. U.S. made. The brand preferred by professionals for over 30 years. Rotron "invented" the precision airmover industry which has kept pace with the cooling demands of today's electronics. Rotron fans and blowers, completely manufactured in the U.S., have earned their way into products bearing such names as IBM, Xerox, Honeywell, H-P, T.I. and Raytheon. So, you'll be in good company with Rotron airmovers. The Rotron line, broadest in the industry, features AC fans and blowers, as well as energy-efficient brushless DC models. Performance sensors are optional in its commercial fans, standard on military/aerospace models built for high reliability in hostile environments. These sensors can signal that a problem exists, or can be wired to shut down the entire system for added protection.

MUFFIN® VENTURI FAN



MUFFIN

The dependable, low cost, largest selling fan for commercial cooling applications.

- 105 cfm (49.6 L/Sec) free delivery
- 4.71" sq. x 1.50" depth (119.6 mm x 38.1 mm)
- weight: 17.2 oz. (0.49 kg)
- acoustical rating as low as NC-43
- famous Muffin motor reliability
- impedance protected
- for ambients to 70°C
- UL yellow card recognized and CSA certified
- MU2A1, MU2B1-115V, MU3A1-220/230V

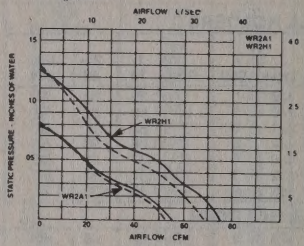
WHISPER® VENTURI FAN



WHISPER

The quiet one—for efficient cooling where low acoustical disturbance is a must.

- 57 to 75 cfm (26.9 to 35.4 L/Sec) free air delivery
- 4.71" sq. x 1.50" depth (119.6 mm x 38.1 mm)
- weight: 17.2 oz. (0.49 kg)
- acoustical rating as low as NC-27
- famous Muffin motor reliability
- impedance protected
- for ambients up to 70°C
- UL yellow card recognized and CSA certified
- 115V 50/60 Hz

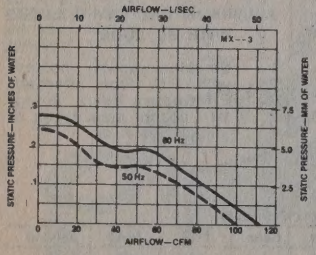
MUFFIN® XL FAN



MUFFIN XL

High performance and low noise level, with Muffin reliability. Sturdy one-piece metal venturi.

- 115 cfm (54.3 L/Sec) free air delivery
- 4.69" sq. x 1.54" depth (119.1 mm x 39.1 mm)
- weight: 21 oz. (0.61 kg.)
- convenient ground lug bosses
- Feathered Edge™ airfoil blades for quietest operation
- available in two flow directions, air over struts or air over blades first. Airflow model "L" available
- impedance protected
- for ambients to 70°C
- UL yellow card recognized and CSA certified
- 115 Volts 50/60 Hz.

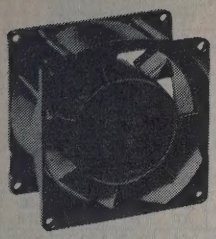
Air Cooling Fans

EG&G ROTRON



SPRITE® FAN

A smaller size fan that delivers relatively high pressures at close-to-maximum air delivery.

- 21 to 35 cfm (9.9 to 16.5 L/Sec) free air delivery
- 3.14" sq. x 1.64" depth (79.2 mm x 41.7 mm)
- weight: 18 oz. (0.51 kg)
- famous Muffin motor reliability
- acoustical rating as low as NC-28
- rugged die-cast zinc housing
- impedance protected
- for ambients to 70°C
- UL yellow card recognized and CSA certified
- lead wire and terminal models
- units 50/60 Hz

SKELETON FANS

Reduce costs. Save .5" space (13.2 mm) on height and width compared to equivalent venturi models; particularly helpful in tight packaging applications. Mount directly to orifice molded into your own panel design.

- 57 to 105 cfm (26.9 to 49.6 L/Sec.) free air delivery
- 1.6" (40.64 mm) depth; propellor dia. 4.19" (106.4 mm)
- mounting holes on 4.125" centers (104.78 mm)
- weight: 12.8 oz. (0.36 kg)
- acoustical rating dependent on application; Maximum NC-43
- famous Muffin motor reliability
- impedance protected.
- for ambience to 70°C
- UL yellow card recognized and CSA certified
- 115V 50/60 Hz

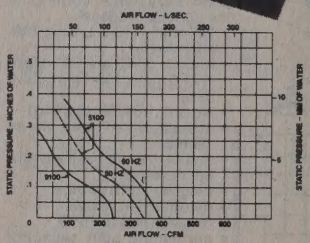
MODULAIR® CABINET BLOWERS

Special air moving packages incorporate proven Rotron fans and blowers to maximize airflow and simplify installation.

- fit standard 19" (483 mm) relay racks and cabinets
- incorporate washable filters, and grilles for attractive appearance.



MODEL	HEIGHT	FLOW	AIRMOVERS

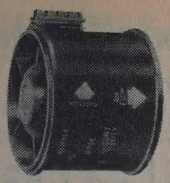
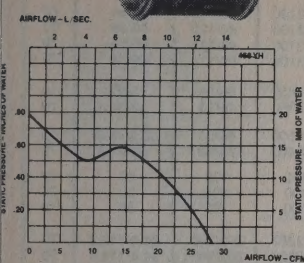
EG&G ROTRON





AXIMAX® 1, 2, 2H & 3
Family of miniature, high performance air movers for airborne and other critical space/weight/performance applications.
- free of air delivery from 11 cfm to 157 cfm (5.2 to 74.1 L/Sec)
- optional Altivar® motors automatically increase speed with altitude
- life expectancies from 10,000 hours at 72° C, at 22,000 RPM
- withstands ambients up to 257° F (125° C)
- sizes: 1½" x 1½" (38.1 mm x 38.1 mm), 2" x 1½" (50.8 mm x 38.1 mm), and 3" x 2 5/16" (76.2 mm x 58.7 mm)
- weight: 4 oz. (113 grams), 4½ oz, (128 grams) and 14 oz. (.4 kg) respectively
- meet all applicable military specs (MS connectors available)

Models for 115 VAC, 1 phase, 400 Hz; 200 VAC, 3 phase, 400 Hz; and 115 VAC, 1 phase, 60 Hz

Stock No.	Model	Part No.	1-9	10-24	25-49	50-99

SPARTAN FAN
The MIL SPEC version of the famous Muffin.
- 113 cfm (53.3 L/Sec) free air delivery. 132 cfm (62.30 L/Sec) for 400 Hz model.
- unusually high pressure characteristics (up to 6.85" [174 mm] H_2O)
- dimensionally interchangeable with the Muffin fan (4.71" sq. x 1.50" [119.6 mm x 38.1 mm]
- double shielded stainless steel ball bearings
- lubricated for life
- highly efficient multi-slot motor
- withstands ambients from -60° F (-54° C) to +212° F (+100° C)
- venturi, spiders, and hub are single aluminum casting for shock and vibration resistance
- meet all applicable military specs (MS connectors available)

AIRFLOW INTERLOCK SWITCH
Features:
- 8 air velocity ratings
- Interchangeable actuating vanes
- Weight 4.5 oz. (0.13 Kg)
- SPDT 5 AMP 250 VAC
- Mounts on round and flat ducts with single screw
- Life expectancy—500,000 operations

Actuated by air velocity rather than air pressure. Designed for easy mounting on the outside of an air duct with a lightweight stainless steel vane protruding through the duct into the airstream. A snap action switch is actuated when the velocity pressure against the vane moves it in the direction of the air flow. As the velocity of the airstream decreases for any reason the vane moves back towards its original position and the switch dactuates.
The switch can be used as an interlock for on-off purposes, or as a marginal safety device where the electrical contacts are operated at a predetermined minimum flow air.
Operates reliably in ambient temperatures of -35° C to +85° C.

ELECTRICAL RATING: The contact arrangement is single pole double throw and no other contacts are available.
The underwriter's rating for the switch is 1 amp at 28 volts DC.

DETERMINATOR KIT: To determine the required vane type numbers, use the Rotron "Determinator Kit."

APPLICATION NOTES: To select the proper rating of a velocity operating switch, determine the velocity of the air in the duct at the point of insertion of the switch. This can be done by experiment or calculation. The cubic feet per minute (CFM)—liters per second 1/Sec) figure is a volume figure and should not be confused with the ft./min. figure which is a velocity figure. The relation is:

$$\frac{\text{CFM (L/S)}}{\text{area}} = \text{ft./min. (m/second)}$$

whereby the area is expressed in square feet (m^2). Therefore, if the CFM (L/S) delivery of the fan or blower can be estimated accurately, the air velocity in the duct at the point of insertion can be calculated.

PROPIMAX® 2,3,& 3B
Large volume and high pressure air movers for airborne equipment.
- free air delivery from 22 to 225 cfm (10.3 to 106.2 L/Sec)
- offer pressures as high as 7" (177.8 mm) H_2O at cut-off
- optional Altivar® motors automatically increase speed with altitude
- life expectancies of 10,000 hours at 72° C, at 22,000 RPM
- withstand ambients up to 257° F (125° C)
- size/weight: 3¼" x 1½" (82.5 mm x 38.1 mm) and 6.5 oz. (184.3 g) for Propimax 2, 3¾" x 2" (95.3 mm x 50.8 mm) and 15.2 oz. (431 g) for Propimax 3 & 3B
- meet all applicable military specs (MS connectors available)

Models for 115 VAC, 1 phase, 400 Hz; 200 VAC, 3 phase, 400 Hz; 115 VAC, 1 phase, 60 Hz

SAUCER®
High volume and high pressure both, from a minimum of fan space.
- 275 cfm (129.8 L/Sec) free air delivery
- generates pressures up to .5" (12.7 mm) H_2O
- driving motor entirely within hub for minimum depth 2.50" (63.5 mm), dia. 7" (177.8 mm)
- pre-lubricated stainless steel ball bearings
- for ambients from -60° F (-54° C) to +257° F (+125° C)
- clamping rings at venturi ends for easy mounting
- meet all applicable military specs (MS connectors available

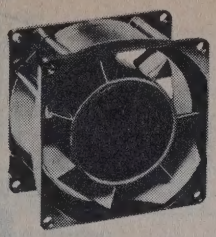
SPRITE DC FAN



- 3.14" sq. x 1.64" depth (79.2 mm x 41.7 mm)
- rugged die-cast zinc housing
- solid state brushless motor
- made by Rotron in the U.S.A.
- low power consumption

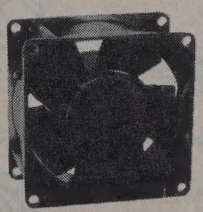
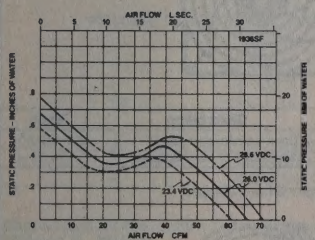
MIL-80 ECDC FAN



- Up to 71 cfm (33.5 L/Sec) free air delivery
- 12 and 24 VDC (nominal)
- 3.14" sq. x 1.64" deep (79.2 mm x 41.7 mm)
- rugged die-cast zinc housing
- built-in performance sensor



MIL80

High pressures from a 3" fan, with military/aerospace dependability and built-in performance sensors.

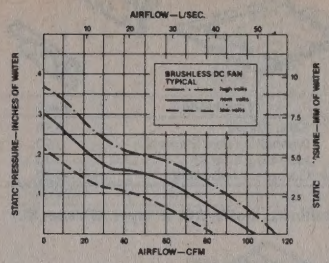
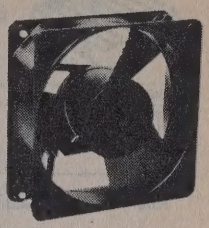
MUFFIN® DC FAN (BRUSHLESS)





MUFFIN DC (Brushless)

- 55 to 120 cfm (26 to 56.6 L/Sec)
- 12.24 and 48 VDC (nominal)
- solid state brushless motor
- made by Rotron in the U.S.A.
- low power consumption
- size: 4 1/16" square x 1.5" deep (119.13 mm x 39.12 mm)
- weight: 21.5 oz. (0.61 kg)
- polarity protected
- terminal or leadwire versions
- all-metal housing
- maximum operating temperature 70° C

Electronically commutated airmovers that contain all their necessary solid state circuitry within an extremely compact motor housing.

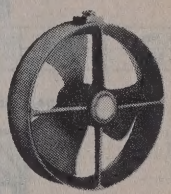
SAUCER ECDC FAN



- Up to 277 cfm (130.7 L/Sec) free air delivery
- 12, 24 and 48 VDC (nominal)
- 7" (177.8 mm) diameter by 2.5" (63.5 mm) deep
- pre-lubricated stainless steel ball bearings
- clamping rings at venturi ends for easy mounting
- built-in performance sensor

High volume, high pressure, low energy use...with built-in performance sensor.

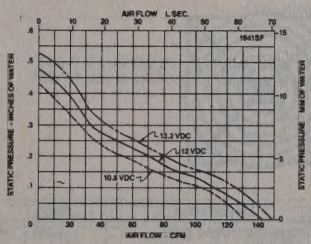
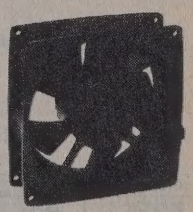
SPARTAN ECDC FAN



SPARTAN



MIL-SPEC version of the Muffin DC, with a built-in performance sensor.

- Up to 148 cfm (69.8 L/Sec) free air delivery
- 12 and 24 VDC (nominal)
- 4.71" sq. x 1.50" deep (119.6 mm x 38.1 mm)
- double-shielded stainless steel ball bearings, lubricated for life
- cast aluminum housing for shock and vibration resistance
- built-in performance sensor

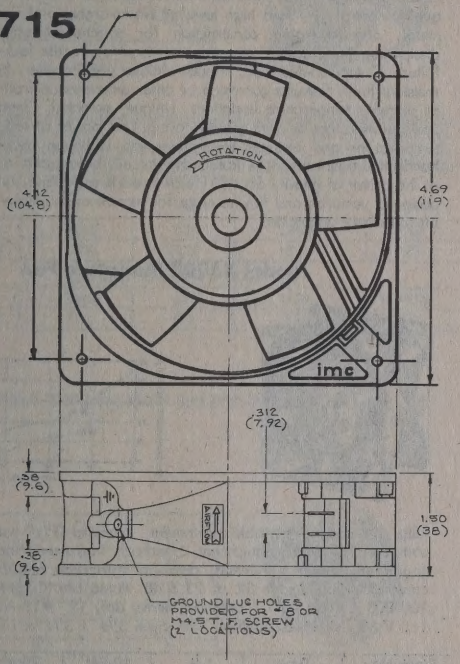
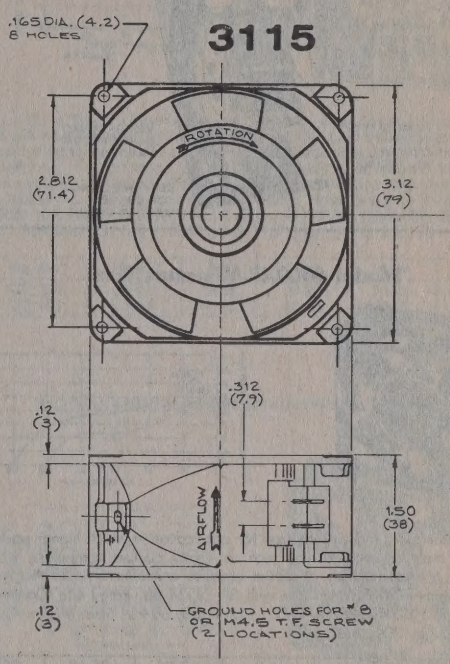
3115 PeeWee Boxer & 4715 Boxer

THE FANS FOR THE 80'S & 90'S

IMC introduces two completely new lines with energy saving motors, acoustically superior impellers and rugged one piece zinc die-cast venturis. Combined with new low friction sleeve or ball bearing systems these airmovers provide higher performance under load and better acoustical characteristics than previous models.





Both 3115/PeeWee Boxer and 4715/Boxer lines provide optimum design flexibility such as:

- ☐ 115 volt, 230 volt or 115/230 dual voltage
- ☐ .120 reversable solder terminals or 12"-22 gauge lead wire
- ☐ Bi-directional air flow selection
- ☐ Broad selection of performance levels, including 2 speed models

All models designed to meet international agency requirements.

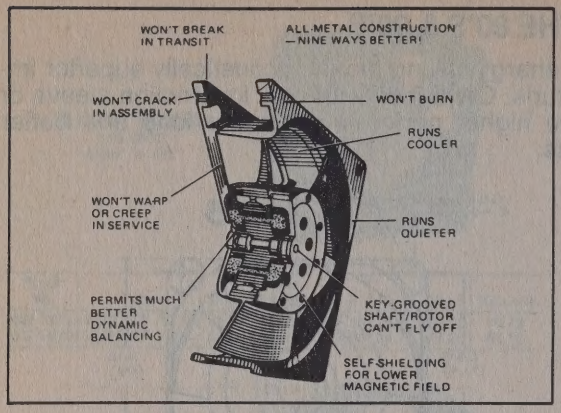
PAMOTOR Air Cooling Devices



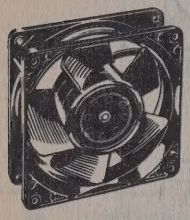
WON'T BREAK IN TRANSIT
ALL-METAL CONSTRUCTION —NINE WAYS BETTER!
WON'T CRACK IN ASSEMBLY
WON'T BURN
RUNS COOLER
WON'T WARP OR CREEP IN SERVICE
RUNS QUIETER
PERMITS MUCH BETTER DYNAMIC BALANCING
KEY-GROOVED SHAFT/ROTOR CAN'T FLY OFF
SELF-SHIELDING FOR LOWER MAGNETIC FIELD

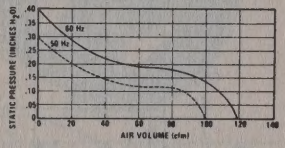
DESIGNED TO OUTLAST THE EQUIPMENT THEY COOL

- **All metal Construction**
- **Low Noise Level**
- **Maintenance Free Operating Life**
- **Low Operating Temperature**

Patented design yields maximum performance at minimum cost. Rigorous quality control assures a high level of workmanship and performance. All metal, non-flammable construction for greater durability and heat dissipation. No cracking, creeping or warping to cause lock-up or bearing failure. Computer-designed, impulse welded steel impeller. Special moisture resistant finish prevents corrosion or other deterioration from high humidity or extreme temperature variations. Unique, patented, "inside/out" motor configuration that delivers greater torque and power at reduced operating temperature and reduces electromagnetic radiation. Maintenance-free, hand-fitted bearing system. Rotors dynamically balanced to a maximum shift of the center of gravity of .0001 inch in each end plane. Aerodynamically designed venturies and fan housings for maximum air intake with minimum air turbulence and noise.

Model 4600XP Miniature Fan

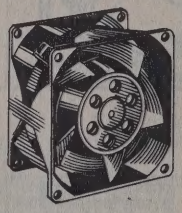


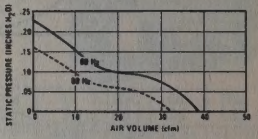


Supplies the extra margin required for application in which higher package densities may be encountered, such as tightly packed computers, power supplies, process controls, airborne consoles and electronic RF/Microwave transmissions. 120 CFM airflow with SIL of 34 dB. Rated Life (Continuous Operation) 100,000 hrs. @ 25°C, 115 V, 50, 60 Hz. Size: 4½" x 4½" x 1½". Weight: 20 ounces.

Stock No.	Type	1-9	10-24	25-49	50-99
57F2600	4600XP	29.80	26.80	25.55	23.85

Model 8500P Miniature Fan

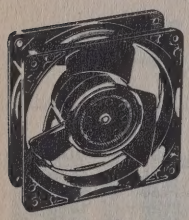


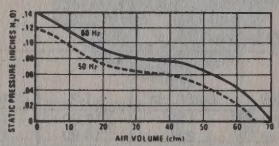


Ideal for cooling portable equipment, standard 3½" rack applications, computer terminal equipment, medical instrumentation, audio-visual equipment, bench instruments, desk-top instruments and broadcast studio consoles. 40 CFM with SIL of 23.3 dB. Rated Life (Continuous Operation) 100,000 hrs. @ 25°C. Terminals: heavy duty 12" #18 AWG wire leads. 115 V 50, 60 Hz. 3250 RPM. 15W Size: 3½" x 3½" x 1½". 18 ounces.

Stock No.	Type	1-9	10-24	25-49	50-99
57F1041	8500P	31.20	28.05	26.75	24.95

Model 4800X Shaded-Pole Miniature





Miniature, shade-pole, axial fan. Moderate air flow, low noise fan. Less than 18 dB. SIL. 70 cfm. Ideal for Hi/Fi stereo equipment, television equipment, medical or office equipment. Fan functions as a natural heat sink, assuring cooler operation. Universal mounting, 4" all metal construction. Moisture resistant finish. Terminals are designed for use with #18 AWG wire or with a plug and cord assembly. 115V, 50, 60 Hz, 1900 RPM. 10 W. Size: $4^{11}/_{16}$" x $4^{11}/_{16}$" x 1½". Wt. 19 oz.

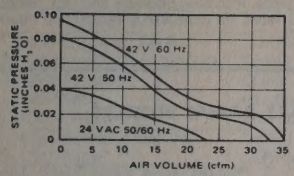
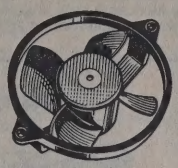
MAKE NEWARK YOUR DEPENDABLE SOURCE FOR ALL ELECTRONIC PARTS AND EQUIPMENT

UL/CSA Air Cooling Fans

PAMOTOR

MODEL 900 SUB-MINIATURE INDUCTION TYPE





Extremely small, ultra-quiet general purpose fan. Air enters fan radially as well as axially. Induction type motor requires a 5.6 mfd. capacitor. Extremely low electro-magnetic radiation. 34 CFM. 16.8 dB SIL. Terminals: three standard 6" leads, #24 AWG, UL approved insulated wire, 1700 RPM. 2.5 W. 24-42 VAC, 50-60 Hz. Size: 3.129" dia. x 1.46". Wt.: 4.0 oz.

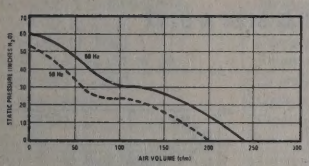
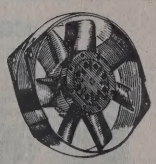
MODELS 7600S and 7650S SHADED-POLE MINIATURE





Lightweight fans for use where high air volume is essential, or to replace several similar fans. Delivers 250 CFM at a noise level of less than 48 dB SIL. Unit measure 6" in diameter by 2 3/16" in depth. Provides more than 2½ times the air flow of the conventional miniature fan.

These units are rated at 100,000 hours of continuous operation at room temperature. Model **7600S** rated at 115-125 VAC, 50/60 Hz. 40 Watts. Model **7650S** rated at 220 VAC, 50/60 Hz, 40 Watts. Operating temperature: −20° C to +55° C. Weight: 2 lbs. 6 oz.

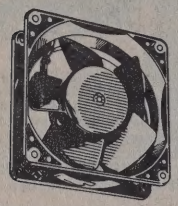
PAMOTOR Solid State DC Fans

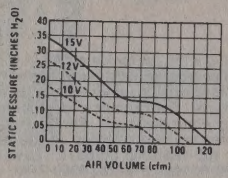
Conforms to UL, CSA, IEC, and VDE standards. Feature single phase brushless motor with all electronics mounted on PC card within motor frame.

These fans do not require an external voltage inverter. This concept has eliminated many of inherent reliability and RF noise problems generally associated with using AC motors in DC environment.

Brushless motor design, reverse polarity protection, minimum magnetic and RF radiation. Power drain at maximum back pressure is approximately 25% of that required in conventional AC units. Precision bearings and high temperature lubricants help to achieve a rated life expectancy of 100,000 hours of continuous operation at 25°C.

MODEL 4112X AXIAL FAN





All metal fan is rated at 12 VDC, develops air flow of 122 CFM @ 14 VDC and 0 static pressure. Power consumption at 12 VDC and 0 static pressure is 4.0 Watts; @ maximum static pressure, 5.3 Watts. Typical noise level at 14 VDC is 35.6 dB SIL. Fan is lubricated for life and finished in electrophoretic black varnish. Operating temperature: −20°C to +80°C. Size: 4 11/16" square x 1½" deep. Wt. 21 ounces.

BUD INDEX

Newark stocks a complete line of Bud products available for immediate delivery. Consult us about your special enclosure problems. We are an extension of the Bud factory's engineering department and can recommend the proper design and size for your equipment. Our advice will save you time and money. Our long years of experience assure you that we can readily understand your problems and solve them economically.

SERIES 20 CABINET RACKS

- 2 Pairs of Adjustable Mounting Rails
- Two Sets of Louvers
- 6" K.O. on Base for Cable
- Royal Blue Texture Finish
- Accepts Bud Casters & Levelers
- No Special Tools Required for Assembly

Includes etched clear anodized aluminum extrusions and decorative nameplate frame. Features include two pairs of adjustable mounting rails attached to horizontal rail supports. Two sets of louvers on the top provide ample ventilation. 6" circular knockout in base provided for cable access. Rear door fitted with cam lock and flush handle. Royal Blue texture enamel finish. Caster mounting brackets drilled to accommodate casters or levelers. Available in four different sizes with 30 inch depth and accepts a wide range of accessories. Which includes, drawers with or without an adjustable slide mechanism, desk top drawers with hinged drawer tops, sliding desk tops, heavy-duty shelves, and power outlet strips with thermal type circuit breaker and grounding type 125 volt receptacle, all rated at 15 amps and U.L. approved.

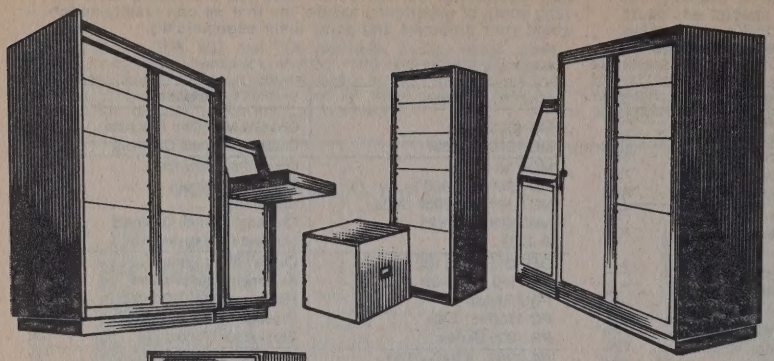
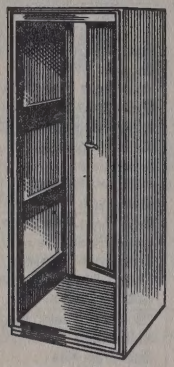
BUD Designers' Group



Designers' Group sets the pace for contemporary-styled enclosures. These are the enclosures with that custom-made look, but far from a custom-made price. Yet, there's more to the Designers' Group than appearance. Here's the quality line designed and built by Bud, the industry's leading manufacturer of cabinets, racks, enclosures and accessories. That means proven craftsmanship; enclosures produced to meet Bud's high-quality standards and yours. And regardless of the style or size enclosure you need, you're assured of immediate delivery. Assured of value.



CLASSIC II CABINET RACKS

Front framed with double-rimmed brushed aluminum extrusion. All steel. 14 ga. frame; 16 ga. top, bottom; 18 ga. sides. Takes 19" panels. Front rails tapped 10-32 with EIA universal spacing. Pierced rear rails. Rails adjustable along support braces. Drilled for Bud RC-7756 casters. Gray and royal blue textured enamel. Select white panels. Comes assembled, including rear door.

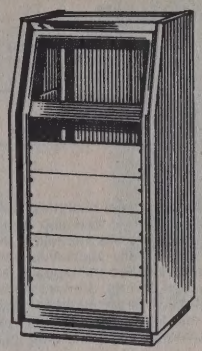
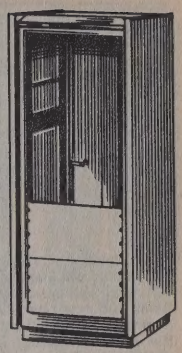
Series 2000 Cabinet Racks

BUD

Frame is all-welded. 14 ga. steel members; 18 ga. steel door, sides, and top. "U" braces welded to sides of frame augment strength, rigidity; act as mounting for vertical rails which can be adjusted horizontally. Front and rear panel mounting rails tapped 10-32. Base drilled for Bud RC-7758 casters. Standard finishes: royal blue (RB) or gray textured (GT) enamel with clear anodized aluminum extrusion.





INCLINED PANEL AND EXTRA-DEEP CABINET RACKS

Inclined panel positioned 20° off vertical. Panel mounting rails in the front vertical section, inclined panel section and rear are adjustable front to rear. Ht. 51¼"; wid. 24³⁄₁₆"; outside dep. 23⅞"; inside dep. 20½"; wgt. 173 lbs.

Extra-deep cabinet rack has 32⅝" outside depth. 14 ga. steel frame; doors, sides, tops 18 ga. Front and rear panel mounting rails tapped 10-32. Drilled for BUD RC-7758 casters. Wgt. 223 lbs.

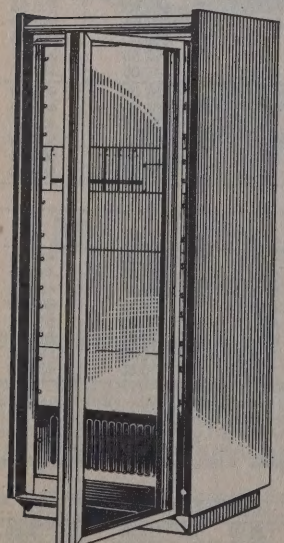
PLEXIGLASS DOORS FOR SERIES 20, SERIES 60, SERIES 2000, AND CONCORDE RACKS



⅛" smoke gray plexiglass offers full visibility of all rack and panel instruments. Edges of plexiglass embedded in polyurethane to prevent rattling. Door is magnetically held in secure, closed position. When closed, inner surface of door is at least ¾" from front of panels, allowing clearance for protruding knobs, switches, etc. Door is easily positioned on cabinet with top and bottom supports by spring-loaded hinge pins, and is reversible to achieve right or left opening. Finished in anodized aluminum.

TRANS-AIRE-BLOWERS

Designed for cooling electronic equipment. All are 115 volts, 50/60Hz. single phase.

Model B-27A. Two speed packaged blower for top CFM. Air delivery: 550 CFM high speed, 300 CFM low speed. Motor: 1350/1150 RPM, 550/350 watt shaded pole motor.

Model B-23A. Low silhouette two speed, requiring just 3 1/2" of panel space. Produces 125 CFM on high, 100 CFM on low speed. Motor: 1450/1250 RPM, 125/100 shaded pole motor.

Model B25-A. Two speed 375/200 CFM blower, delivers a turbulent air distribution pattern to eliminate hot spots. Motor: 1420/1075 RPM, 375/200 shaded pole motor.

Model B-52. Produces 150 CFM, equipped with two extra wide, small diam. centrifugal blower wheels. Motor: 3000 RPM, fan cooled, 80 watts.

Model B-54. Dual wheels deliver 300 CFM of clean, cool filtered air. Motor 1550 RPM, rubber mounted. 60-watt shaded pole motor.

Model B-50. Requires only 3 1/2" of panel ht., produces 150 CFM, 12 1/2" wide air stream. Motor: 3150 RPM, 80 watts, shaded pole. Gray finish on all.

TEM-STAT TEMPERATURE CONTROL

Type TS-15. Prevent shut-downs from overheating of enclosed electronic or electrical equipment. Reacts to gradual or sudden changes. Accuracy ±8° F. Contacts remain closed until there is a 10° ±5° F drop. Also controls convection and radiant heating. Range 80°-170° F.

U.L. ELECTRICAL RANGE. 100,000 cycles: full load 8 amps at 115 VAC, 4 amps at 230 VAC. Motor rating: locked rotor 48 amps at 115 VAC, 24 amps at 230 VAC. Pilot Duty: 125V amps at 115/230 VAC or 250 mV or more. 6,000 cycles: full load 13.8 amps at 120 VAC, 6.9 amps at 240 VAC. Motor rating: locked rotor 82.8 amps at 120 VAC, 41.4 amps at 240 VAC.

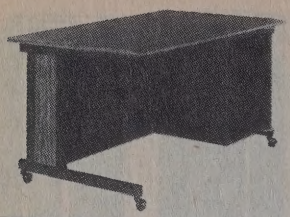
MODEL TS-15

BUD COMPUSTATION



Contemporary styled CompuStation offers versatility in developing individualized work-stations for your specific operations. Now you have the freedom to add or remove modules based on your changing requirements.

The CompuStation Series from Bud has been designed for use with computer systems, data terminals, word processing and communications equipment as well as a variety of other electronic systems.

Design features:
- Double strut, welded leg construction for strength and rigidity.
- Scratch resistant wood grain top and matching side panels provide attractive appearance and durability.
- Beveled front edge is standard on all tops for operator comfort.
- Two and three bay tops have steel channels for additional support.
- Quick and easy to assemble. No special tools required.

Finish: All units and accessories are black textured. Top and side panels are wood grain plastic laminate.

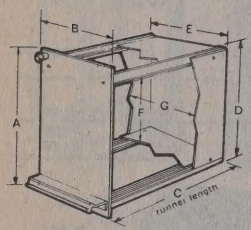
SUB-UNIT KITS

Slide into racks on mounting guides and lock in place. 30 different sizes to choose from. Order guides separately, see previous page, 4 needed for each sub-unit.



Note: C Depth—7.25″
D Depth—9.897″

OPTIONAL EXTRAS

Type UCP. SUB-UNIT COVER PANELS. These slide into grooves on top and bottom of sub-unit runners before rear panel is fitted, no hardware necessary.

Type USP. SCREEN PLATES. Circuit boards may be replaced by screen plates on one or both sides of unit. Supplied with screws and washers, nuts are supplied as part of the sub-unit kits. Choose by height and depth.

Type UDP. DECK PLATES. Can be used on top and bottom. Supplied with screws and washers, nuts are supplied as part of sub-unit kit.

Type SMP. SOCKET MOUNTING PANELS. These panels are used to provide matching plug or socket on sub-rack for the sub-unit to mate with. Hardware supplied. Mounted on guides, if the sub-unit is not the same width, order extra guides. Choose by height.

Type JL-22800. JACKING LOCKS. Jacking locks can be used instead of supplied floating locks.

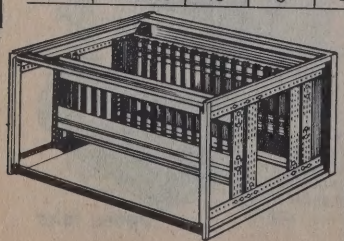
HORIZON CABINETS



Ideal for microprocessor and microcomputer applications. Developed to provide a range of options for effective housing of printed circuit boards, mother boards, power supplies, plug-in modules, connectors, and other chassis-mounted components. Contemporary styling with no exposed screws on front, top, bottom and sides. Sturdy anodized aluminum extrusion frame. Top, bottom, sides and rear panel are blue vinyl-clad aluminum, and slide out for easy access to cabinet interior. Four fully adjustable interior mounting rails allow complete flexibility when mounting optional chassis, or other accessories.

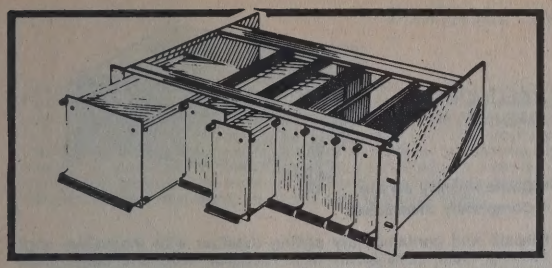
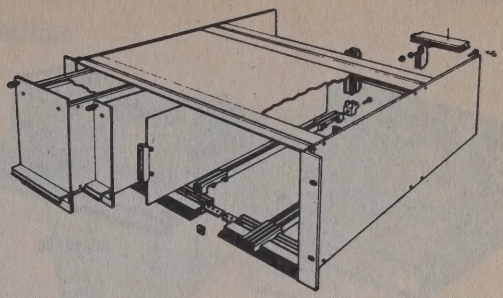
Modular Packaging Systems





Simple in design, highly functional, easy to use and handsome in appearance. This is the proven System that assures quick and accurate alignment of circuit boards and connectors. Since guides do not carry the weight of boards or sub-unit chassis, there's no guide distortion. Circuit boards go directly into the connectors securely mounted at the end of the guides. Shipped in easy-to-assemble kits.
Size by code:

OPTIONAL EXTRAS FOR SUB-RACKS

GUIDES

Type G—Used on top and bottom of sub-rack to guide sub-units and circuit cards into position. Nuts N-9234 are used on front for locks, N-9226 on back for connector or panel mounting. Order nuts separately.

TOP OR BOTTOM COVERS

Type TBC—No mounting screws are required—simply slip into grooves and depress lugs. Order by rack depth.

OVERALL FRONT PANELS

Type OFP—Order by rack height. 4 FL-22700 floating locks required per panel, order separately.

CONNECTOR MOUNTING RAILS

Type CMR-21201. To be used only when connectors are not mounted direct to guides, 2 needed. Supplied with screws to mount to side plates. Order hardware separately: screw—S-9089, nut—N-9233, washer—W-9556 for mounting connectors to connector mounting rail, 2 of each required per connector.

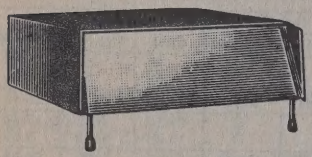
TILT-A-VIEW CABINET



- 18 Gauge Steel
- Adjustable Tilt

Designed to present selective angles of vision to the viewer who may be observing the action of meters or the position of dials and recorders. Detachable legs change the position of the cabinet. Two piece construction permits immediate access to interior for installation and service. Cabinet fasteners are also positioned on the lower portion of the cabinet so that no fasteners appear on the front or rear panels. Color is gray textured with white body. All models 18 gauge steel.

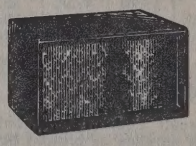
SHADOW CABINET



Extremely versatile housing since front, rear and bottom may be removed for installation or servicing. One inch recessed front panel prevents accidental movement of controls, knobs, and switches attached to it. Body made of 18 gauge steel and panels of 16 gauge steel. Four rubber feet attached to base eliminate scratching. Finished in luster gray.

BUD

PORTABLE ENCLOSURES

Use as desk top instrument cases, in systems, in racks, as portable enclosures. Function plus design gives your products the competitive edge...the value edge. Lightweight, but sturdy. Top, sides, rear panel and base are .050 aluminum; front panel is .090. For added strength, gussets have been engineered into the sides of the unit. Strong, flexible handles, recessed and secured firmly into the top, assure safe handling. Front and rear panels and fold-away bail are standard equipment and are included. Two standard color combinations: black textured (BT) and white frame, royal blue (RB) and white frame.

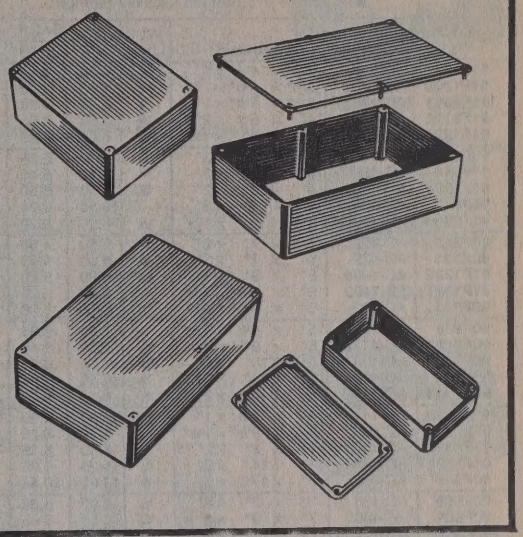
PRECISION DIE CAST UTILITY BOXES



For applications requiring sturdier structure than sheet metal utility cabinet. LM-380 aluminum, lightweight and easy to machine. Close-fitting flanged lids fasten to bosses in body with screws. Interiors are dust and moisture-proof; excellent screening properties. Suitable for instrument and meter cases, filter networks, junction boxes, switches, audio and radio frequency distributors, etc.

WELDED STEEL FRAMES

- Chip-proof,scratch resistant baked enamel finish
- Standard 18" width
- Keyhole slots for wall mounting
- Attractive charcoal hammertone finish
- Nesting "feet" for stability in stacking

MOLDED STYRENE DRAWERS

- Long-lasting—rust and corrosion proof
- Safe—no sharp edges
- Lightweight—60% lighter than steel
- Non-Spreading—won't bulge or sag
- Spill-proof—safety tab keeps drawer open

TWO TYPES OF STYRENE DRAWERS

Gray Heavy-Duty
Virtually unbreakable hi-impact styrene—ideal for most requirements. Guaranteed for life, won't crack, dent or break.

Transparent
Where frequent visual inventories are required, transparent drawers permit a quick check.

Dividable
All drawers can be partitioned into several sub-compartments. Patented dovetail dividers lock in place—won't creep or slip. Label slots provide easy indexing.

Storage Bins and PC Equipment

LOUVERED PANELS FOR AKROBINS MODEL 30-636

This heavy duty panel is 16 gauge cold rolled steel with horizontal reinforcing ribs. Slotted holes ¾" L × ⅜"W at 6" centers simplify installation. Gray baked enamel. Panel size: 19"H × 35¾"W.

The louvered panel provides a universal hanging surface for AkroBins and allows unlimited relocation of all bin sizes. No adjustment or relocation of rails or shelves is necessary—just rearrange the bin as desired.

These versatile panels can be mounted on walls, attached to the back of existing shelving, mounted on benches, carts, inside cabinets or fastened to readily available slotted angle components to form free standing storage bays.

SERIES 1456 MINIATURE DESK TOP CONSOLES

HAMMOND MANUFACTURING™

Miniature consoles with 15° or 30° sloping front panels, offer the same display visibility as most calculators. Cases are available in ½" genuine oil-finished walnut, or in .081" painted aluminum. Panels are available in .064" painted aluminum. Ventilation is provided by slots in the bottom and rear. Cases and panels are sold separately. Rubber feet and hardware are included with the case. Matching cases and panels must have the same type no. For example, a CE2C case will only fit a CE2C panel. Suffix of type no. indicates color: BU, blue; WW, walnut; BK, black; WH, white. Dimension "D" on illustration is approx. 1.2 in. All dimensions are approximate.

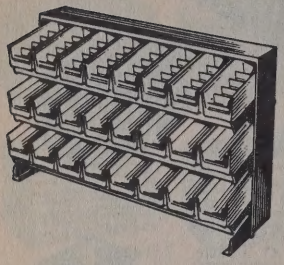
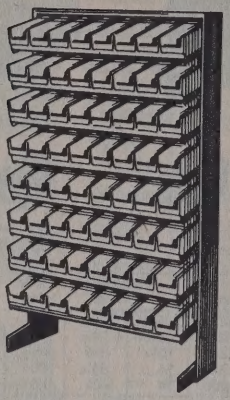
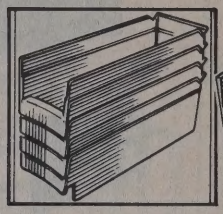
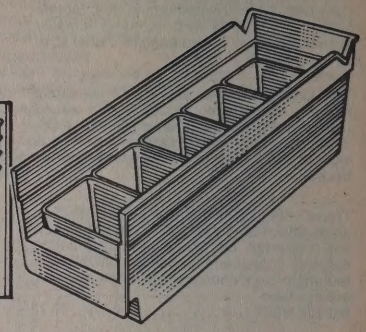
HEAVY-DUTY SEAMLESS PLASTIC PARTS BINS

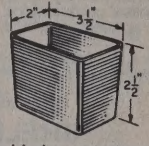




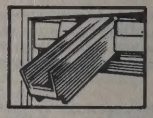




Plastic Bins Nest—Space saving storage



Plastic Mini-Bins fit into larger bins for "sub-storage"



Hanging Notch—Hang bins for easy access

Bottom Runners—Aid bin removal, Reduce friction

BENCH MODEL

Keep work materials close at hand. 24 plastic parts bins are conveniently displayed on a table or work bench. Unit is free standing or can be bolted to bench top. Rack only. Accommodates 24—4″x4″x12″ bins.

FLOOR MODEL

64-bin unit uses a small amount of floor space. Unit is free standing or may be bolted to floor or wall. Rack only. Accommodates 64 — 4″x4″x12″ bins.

Injection-molded plastic bins are perfect for storing parts. High-density polyethylene resists the ravages of grease, chemicals, and wear like no other bins can! Pull "handle" makes removing from shelf easy . . . without disturbing adjacent bins. Optional Mini-Bins fit neatly inside larger bins to accommodate various size parts. Extra-high sides help prevent spills. In OSHA safety yellow, with convenient label area that accepts standard pressure-sensitive file folder labels (not incl.).

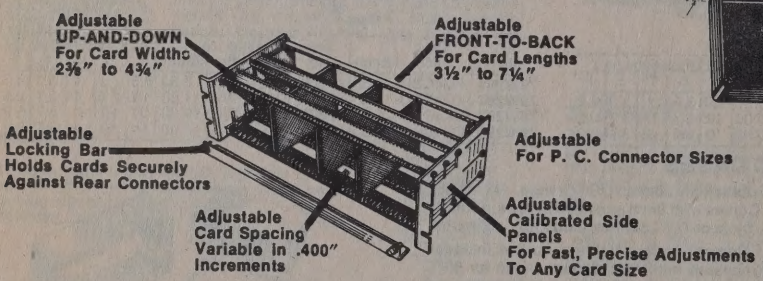
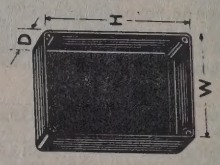
H. H. SMITH PRINTED CIRCUIT CARD EQUIPMENT

STACKING & BLANK END PLATES



Adjustable UP-AND-DOWN For Card Widths 2⅜″ to 4¾″
Adjustable FRONT-TO-BACK For Card Lengths 3½″ to 7¼″
Adjustable Locking Bar Holds Cards Securely Against Rear Connectors
Adjustable For P. C. Connector Sizes
Adjustable Card Spacing Variable in .400″ Increments
Adjustable Calibrated Side Panels For Fast, Precise Adjustments To Any Card Size



- Card Capacity up to 39 Cards, 1/16″ Thick
- Card Spacing .400″ Minimum Centers, Adjustable in .400″ Increments
- Accommodates Card Edge Connectors With Mounting Centers From 0.936″ Minimum to 4.437″ Maximum
- Card Sizes With Locking Bar, 2⅜″ to 4¾″ Maximum Width, 4⅜″ to 6½″ Maximum Length. Without Locking Bar, 3½″ to 7½″ Maximum Length.

P.C. Card Rack. Made of heavy gauge anodized aluminum, guide and alignment members are extrusions. Capacity 39 cards, 1.16″ thick. Card spacing .400″ minimum centers, adjustable in .400″ increments. Accommodates card edge connectors with mounting centers from 0.936″ minimum to 4.437″ maximum. All hardware, plastic card guides (for 1/16″ thick cards), step and assembly instructions included.

Instrument Cases and Covers. Ideal for small instruments and test equipment. The right size and the right mounting for your requirements. Molded of high quality, glass finish, thermosetting plastic. Threaded brass insert for cover mounting. BLACK ONLY. *Self-tapping.

MODEL 465-2A AUTORANGING DMM

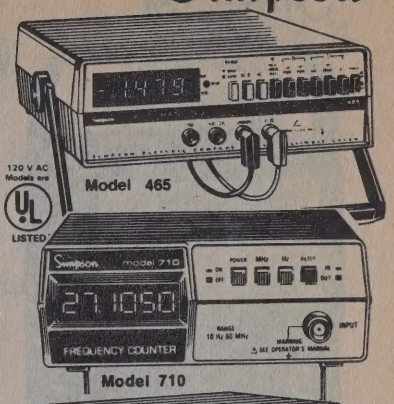
- **3½ digit, 7 seg., 0.43" LED**
- **MOS/LSI integrated circuitry.**
- **Resolves 100μV, 1 ohm, 100nA.**

SPECIFICATIONS. DIGITAL MULTIMETER FOR AC LINE ONLY. CONVERSION RATE: 4 reading per sec. ZERO STABILITY: ±0.02%/°C. POWER REQUIREMENTS: 120VAC operating or battery charging. ±10%, 50-400Hz, 6VA nominal. OPERATING TEMPERATURE: 0°C to 55°C; storage, −40°C to +60°C. DIMENSIONS: 2.7" × 8.4" × 9.0". ACCURACY: AC VOLTAGE. (Average sensing RMS calibrated sine wave: 40Hz to 20KHz; % of reading +2 digits): ±0.5%, .2V, 2V, 20V ranges, to 10KHz, ±1% to 20KHz; on 200V, ±.5% to 1KHz, ±1% to 20KHz; on 600V, ±2%, RESISTANCE. ±4% +2 digits, ±1% on 20MΩ. CURRENT. ±0.25% +1 digit, ±1% on 10A. Wt. 3 lbs.

62F1130 NET 373.00

Model 465-2D. Same as Model 465-2A but for AC line rechargeable battery operation. Battery operation time; 10 hours. Recharge time; 16 hours nominal. Uses 4 Nickel Cad D Size rechargeable batteries. Not Included. Meets UL 1244 and ANSI C39.5. Wt. 3 lbs.

62F1129 NET 418.00



MODEL 710 COMPACT FREQUENCY COUNTER

For CB/communications service, production line testing, frequency monitoring, R&D lab use. Features: Covers 10Hz to 60Hz. 2 ranges -Hz and MHz. 6 digits 0.35" LED readout with overrange indicator. Accurate to ±1 count (±time base accurracy) standard 10ppm time base. Resolves 1Hz. Switchable low-pass filter eliminates input noise. Highly reliable LSI circuitry. Compact 2" × 5.6" × 4.6". Power requirements: 120VAC ± 10%, 50-400Hz, approx. 5VA.

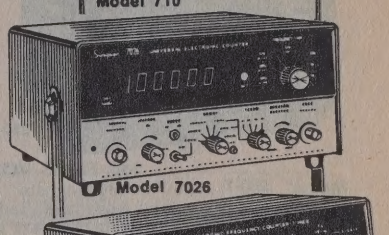
MODEL 7026 UNIVERSAL ELECTRONIC COUNTER

- **0.55" Planar Numerical Display**
- **5Hz to 50MHz**
- **Overrange Indication**
- **Overload Protection**

Measures frequencies, periods, ratios of two frequencies, time intervals and events. Standard features include: display storage selection, automatic decimal point location, variable display time, manual reset, gate time indication, high input Z and input overload protection. Can be interfaced with a high frequency prescaler to extend range. Temperature Stability: ±10ppm max. 0 to +45°C. Aging Rate ±5ppm max./yr. Gate Times: 10 μsec, 100 μsec, 1 msec., 10 msec., 100 msec., 1 sec., 10 sec. Accuracy ±1 count, ±time base accuracy. Oper. Temperature: 0°C. to +45°C. With probe, manual.

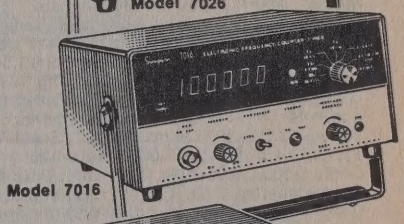
62F1706. NET 463.00
Model 7026B. Has additional BCD Output.
62F1707. NET 518.00
No. 00238. Replacement Probe.
62F2360. NET 17.65



ELECTRONIC FREQUENCY COUNTER–TIMER

Model 7016. Measures frequencies, elapsed time and events and exhibits them on a 0.55" planar numerical display. Frequencies from 5 Hz to 50 MHz, elapsed time from 0.01 sec. to 19999.99 sec. Features display storage selection, automatic decimal point location, variable display time, manual reset, overrange and gate time indications and input overload protection. AC coupled input with 1MΩ impedance shunted by 30 pF. Gate time: 10 msec, 0.1 sec, 1.0 sec, 10 sec. Accuracy ±1 count ±time base accuracy. Oper. Temp. 0 to +45°C. 2.0 MHz Internal time base temp, stable to ±10 ppm from 0 to 45°C; aging rate ±5 ppm/year; ±10% line variation produces deviation of ±1.0 ppm max. Input sensitivity: 50 mV RMS from 5 Hz to 50 MHz (sinewave). Max. input 240V RMS, derated to 50V RMS at 1 MHz and 10V RMS at 50 MHz. Size 4"H x 8.5"W x 8"D. With probe, line cord, manual.

62F1407. NET 447.00
Model 7016B. As above with BCD out.
62F1408. NET 503.00



460-5 PORTABLE DMM

32 ranges, including low-power ohms. Overload protection on all ranges. 0.43" LED readout. Analog meter for nulling, peaking, scanning trends. MOS-LSI IC for reliability, low power drain. High-impact case with adjustable tilt-view handle. Pushbutton selection of range. Over-range indication. Accuracy (% of reading)—DCV: ±(0.1% + 1 digit); ACV: ±(0.5% + 2 digits); DC current: ±(0.25% + 1 digit), except 2000 mA and 10 A ranges ±(1.0% + 1 digit); AC current: ±(0.7% + 2 digits); Resistance: ±(0.25% + 1 digit), except on 2000KΩ and 20MΩ, ±(0.5% + 2 digits). Oper. Temp. 0 to +55°C. Wt.: 3' lbs. With test leads, line cord and operator's manual.

Model 460-A-5. 120/240VAC (50-400Hz) operation.
62F1700. NET 378.00
Model 460-D-5. Ni-cad batt. or 120/240VAC oper. (Less batteries).

260 SERIES VOM

Model 260-7 Volt-Ohm-Milliammeter. Features a varistor protected rugged taut-band movement. Reverse, recessed, insulated panel connectors with matching test leads. Requires only two batteries: one 9-volt NEDA 1604 and one 1.5-volt "D" cell NEDA 13F. **Batteries supplied.** Polarity reversing switch allows faster, more convenient DC measurement. Full-wave bridge rectifier provides accurate AC voltage measurements. **Specifications**—20,000 ohms/volt DC, 5000 ohms/volt AC, Scale length: 4.2", Dimensions 5¼" x 7" x 3". **Ranges**—DC volts: 0-0.25; 0-1; 0-2.5; 0-10; 0-50; 0-250; 0-500; 0-1000. AC volts: 0-2.5; 0-10; 0-50; 0-250; 0-500; 0-1000. DC microamperes: 0-50 (250 mV drop). DC milliamperes: 0-1; 0-10; 0-100; 0-500. DC amperes: 0-10 (250 mV drop). DB scale (1 mW 600 ohm reference): −20 to +10; −8 to +22; −6 to +36; +20 to +50. Resistance: Rx1; Rx100; Rx10K. **With batteries, test leads and manual included.**

260-6XL VOM FOR SOLID STATE TESTING

- Four Color, Color-Keyed Scales
- Low Power Ohms Capabilities
- Shock and Drop Resistant Const
- 33 Ranges

All the features of the Model **260-7,** with additional capabilities to make it more useful in servicing solid state systems. Additional voltage and current ranges permit making measurements with higher resolution. Low power resistance measurements protect against damage of solid state components. Panel and case are molded of high impact material to provide more resistance to shock. Large meter face features color-keyed scales in four colors to facilitate rapid reading of measurements. In addition to the ranges available on the **260-7,** the **260-6XL** has the following ranges: DC Volts: 0-25 and 0-100. AC Volts: 0-25 and 0-100. DC milliamperes: 0-5 and 0-50. DC amperes: 0-5 (250 mV drop). dB scale: −1 to +29 and +11 to +41. Resistance ranges are: Standard Power: Rx1 (6 ohm center scale); Rx100 (600 ohm center scale); Rx1K (6000 ohm c.s.) Rx10K (60K ohm c.s.). Low Power: Rx1 (20 ohm c.s.) Rx10 (200 ohm c.s.) Max. open circuit voltage on low-power is 100 mV and max. measuring power is 0.125 mW. **Complete with batteries, test leads and manual.**

62F1786. NET 134.00

OVERLOAD PROTECTED TAUT BAND VOM

Model **260-7P.** Offers the same ranges and specifications as the **260-7** series of VOM with the added feature of electronic circuit protection which senses overload conditions and trips a protective relay. Entire tester is protected, providing an extra measure of protection for experienced personnel exploring unfamiliar equipment. Meter cannot be reset, even momentarily, until the overload has been removed. Particularly useful for labs, schools, shops or wherever mortality rate of VOM's is apt to be high. **Sold complete with batteries, test leads, and manual.**

HIGH ACCURACY VOM's 270-5

Designed for VOM applications requiring high accuracy. All the features of the **260-7M,** including external access battery, mirror scale, varistor-protected self-shielding movement, and Adjust-A-Vue handle. Special calibration circuits and components, combined with strict manufacturing controls, produce outstanding accuracy. Use all 260 accessories, including plug-in Add-A-Tester adapters. **Complete with operator's manual, test leads and batteries.**

Model 270-5. ±1.25% DC; ±2% AC; ±1.5% of arc on Rx1, ±1° of arc on RX100 and Rx10K.

UNIVERSAL TEMPERATURE PROBE

- **May be used with meters, recorders, controllers and multimeters.**
- **May be used with low impedance devices (5000Ω min) as well as hi-impedance with no loss in accuracy.**
- **°F or °C switch selectable**

Silicon Sensor. Small mass. Absorbs minimal heat from object it is measuring, ideal for measuring transistors. Interchangeable banana jacks test leads & reverse female connectors, may be used with 460, 464, 461, 260-6 and all competitive Multimeters. Output voltage: 1 mV/DEGREE Max. temp; probe tip −150°C, Body & cable 80°C Rated Circuit to ground voltage: 250V rms Max. Response time: 1.5 seconds to within 2°C of final reading for 50°C step change.

373

230-3

OHMMETER

Model 372-2. Provides wide range of resistance measurements in a small package. Ideal for use in schools, on test benches or at inspection facilities. **Ranges:** 0-500, 0-5000, 0-50,000, 0-500,000 ohms; 0-5, 0-50 megohms. **Center Scales:** 5, 50, 500, 5,000, 50,000, 500,000 ohms.
62F318. NET **77.00**

AC AMMETER

Model 370. Ideal for checking small motors, lineloads, etc., where AC current measurements are required. 60 Hertz. Self-contained current transformer. **Ranges:** 0-1, 0-2.5, 0-5, 0-10, 0-25 amperes. **Accuracy:** ±5% of full scale.
62F319. NET **74.00**

AC MILLIAMMETER

Model 378. Has five separate ranges. Typical applications are transformer vacuum tube tests. Contains current transformer and indicating instrument in one case. **Ranges:** 0-5, 25, 100, 250, 1,000 ma. **Accuracy:** ±5% of full scale.
62F365. NET **74.00**

DC MILLAMMETER

Model 373. General purpose tester. Valuable in a number of applications. Provides DC current transformer and indicator instrument in one case. **Ranges:** 0-1, 5, 10, 25, 50, 100, 250, 1,000 ma. **Accuracy:** ±3% of full scale.
62F323. NET **74.00**

BATTERY TESTER

Model 379. Provides accurate indications of condition of all standard flashlight, hearing aid (mercury cells), radio batteries. Complete with test leads no. 08375 and operator's manual. **Ranges:** 0-1.5, 4.5, 6.0, 7.5, 9.0, 15.0, 22.5, 30.0, 45.0, 67.5, 90.0v.
62F366. NET **74.00**

AC/DC VOM

Model 230-3. Contains sufficient ranges to do a complete servicing job. Designed for telephone, teletype and marine use. Excellent troubleshooter. 1,000 ohms per volt AC-DC. **Ranges:** DC: 10v, 50v, 250v, 1,000v. AC: 10v, 250v, 1,000v. DC: 10 ma, 50ma, 250ma. **Resistance:** 0-1,000Ω, 0-100KΩ.
62F2379. NET **84.00**

DC AMMETER

Model 375. Provides complete range from a fraction of an amp to 25 amps without external shunts. Ideal unit for use with unmetered power supplies. **Ranges:** 0-1, 2.5, 5, 10, 25 amperes. **Accuracy:** 3% of full scale.
62F362. NET **74.00**

362-2

LOW-OHMMETER

Model 362-2. Permits highly accurate readings between 0.1 and 25 ohms. For checking motor armatures, switch and relay contact resistances, shorts between windings and grounds in radio chassis wiring, electrical equipment, etc. **Ranges:** 0-5, 0-25 ohms. **Accuracy:** ±3% of linear arc length.
62F368. NET **77.00**

AC VOLT-AMP-WATTMETER

Model 390-2. AC/DC volts, AC amps and AC watts with one meter. Useful for practically any appliance. Complete with test cord assembly no. 08418 and operator's manual. Volts: 0-150, 300. **Amps:** 0-3, 15. **Watts:** 0-300, 600, 1,500, 3,000. **Accuracy:** ±5% of full scale.

MODEL 886

*National Institute of Occupational Safety and Health
**Mine Safety Health Administration

MODEL 890/887 CALIBRATORS

Model 890 calibrator for sound level meters and Model 887 calibrator for dosimeters are low priced yet highly accurate, portable sound sources for convenient field calibration of Simpson and other sound level meters and dosimeters. Provide a constant, calibrated sound pressure level of 114 dB (0 dB reference is 20 μNewtons/mtr^2.) Simple to operate. A 3-position slide switch selects power Off/On and battery test functions. In battery test function, a red LED lights to indicate adequate battery voltage.

Model 887, 890 SPECIFICATIONS
Acoustical Output: Frequency: 1000 Hz
±1% Sound Pressure Level: 114 dBV
±0.5 dB at reference conditions
Distortion: Less than 1%

Power: One 9V battery, NEDA 1604, 35 hours life approx.

Model 890 Calibrator, N.I.O.S.H. and M.S.H.A. approved when calibrating Simpson Models 884 and 886. Also calibrates similar Sound Meters.
81FX108 MODEL 890, NET 147.00

Model 887 Calibrator, M.S.H.A. approved. For calibrating Simpson Model 891. Personal Dosimeters and similar instruments.

MODELS 891 OSHA and ISO PERSONAL NOISE DOSIMETERS M.S.H.A.** APPROVED!

Sound Threshold Level (Lt): Model 891, 89.5 dBA ±0.5 dBA
Dynamic Range: Model 891, 90 dBA to 125 dBA per OSHA
Accuracy: meets accuracy requirements of ANSI S1.25-1978

Calibration Readout: 4-digit LED displays "0100" with 114 dB, 1000 Hz acoustic input

Portable, accurate sound measurement instrument designed to allow direct automatic determination of OSHA noise exposure compliance without calculations. This complete dosimeter system consists of a monitor and self-contained readout in a compact instrument that is specifically designed to be worn either in the shirt pocket, or on the belt.

The dosimeter may be used to determine percent noise dosage, elapsed exposure time, and the equivalent continuous noise level over a measurement period. The instrument is battery powered and ruggedly constructed to permit use in virtually any location. The display and control panel is secured under a cover to permit access only to authorized individuals.

MODEL 886 TYPE 2 GENERAL-PURPOSE SOUND LEVEL METER APPROVED BY N.I.O.S.H.* AND M.S.H.A.**

- Helps you meet OSHA and Walsh-Healy noise control specifications
- Quickly, accurately measures sound levels in factories, offices, stores, theatres, construction sites, studios
- Full coverage 40-140 dB, with special 85-115 db OSHA range, fast or slow response and standard A, B and C weightings selection

For measurement and analysis of sound over a wide range of frequency and power complete with external output plug, 2 batteries and operating instructions.
Microphone: Type Condenser Type L size per ANSI S1 12-1967. Impedance: 350 ohms.
Sound Level Measurement Ranges: 40 dB to 140 dB. Zero (O) dB reference is 0.0002 μbar
Accuracy: Meets ANSI specifications S1.4-1971 for a Type 2 general purpose sound level meter and IEC 123 specifications.
Calibration: Screwdriver adjustable using Model 890 or 896 calibrator.
Power Requirements: Two 9-volt batteries, NEDA 1604, 50 hrs. life approx.

81FX000 MODEL 886 NET 375.00

Attache case with Model 886 and accessories. Includes Model 886, Model 890 calibrator, microphone wind screen, microphone to tripod adapter, 25-ft. extension cable, three 9V batteries, calibration adjusting screwdriver, wrist strap and operator's manuals.

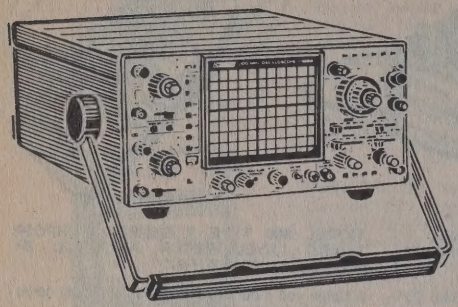
100MHz TRIGGERED SWEEP SCOPE WITH QUADRUPLE TRACE DISPLAY



- **Dual timebase design**
- **5mV per div. sensitivity at 100 MHz**
- **Lighted touch-sensitive pushbuttons control digital logic switching**

Model 1590P. Observes ringing in digital circuits. Satisfies necessity of being 2-3 times highest frequency of logic being observed. For use in digital design and troubleshooting. 1 mV per div. sensitivity at 30 MHz with 5x magnification. 2nS per div. sweep rate (with 10x magnification). Performs accurate rise-time measurements. Observes propagation delays along digital logic gates. Schottky and low-power circuit development in 30-50 MHz and 80 MHz ranges. Telephone main-frame circuit tracing and development, where high speed D/A and A/D conversion is involved. Tracing and development of D/A and A/D converters in audio products. Able to observe troublesome transient glitches. Observation of rf and i-f frequencies through 100 MHz are possible with this scope. Two 10:1 dir. probes included.

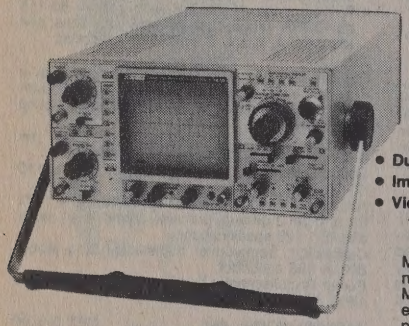
60 MHz QUAD INPUT SCOPE



- **Dual Timebase**
- **Imv Input Sensitivity**
- **Video Sync Separator**

Model 1570P. The new B&K-PRECISION Model 1570 is a cost-effective full-feature portable lab scope. Having many of the important features of the 1500, the 1570 is more feature-packed and offers higher performance than most other scopes in its bandwidth class. This 60 MHz scope is useful to even higher frequencies and has a −6dB response at 70 MHz. Its 1 mV/division sensitivity extends to the full 60 MHz bandwidth. For applications involving low-frequency signals, a selectable 20 MHz bandwidth limiter is built in. Other important features include single sweep, dual time base, delayed sweep, full-logic touch-sensitive function switching and a video sync separator. A buffered channel 1 vertical amplifier output is provided to interface with frequency counters, DMMs or other instruments. This output can also be connected to the channel 2 input for a single channel sensitivity of 500 uV to 40 MHz. Two 10:1 direct probes included.

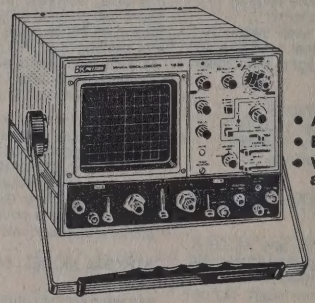
35MHz 5″ DUAL-TRACE TRIGGERED SWEEP



- **Alternate trigger capability**
- **Built-in triggering filters**
- **Variable hold-off for accurate pulse train display**

Model 1535P. Range of useable response is beyond 50 MHz. 2mV/cm vertical sensitivity. Signal delay line for accurate view of high frequency pulse leading edge. Automatic or manual, CHOP and ALTERNATE dual-trace display. UNCAL "reminder" LEDs for sweep rate and input level adjustments. Single sweep feature for photography or observations of non-repetitive waveforms. 10:1/reference/direct probes included. Differential input capability. Algebraic sum and differences of CH A and CH B waveforms. Microprocessor system development is one of its uses. Also work in TV and radio broadcasts, logic and digital design work, measuring phase shifts, setting sync and color burst in TV.

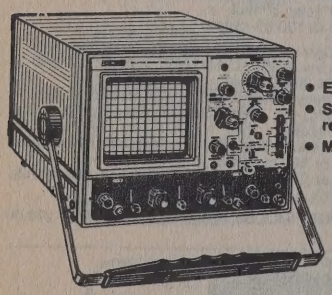
30MHz DUAL-TRACE DELAYED SWEEP



- **Expands signals 1000 times**
- **Single-sweep for non-repetitive waveforms**
- **Mesh-type rectangular CRT**

Model 1530P. Variable hold-off for accurate pulse train display, delay sweep operations for sweep expansion up to 1000x, 2 mv/div. sensitivity, operates at 30 MHz responses; useable to 50 MHz, 11.7nS risé time for short duration pulses. For use in microprocessor system development, computer terminals, broadcast applications, logic and digital design work, digital data systems tests, industrial control engineering work, propagation delay measurement, monitoring RF waveforms, phase shift and distortion, checks, video recorder maintenance, CCTV and CATV performance checks, and transducer testing. 10:1/REF/DIR probes included.

DUAL TRACE 20 MHz DELAYED TRIGGER

- **2mv Vertical Sensitivity**
- **Bright Rectangular PDACRT**
- **Differential Input Capability**

1525P. With 2 mv per division input sensitivity and a conservatively rated 20 MHz bandwidth, the 1525 easily surpasses most industrial needs. The signal expansion capabilities of the delayed trigger feature and the trigger stabilizing variable trigger hold-off feature make the 1520 useable for: Broadcast, CATV, digital and analog design, monitoring RF waveforms, observing 1-f response curves, phase shift and distortion checks. Includes 10:1/REF/DIR probes.

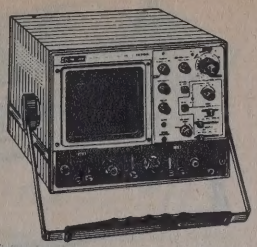
5" DUAL-TRACE 30MHz TRIGGERED OSCILLOSCOPE



Model 1479BP. Vertical Amplifier—Sensitivity: 5mV/cm. Response: DC, DC-30 MHz (−3 dB); AC, 10 Hz-30MHz (−3 dB). Rise time: 11.7 nS. Input Imped: 1MΩ±2%, 22 pF (±3 pF). Max. Input: 300V DC +AC peak or 600 V p-p. Modes: CH-A, CH-B, Dual, Add. Chop Freq: 200 kHz ±20%. Signal Delay: Fixed-12 nS. Sweep System—Type: Auto & triggered (NORM) Mode (X-Y oper) CH A = Y. CH B + X. Sweep time; 0.2 μS/cm-0.5 S/cm ±3% in 20 calibrated steps (1-2-5 sequence) with vernier plus 5X sweep magnifier. Triggering—Source: INT CH-A, CH-B and EXT; X1 and X10 Slope: + or −, cont. variable level control; pull for AUTO. Coupling: AC, DC, LF reject, HF reject. Horizontal Amp (input thru Ch B vertical Input)—Sensitivity: 5 mV/cm. Response: DC-1 MHz (−3 dB). Calibration; 0.5 V p-p ±1% (square-wave at 1 KHz ±10%). Intensity Modulation: More than +5V (TTL compatible). DC-5 MHz. Power 115/230 VAC, 50/60 Hz, 25 W. Size: (HWD) 18.4 x 25.3 x 36.9 cm. Weight: 8.8 kg. Includes: Two PR-40 probes.

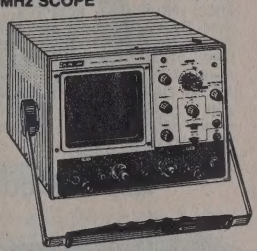
5" DUAL-TRACE 10 MHz SCOPE



Model 1476P. Vertical Amplifier Deflection Factor: 10 mV/Cm to 20V/cm, ±5%, in 11 ranges, each with fine adjustment. Response: DC, DC—10MHz (−3dB) AC, 10Hz—10MHz, Risetime: 35 nSec. Overshoot: 3% or less. Input Imped: 1 MΩ shunted by 27pF (±3 pF). Tilt: <than 5%. Max Input Volt: 300V, DC + AC peak or 600V p-p. Oper Modes: Ch A only; Ch B only; Dual Trace (A and B)—; Chop Frequency: 200 kH approx. Channel Separation: Better than 60dB. SWEEP SYSTEM (Common to Ch A and Ch B) Type: Auto and triggered; Sweep Time: 1μSec/cm to 0.5SEC/cm. HORIZONTAL AMPLIFIER (Input through Channel B vertical input) Deflection Factor: 10mV/cm to 20V/cm, ±5%, in 11 ranges, each with fine adjustment. Response: DC-1. MHz (−3dB). Calibration Voltage: 1kHz square wave, 1V p-p (±5%). Intensity (Z-Axis) Modulation: 5V TTL compatible, 470K nominal input resistance. Probes: Two PR-40 10-1 direct probes included. Power: 117 or 230 VAC, 50/60Hz, 23W; CSA-approved three-wire line cord; 50/60Hz. Size: (HWD) 19 x 25 x 36 cm. Net Weight: 8.8 kg.

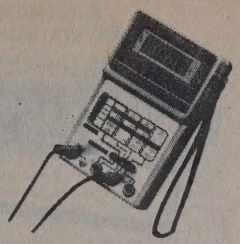
Digital DMMs and Probes

B+K PRECISION DYNASCAN CORPORATION

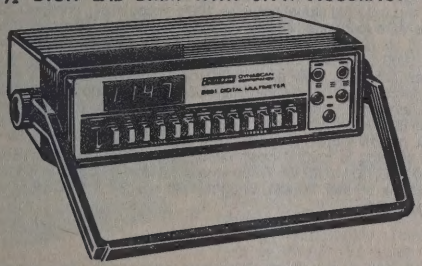
3½ DIGIT LOWCOST DMM



- High Energy Fuse Protection
- Liquid Crystal Display
- DC Accuracy 1% Typical
- Fully Overload Protected
- Auto Zeroing; Auto Polarity

Model 2801 Economical 3½ Digit DMM ideal for field shop and hobby applications. AC-DC Voltage ranges 0-2, 20, 200 and 1000V. Input Impedance 10 MΩ; AC: 200 KΩ on 200V Range. Circuit Protection ±1000 Vdc or dc plus ac all ranges. Resistance Ranges 0-2, 20, 200, 2000KΩ. Circuit Protection: ±140 Vdc plus ac peak, 140 Vac RMs. DC Current 0-2, 20, 200 ma. Power: 9 volt battery. Test leads, carrying case, operation manual and a spare fuse included. **81FX004. NET** **65.00**

3½ DIGIT LAB DMM WITH 0.1% ACCURACY



Model 2831. For all types of lab or bench operation. 0.43" high LED display visible under all lighting conditions. Basic DC accuracy of 0.1% and autozeroing on all ranges. Built-in 10 amp range permits current measurement to 20 amps with 100% overrange. Voltage to 1000 VDC or 750V AC, and up to 40,000V with probe. Seven ohm range for measurment from .01 ohm to 20 megohms. 10 ohm range capable of .01 ohm resolution. Ability to measure switch and point contacts, motor and coil winding, and wire lengths. Circuit resistance measurements without forward biasing semiconductor junctions, independent of range switch. Four range high/low selection allows pn junctions to be forward biased for polarity or condition tests. Protection against application of ±1000V DC, −450 VDC or 300 VAC rms. Diode and high voltage current range protection. Voltage ranges protected to ±1000 VDC or DC+AC peak.

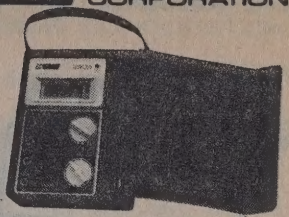
THERMOCOUPLE TEMPERATURE PROBE

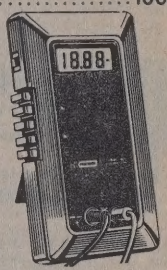
MODEL TP-30. Measure temperature of liquids, solids, gases from −328° to +900° F with almost any digital or analog voltmeter. Farenheit or Celcius switch selectable. Sensor: K type thermocouple. Meter must have minimum 12K ohm input inpedance. Celcius range: −200° to +428°. Resolution: 0.1° with adequate voltmeter range. Sensor is switchable to other standard sensor types. **81F201** NET 95.00

3½ DIGIT 5 FUNCTION DMM



- 200 mV AC/DC voltage ranges
- 10 Amp AC/DC current ranges
- High Energy Fuse Protection
- LCD Readout

Model 2805. AC/DC Voltage 1,000V. Input Impedance 10MΩ (ac and dc). AC and DC Current Ranges: DC: 200μA, 2, 20, 200mA. AC 1000mA, 10A. Resistance Ranges 200 ohms, 2, 20, 200, 2000 k ohms. All ranges protected against direct connection to an AC line. Accuracy. DC Volts ±0.8% of reading ±.2% of full scale ±1 LSD. AC Volts ±1% of reading ±.5% of f.s., ±2LSD. DC Current: ±1.5% of reading, ±1LSD, AC Current ±3% of reading ±2 LSD. Test Leads carrying case, operation manual and spare fuse included. **81FX005. NET** **100.00**



- **3½ digit full-function DMM**
- **Metal oxide varistors and a fuse overload protection.**
- **Computer stabilized readings display.**
- **Hermetically sealed reed relays.**
- **Complies with U.L. 1244 safety standards.**

Model 2845. Designed around 4-bit microcomputer. Input signal converted to scaled DC voltage; and A/D converted and stored in RAM. Microcomputer stores data and selects range to give max. display resolution. Program memory capacity is 1024 x 8 bits of ROM, with 48 x 4 bits of RAM. Program includes autoskip for max. resolution in min. time. **DC Voltage.** Ranges: ±1V, 10V, 100V, 1000V. Input Impedance: 10 MΩ. Circuit Protection: 1000 VDC or DC+AC peak. Overrange (full scale): 100% all ranges, limited ±1000 VDC or DC+AC peak. **AC Voltage.** Ranges, Input Impedance, and Circuit Protection: same as DC. Overrange: 100% all ranges except 1000V, limited 750 RMS. **Resistance.** Ranges: 1KΩ, 10KΩ, 100KΩ, 10MΩ, automatic selection and display. Circuit Protection: +1000V, to −450 VDC or 300 VAC all ranges. Overrange: 100% all ranges. Polarity: Red jack positive all ranges. **Accuracy.** Basic DC: ±0.1%, ±1 LSD all ranges. DC Current: ±0.75, ±1 LSD. AC Current: ±1%, ±3 LSD, 50 Hz to 1 kHz; ±2.5% ±3 LSD to 5 kHz. Resistance: ±0.3%, ±1 LSD, on 1kΩ thru 1000kΩ ranges; ±0.6%, ±1 LSD on 10 MΩ range. Readout 3½-digits, 0.5" LCD; with kΩ, MΩ, polarity and low battery indicators. 0° C to 55 C temp. range. 7 x 3¾ x 1⅞. 1 lb. Requires 9V battery (NEDA 1604 or equiv.).

LOW DISTORTION FUNCTION GENERATOR

Model 3010. Frequency. Range: 0.1 to 1 MHz in six ranges. (Each range provides >100:1 frequency control, by dial or external. Accuracy: 5% of full scale. Stability: 5% (after 15 minutes.). Functions: Sine, Triangle, Square, TTL Square Wave. Square Wave: Variable amplitude or fixed TTL output. Symmetry: 99% to 100 kHz. Rise/Fall Time: <100 ns at maximum output. TTL square-wave response: <25 ns rise/fall time (0<.4 V: 1>2.4 V). Sine-Wave: Variable amplitude. Distortion: <1% 0.1 Hz to 100 kHz, <0.5% typical. **Output.** Amplitude: 20 V p-p open circuit 10 V p-p into 600 ohms. Control: Continuously variable, max. of ±10 V open circuit or ±5 V into 600 ohms (Max VAC + VDC offset without clipping is ±10 V open circuit, or ±5 V into 600 ohms). General Power: 105-130 VAC, 60 Hz, 8. Size: 8.1 x 29 x 20 cm. (3.2 x 11.3 x 7.8″) Wt: 1.3 kg. (2.9 lbs.).

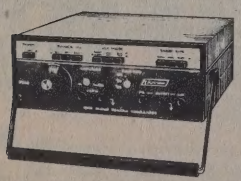
LAB SWEEP/FUNCTION GENERATOR

- **.001Hz to 5MHz**
- **Log/linear Sweep**
- **Variable Symmetry**
- **Calibrated 10db to 60db attenuation**

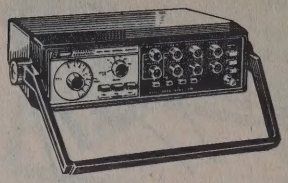
Model 3030. Generates Sine, Square, Triangle sweep ramp, Sweep pulse, TTL Pulse, DC. Modes: Continuous, linear sweep, logarithmic sweep, tone burst, single cycle. Output amplitude 20vp-p into open circuit, 10Vp-p into 50 ohm. 50 ohm input impedance, amplitude stability .25% of setting Frequency Stability .25% of setting. Since wave distortion LO.5% from 1 Hz to 100KHz all harmonics>30db down from 100KHz to 5MHz. Test Analog, digital and audio circuitry.
81F204. NET 645.00



COMPACT SWEEP/ FUNCTION GENERATOR

- **Sine, Square, Triangle Output**
- **2Hz to 200KHz Range**
- **Internal Lin/Log Sweep**

Model 3015. Low cost generator for amplifier and audio frequency response tests, analog and digital signal substitution. Ultra compact it boasts the following specifications: Square wave symmetry >99% to 100KHz, Sine Wave Distortion: <1% 2Hz to 20KHz, Triangle Wave linearity: >99% to 100KHz. Internal Sweep 1000: 1 linear; 10,000:1 Log. Sweep rate: selectable: Slow-25s; Medium 250 ms; Fast 2.5ms. Output 15vp-p open circuit; 7.5vp-p-600 ohms.
81F206. NET 270.00



SWEEP/FUNCTION GENERATOR

- **CSA Listed**
- **±5% Accuracy**
- **.05% Stability**
- **<0.5% Typical Distortion**

Model 3020. Frequency Range: .02 Hz to 2 MHz in 7 ranges. Functions: Sine, Triangle, Square, TTL Square Wave, Pulse, Tone Burst. Square Wave: Variable amplitude and fixed TTL output. Symmetry: 99% to 100 kHz. Rise/Fall Time: <100 ns at max. output. TTL Square Wave Response: <25 ns rise/fall time (logic 0 <0.4; logic 1 >2.4 V.). Sine Wave: Variable amplitude. Amplitude Flatness: Better than ±0.3 dB to 2 MHz at max. output. Triangle Wave: Variable amplitude. Linearity: 99% at 100 kHz. Variable Symmetry: 40:1 range, independent of frequency or output waveform. AM Modulation: 0-1.5 V p-p external signal provides 100% modulation; continuously variable. Capable of suppressed carrier operation. SWEEP: Internal: Linear or log. Rate: 0.5 Hz (2 SEC period) to 50 Hz (20 ms period). Width: Variable from 10:1 to 1000:1. Voltage Output: Proportional to sweep; at rear GCV connector. External Sweep: Rear panel VCO input provided. OUTPUT Amplitude: 20 V p-p open circuit; 10 V p-p into 50Ω. Control: Continuously variable, >20 dB. Fixed attenuation, 0-40 dB in 3 steps. This, together with 30 dB variable, provides 60 dB total attenuation. Impedance: 50Ω ±5%. D.C. Offset: Variable, ±0 max. of ±10 V open circuit or ±5 V into 50Ω. (Max. AC peak + VDC offset without clipping is ±20 V open circuit; ±10 V into Ω). GENERAL Power: 105-130 VAC, 60 Hz, 22 W. Three-wire cord. Size (H x W x D: 8.1 x 29 x 20 cm (3.2 x 11.3 x 5″) incl. handle. Weight: 1.35 kg. (3.1 lbs.) CSA listed.

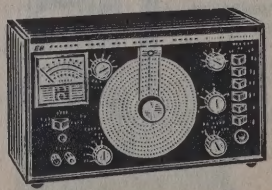
5-MODE FUNCTION GENERATOR

- **.005Hz to 5MHz**
- **High and low Amp Outputs**
- **Variable DC offset**

Model 3025. Since, square, triangle, haversine waveforms, Modes: continuous, logarithmic and linear sweep, tone burst, single cycle. Amplitude and Frequency stability: .25% of setting. Output amplitude 20vp-p into open circuit. 10vp-p into 50 ohms. 50 ohm output impedance. Sine wave distortion <0.5% 1Hz to 100KHz, all harmonics 30db down from 100KHz to 5MHz. Square wave rise/fall time <50ns Square wave symmetry: 99% from 1Hz to 5MHz. Uses: test compression amps, speakers, digital, analog circuitry.
81F205. NET 450.00

MODEL E200D RF GENERATOR



Calibrated meter monitors RF level and % modulation. Wide-range coverage from 100 KHz to 216 MHz in 5 bands. Completely shielded RF output with continuously variable monitored attenuation calibrated to less than 1 microvolt (on fundamentals to 54 MHz). Built-in crystal calibration for assured frequency accuracy. Easy-setting, 2-color 5″ vernier dial with anti-backlash 12:1 gear ratio. Accuracy ±1.5%. Output: 100,000 microvolts maximum. Four outputs: Unmodulated RF; modulated RF (400Hz); externally modulated RF; 400 Hz audio signal. FM and TV channels identified on dial. 3-wire grounded AC line cord. Attenuator system: 6 individually shielded step attenuators with a total capability of −96 dB. Outputs as low as 106 dB below 100,000 microvolts can be obtained with fine output level control and calibrated meter, which provides additional −10 dB to +dB output level indication (0 dB = 100,000 microvolts into 50 ohms). Shipping Weight: 10 lbs.

Precision Test Equipment

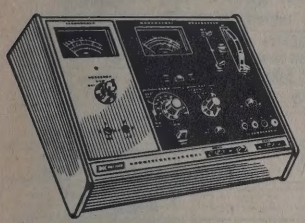
B&K PRECISION DYNASCAN CORPORATION

PORTABLE AUTORANGING DIGITAL CAPACITANCE METER

Model 830. Measure capacitors, all types. Verify tolerances. Measure cable capacitance. Match for critical circuits. Sample for quality assurance. Measure series-parallel networks. Set trimmers to specific capacitance. Checks excessive capacitance. Accuracy exceeds most capacitor tolerances. No range switching. Range hold capability. Zero control for leads. Fuse protected. 10 ranges, full scale 199.9pF to 199.9mF (reads 0.1pF to 0.2F, resolution 0.1pF). .2% ±0.5pF, ±1 digit to 19.99μF, ±1% 1 digit, 20μF to 199.9mF accuracy. Hold accuracy same, except, ±0.1% to 19.99mF, 0.5% over 19.99mF. .04 to 1 sec reading time to .2mF, 6 sec at 200nF. Lead capacitance overcompensation and overrange indicators. 3½ LCD. Temp. range 15 to 35°C. Req. 4 C cells or AC adapter, not incl. 16x11x6 cm. 725 g.

60F2766. NET 229.00

MODEL 530 SEMICONDUCTOR TESTER



Transistor cut-off frequency measurement capability permits high-frequency evaluation of transistors. Audible tone indicates good device—no weak borderline indication. Measures ICES and IDSS Color coded switch indicates base lead to free hands to connect difficult-to-reach in-circuit transistors. Base diagrams not required. Automatic identification of PNP/NPN types and N or P channel FET. Measures transistor beta using two collector current ranges (low power beta 20-600, high-power beta 20-200). FT: three ranges (0-100 MHz, 0-500 MHz, 0-1500 MHz). Collector: 125 mA @ 4% duty cycle. Base: 250 mA @ 4% duty cycle (HI drive); 1 mA @ 4% duty cycle (LOW drive). Test repetition rate: 10 per second. Voltage for leakage test, Variable from 10-100 VDC. Power required, 105-125 VAC, 60 Hz, 10 watts. Size; 7 x 13 x 3½″. Weight, 5 lbs.

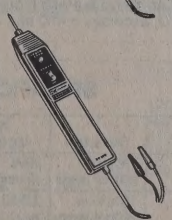
59F915. NET 455.00

50 MHz DIGITAL PROBE

Model DP-51. TTL, DTL, RTL, HTL, CSOM, MOS, HiNil compatible for analysing. Displays pulse presence, DC, logic states to 50MHz. Pulse memory. Pulse mode slows short pulses. detects to 10nsec. 2MΩ input impedance, Protected to ± 50V. 75 cm lead. 16.25×3.12×1.9 cm. 1.25 tip. 98 gram.

55F4903. NET 70.00

DIGITAL PULSER PROBE



Model DP-101. Multi-family. Generates single or 5Hz pulse or train. Senses logic state and changes to compliment. High current drive pulls shorted logic ouputs, high or low. Short duty pulse won't damage circuitry. Tip protected to 35V. Leads to 160VDC and 117VAC. Requires 5 to 15 volts (1 mA @ 5VDC; 20 mA @ 117VAC.)

60F2765. NET 100.00

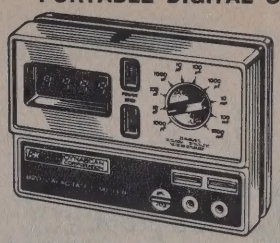
SA-1010 SIGNATURE ANALYZER

- 20MHz Operating Speed
- 10ns Set-up time
- TTL, CMOS, MOS Compatible

Model SA1010. Makes trouble-shooting of advanced digital and microprocessor based circuitry simple. Unstable signature hold, signature hold, a 1MHz clock output and self test allow quick and accurate diagnosis of complex digital faults. The SA1010 uses the standard four digit modified hexidecimal readout and can be used in circuits designed for other signature-analyzers. TTL/CMOS control pod and data probes included.

81F9004. NET 825.00

PORTABLE DIGITAL CAPACITANCE METER



Model 820. CAPACITANCE Range: 10 selectable ranges with full scale value from 999.9 picofarads to 999.9 millifarads (reads from 0.1 pF to 999.9 millifarads). Accuracy: 0.5% of full scale, ±1 digit to 100 μF; 1% of full scale, ±1 digit from 1 millifarad to 1 Farad. Resolution: 0.1 pF. Reading Time: 0.3 SEC up to 1000μF increasing to 35 SEC max. at 1 Farad. Overrange Indicator: (All Ranges) All bottom segments of the digits are "ON" when the capacitor value exceeds the value of the range selected. GENERAL Display: 4 digits LED display. Front Panel Controls: 10-position range switch, zero adjust, ON-OFF switch. Power Source: 4 standard "C" size cells operating from 4-6 volts, nicad, alkaline or zinc carbon, with provision for charger. (Note: batteries and charger are not supplied. Battery Life: 8 hours minimum. Operating Temperature: 0°C to 50°C (32° to 100°F). Dimiension: 16 x 11 x 6 cm (6.4 x 4.4 x 2⅜″). Weight: 675 g. (1.51 lbs.) with batteries. Includes: Manual, spare fuse.

55F4902. NET 185.00

MODEL 520B INDUSTRIAL TRANSISTOR TESTER

Identifies all three transistor leads. Automatic NPN/PNP determination. Positive Si/Ge identification. Tests SCR's FET's, and Darlingtons. Audible "beep" signals a good transistor. LED lamps identify NPN or PNP devices and Ge or Si types. Meter scales; readable from 0.1μA to 5mA for ICE leakage. Applied test currents: Collector: 250 mA at 5% duty cycle. Base: 125 mA at 5% duty cycle. 10 per second test repetition rate. 2.0 V leakage test reverse voltage. Shunt resistance 10 ohms and shunt capacitances up to 15μF. Accessories: Color coded test leads with Mini Lock clips; detailed instruction manual; optional FP-5 Dynaflex three lead, one hand probe for easy in circuit testing available. Power: 105-125 VAC, 50-60 Hz. 8″H x 7″W x 3.5″D. 5 lb.

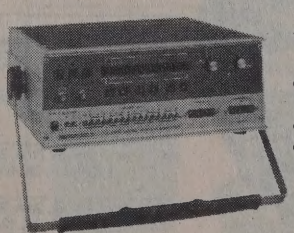
Model FP-5. Dyno-Flex 3 Point-Probe

62F567. NET 24.50

Model PR-23. RF Detector/Demodulator Probe. Usable with any electronic voltmeter or oscilloscope models 1403, 1431, 1440, 1460, 1465, 1470 and 1472. Typical freq. res. ±2 db 15kHz to 125 MHz. Within 6dB at 250 MHz.

62F531. NET 23.00



16 CHANNEL LOGIC ANALYZER

- DC to 20 MHz Synchronous Operation
- 1 Hz to 10 MHz Asynchronous
- TTL, MOS or CMOS Compatible

Model LA1020 12 digit LED display of state data in hex, octal, binary, decimal, 16 channel timing diagram can be displayed on most oscilloscope 16 bit x 250-word memory. Clock and event delays programmable from 0-999. Trigger word position 0-249. Test and evaluate: counters, decorders, flip-flops, gates 1/0 devices, verify computer computer programs.

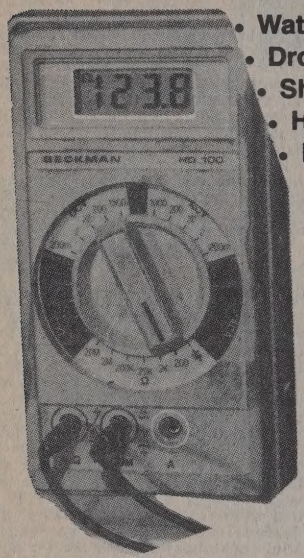
81F9003. NET 2075.00

Model LA1025 Similar to LA1020 but with signature analysis capability. Designate **81F9009** or **81F9007** probes when ordering. (2 probes supplied with each unit) 2475.00

81F9003—16 channel qualifier expander probe available..... 495.00

BECKMAN Digital Multimeters

HD-100 SERIES HARDHAT METERS



- Waterproof
- Drop-proof
- Shockproof
- High Visibility
- Recessed Switch

MODEL HD100 AND HD110

Hardhat series designed for accuracy-precision and reliability under most adverse environments, built for punishment from elements. Completely waterproof, in tough thermoplastic fire-retardant case, locks out dirt, grime and grease. High visibility color of international yellow helps prevent accidental loss. Has recessed rotary switch to prevent damage in transport. The 3½ digit LCD is shock mounted to reduce breakage. All DC voltage ranges are protected for 1500 Vdc or 100 Vrms. Current ranges are protected to 2A/600 V. Resistance ranges to 600 Vdc. 2 Amp/600 V fuse protection in all current ranges. Battery provides up to 2000 hours of continuous operation with blinking decimal warning when battery life is down to 200 hours.

TECH 310/310UL
320B/330

SERIES 300: TECH 300; TECH 310; TECH 330

Designed to last during heavy duty use. Will even take a six foot fall and continue to operate. Recessed display and single rotary switch prevents damaging in most situations. Water resistant case guards against water, dirt, and fluids that are detrimental to multimeters. Designed test leads protect the operator from accidental shocks. DC resistances are higher than most digital or analog meters. Voltage ranges are protected against transients up to 6kV. 2 amp current input is protected by an easy to replace fuse. Overall 10A current is protected for at least 30 seconds at up to 20A. All models feature Autodecmal, Autozero, and Autopolarity. Decimal point blinks during the last 200 hours. In-circuit diode/transistor test function allows accurate measurement of forward voltage drops across diode and transistor junctions with 5mA test current. Semiconductors can also be measured while in circuit with as little as 200Ω shunt. In-circuit resistance measurements in low-power ohm allows accurate measurement of resistors but not common diodes and transistors.

GENERAL FEATURES

- 22 Megaohm Input Resistance.
- 1500V Overload & 6kV Transient Protection.
- Safety Designed Leads.
- 2000 Hour Battery Life.

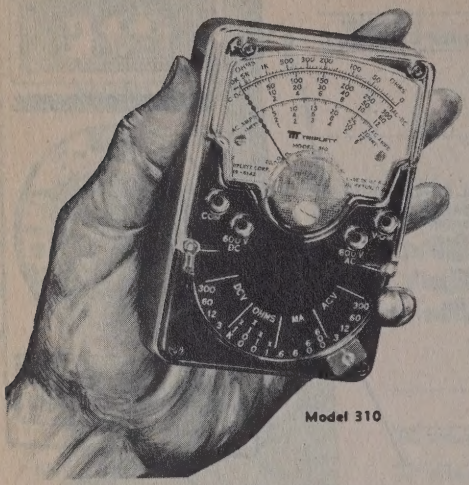
TRIPLETT® Hand Size Test Instruments



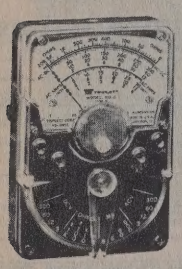
Model 310

MODEL 310 V-O-M TYPE 4

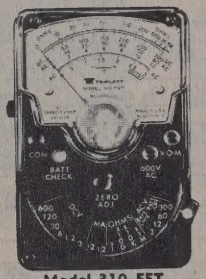
1. Drop-resistant, hand-size V-O-M w/high-impact thermoplastic case.
2. 20,000 Ohms per volt DC and 5,000 Ohms per volt AC; diode overload protection with fused Rx1 Ohms range.
3. Single range switch; direct reading AC Amp range to facilitate clamp-on AC Ammeter usage.

RANGES

DC Volts: 0-3-12-60-300-600 (20,000 Ohms per Volt).
AC Volts: 0-3-12-60-300-600 (5,000 Ohms per Volt).
Ohms: 0-20k-200k-2MΩ-20MΩ (200 Ohm center scale on low range).
DC Microamperes: 0-600 at 250 mV.
DC Milliamperes: 0-6-60-600 at 250 mV.
Accuracy: ±3% DC; ±4% AC; (full scale).
Scale Length: 2⅛".
Meter: Self-shielded; diode overload protected; spring backed jewels.
Case: Molded, black, high impact thermoplastic with slide latch cover for access to batteries and fuse. 2¾"w. x 1 5/16"d. x 4¼"h.
Batteries: NEDA 15V 220 (1), 1½V 910F (1): Complete with 42" leads, alligator clips, batteries and instruction manual. Shpg. wt. 2 lbs.
62FX230 ..... 70.00



Model 310-C



Model 310-FET

MODEL 310-T V-O-M

Model 310-T—Similar to Model 310 with −50° F to +150° F and +50° to +300° F temperature ranges and curve matched thermistor temperature probe.
62FX293 ..... 107.00

MODEL 310-C V-O-M TYPE 5

1. Hand-size V-O-M w/diode overload-protected suspension movement.
2. 20,000 Ohms per volt DC and 15,000 Ohms per volt AC.
3. Single, enclosed range switch minimizes error; DC polarity-reversing switch.

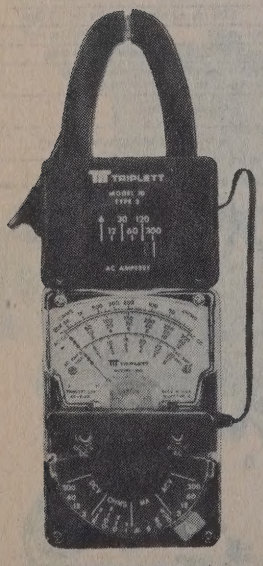
Model 310-C. Similar to Model 310 with diode overload-protected suspension movement, 15,000 ohms per volt AC, enclosed range switch and DC polarity-reversing switch. Maximum AC/DC voltage range 600 volts.
62FX292 ..... 95.00

MODEL 310-FET TYPE 2

1. Hand-size FET V-O-M with 10 megohm DC input resistance and diode overload-protected suspension movement.
2. Low voltage range of 300 mV DC; X1 megohm range.
3. Single range switch; DC polarity-reversing switch.

RANGES

DC Volts: 0-0.3-1.2-6-30-120-600. Input resistance 10 megohms.
AC Volts: 0-3-12-60-300-600 (5,000 Ohms per Volt).
Ohms: 0-5k-500k-50MΩ-5,000MΩ (50 Ohm center scale on low range).
DC Milliamperes: 0-0.12-1.2 at 300 mV.
Accuracy: ±3% DC; ±4% AC; (full scale). Scale Length: 2⅛".
Meter: Self-shielded diode overload protected suspension movement; DC polarity-reversing switch.
Case: Molded, black, 2¾"w x 1 5/16"d x 4¼"h.
Batteries: NEDA 7V, 1501M, (1), 1½V 910A (1). Complete with 42" leads, alligator clips, batteries and instruction manual. Shpg. wt. 2 lbs. Battery life 150 hours.
62FX250 ..... 127.00

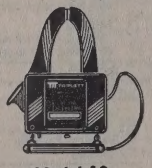


Model 100-T

Model 369

Model 369-S

Model 379



Model 10

Model 101

ACCESSORIES FOR 310's

Model 10 Clamp-on AC Ammeter—For 310, 310-T and 310-F. Ranges, 0-6-12-30-60-120-300. **62F235** 34.70
Model 10-C Clamp-on AC Ammeter—For 310-C. Ranges, 0-6-12-30-60-120-300. **62F251** 34.70
Model 101 Line Separator—Divides two conductor cords direct or increases Model 10 sensitivity 10x and 20x. **62F238** 13.70
Model 311 Lead—42" long lead to separate Model 10 from 310 unit for easy reading in awkward spots. **62F045** 6.80
Model 369 Carrying Case—For Model 310's. **62F231** 8.50
Model 369-S Carrying Case—For Model 310's; front opens permitting use of tester in case. **62F046** 19.90
Model 379 Carrying Case—Form Model 310 and Model 10 in combination, plus Model 101 and leads. **62F239** 16.20
Model 79-153 Needle Tip Replacement Lead—For Model 310 series. **62F246** 6.80
Model 79-296 Blunt Tip Replacement Lead—For Model 310 series. **62F1316** 10.70
Model 79-386 Thermistor Temperature Probe—For Model 310T. **62F2650** 25.10

HAND-SIZE V-O-M CLAMP-ON AMMETERS

1. Complete maintenance kit with V-O-M and clamp-on AC ammeter.
2. Diode overload-protected; 20,000 Ohms per volt on DC.
3. AC clamp-on will read up to 300 Amps AC.

Model 100—Complete set includes Model 310, Model 10, Model 101, No. 311 lead and Model 379 case. Shpg. Wt. 7 lbs. **62F249** 138.00
Model 100-C—Complete set includes Model 310-C, Model 10-C, Model 101, No. 311 lead and Model 379 case. Shpg. Wt. 7 lbs. **62F252** 166.00
Model 100-FET—Complete set includes Model 310-FET, Model 10, Model 101, No. 311 lead and Model 379 case. Shpg. Wt. 7 lbs. **62F1315** 198.00
Model 100-T—Complete set includes Model 310-T, Model 10, Model 101, No. 311 lead, temperature probe and Model 379 case. Shpg. Wt. 7 lbs. **62F2649** 178.00

Test Instruments

TRIPLETT®

X'TRA rugged, Overload protected, Safety designed V-O-Ms

MODEL 60 V-O-M TYPE 2

1. X'TRA Rugged—Will withstand an accidental drop up to a five foot height.
2. Overload Protected—All ranges protected by diode and unusual three fuse arrangement, including ⅛ amp, 1 amp and 2 amp/1000V fuses.
3. Safety Designed For You—Designed to most rigid safety standards; completely insulated unit including newly designed safety leads.

RANGES

DC Volts: 0-0.3-1-3-10-30-100-300-1000 (Approx. 20,000 Ohms per Volt).
AC Volts: 0-3-10-30-100-300-1000 (Approx. 5,000 Ohms per Volt).
Ohms: 0-1k-10k-100k-1MΩ-10MΩ (12 Ohms center scale on low range).
DC Microamperes: 0-100 at approx. 320mV.
DC Milliammeters: 0-10-100-1000 at approx. 320mV.
Decibels: −20 to +52.
Accuracy: ±2% DC; ±3% AC; (full scale).
Batteries: NEDA 9V 1604 (1), 1½V 13F(1).
Complete with 48" safety test leads, insulated alligator clips, batteries, spare ⅛A and 1A fuses and instruction manual. Shpg. Wt. 4 lbs.
62F170 Model 60 ..... 140.00

LEADS AND ACCESSORIES

79-374: Model 60 Series, Model 630/630-A type 4, safety test lead set 48". **62F2328** 7.40

79-261: Model 601 and 603 ground lead, black, 48". **62F253** 5.00

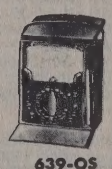
Frequency Compensated.
Batteries: NEDA 30V 210 (1), 1½V 13F (1).
Complete with 48" safety test leads, screw-on insulated alligator clips, batteries, spare ⅛A and 1A fuses and instruction manual. Shpg. Wt. 4 lbs.
62FX044—Model 60-NA 191.00

QUALITY LEATHER CASE

639-A

Model 639-A: For Model 60, 600, 630 Series, Flaps open to permit use of tester in case. Space for tester leads, Model 10 and Model 101. **62F041** 23.38

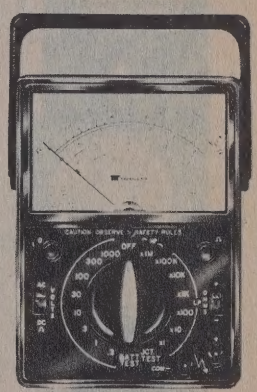


639-OS

Model 639-OS: For Model 600, 630 Series. Flaps open to permit use of tester in case. Space for tester, leads, Model 10 and Model 101. **62F2333** 29.30

639

Model 639: For 630 Series only. Top opens with space for leads. **62F213** 25.40



Model 64

MODEL 64 VOLT-OHMMETER

1. X'TRA Rugged/Overload Protected (all ranges)/Safety Designed solid state Volt-Ohmmeter.
2. Low-Power Ohms—LPΩ™—6 ranges with 90mV power source for in-circuit measurements plus junction test circuit.
3. Exclusive Triplett Micro Power—TMP™—permits continuous operation with carbon battery life in excess of a year.

RANGES

DC Volts: 0-0.3-1-3-10-30-100-300-1000. Input res. 11.12 MΩ.
AC Volts: 0-0.3-1-3-10-30-100-300-1000. Input imp. 10 MΩ. Frequency range 20Hz to 20kHz, except 300 and 1000V.
Ohms-Low Power: 0-1k-10k-100K 1MΩ-10MΩ-100MΩ. (Max. voltage 90mV, max. power 0.08mW, 10 Ohm center scale).
Ohms-Conventional: 1000MΩ. (Max. voltage 0.9V, max. power 0.08μW, 10M ohm center scale.)
Junction Test: checks diodes and transistor junctions (silicon-germanium-open or shorted); forward and reverse conduction. (Max. V. 0.9V, max. power 0.8mW.)
Decibels: −40dB to +62dB.
Accuracy: ±3% F.S., all ranges.
Batteries: NEDA 9V 1604 (2), 1½V 13F (1).
Complete with 48" safety test leads, insulated alligator clips, batteries, spare 1A fuse and instruction manual. Shpg. Wt. 4 lbs.

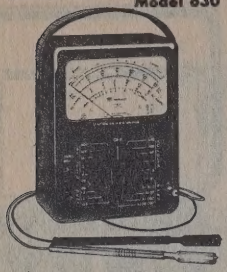
TRIPLETT® Test Instruments

Model 630



MODEL 630/MODEL 630-A V-O-M TYPE 4

1. **OVERLOAD PROTECTED** — Protected by diode and two fuse arrangement, include 1 amp and 2 amp/600 V fuses.
2. **SAFETY DESIGN FOR YOU** — Completely insulated unit using newly designed safety leads.
3. Single range switch minimizes error; 5 ohmmeter ranges with 4.4 ohms center scale.

RANGES

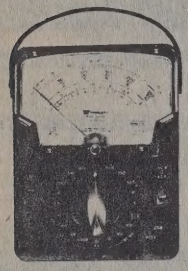
DC Volts: 0-0.3-3-12-60-300-600 (20,000 Ohms per Volt).
AC Volts: 0-3-12-60-300-600 (5,000 Ohms per Volt).
Ohms: 0-1k-10k-100k-1MV-100MV (4.4 Ohm center scale on low range).
DC Microamperes: 0-60 at 300mV.
DC Milliamperes: 0-1.2-12-120 at 250mV.
Decibels: –20 to +57.
Accuracy: ±2% DC; ±3% AC; (full scale).
Batteries: NEDA 30V 210 (1), 1½V 13F (1).
Complete with 48″ leads, alligator clips, batteries and instruction manual. Shpg. Wt. 5 lbs.
52F212 ..... 118.00

Model 630-A: Similar to Model 630 with mirror scale and ±1½% DC accuracy. **62F211** 128.00

ACCESSORIES

79-374: Replacement safety test lead set, 48″, Model 630/630-A type 4. **62F2328** 7.40
79-433: High Voltage Probe — 6kVDC, Model 630/630-A type 4. **62F2651** 19.90
79-432: High Voltage Probe — 6kVAC, Model 630/630-A type 4. **62F2652** 19.90

Model 630-PL



MODEL 630-PL/MODEL 630-PLK V-O-M SERIES

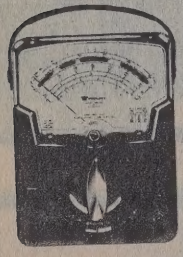
1. 28-range V-O-M with single range switch minimizes error; multi-fuse protection for entire unit.
2. 5″ suspension meter with diode overload protection.
3. 4 ohmmeter ranges with 4.4 Ohms center scale.

RANGES

DC Volts: 0-2.5-10-50-250-1,000 (20,000 Ohms per Volt); 0-0.25 at 100 MA.
AC Volts: 0-3-10-50-250-1,000 (5,000 Ohms per Volt).
Ohms: 0-1k-10k-1mV-100MV (4.4 Ohm center scale on low range).
DC Microamperes: 0-100 at 250mV.
DC Milliamperes: 0-10-100-1,000 at 250mV.
DC Amperes: 0-10 at 250mV.
Decibels: –20 + 49.
Output Volts (AC): 0-3-10-50-250 (5,000 Ohms per Volt).
Accuracy: ±2% DC; ±3% AC; (full scale).
Batteries: NEDA 30V 210 (1), 1½V 13F (1).
Complete with 48″ leads, screw on insulated alligator clips, batteries and instruction manual. Shpg. Wt. 5 lbs.
Model 630-PL. 62F241 ..... 126.00

Model 630-APL: Similar to Model 630-PL with mirror scale and ±1½% accuracy. **62F242** 139.00
Model 630-PLK: Similar to 630-PL with solid-tate switching circuit overload protection for burnout protection of entire tester. **62F1775** 184.00
Model 630-APLK: Similar to Model 630-PLK with mirror scale and ±1½% DC accuracy. **62F1777** 201.00

Model 630-NA



MODEL 630-NA/MODEL 630-NS V-O-M SERIES

1. 58-range V-O-M with single range switch and DC polarity-reversing switch.
2. Accuracy 1½% DC and 3% AC; mirrored scale.
3. Diode overload-protected suspension movement; temperature compensation.

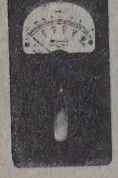
RANGES

DC Volts: 0-0.6-3-12-60-300-1,200 (10,000 Ohms per Volt). 0-0.3-1.5-6-30-150-600 (20,000 Ohms per Volt). 0-0.120 at 60 microamperes. 0-0.240 at 120 microamperes.
AC Volts: 0-3-12-60-300-1,200 (5,000 Ohms per Volt). 0-1.5-6-30-150-600 (10,000 Ohms per Volt). Frequency range 35Hz to 20kHz.
Ohms: 0-1k-10k-100K-1MV (4.4 Ohm center scale on low range).
DC Microamperes: 0-60-600 at 120mV; 0-120 at 240mV.
DC Milliamperes: 0-6-60-600 at 120mV; 0-1.2-12-120-1,200 at 240mV.
DC Amperes: 0-6 at 120mV; 0-2 at 240mV.
Decibels: –26 +51.
Output Volts (AC): 0-3-12-60-300 scale (5,000 Ohms per Volt). 0-1.5-6-30-150 (1,000 Ohms per Volt).
Batteries: NEDA 30V 210 (1), 1½V 13F (1).
Complete with 48″ leads, screw on insulated alligator clips, batteries and instruction manual. Shpg. Wt. 5 lbs.

Model 630-NA, 62F228 ..... 173.00

Model 630-NS: Similar to Model 630-NA 200,000 Ohms per Volt DC and 20,000 Ohms per Volt AC. Maximum AC/DC-voltage range, 1200 Volts. **62F168** 208.00

Model 666-R



MODEL 666-R V-O-M TYPE 1

1. Rugged 14-range V-O-M; single range switch minimizes error.
2. 3 ohmmeter ranges reading to 3 megohms.
3. AC and DC voltage ranges from 10 to 1000 volts.

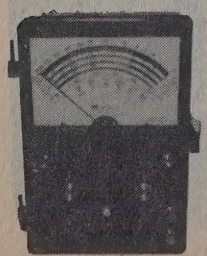
RANGES

DC Volts: 0-10-50-250-1,000 (1,000 Ohms per Volt).
AC Volts: 0-10-50-250-1,000 (1,000 Ohms per Volt).
Ohms: 0-3k-300k-3MV (20 Ohm center scale on low range).
DC Milliamperes: 0-10-100 at 250mV.
DC Amperes: 0-1 at 250mV.
Accuracy: ±3% DC; ±4% AC; (full scale).
Scale Length: 3″
Meter: Rugged spring-backed instrument jewels.
Case: Molded, black, 3 1/16″w × 2 9/16″d × 5 7/8″h.
Batteries: NEDA 1½V 15A (2), 1½V 14F (1). Complete with 48″ leads, screw on insulated alligator clips, batteries and instruction manual. Shpg. Wt. 3 lbs.
Model 666-R. 62F209 ..... 89.00

Model 666-R ACCESSORIES

Model 669: Quality leather case, top opens with space for tester and leads. **62F210** 16.70
Model 669-OS: Quality leather case, flaps open to permit use of tester in case: **62F2647** 18.30
79-127; Replacement test leads, 48″. **62F245** 6.80

Model 4



THREE-IN-ONE TELEPHONE TESTER
MODEL 3 LOOP TESTER

TYPE Model 3 Loop Tester. Three-in-one telephone tester, this multi-function unit is specifically designed for the individual who needs to check telephone company or privately installed cable for transmission quality or alarm circuit work. The **voltohmmeter** includes two AC and DC voltage ranges, plus three ohm ranges. The multi-tone **generator** has a 10 frequency tone output at the output jack. The tone level is adjustable from –40dBm to +3dBm and is self-compensating so that negligible error results when used on either 600 or 900 ohm lines. This unit will measure either its tone output or line input. **Standard transmission test set** provides a line measurement capability designed to measure line parameters such as circuit loss, circuit noise, power influence and line current. The input and output circuits are self compensating. Combining the functions of the tone generator and the transmission test set, you can send a tone and receive and measure a tone simultaneously. This enables the user to measure the receive and send losses of a line under test. Complete with black thermoplastic case and cover, shoulder strap, test leads.
62F2671. Net 450.00

MODEL 4 LOOP TESTER

Combines more than four functions in one tester

The Model 4 Loop Tester was designed to allow the user to perform the majority of transmission quality tests on telephone lines in a loop-around style. The tests are performed in a similar style to the way the same tests are performed from central offices of telephone companies. The user will *not* be dependent on the telephone company or a central office to perform transmission tests. This tester can be used effectively by telephone companies, interconnect companies, computer companies, telegraph companies, and anyone transmitting information over telephone wires.

The Model 4 Loop Tester has:
1. A 17 tone oscillator with 15 fixed tones and 2 optional tones.
2. A transmission test set with total loop-around capability.
3. A volt-ohmmeter with *five* ohm ranges reading to 100 million ohms, *three* DC ranges, and two AC ranges.
4. All the features of a telephone wire insulation resistance measurement tester with a polarity reversing switch.

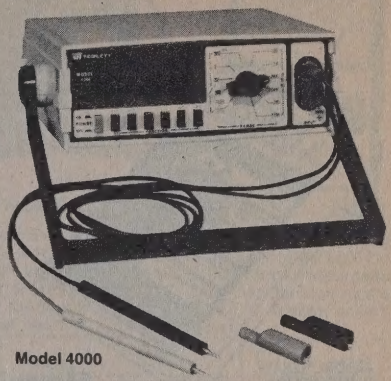
Digital Test Instruments

TRIPLETT®

MODEL 4000 MULTIMETER



Model 4000

1. **OVERLOAD PROTECTION**—Protected up to 1000V on all ranges with safety designed test leads, RF shielded, auto zero, auto polarity.
2. **SIX FUNCTIONS**—.2% accuracy, 31 ranges with selectable Hi and Lo power ohms, 3½ digit. 0.43″ LED's.
3. **EASY OPERATION**—Single range selection with two recessed input jacks and pushbutton selection.

DC VOLTS: 0-0.2-2-20-200. ±.2% Rdg. +1 Digit. 0-1000, ±0.5% Rdg. +1 Digit. Input impedance all ranges: 10 Meg. Full Scale step response: 1 sec. maximum.
AC VOLTS: 0-0.2-2-20-200, ±0.5% Rdg. +2 Digits. 0-1000, ±1.0% Rdg. +2 Digits. Frequency response at specified accuracy 40Hz to 1000Hz all ranges. Input impedance all ranges: 10 Meg. Full scale step response: 5 sec. maximum.
LOW POWER OHMS: 0-200-2k-20k-200k-2M, ±0.5% Rdg. +1 Digit. 0-20M, ±1.0% Rdg. +1 Digit. Maximum open circuit voltage, 200mV. Full scale step response: 3 sec. maximum.
HI POWER OHMS: 0-200-2k-20k-200k-2M, ±0.5% Rdg. +1 Digit. Maximum open circuit voltage, 5V. Full-scale step response: 3 sec. maximum except 20M range which is 7 sec. maximum.

DC MILLIAMMETERS: 0-0.2-2-20-200, ± 0.5% Rdg. +1 Digit. 0-2000, ±1% Rd. +1 Digit. Voltage drop across input, 200mV. Full Scale step response: 1 sec. maximum.
AC MILLIAMMETERS: 0-2000, ±2.0% Rdg. +2 Digits. Voltage drop across input. 200mV RMS. Full scale step response: 5 sec. maximum.

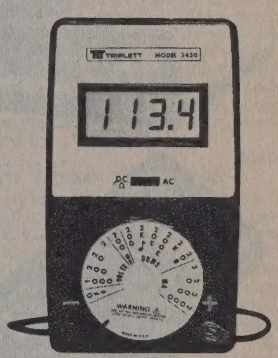
CONSTRUCTION
.43″ LED's with polarity indication. Overrange Indications: 1 or –1 displayed, three least significant digits blanked. CMRR: 90dB minimum at 60Hz. NMRR: 55dB minimum at 60Hz. Power Requirements: 120 VAC ±10% 50/60Hz. 240 VAC 50/60Hz. with internal change. Case: Molded tan high impact thermoplastic with black carrying handle that serves as a tilt stand. Case is RF shielded 10″W×3½″H×9¼″D. Weight 3 lbs., 4 oz. Complete with one year warranty, 48″ safety test leads with screw on alligator clips and instruction manual.
62F3013 Model 4000 ..... 247.00

MODEL 7000 DIGITAL COUNTER/TIMER

Model 7000

High resolution, µP controlled reciprocal counting design provides both input signal frequency and period measurements. 80MHz frequency measurement plus event counting to 1 billion. Elapsed time measurement from 100 µS to 100 hours. Single knob for six functions. **INPUT:** Impedance, 1MΩ shunted by 20 pF; AC Coupling; Sinewave sensitivity 30mV rms (5Hz to 40MHz), 50mV max, at 80MHz; Maximum Input, 200V (peak AC+DC) DC to 500Hz, derate linearily to 100V at 1kHz. 100V (peak AC+DC) 1kHz to 5MHz, derate linearily to 30V (peak AC+DC) at 80MHz. **FREQUENCY:** Range, 5Hz to 80MHz; Accuracy, ±time base accuracy ±count ±trigger error. **TOTALIZE (EVENTS):** Range, 5Hz to 80MHz repetition rate; Capacity, 0 to 999.999 Mega events (999,999,999 events). **TIMER:** Range, 100µS to 100 hr. (99:59:59), Accuracy, ±time base accuracy ±trigger error ±1 count. **VISUAL DISPLAY:** Six digits .43″ high with decimal points and colons. **POWER:** 105V to 130V or 210V to 260V (with internal transformer jumpers) 50/60Hz Molded tan high impact case, 10″ wide (over handle)×3¾″high×9¼″ deep. Weight, 4½ lbs.
62F875 Model 7000 ..... 330.00

MODEL 3450 HAND–SIZE DIGITAL MULITMETER



Model 3450

True hand size 24 range battery operated Digital Multimeter measures AC and DC Voltage and current and Lo and Hi power resistance. 500 hour battery life typical with 9V battery.
DC VOLTS: 0-0.2 ±0.15% Rdg. ±1 digit. 0-2-20-200, ±0.2% Rdg. ±1 digit. 0-1000, ±0.5% Rdg. ±1 digit. Input impedance all ranges: 10 meg. **AC VOLTS:** 0-0.2-2-20-200, ±0.6% Rdg. ±2 digits. 0-1000, ± Rdg. ±2 digits. Frequency response 50Hz to 400Hz all ranges. Input impedance all ranges: 10 Meg. **LOW POWER OHMS (green scale):** 0-200-20K-2M, ±0.3% Rdg. ±1 digit. Maximum open circuit voltage, 3V. **HI POWER OHMS (black scale):** 0-2K-200K, ±0.3% Rdg. ±1 digit. 0-20M, ±1.0% Rdg. ±1 digit. 0-2000, ±1.0% Rdg. ±1 digit. Maximum open circuit voltage, 3V. **DC MILLIAMPERS:** 0-2-20-200, ±1.0% Rdg. ±1 digit. 0-2000, ±1.5% Rdg. ±1 digit. Maximum open circuit voltage, 3V. **AC MILLIAMPERES:** 0-2-20-200, ±1.5% Rdg. ±2 digits. 0-2000, ±2.0% Rdg. ±2 digits. Voltage drop across input, 200mV RMS. **DISPLAY:** 0.5″. 3½″ digit LCD. With 36″ black and red test leads, 9V battery, extra 2 Amp. fuse, wire tilt stand and instruction manual. Tan high impact case, 3″W×5⅜″L×1½″D. Weight, 10 oz.

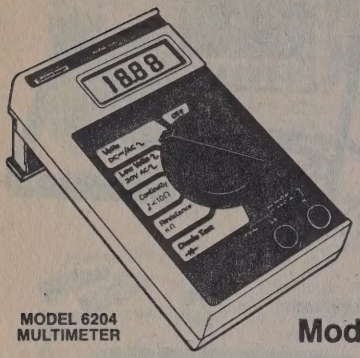
CONSTRUCTION: Display: 0.5″, 3½ digit LCD (Liquid Crystal Display) with polarity indication. **Overrange Indication:** display blanks least significant digits with polarity indication. **Overload Protection:** up to 1000 volts on ohms and volts without fuse blow: up to 600 volts on current ranges. **Auto Polarity:** positive implied, negative indicated. **CMRR:** 90 dB minimum at 60 Hz. **NMRR:** 55 dB minimum at 60 Hz. **AC Frequency response:** 50 Hz to 400 Hz, all ranges. **Operating Temperature:** +18°C to +28°C (OC to + 50C with reduced accuracy). **Storage Temperature:** –40C to +60C. **Battery:** NEDA 9V 1604A (1) 500 hours typical life. **Low Battery Indication:** shows on display when approximately 8 hours of life remain. **Fuse: 2 Amp**/600 Volt. **Test Leads:** standard black and red, 36″ long with screw on type alligator clips. **Case:** Molded, fiesta tan high impact thermoplastic with non-slip "finger tread" surface finish. **Dimensions:** Approx. 3″W×5⅜″L×1½″D (77.8 mm W×135.3 mm L×48.1 mm D). **Weight:** Approx. 10 oz. (0.28 kg) with battery. Complete with one year warranty, 36″ test leads, screw-on insulated alligator clips, extra 2 Amp fuse and retaining screw, wire tilt stand, 9V battery and instruction manual.

62FX296 Model 3400 ..... 125.00

WESTON Digital Multimeters

Introducing the first fully automatic

AUTOFUNCTION, AUTORANGING handheld DMM



MODEL 6204
MULTIMETER

- Sealed, Water Resistant Case
- Rugged, Drop-Proof Design
- High 0.1% DCV Accuracy
- Audible Continuity Test
- Extensive Overload Protection
- 1KHz AC Frequency Response
- Large, High Contrast Display
- Full Accessory Line

The Model 6204 is designed for the rigorous demands of the skilled DMM user. It combines outstanding measurement performance within a highly versatile package that enables the multimeter to perform in the most demanding work environments. In addition, autofunction, autoranging operation eliminates the need to select AC, DC, or the proper range—the 6204 does all this automatically—freeing the user to concentrate on his measurement task.

SPECIFICATIONS

Resolution on all ranges and functions: 3½ digits (2000 counts). **DC Voltage:** 0-200V, ±0.1% + ld. **AC Voltage:** 0-600V, ± 1% + 5d from 45 Hz to 1KHz. **Continuity:** Audible tone <10Ω. **Resistance:** 0-2MΩ, ± 0.5% + ld. **Diode Test:** Audible tone plus display of forward voltage drop AC/DC Voltage Functions protected to 1000 VDC or 750 VAC continuous. Continuity, Resistance, and Diode Test Functions protected to 300 Volts AC or DC continuous. Operating temp. 0-50° C. Size 5½" × 3 ¼" × 1⅜". Includes vinyl carrying case.

81FX020 Model 6204 Type 0285000 .... 159.00

Model 6500 and 6400 "Educated" DMMs

SERIES 6500
COMPUTING DMM

- **6 convenient Arithmetic functions-FILTER, NULL, SCALE/OFFSET %DEVIATION, HI/LO LIMITS, MAX/MIN**
- **4½ Digit (20,000 count) Resolution**
- **Self-Prompting, Self-Diagnostics**
- **High Contrast LCD Display**
- **True RMS or AC Average Sensing**
- **20 KHz Frequency Response**
- **Highly Versatile IEEE-488 Interface Optional**

The μP-based Series 6400/6500 provide a new dimension in operator convenience combined with unparalleled measurement precision in a moderately-priced bench multimeter. The single keystroke arithmetic keyboard enables the Series 6500 to replace elaborate, expensive instrumentation systems in many sophisticated application tasks. Full function versatility is further enhanced by availability of BCD output, and IEEE-488 Interface options.

SERIES 6400

MODEL 749 AC POCKET SIZE CLAMP VOLT-AMMETER

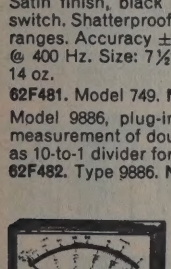
Light weight, compact, hand-fitting design. Precision ground faces provide positive jaw contact. Accommodates conductors up to 1" Round or 1¼" x ⅜" rectangular. Large, smooth action trigger. Satin finish, black bakelite case. Positive action range selector switch. Shatterproof wrap-around plastic window. One scale for all ranges. Accuracy ±3% of full scale @ 50-60 Hz, ±5% of full scale @ 400 Hz. Size: 7½" x 3" x 1¼". Scale length 2.36". Approx. wgt. 14 oz.

62F481. Model 749. **NET** 133.50

Model 9886, plug-in adaptor for Model 749. Facilitates current measurement of double conductor feeds. Use on direct reading or as 10-to-1 divider for low cur. measurement.

62F482. Type 9886. **NET** 16.75

SERIES 660 "DROP-PROOFED" VOMs



Major design advancement. Warranted in writing to work even after five accidental drops. Rugged self-shielded taut-band mechanism. Diode protected movement. Temperature compensation. Pluggable circuit boards for easy repair. Scales calibrated for dB measurements. Recalibration without disassembling. External fuse replacement. Controls flush with end of case. Single range switch. Self storing handle. Input terminals spaced for use with double banana jacks. All models supplied with leads and batteries.

MODEL 660 VOM

Precision instrument built for service in most demanding field environments. Completely "drop-proofed." Rugged self-shielded taut-band mechanism. Temperature compensated. Diode protected meter movement. Polarity reversal switch for AC voltages. Critical circuits employ 1% precision resistors. Specially calibrated scales for dB measurements. Externally replaceable fuse and single range switch. Full range coverage provided.

SPECIFICATIONS

Accuracy: 2% DC (1.5% on 50 A range); 3% AC.
Sensitivity: 20,000 per Volt DC. 5,000 per Volt AC.

MODEL 615 BROAD RANGE LIGHT METER

General purpose standard for business, industry, and government agencies where monitoring over wide ranges of illumination is necessary. The Phototronic cell is corrected by visual and cosine filters, and the built-in battery operated amplifier allows seven ranges of light measurement. The Phototronic cell is hermetically sealed for long life and is hinged for convenience in making directional measurements. The selector switch has a provision for battery test and an interlock to insure the switch is off when the case is closed. Ranges: 0-1.2, 3, 12, 30, 120, 1200 foot candles. Viscor and cosine correction supplied. More than one year of operation from one 9 volt battery. Size: 7" x 3½" x 2½". Weight: 2 lbs.

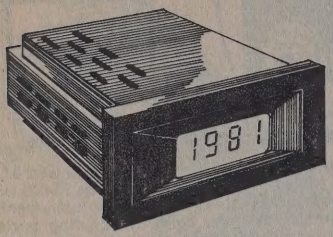
WESTON Digital Panel Meters

WESTON 2490 SERIES 3½ DIGIT LCD DIGITAL PANEL METER



FEATURES
- AC or DC Powered.
- 0.5% Accuracy—on all ranges.
- Multi-Function.
- Four Basic DCV Ranges—200mV-200VDC.
- 0—60° C operation
- Single-ended or differential operation.
- True Ratiometric Operation.
- Autozero-automatic zero and polarity eliminate zero calibration adjustment and allow direct readings of + and − input signals.
- "True Bipolar" Integration—eliminates dead zone around zero, no skewing.
- Liquid Crystal Display—half-inch, high-contrast display minimizes power consumption.
- Universally Powered—115/230VAC ±15% with 1500Vrms isolation.
- Full Compliance with IEC 348 and ANSI C39.5.
- BCD Output—tri-state buffered μC-compatible with 200 Vrms isolation between signal and BCD grounds.
- Hundreds of standard configurations.

SERIES 2470 DC VOLTMETERS

Line powered Digital panel meters Bi-polar integration eliminates dead band around zero. Automatic zero calibration. Temp. controlled voltage reference. Unit within spec 10 min after turn-on. High brightness 0.6" LED display. 3.5 W power consumption. Cool running operation. DualSlope Integration rejects noise. Universally accepted and patented. Weston Dual Slope Integration. (U.S. Patent 3,051,939). Size: 3.875"w x 1.75"h x 4.56"d. Panel cut-out dim. 3.924" x 1.682". Depth behind panel: 4". Wgt. 12.7 oz. (360 grams).

Model 2471 without BCD

Stk. No.	Type 2471-	Range	Input Imp.	Each
55F4917	0280561	100 mV	1000 MΩ	279.00
55F4918	0280562	1 V	1000MΩ	249.00
55F4919	0280563	10 V	1 MΩ	259.00

Model 2472 with BCD

Stk. No.	Type 2472-	Range	Input Imp.	Each
55F4921	0280581	100 mV	1000 MΩ	329.00
55F4922	0280582	1 V	1000 MΩ	299.00
55F4923	0280583	10 V	1 MΩ	309.00

9760-0277371. PC Board Connector for BCD output.

MAKE NEWARK ELECTRONICS YOUR ONE STOP SOURCE FOR INDUSTRIAL ELECTRONICS EQUIPMENT

8500 Series Panel Meters

WESTON

Specification: 8500 Series

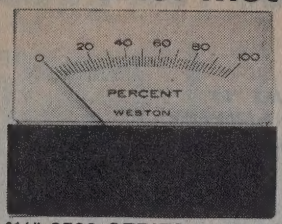
Accuracy: All DC Meters ± 2%
All AC Meters ± 2%

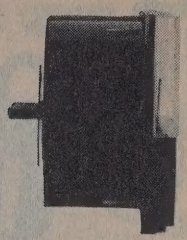
Pointer: Knifeedge, plastic, black case high-impact styrene/94V-0 cover NAS polystyrene/94 H-B

Mechanism: Self-shielding Cormag® taut band. Except all AC. Iron vane are pivot & jewel type

Meets ANSI C 39.1 and C 39.5 specifications

All AC Meters ± 2%
Except AC Rectifier ± 3%





SIZES 2½", 3½", 4½" 8500 SERIES ANALOG PANEL METER

TAUT BAND SUSPENSION

ROTARY-SCALE "RS" CLAMP-ON VOLT-AMMETER

Trigger operated, clamp-on transformer jaws permit current readings without interrupting electrical service. Rotary scale reduces reading errors as only selected range is visible in window. Pointer-lock permits measurements in hard-to-reach and darkened areas. Accuracy: ±3% F.S. based on sinusoidal waveform. RS-1000S/1007S have built in manually set, surge indicating capability for measuring starting current surges and voltage increases lasting one-sixth second. With VL-11R leads and "G" case. (*) With Extendo lead pack and "A" case.

AMPROBE JUNIOR

Only voltage testers in their price range that also measure amperage. Current measurements are made by merely snapping the trigger operated jaws around a single conductor (insulated or non-insulated). They are precision instruments that measure accurately on a calibrated scale ±3% full scale based on sinusoidal waveform (not just an indication). Junior models are the lightest and smallest clamp-on instruments available. Price includes VL-55R test leads.

ACD-1 DIGITAL CLAMP-ON VOLT/AMP/OHMMETER

- **Replaceable probe tips.**
- **Withstands momentary overloads up to 50%. Fused ohmmeter.**
- **One hand operation.**
- **"Continuous" or "Peak" readings.**

ACD-2

ACD-1

Measures from 0.1 amp, 0.1 volt, or 0.1 ohm up to 999 amp, volt, or ohm. DC voltage measured by multiplying factor. AC amp and AC accuracy ±2% ±1, based on 25-400 Hz. sinsoidal wave, ohm ±2% ±1. Non-flickering 7/16" high LED. 3000 volts AC case voltage breakdown test. +32°F to 120°F and 95% RH operating temperature and humidity. Jaws accept 2" diameter conductors. Features auto-ranging, Over-range and low battery indications, all weather test leads, one alligator clip adapter, fused ohmmeter test lead, and carrying case. Requires 9V alkaline battery or equivalent, (not included).

Amprobe Testers and Recorders

AMPROBE® MEGOHMMETERS

AMB-1. Measures high resistance of conductor and motor insulation and checks low resistance of motor windings and relay coils. Model AMB-1 has a 0-100 megohm range (2.54 midscale), megohm test voltage 500 VDC, a 0-100 ohm range, (4 midscale), a 0-600 V test band and a "Battery OK" test band. Power supplied by 8 "AA" batteries, not included. Supplied with carrying case, test leads, adaptor clips, and manual.

Model AMC-2. Features a 0-100 megohm range (1MΩ midscale), megohm test voltage 500 VDC, 0-200 ohm range (10Ω midscale), guard terminal to eliminate surface leakage current influences, spring-loaded terminal connections and constant voltage generator with an operating crank. Supplied with operations manual, three-piece test lead set (2 clip type, 1 probe type) and two-part carrying case.

Model AMC-3. Hand-cranked megohmmeter with same features as AMC-2. Test voltage is 1000 VDC. Ranges: 0-500 megohms (5 megohms midscale) and 0-200 ohms (10 ohms midscale).

Model AMC-4. Hand-cranked megohmmeter with a 0-100 megohm range (3MΩ midscale), megohm test voltage 500 VDC, a 0-500 megohm range (6MΩ midscale), megohm test voltage 1000 VDC, and a 0-200 ohm range. Combines same features as AMC-2 and AMC-3 in one unit

STRIP CHART RECORDERS AND TIME SHARING RECORDERS

Compact, rugged recorders that satisfy requirements for OEM applications, service and maintenance work, process control and recording experimental data. AC or DC current, AC or DC voltage, or any variable that can be converted to an electrical signal. Power requirements: 115VAC, 60 cycles, 2.5 watts. Accuracy: AC amps and volts ±3%FS; AC expanded scale volts ±1.25% FS; Temperature ±3°F on +20°F to +100°F; ±4°F on −50°F to +20°F; ±5°F on +50°F to 250°F. Chart Speed is 12"/hr. Supplied with 1 roll each of the necessary strip charts. Other chart speeds available on special order. Weight 20 oz.

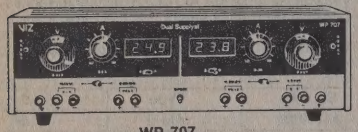
Test Equipment

DC Power Supplysts

WP-705, WP-706



WP-707

- **Adjustable current limiting.**
- **Dual concentric controls.**
- **Simultaneous voltage and current monitoring.**

DC power supplies (WP-707 is a dual supply). Designed to give laboratory type performance. Each supply has adjustable current limiting and dual concentric controls for setting output voltage. Both voltage and current can be monitored simultaneously on the two digital panel meters provided on the WP-705 and WP-706. On the WP-707 dual supplyst the two digital panel meters can be switched to moniter voltage and/or current of either output, also the two outputs can be externally connected in series to give 0-50V at up to 2A. Specs: Output voltage: 0-25VDC (0-50V, WP-705), 5 switched ranges, continuously variable between ranges; fully regulated. Output current: 0-2 Amps (0-4A, WP-706) over entire voltage range; full load. Load regulation: 0.075% max. (0.1%, WP-706) over full operating range. Line regulation: 0.05% max. at full output voltage and current from 105V AC to 130V AC. Riple: 5mV peak to peak, max. Overshoot: none. Output impedance: 1 Ohm DC to 10Khz. Load protection: Current foldback and auto-shutdown. DC voltmeter input: 99.9V DC full scale, 0.1V resolution. Input impedance: 5 Megohms. Panel meters: 3 digit .43" LED, resolution 0.1V and 0.01A, accuracy 1% ±1 digit. Size (HWD): 4" x 15" x 9½" (10 x 38 x 24 cm).

WP-708 DC POWER SUPPLYST

Triple DC power supply designed to give laboratory type performance. Ideal for circuit breadboarding, production testing, service, repair and educational applications. Output voltage: 0-20VDC in four switched ranges, continuously variable, fully regulated. Output current: 0-2 Amps over entire range, full load. Load regulation: 0.075% Max. Line regulation: 0.05% max. Ripple: 5mV peak to peak. Size (HWD): 4" x 15" x 9.5".
55F4986. Type WP-708. **Net** 479.95

WD121 (Digital) POWER LINE MONITORS

Power-Line Monitors—warn of "brown-out" condition. High accuracy, easy-to-read scale, large numerals and pointer. True rms reading—moving-vane meter gives accurate rms readings, even on distored sine waves. Fast meter action—reveals "bounces" and fluctuations in line voltage. Can be installed between AC line and unit to be monitored. High accuracy, easy-to-read. 8 inch LED display-fused.

	Thru Line	Aux. Input (as digital voltmeter)
Frequency Range	50-60 ZHz	50-60 Hz
AC Voltage Range	100-150V line	0-500V
Accuracy	Line ±1%	Ext ±2%
AC Current	8 Amps Max	N/A
Dimensions	4 x 5 x 3 inch	
Weight	1½ lbs. (670 gms.)

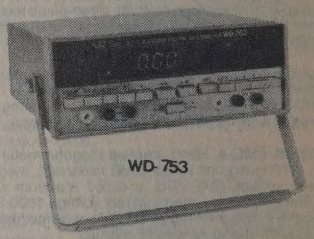
WD121

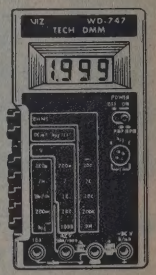


WD-753

WD-753

It does the job of two autoranging DMMs but costs about 30% LESS. Talk about convenience. You can measure or monitor voltage, current or resistance from two points in a circuit. Extra bright digital LED display. Accurate to 0.1% DCV, ±1 digit. Auto-zero, auto-polarity, autoranging. Just push panel buttons to preprogram the instrument to perform the function you want. Measure any value from 1 millivolt to 1000V DC (750V AC). Measure audio frequencies to 20kHz (up to 10V). From 1 microamp to 2A DC or AC. High or low power ohms from 1 ohm to 20 MΩ. You'll soon find it to be the most used instrument you own!

81F1345. Type WD-753. **Net** 384.95



WD-747

WD-747 TECH DMM

LCD readable over wide range of ambient lighting levels. Push button function and range switches are located on one side permitting "one hand" operation, 4 color coded front panel assures positive function/range identification. 10A DC range for testing relays, solenoids and many logic circuits. Measures AC/DC volts, DC current and resistance and tests PNP/NPN transistors. A 4 pin production type socket located on front panel for fast measuring of transistor hFE. Measurement circuits are electronically and fuse protected against accidental overload. Display: 3½ FET LCD, auto-zero, auto polarity, overload indicator. Temp: operating, 0 to 40° C; storage, –20 to 50° C. Humidity: 80 RH. Power: 9V "transistor" battery. Battery Life: 200 hr. cont. use. Size: 6⅝ x 3½ x 1¼. Wt: ¾ lb.

Chart Recorder

EVENT RECORDER

Model 288:

- **Small size**
- **DC single channel recorder**
- **Inkless dry writing on rectilinear chart paper**

Model 292:

- **Small size**
- **4 or 8 channel on-off recording in a package only 3⅝" wide**
- **UL listed**
- **Inkless dry writing on rectilinear chart paper**

DC SINGLE CHANNEL RECORDER

Model 288. Measures and records electrical signals without amplification. Writes on pressure sensitive rectilinear chart paper by making a series of dots which form a continuous line representing the function being monitored. Inkless, dry writing offers wide range of sensitivities, writing speeds and chart speeds. Incorporates both chart tear-off and chart reroll. Chart can be reviewed and rerolled while recorder is operating. Sliding access window permits operator to make notations on chart. Die-cast aluminim case is finished in epoxy suede-like charcoal grey. Thumbwheel on front panel facilitates precise setting of timing lines or chart paper and permits quick discharge of recorded data when using tear-off operation. Usable chart width: 2⅝". Accuracy: ±2% of full scale. Response time: less than 1.0 sec. Dimensions: 5⅝"H, 3⅝"W, 4⅛"D. Wt.: 3½ lbs. approx. Range: 0-1 mA.

MULTI-CHANNEL EVENT RECORDER

Model 292, four or eight channel event recorders provide a permanent record of four or eight individual channels of ON-OFF data. Actuator specifications (select when ordering):6VDC-300mA; 12VDC-150mA; 24VDC-70mA; 48VDC-35mA AC-6, 12, 24, 48, 115, 240; Response time: 10 ms (up to 20 Hz ON-OFF signal). Record pattern: continuous rectangular. Standard Motor: 2RPM, 115VAC, 60 Hz. Standard gear train #12.
62F2181 Model 292-4 (4 channel). Net 277.02
62F2182 Model 292-8 (8 channel). Net 384.18

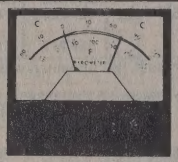
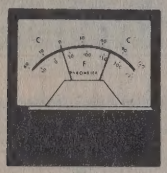
PYROMETERS

Model 29



Model 2123



Model 3324

Available in a variety of styles and ranges, all models are manufactured with ambient (bi-metal) cold-junction and circuit copper compensation. Accuracy: 2%. Each pyrometer furnished with external, adjustable series resistor to permit use of lower resistance thermocouples in the field. Thermocouples not included. Thermocouples required are either Iron/Constantan (I/C) or Chromel/Alumel (C/A). Model 29-standard phenolic. Model 2123-3½" Century series style. Model 2124-4½" Century series style. Modest 3324-Rugged seal, metal cased for extreme conditions.

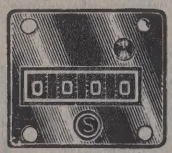
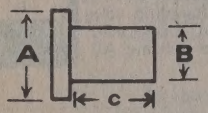
ELECTRO-MECHANICAL COUNTERS

MODELS 103 & 104 4-DIGIT COUNTERS





SIZE CHART

Model	A	B	C
103+104	1.84"	1.03"	1.88"

Four-Digit Counters, rated at 10 counts per second. Are reset to 0000 with a single push-button control. The black matte finish bezel is made from tough thermosetting materials which withstand high impacts. Min. pulse duration is 50 millisec. "on" and 50 millisec. "off". Power Consump; 4.2 watts (nominal).

Stock No.	Type	Voltage	NET
55F4853	103	117VAC	38.25

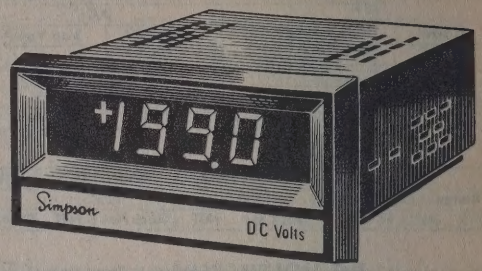
Simpson Digital Panel Meters

MODEL 2840 4½ DIGITAL PANEL METERS

SPECIFICATIONS

Accuracy: ±.02%, voltage; ±.05% current. **Temperature Coef.:** ±.003% +.1 digit, voltage: ±.01% +.1 digit, current. **Resolution:** 1 part in 20000. **Sensitivity:** 10 μV for 200 mV; 10 nA for 200 μA. **Input Bias Circuit:** 100 pA max. at reference conditions. **Response Time (to rated accuracy):** 1 sec max. **Common Mode Rejection (with 1KΩ unbalance @ 60 Hz):** 120 dB min. (2840). **Normal Mode Rejection:** 60 dB @ 60 Hz. **Rated Circuit to Ground Voltage (maximum common mode voltage):** 250 VDC between either input terminal and power line ground (2840) or VDC terminals (2841). **Conversion:** Technique, charge balance. Rate, 2 samples/sec. **Display:** Type 7-segment, high efficiency LEDs with .043" numerals. 4 full digits and "1" for overrange. Automatic plus/minus polarity indicators. Fixed decimal. **Power Requirements:** 2840: 120, 220, or 240 VAC ±10%, 50 Hz to 400 Hz, 4 VA. 2841: 5 VDC ±5% at 750 mA. **Temperature Range:** 0° C to 55° C, operating; 40° C to 60° C, storage. **Humidity:** 0 to 85%, non-condensing. **Reference Conditions:** Temperature: +23° C ±2° C. Atmospheric Pressure: 575 to 800 mmHg. Relative Humidity: 30 to 60%. Warm-up Time: 15 min. @ ref. conditions. **Dimensions:** 99 x 49 x 109 mm. fits standard 1.682" x 3.622" cutout. With adapters, fits IEC/DIN 1.77" x 3.622" or 1.682" x 3.92" cutouts.



Utilizes solid-state IC electronics with 0.42" LED display. I/O edge connector incl. Model 2841, 5 VDC; Model 2840, 120/240 VAC.

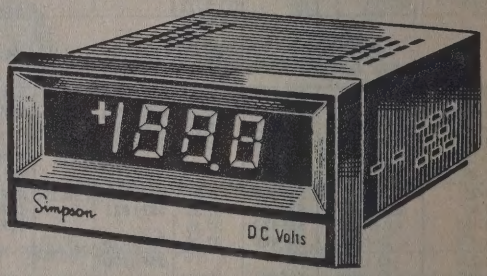
MODEL 2865 DIGITAL PANEL METER

SPECIFICATIONS

Accuracy: ± (0.1% of reading +1 digit) at reference conditions. **Temperature Coeff.:** ± (0.01% of reading +0.05 digit) per °C from 0°C to 55°C. **Resolution:** One part in 2,000. **Sensitivity:** 100 μV for 200 mV unit; 10 nA for 20 μA unit. **Input Bias Current:** 100 pA max. at reference conditions. **Response Time (to rated accuracy):** Less than 800 msec. **Common Mode Rejection (with 1k ohm unbalance at 60Hz):** 90 dB min. **Normal Mode Rejection:** 50 dB minimum at 60Hz. **Rated Circuit to Ground Voltage (Maximum Common-Mode Voltage):** 350 VDC between either input terminal and power line ground. **Conversion:** Technique, up-down integration. Rate, 4 samples per second. **Display:** Type, 7-segment, LED, 0.43" high numerals. 3½ digit. Automatic polarity, with "-" indication. Decimal point fixed with range. All digits blank except for "1" indicates Out-of-Range. **Power Requirement:** 120 or 220-240 VAC ±10%, 50-400Hz, 3 VA (Mod 2865). 5 VDC ±5% at 100 mA (Mod. 2866). **Operating Temperature Range:** 0°C to +55°C. **Warm-up Time:** Less than 2 minutes at reference conditions. **Reference Conditions:** Temperature: 23°C ±2°C Atmospheric Pressure: 575 to 800 mmHg. Relative Humidity: 30 to 60%. **Dimensions:** 3.9" wide x 1.93" high x 4.27" deep (99 x 49 x 109mm). **Weight:** Approximately 1 lb. (453 g).



Single LSI chip contains all analog to digital circuitry and provides high reliability. Compact units are available for 5 VDC (Model 2861) or 120 VAC (Model 2860) input power. Input/Output edge connector included.

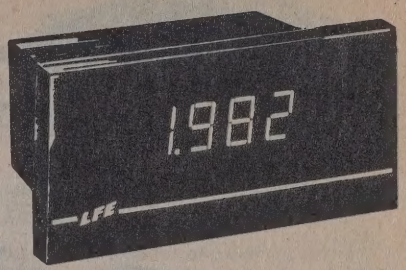
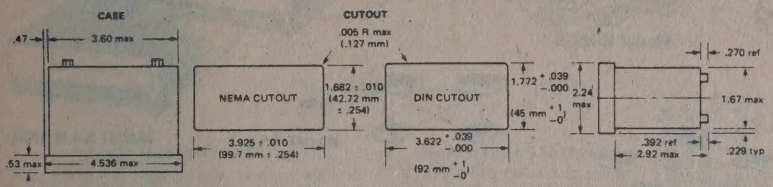
SERIES 40 DIGITAL INSTRUMENTS

- Universal, "snap-mount" case for DIN or NEMA cutouts
- Large 0.56", high brightness, LED display
- Includes screw terminal connectors as standard feature



DIMENSIONS (cased configuration)



SPECIFICATIONS

ANALOG INPUTS

Basic Accuracy: ± (0.05% reading + 1 count) **Configuration:** Bipolar, floating input **Input Bias Current:** 10 pa (max) basic ranges only **Input Resistance:** Greater than 100 megohms (basic ranges only) **Input Protection:** 220 volts (DC or DC + peak AC) continuous **Temperature Drift:** Basic Ranges: 35 ppm/°C over 0/55°C range Other Ranges: 80 ppm/°C max over 0/55°C range **Zero Drift:** ±1 μV per °C (maximum)

NOISE REJECTION

Normal Mode: 55 db (typical), 45 db (minimum) at 50/60 Hz **Common Mode:** 110 db (typical), 90 db (minimum) at 50/60 Hz; 350 volts maximum—analog signal return to "power line" ground

POWER

AC: 117 volts ±10%, 47-500 Hz, 3.2 watts nominal **DC:** +5 volts ±5%, 220 mA nominal

DISPLAY

Type: 0.56" high brightness LED **Polarity:** Positive assumed, negative sign displayed **Decimal Points:** One of three positions displayed, selected by internal "solder bridge" **Overrange:** An above 2000 count positive input will blank out all digits except display a 1. (MSD)

ENVIRONMENT

Operating: +5° to +55°C, 105 VAC to 130 VAC, 50/60/400 Hz ±2 Hz **Storage:** −20 to +85°C

PHYSICAL

Board Only: Approximately 3¼" length (including terminals) × 3½" wide **Case:** Universal for NEMA/DIN cutout with "snap-in" mounting (no mounting hardware). The case is manufactured from UL-recognized polycarbonate plastic for additional strength. **Connections:** Screw terminal connections on the PCB, accessible from the rear (solder-type edge connector optional)

CONVERSION

Reading Rate: 2.5 readings/second

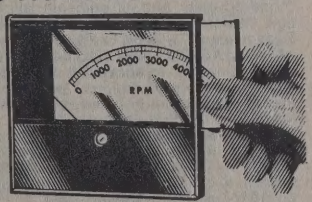
Panel Meters, Indicators, Controllers

SERIES 7000 DC PANEL METERS

- **Scratch-proof glass windows**
- **Taut band; 1% tracking**



Series 7000 brings you distinctive style, functional flexibility and outstanding performance. Basic stock of meters is easily modified with slide-out scales. Choice of front mount or bezel mount. Glass windows are scratch-proof and static free. Has phenolic fronts and cases. Self shielding for mounting on either magnetic or non-magnetic panels. Accuracy is ±2%.

SUPER SELECTIVE ALL MASTER SYSTEMS

Intercom system consisting entirely of Masters. Permits several separate conversations to be carried on without interfering with each other. System provides privacy. Stations may be located up to 1000 feet apart. Operates on 110-120 volts, AC-DC. Complete with instructions. Transistorized. Charcoal gray and brushed chrome. Cabinet size: 10½x8¾x3⅛". Shpg. wt. 7 lbs.

95F406. Model K-LS-5. For 5 stations. **NET** 114.00
95F407. Model K-LS-10. For 10 stations. **NET** 141.00

HI-VOLUME MASTERS

Operates the same as the above masters with the added feature of 10 times volume output. For 120 volts, AC only. Masters K-AC510 and K-AC-505 may not be intermixed with any other Master.

95F437. Model K-AC-505. Hi-Volume, 5 station. **NET** 143.00
36FX441, 5506 (6-conductor) cable. For interconnecting K-LS-5 or K-AC-505. **NET** per foot ..... .17
36FX442. 9911 (11-conductor) cable. For interconnecting K-LS-10. **NET** per foot ..... .31

2-STATION WIRELESS SYSTEM

A quality intercom system for Office, Factory, and Farm. No installation. Plug into 110V AC or DC electrical outlet on the same transformer. Uni-Trans gives you dictation and supervisory control. Provides continuous transmission when set for Uni-Trans. Cabinets are charcoal gray and brushed chrome. 10½"x8¾"x3⅛". Two master stations. With tubes and instruc-tions. 16 lbs.

95F413. Model T-LC-33. Two station system. **NET** 235.00

36F449. 6303. 3-cond. shielded cable. **NET per ft.** ..... .10

COMBINATION SYSTEMS

For the more flexible type of system requiring the operation of more than one Master, along with Sub-Stations which need not originate calls. Masters may talk to each other and to each Sub in the system selectively; or, one or more Subs can be exclusive to only one Master. Masters can switch themselves "private" so that other Masters cannot listen in to them, or "non-private" at will. Masters in charcoal gray and brushed chrome cabinets. 10½"x8¾"x3⅛". Sub-Stations: 7½"x8¾"x2⅞". With instructions. Transistorized. Masters operate on 110-120 volts AC-DC Electric curr. not needed for Sub-Stations. Shpg. wt. 7 lbs. K-AC-605 and K-AC-610 operate on 120 volts, AC only. Masters K-AC-610 and K-AC-605 may not be intermixed with any other Master.

36FX448. 6202. (1 pr.) cable for substation. Overall jacket. **NET per foot** ..... .07

MASTER SELECTIVE INTERCOMMUNICATION SYSTEMS

A system consisting of one Master Station and one to ten Sub-Stations. Only the Master Station plugs into an electrical outlet. System has operational feature whereby Sub-stations can be connected "privately" or "none-privately" and still originate calls to the Master under either application. Cabinets are charcoal gray and brushed chrome. 10½" x 8¾" x 3⅛". Subs measure 7½" x 8¾" x 2⅞". With instructions. Transistorized. For 110-120 volts, AC-DC. HIGH VOLUME OUTPUT MASTERS K-AC-5406 and K-AC-5411 operate as above with the added feature of 10 times volume, for large areas or noisy locations. Operate on 120 volts, AC only. Note: Only one master station can be used in each Master Selective System. Weight: Masters—7 lbs. Sub-Stations—4½ lbs.

MASTER STATION

"CHIEF" MASTER STATIONS

Full intermix of masters and remotes: six and twelve stations. Master to Master Communications. Also to Staff Stations. Staff Stations can reply to all masters; call one or two private masters. No AC power required for Staff Stations. Masters can be private (no eavesdropping) or non-private (answer hands-free). Visual Signal indicates "non-private" station is being monitored. Visible signal indicator when called station is busy.

All Stations have facility to override busy signal. Multi-station selector switch enables selection of up to 30 stations with 12 for siren, gong, lights, etc. Masters operate on 120 VAC. Up to 30% of "Chief" masters can operate without being connected to AC. KHP-3 horn provides four times volume.

Wall Switch with Horns or Hi-Power Staff for call origination feature. Incoming Chime Call on Masters. Chief Masters come with a junction box attached with six foot cables. Built-in Power Supply. Master Size: 14½"Wx3⅛"Hx8½"D. U/L Listed.

Model K-C-4912. Master for 12 Stations. Shpg. wt. 15 lbs.
95F426. NET PER STATION 261.00

CHIEF STAFF STATIONS

STAFF STATION. For use with "Chief" Master. Staff Stations may be connected "privately" or "non-privately". Connected "non-privately", Master can be answered at a distance from the Staff without operation of any controls. "Non-private" Staff may reply to all Masters in the system (whether connected directly to them or not) and can originate calls to one or two "Private" Masters, depending upon its capacity. Connected "privately" no one can "listen-in", but any Master can call. Staff Stations do not need electrical outlets.

Model K-C-41. Staff Originates calls to 1 Master. Gray leatherette and brushed chrome. Size 7½x8¾x2⅞". 5 lbs.

Model MIS-8. Compact, weatherproof low-power reflex speaker. Mounts flush in wall. Dispersion: 150° 7"-½ watts and 8"Ω. Wt. 2½ lbs.

Model DLC-8. Low-cost reflex speaker. Dispersion: 120°. Aluminum 7"-½ watts amd 8"Ω. Wt. 1¾ lbs.

Model DLCT. Has 70V line transformer.

Model CFID15-8. Rectangular reflex exponential. 15 watts with 8Ω. Dispersion: 120° horizontal: 80° vertical. Weatherproof, virtually indestructible cycolac material. Easy installation with Uni-Lok swivel mount. Wide frequency response and unusually low distortion. Shipping weight 3¼ lbs.

Model CFID15-T. Similar to CFID15-8, but includes a 70V and 25V line transformer w/6 screwdriver selectable wattage taps. Wt. 4.25 lbs.

Model CFID32-8. Similar to CFID15-8 but 32 watts.

Model CFID32-T. Similar to CFID15-T but 32 watts.

Model FID15-8. Round reflex horn speaker similar to CFID 15-8. Dispersion: 120°—all planes. Weatherproof, virtually indestructible cycolac material. Easy installation with Uni-Lok swivel mount. Wide frequency response and unusually low distortion, modern wide throat design insures wide frequency response and low distortion with high efficiency. Shpg. wt. 3¼ lbs.

Model FID15-T. Similar to FID15-8. but includes a built-in 70V and 25V transformer, 6 screwdriver selectable taps. 3¾ lbs.

Model FID32-8. Similar to FID15-8 but 32 watts.

Model FID32-T. Similar to FID15-T but 32 watts.

M68FC MICROPHONE MIXER

Each of four microphone-level inputs has switch for selection of low-impedance or high-impedance mikes and a high-level auxiliary input is suitable for inputs from tape recorders, tuners, or other sources. Has two outputs: microphone-level output for connection to a sound system amplifier or tape recorder input high-impedance, high-level output to feed any power amplifier or tape recorder requiring a 0.5 to 2V input signal. Can be powered by an external power source. Freq. Response: ± 3 dB from 40 to 20000 Hz. Operating Voltage: 108 to 132 VAC 50/60 Hz. 3 socket inputs. UL listed and CSA listed as certified. Size 2¾ × 11⅜ × 5¼". Wt. 4 lbs.
61FX774. NET 205.00

M268 MICROPHONE MIXER

Compact, lightweight, five-channel microphone mixer. Ideal for public address and paging in hotels, schools, community centers, and hospitals, as well as an excellent add-on mixer for expanding current equipment. It is also an excellent mixer for use by the serious tape recording enthusiast.

Features mix bus, simplex (phantom) power, automatic muting circuit, active gain controls, and electronic power supply regulation.

Also includes four transformer balanced microphone inputs, high level auxiliary input, individual volume controls, a master volume control. Freq. Response: ± 3 dB from 40 to 20000 Hz. Oper. Voltage: 105-125 VAC 50/60 Hz. U.L. listed and CSA listed as certified. Size: 2³¹⁄₃₂ × 12⁵⁄₃₂ × 9". Wt. 4 lbs. 2 oz.
81F9222. NET 257.00

M267 MICROPHONE MIXER

Features peak program limiter, simplex (phantom) power, built-in battery pack, LED peak indicator, headphone level control, gold contact headphone ampl/line switch, automatic muting circuit, active gain controls, and electronic power supply regulation.

Gold contact Mic/Line switches, battery check function—*does not interrupt program*. Front panel headphone jack and gold contact tone oscillator switch.

Transformer balanced inputs and outputs; mix bus; VU meter; low cut filters; low RFI and line noise susceptibility. 105-125 VAC 50/60 Hz. Freq. Response ± 2 dB from 30-2000 Hz. UL listed, CSA listed as certified. Size: 2³¹⁄₃₂ × 12⁵⁄₃₂ × 9". Wt. 5 lbs. 2 oz.

MODEL H3330

Headset/Microphone Over-the-head style with boom mounted noise canceling microphone. 600 ohms impedance for noise levels to 125dB.
02F1230. NET 154.75

MODEL H3340

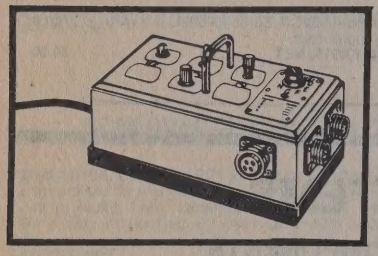
Headset/Microphone Behind-the-head version for use with safety cap. Noise canceling boom mounted microphone for noise levels to 125dB.
02F1231. NET 152.75

MODEL H3370

Lightweight Headset/Microphone Over-the-head style with boom mounted noise canceling microphone. **Not to be used in noise levels above 90dB.**
02F1232. NET 133.25

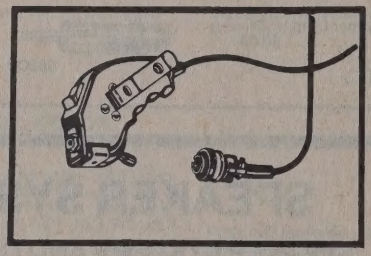
MODEL H3390

Lightweight Headset/Microphone Single ear version with boom mounted noise canceling microphone. **Not to be used in noise levels above 70dB.**
02F1233. NET 117.75



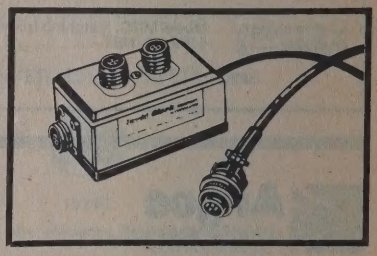
MODEL U3400

Master station contains power supply, amplifier, and impedance selector in a sturdy metal box. Has four output connectors, 12 ft. grounded power cord, roll bar/carry handle, master volume control, and system on/off switch. Belt stations can be connected to four Master stations outputs. Input: 110-125 VAC, 50-60 Hz. Output: 24 VDC. Max. current: ½ amp. Size: 5¾" x 9½" x 4¾".
02F1234. NET 447.25



MODEL U3410

Belt stations serves as preamplifier and interface between headset and system. Every headset must be plugged into belt station for system to operate. Belt station connects to master or remote either directly or via extension cords. Unit features headset jack, individual earphone volume control, push-to-talk/push-to-lock microphone button, belt clip, and 12 ft. cord with connector.
02F1236. NET 117.50



MODEL U3401

Remote junction modules are used to provide additional belt station connections. Each can accommodate three belt station connections or two belt station connections and one junction box.
02F1235. NET 147.25

Extension cords with screw-on type connectors used to expand system to cover larger area. Cords can be used to connect all components-master station, remote module, and belt stations.

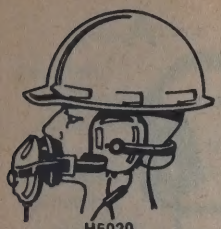
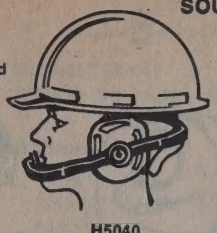
SOUND-POWERED SYSTEMS



H5020

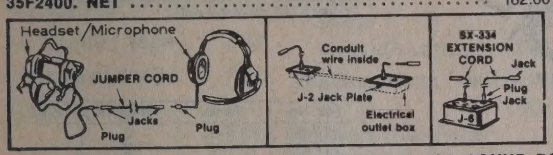
Behind the Head Models



H5040

Type H5010. Noise shielded microphone held in talking position by straps for ease of use. Push-to-talk switch on microphone shield. Clear, reliable communication to 130 dB. Padded headband to ensure comfort. Replaceable foam filled ear seals. Adjustable to fit any head contour. Two conductor 30″ cord with PJ-055 plug.
35F2402. NET 218.15

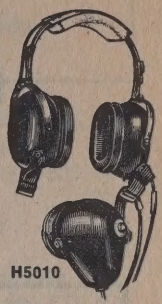
Type H5030. Lightweight acoustic boom rotates to allow easy adjustment. Eliminates heavy microphone element. No push-to-talk switch, your voice activates system. Clear reliable communications in noise to 100dB. Padded headband and replaceable foam filled ear seals ensure comfort. 30″ two conductor cord with PJ-055 plug.
35F2400. NET 162.00



H5090

Over the Head Models

H5030



H5010

Type H5090. Single ear model used in low noise area to 70dB. Lightweight, durable construction for maximum comfort. Boom microphone rotates to permit wearing on either left or right side. No push to talk switch necessary. Foam filled ear seal. 30″ two
35F2435. NET 108.95

Type H5020. Has all the features of the H5010 but designed to be worn in the behind the head position so as not to interfere with safety hats or face shields. Has soft, pliable, adjustable overhead strap to allow proper fitting. Two conductor 30″ cord with PJ-055 plug.
35F2403. NET 214.50

Type H5040. Has all the features of the H5030 but is in the behind the head configuration. Adjustable overhead strap and nape spring for firm comfortable fit under safety headwear. Lightweight, durable and recommended for use in noise areas to 90dB. 30″ two conductor cord with PJ-055 plug.
35F2401. NET 160.40

ACCESSORIES FOR SOUND POWERED COMMUNICATIONS GEAR

M5002. Jack Plate. Has two jacks with weatherproof covers in standard outlet faceplate.

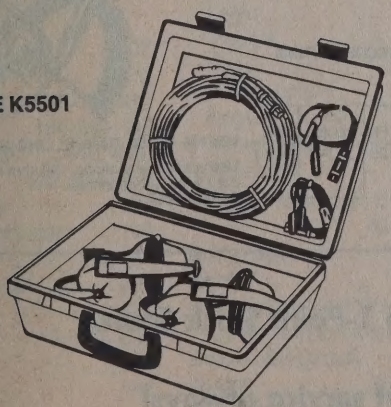
TELEPHONE COMMUNICATION HEADSETS

Sound Power Communication Kit

TYPE K5501



A complete two person system providing a means of communication for Linemen, Electrical Contractors and General Contractors over extended distances. This easy to use system is ideal when pulling and paring wires, performing continuity checks, calibrating readings, etc.

Packaged in its own compact carrying case, the kit includes two each Sound Power Headsets and adapter cords and a 50 foot jumper cord.

Through the use of the Sound Power accessories, the system can be extended to include up to six people and when proper conditions exist, two way communication is possible for miles.

81FX010. NET 375.00

H8730

Foam filled polyurethane Ear Seals
Listen Volume Control
Noise Canceling Microphone, place ¼ inch from mouth
PJ-327 Connector

H8730 provides noise attenuating domes for both ears and a noise canceling dynamic microphone. This combination assures clear, accurate communication under adverse operating conditions, including noise levels up to 125 dB. This headset carries a noise reduction rating (NRR) of 26.
81FX011. NET 246.00

ELECTRICAL CHARACTERISTICS:

Earphone impedance	300 ohms
Microphone impedance	130 ohms
Voltage accommodation	6 volts to 48 volts

H8790

H-8790 is lightweight (12 oz.), with a single noise attenuating ear dome and noise canceling dynamic microphone. The foam cushioned temple pad is self-adjusting, for stability and comfort. High quality reception is provided by the noise attenuating dome, which subdues background noise. The single ear concept permits essential conversation with nearby co-workers. Not recommended for noise levels over 90 dB.

NEWARK STOCKS... Simpson®

Panel Meters and Test Instruments In Depth

JUST ANNOUNCED! TOO NEW TO CATALOG...

NEW 360 Series 3

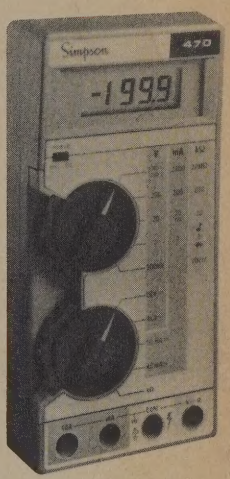
Stock No. 81FX029 **$275.00**

• 28 Ranges including "Low Power" Ohms, 10 A Current • Bright, Large .56" LED Display • Continuity Beeper and Diode Test • Transient Protection and Double Fusing • Full Day's Battery Operation

Low-Priced 470™ DMM

Stock No. 81FX028 **$139.00**

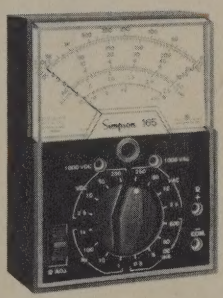
• 25 ranges
• Transient Protection and Double Fusing
• Continuity Beeper
• Diode Test Function

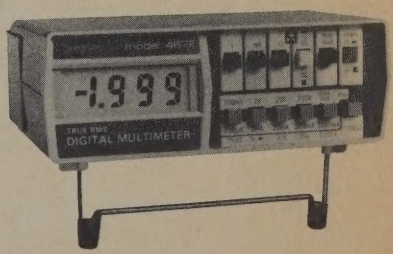


Model 165 "Handi-VOM"

Stock No. 81FX030 **$75.00**

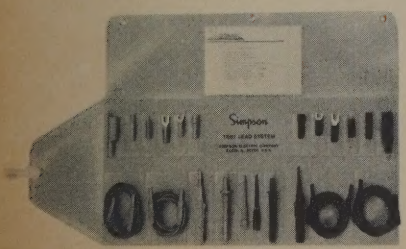
• Pocket-Size Instrument • 22 Ranges, 1 kV AC/DC, DC Current, Resistance, dB • Enclosed One-Knob Range/Function Function Switch • Big, Easy-to-Read 3-1/4" Meter • Taut-Band 50 μA Movement • Internal Fusing on Ohms Ranges • Just 4-9/16 x 3-5/16 x 1-3/4"





New Deluxe Universal Test Lead System

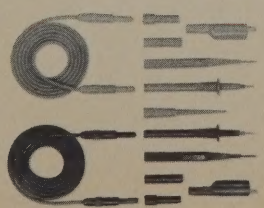
Stock No. 81F4924 **$57.00**



• For All Simpson and Other VOMs and DMMs with Standard or Reverse Banana Jacks

Lo-Cost Standard Lead Kit

Stock No. 81F4923 **$32.50**



Model 467E Digital Multimeter

Stock No. 81F4922 **$225.00**

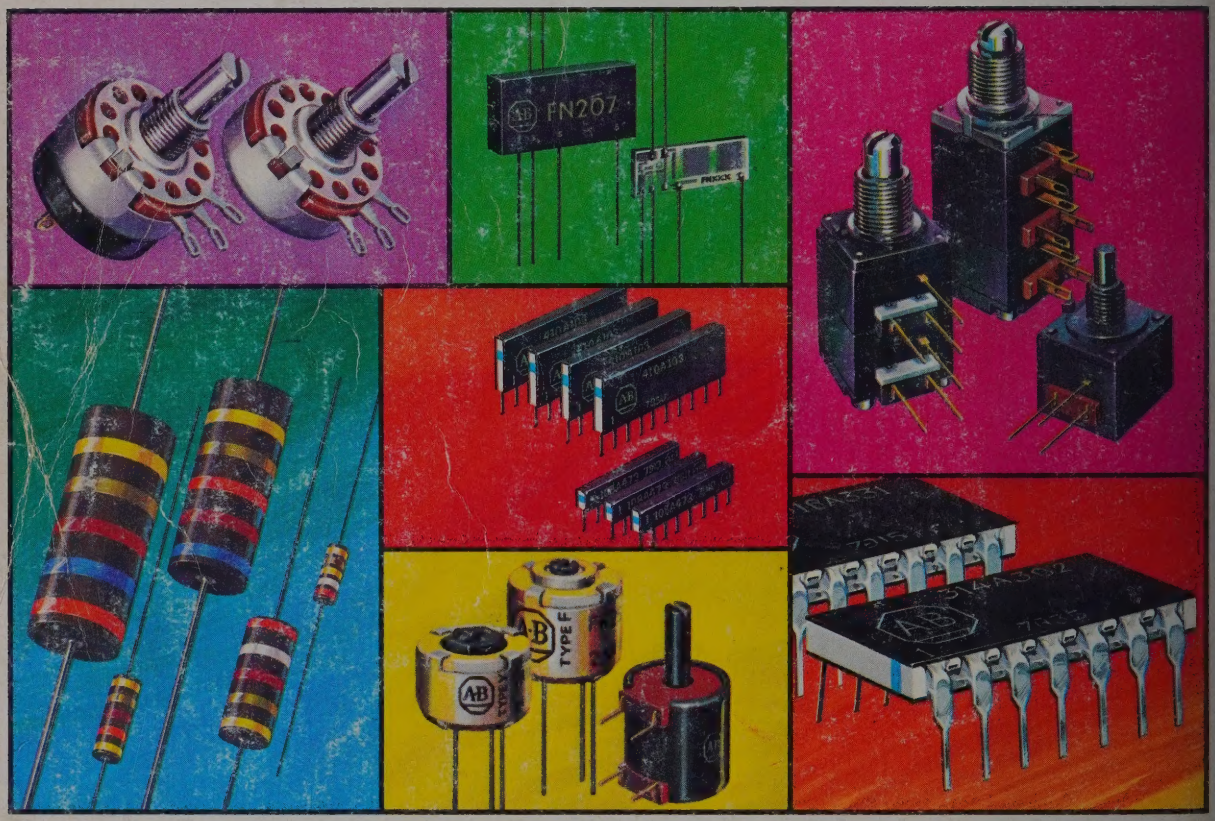
• 26 Ranges including 1 kV DC, 750 V DC • Peak Hold plus Continuity Modes • True RMS Measuring Capability • Diode Test, 3 Low Power Ohms Ranges • Extra Transient Protection and Double Fusing

SEE THE COMPLETE SIMPSON PRODUCT LINE ON PAGES 745-751 AND 772-776

WE DELIVER

ALLEN-BRADLEY
- Superior Quality
- Advanced Technology
- Broad Product Line

NEWARK ELECTRONICS
- In-Depth Inventory
- High Service Levels
- Fast Shipment



Thousands of resistance products listed in detail:

Fixed Resistors . . . . . Page 124
Networks . . . . . Page 125
